Centennial Jing-Zhang Synbiotic Intelligence Belt

AI-native Innovation Corridor · Drawing Set (A3)

Concept · provisional-boundary intake draft

Overview map: land-use, key areas, mobility and public space

All design layers are derived from the same GeoJSON and metrics; provisional boundaries are for intake only.

Land-use structure

Four land-use classes structure the overall design area; blue-green and public space are interwoven.

Three key detailed-design areas

Zhongzhiyuan, Beijing AI Origin Community, and Dazhongsi detailed design strategies.

Mobility and blue-green public space

The Jing-Zhang heritage park spine links slow mobility, green and public space into a loop.

Core metrics and recomputation evidence

site_area_sqm	11412825 m²
green_ratio	0.1234
public_space_ratio	0.3733
key_area_count	3

Site area, green ratio and public-space ratio are recomputable from geometry and match metrics.json.
