JINGZHANG ROUTE

JINGZHANG ROUTE

Centennial Jing-Zhang AI Innovation Belt · A3 Booklet

Translating the railway operating system — Route · Interlocking · Signal · Block · Dispatch — into the operating protocol of an AI city.

Author: BedrockLian · Generated by JZ-Route Agent · 2026-08-10

Contents

01 Basis & sources · 02 Three-level scope · 03 Research-area strategy · 04 Overall design (structure & land use) · 05 Transport & municipal · 06 Blue-green & public space · 07 Three key areas · 08 Renewal & phasing · 09 Metrics & compliance · 10 AI scenarios & protocol · 11 Risk & pending data

Key sources

- Prequalification announcement (2026-05-09)
- Agent taskbook (agent.1-6, 2026-05-18)
- MOHURD urban design measures / regulatory plan measures
- MNR land-use classification guide (2023)
- Generative AI interim measures / barrier-free law
- Repository provisional boundary (verified 2026-08-07)

⚠ All geometry is generated from the provisional boundary (not official); full recalculation when official polygons are released. All spatial proposals are conceptual.

Three-Level Scope Framework

Coordinated Research Area 43.6 km²

AI industry ecology, future-city form, strategy; three-area-two-wing synergy.

Overall Design Area 11.4 km²

Regulatory-plan-level design: one spine, three stations, two wings, twelve crossings.

Key Detailed Design Area 368.4 ha

Turning Yard 192.1 ha · Kilometer Zero 104.3 ha · Origin Station 72.0 ha.

Areas: official announced values; geometry: repository provisional polygons.

| Overall Concept and Spatial Structure

JINGZHANG ROUTE

In 1909 Zhan Tianyou opened China’s first self-built route; in 2026 the belt opens a route for every AI service: apply → interlock → signal → operate → rollback.

One Spine

Heritage Park vitality belt, 9.7 km blue-green slow spine.

Three Stations

Dazhongsi Origin / Kilometer Zero / Zhongzhiyuan Turning Yard.

Two Wings

Zhongguancun Link (W) / Xiaoyue Scenarios (E).

Twelve Crossings

Lateral stitching + switch nodes (human-machine co-throw).

Coordinated Research Area: Industry and Future City

Three Positionings

Centennial cultural belt · Urban AI life belt · AI-integrated innovation belt

Five Functions

Full-stack innovation · world ecology · AI+ empowerment · vibrant city · governance voice

Naming & Logo

JINGZHANG ROUTE; signal language + rails converging into "人" (human-centered + switchback heritage).

Six Global Cases → Transfer Mechanisms

Case	Mechanism
King’ s Cross (rail heritage)	Heritage-first public space + phasing
Station F (station→incubator)	Station hall as incubator
Kendall Square (campus cluster)	Campus-block-market loops
Punggol (statutory testing)	Industry test blocks
Nanshan (renewal & tech)	Low-cost space + dense innovation
Yunqi (event-driven)	Train-diagram events

Overall Design Area: Land Use & Renewal

Land use	Area	Share
R&D 0802	227.8 ha	20.0%
Commercial 05	169.2 ha	14.8%
Green 1401/1402	465.6 ha	40.8%
Residential 07	70.7 ha	6.2%
Education 0804	70.7 ha	6.2%
Road 1207	97.7 ha	8.6%
Cultural/Plaza/Reserve	39.0 ha	3.4%

Retain/renovate/new

~30/40/30 (conceptual, pending survey); spine first interface renovation-led, second interface new-build-led.

Character

≤30 m near spine, 30–60 m beyond, 60–80 m nodes (conceptual, pending regulatory conditions).

Transport, Rail, Municipal & Public Services

Slow-traffic spine

Pedestrian + cycling greenway ~9.7 km, unbroken through three stations.

Twelve stitching crossings

Secondary/branch stitching, zero-level crossings + smart signal language (SC-10).

Transit connections

Three stations connect toward Line 13 (schematic, not engineering).

Wing corridors

Zhongguancun Link (W) + Xiaoyue River greenway (E).

Municipal & new infrastructure

Edge compute on smart poles; distributed energy reserved; ducts under crossings; interlocking dashboard publishes anonymized data.

Blue-Green Network, Public Space & Three AI Pilgrimage Landmarks

Blue-green system (green ratio 41.3%)

Vitality belt (three character bands) + Xiaoyue greenbelt + west buffer + station parks + pocket parks.

