AI ALONG JINGZHANG

The 43.6 km² Coordinated Research Area, 11.4 km² Overall Design Area, and 368.4 ha Key-Area total use three output depths; all mapped boundaries remain provisional.

01 Site, Evidence, and Overall Concept

Three Zones as a chain · Two Wings as a loop · Jing-Zhang integrated with the city

Three scales, three outputs

43.6 km² Coordinated Research | ecosystem, regional links, future-city strategy
11.4 km² Overall Design | renewal, land use, mobility, utilities, blue-green systems
368.4 ha Key Areas | detailed design for three areas; polygons pending

One operating loop

Problem intake → AI Origin translation → Zhongzhiyuan validation → Dazhongsu adoption → public feedback → continue, modify, or retire. The Technology Services Wing supports every stage.

Public right to participate and exit

The Jing-Zhang heritage park is the public interface. An 11-field City Problem Passport and five evidence gates control progression; all 12 scenarios retain a same-task human route.

Fig. 1 | Real-world context with conceptual overlay. Basemap: © OpenStreetMap contributors. Provisional geometry is not an official boundary, road redline, or area basis.

Problems move through AI Origin translation, Zhongzhiyuan validation, Dazhongsi adoption, and public feedback to continue, change, or retire; the Technology Services Wing supports every stage.

02

Land Use, Operating Loop, and Two Wings

Complete partition coverage 1.0 | Daily mode first; testing mode reversible

01 Zhongzhiyuan

Independent research | trusted validation | AI governance

02 AI Origin

Outcome translation | incubation | public co-creation

03 Dazhongsi

Market adoption | urban services | international presentation

The Two Wings keep the loop operating

The west wing supports every stage; the east wing returns testing, ecological, and public feedback. No expansion without passing the evidence gate.

Zhongzhiyuan, AI Origin, and Dazhongsi distinguish daily, testing, and restoration modes; testing cannot displace everyday movement or human service.

03

Three Key Areas and Four Landmarks

One value chain, distinct spatial tasks; locations require official-boundary and survey calibration

Zhongzhiyuan

Trusted Validation Ground
Daily | public foyer and park circulation
Test | observation separated from hazards; physical stop
Reset | enclosure, equipment, data, and circulation
Gate | Planning controls, engineering conditions, and operator pending

AI Origin

Milestone Court + Qinghuayuan City Question Station
Daily | neighbourhood life, heritage visits, staffed intake
Test | reversible questions and small co-creation
Reset | heritage setting, quiet hours, personal data
Gate | Heritage lines, ownership, and real location pending

Dazhongsi

Global AI Living Gallery
Daily | ordinary commerce, urban service, non-participation route
Test | timed experience, open day, commerce validation
Reset | human service, refunds, capacity, quiet space
Gate | Area location, road redlines, and visitor permission pending

Eight personas, twelve scenarios, and three validation types; all twelve scenarios record a same-task human or low-technology route.

06 Twelve Scenarios and the City Problem Passport

All twelve scenarios record same-task human routes; three validation types use separate protocols

01

City questions

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

02

Multilingual service

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

03

Accessible navigation

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

04

AI learning

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

05

Health navigation

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

06

Heritage guide

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

07

International open day

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

08

Enterprise compliance

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

09

Trusted models

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

10

Robot testing

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

11

Smart commerce

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

12

Blue-green citizen science

Same-task human route | data ceiling | human review
Success evidence | failure | appeal | pause | restoration

Red public participation Blue service referral Gold industry validation Green ecological feedback

12 / 12 same-task equivalence

People who decline AI, withhold non-essential authorisation, or lack a smart device can still complete the same basic task; if the human route fails, the AI route pauses too.

Everyday movement comes first; the Jing-Zhang spine links three stitches and Xiaoyue River supports ecological and public retesting.

04

Walking, Blue-Green, and Public Participation Network

Protect everyday movement before adding events, testing, and ecological feedback

Weekdays

Study, work, and community services
Jing-Zhang spine as a green shortcut

Weekends

Heritage and technology experience
Bookable open days and co-creation

Blue-green feedback

Heat, rainwater, and biodiversity observation
Human validation; no watercourse or tree alteration

Safety gates

Capacity threshold | physical stop
Human takeover | quiet periods

Ten actions follow G0 to G4 evidence gates; dates organise sequence and cannot replace baselines, permission, retesting, or exit decisions.

