

JINGZHANG AI COMMONS | SPATIAL STRUCTURE

One belt, three anchors, multiple scenarios, one blue-green slow-mobility loop

- Land use
- Blue-green
- Industry / renewal
- Mobility spine

11.41 km²
submitted design area

3 key areas
provisional polygons

Evidence note

The boundary is not an official redline; replace it and recalculate

Design intent: connect three innovation anchors through a heritage / blue-green / slow-mobility spine.

JINGZHANG AI COMMONS | THREE KEY AREAS

Positioning, spatial move, AI scenario and implementation dependency

01

Zhongzhiyuan AI acceleration

Garden full-stack R&D

Green testing / standards / safety

CONCEPT

provisional

02

Beijing AI Origin Community

Near-campus conversion

Open source / talent / daily life

CONCEPT

provisional

03

Dazhongsi AI industry cluster

Urban intelligent economy

Station integration / global showcase

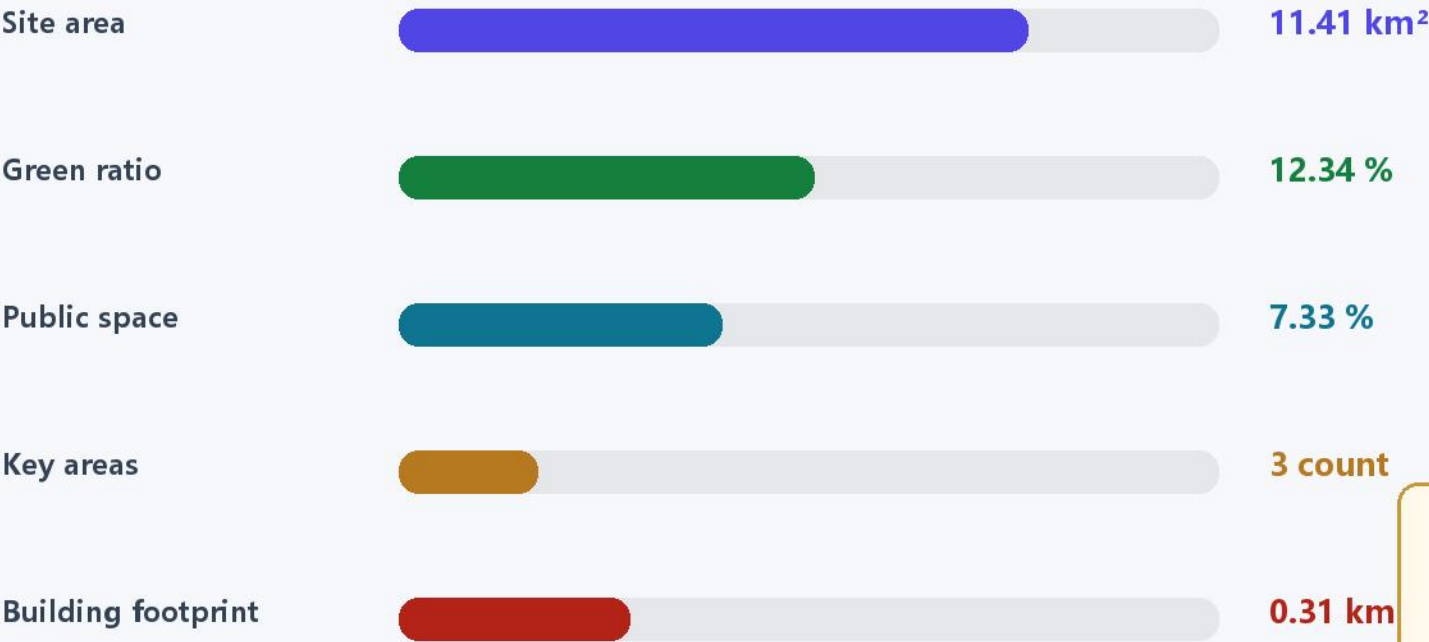

CONCEPT

provisional

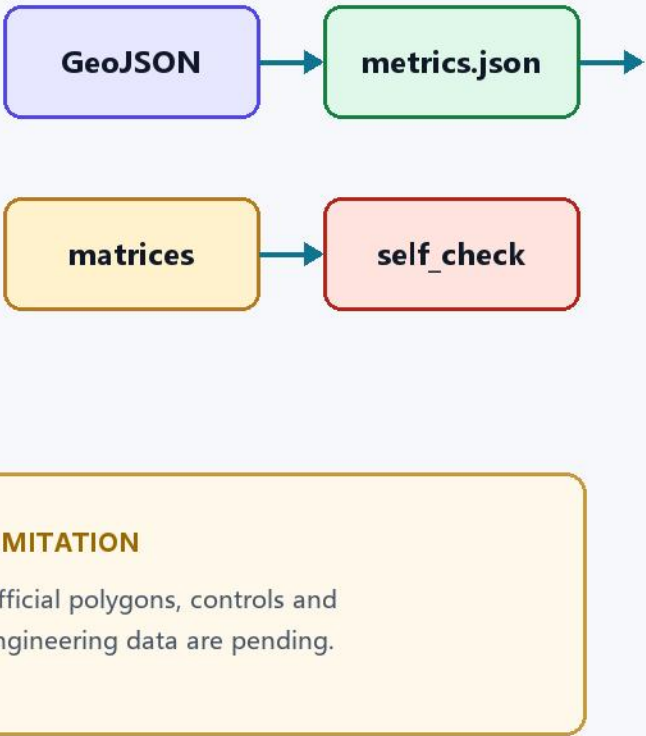

JINGZHANG AI COMMONS | METRICS + EVIDENCE

Design judgments supported by geometry, metrics, matrices and checks

Core indicators

Evidence chain

Derived from the same GeoJSON, metrics, matrices and self-check state. Provisional geometry is intake-only.