Public space

3 station plazas + 12 switch plazas + 3 test blocks + 3 landmarks.

Pilgrimage landmarks

① Departure Signal Tower (Dazhongsi) ② Kilometer-Zero Milestone (Origin) ③ Turning Switch Memorial (Zhongzhiyuan).

Landmarks are conceptual; design rights clearance required.

| Key Area 1: Zhongzhiyuan Turning Yard (192.1 ha)

Positioning

Full-stack innovation: research turns into products, products into industry.

Structure

Central test spine TB-1 + eastern R&D clusters + western service belt.

Scenarios

SC-01 compute dispatch · SC-02 robot delivery test block (industry test) · SC-03 developer validation.

Risks

Complex park ownership; test block requires special permits.

| Key Area 2: Beijing AI Origin Community (104.3 ha)

Positioning

Depot & Kilometer Zero: talent servicing; railway origin = AI spiritual origin.

Structure

Milestone Plaza + education/research belt + transfer street.

Scenarios

SC-04 transfer street · SC-05 interpretation · SC-06 human-machine care test block (industry test).

Risks

Campus co-governance; functional replacement, no mass demolition.

| Key Area 3: Dazhongsi AI Industry Cluster (72.0 ha)

Positioning

Origin Station: intelligent-native business departs; ancient bell = time anchor.

Structure

Origin Plaza + new-business blocks + ancient bell cultural node.

Scenarios

SC-07 window lab · SC-08 unmanned retail & delivery (industry test) · SC-09 consumption experience.

Risks

Complex underground conditions near Xizhimen hub; heritage approvals.

Renewal Projects, Policy & Phasing

ID	Project	Location	Type	Phase
R-01	Belt south connection	Dazhongsi–Zhichunlu	Public space	P1
R-02	Origin Plaza & tower	Dazhongsi	Node	P1
R-03	Blocks renovation	Dazhongsi spine	Renovation	P1
R-04	Origin Plaza & zero	Origin	Node	P2
R-05	Transfer street	Origin west	Replacement	P2
R-06	Turning Plaza & switch	Zhongzhiyuan	Node	P2
R-07	Test block TB-1	Zhongzhiyuan	Testing	P1
R-08	Xiaoyue greenway	East wing	Blue-green	P3

P1 2026-2028

Test blocks first: belt connection + 3 test blocks + station plazas (~2.4 km²).

P2 2029-2031

Stations take shape: station-area renewal + wings (~3.0 km²).

P3 2032-2035

Full-belt interlocking (~6.0 km²).

Long-term operation (conceptual)

Train-diagram system: Developer Day (quarterly) · International AI Innovation Week (annual) · Interlocking Annual Report · Route Pilgrimage Line · Dispatch Office community · test-block graduate conversion.

Metrics, Area Recalculation & Compliance

Metric	Value
Overall design area	1140.6 ha
Green ratio	41.3%
Public space ratio	1.6%
Building density	0.126
Overall FAR (conceptual)	1.09
Spine + crossings	34.3 km
Cards/Blocks/Landmarks	12 / 3 / 3
Interlocking rules	20

All metrics recomputed from submitted geometry in EPSG:4548; formulas in metrics.json.

Compliance coverage

compliance_matrix.json: announcement 16 items + agent.1-6, all covered.
standard_matrix.json: 9 standards (5 mandatory addressed).
design_depth_matrix.json: 15 depth items complete.

Pending

Regulatory FAR/height (unknown); official redline; ownership; heritage lines.

| AI Scenarios & Route Protocol • Risk & Copyright

Five-step route regime

Apply → Interlock → Signal → Operate → Arrive/Rollback. Conflicting routes never open simultaneously; rollback filed in advance.

12 route cards

SC-01 dispatch · SC-02 robot delivery (test) · SC-03 validation · SC-04 transfer · SC-05 translation · SC-06 care (test) · SC-07 window · SC-08 unmanned retail (test) · SC-09 consumption · SC-10 signals · SC-11 pilgrimage · SC-12 dashboard

Personas

Developers · faculty/students · residents (incl. seniors) · pilgrims · operators.

Risk & compliance

- All conceptual; no government approval implied
- No facial capture; anonymized public data
- AI generation disclosed (narrative.md)
- System fonts, not redistributed
- OSM context under ODbL

Pending data

Official redline & key areas, regulatory conditions, existing buildings/ownership, road redlines, utilities, heritage lines, engineering alignments.