07 Renewal Actions, Phasing, and Five Evidence Gates

Dates organise work only; G0 to G4 determine whether work may advance

Near term 2026-2028

Surveys and governance protocols

Boundaries, buildings, flows, accessibility, ecology, facilities; reversible wayfinding, open days, and small scenarios

Medium term - north

Research validation and blue-green links

Trusted validation, three stitches, AI Origin translation network, and Xiaoyue River citizen science

Medium-long term - south

Adoption, services, and international presentation

Dazhongsi location calibration, controlled commerce, multilingual service, and international events

Five operating evidence gates

G0 Register

Place, users, current practice, and source

G1 Baseline and rights

Non-AI baseline, data ceiling, permission, owner, restoration funding

G2 Controlled pilot

Safety, human takeover, capacity, notice, appeal, end date

G3 Independent retest

Failures, same-task comparison, public review, site restoration

G4 Continue or retire

Retest, continuing budget, renewed owner, source validity, public statement

Pause condition

Pause on boundary or heritage conflict, missing owner or restoration funding, failed human takeover, unavailable same-task route, expired critical evidence, or ecological disturbance.

The three scope figures, City Problem Passport, evidence gates, and same-task coverage are auditable; unknown planning and engineering indicators remain unknown.

05 Metrics, Evidence, and Release Logic

Spatial metrics are reproducible | Operating rules are auditable | Unknowns remain unknown

43.6 km² Announced Coordinated Research Area official text	11.4 km² Announced Overall Design Area official text	368.4 ha Announced total of three Key Areas official text
1.0 Complete conceptual land-use coverage topology pass	12 / 3 / 4 Scenarios / validations / landmarks content count	11 fields Required City Problem Passport content operating rule
G0-G4 Five operating evidence gates release control	12 / 12 Same-task human-route coverage public-interest gate	5 types Proposed regional interfaces unconfirmed interface

Data boundary

Remain unknown: total floor area, FAR, road area, building height, and statutory green ratio

Formal prose uses Jing-Zhang; the confirmed brand lockup retains AI ALONG JINGZHANG.

B Logo and Core Guidelines

Do not redraw the core symbol | Formal prose uses Jing-Zhang | Brand lockup retains AI ALONG JINGZHANG

AI ALONG JINGZHANG

00 / Ink

000 / Jing-Zhang Red

00 / Blue-Green

Transparent

For documents, figures, and digital interfaces

Reversed

Only on dark backgrounds with clear space

Do not

Stretch, outline, recolour, or merge with metro line symbols

Monochrome

For material limits, embossing, or low-cost wayfinding

Minimum size

Mark $\geq 24\text{px}$ digitally; full lockup $\geq 180\text{px}$

Spatial, heritage, data, transport, municipal, ecological, operational, and evidence-expiry risks have pause conditions and professional review paths.

07 Renewal Actions, Phasing, and Five Evidence Gates

Dates organise work only; G0 to G4 determine whether work may advance

Near term 2026-2028

Surveys and governance protocols

Boundaries, buildings, flows, accessibility, ecology, facilities; reversible wayfinding, open days, and small scenarios

Medium term - north

Research validation and blue-green links

Trusted validation, three stitches, AI Origin translation network, and Xiaoyue River citizen science

Medium-long term - south

Adoption, services, and international presentation

Dazhongsi location calibration, controlled commerce, multilingual service, and international events

Five operating evidence gates

G0 Register

Place, users, current practice, and source

G1 Baseline and rights

Non-AI baseline, data ceiling, permission, owner, restoration funding

G2 Controlled pilot

Safety, human takeover, capacity, notice, appeal, end date

G3 Independent retest

Failures, same-task comparison, public review, site restoration

G4 Continue or retire

Retest, continuing budget, renewed owner, source validity, public statement

Pause condition

Pause on boundary or heritage conflict, missing owner or restoration funding, failed human takeover, unavailable same-task route, expired critical evidence, or ecological disturbance.
