

JINGZHANG AI BELT · Centennial Jing-Zhang AI Innovation Belt · A3 Booklet

"Ren" Innovation Chain: Origin → Open → Convert → Industrialize → Feedback loop

§ 1 Concept /

The Intelligent Pulse of Jing-Zhang

From Iron Rails to Intelligent Pulse — a century-old iron road turned into a living AI belt.

§ 2 Three Cores & Two Wings /

Engine Yard · Origin Depot · Junction

Full-stack indigenous innovation; campus-origin incubation; intelligent economy & international exchange. Dispatch & Test wings complete the loop.

§ 3 Scenarios & Personas /

10 AI scenario cards · 3 test scenes · 5 user personas

Open-source hall, safety sandbox, edge-compute stop, agent roadshow hall, data-elements lounge, etc.

§ 4 Land Use & Buildings /

Land-use plan covers full boundary · building footprints + retain/renovate/demolish logic

Control metrics (FAR/height/density/setback) await official regulatory planning; performance metrics are design targets, not approvals.

§ 5 Mobility & Blue-Green /

Rail + slow + shared mobility loop · Qinghe & Xiaoyuehe green corridors

Stitch the ring-road crossings; integrate heritage park as the historic spine.

§ 6 Operations & Brand /

Annual Global AI Week · developer community · honor wall & pilgrimage landmarks

Iron Rails to Intelligent Pulse: a century of indigenous innovation continued through AI.
