

One loop, two tracks

Forward heritage axis + return service loop meet in a REN glyph at Origin.

The Ren Loop · Overall Concept

Forward Track (heritage park axis) + Return Track (innovation service loop) meet at Origin Station; 3 stations & 12 crossings organise the 11.4 km² Overall Design Area

THE REN LINE

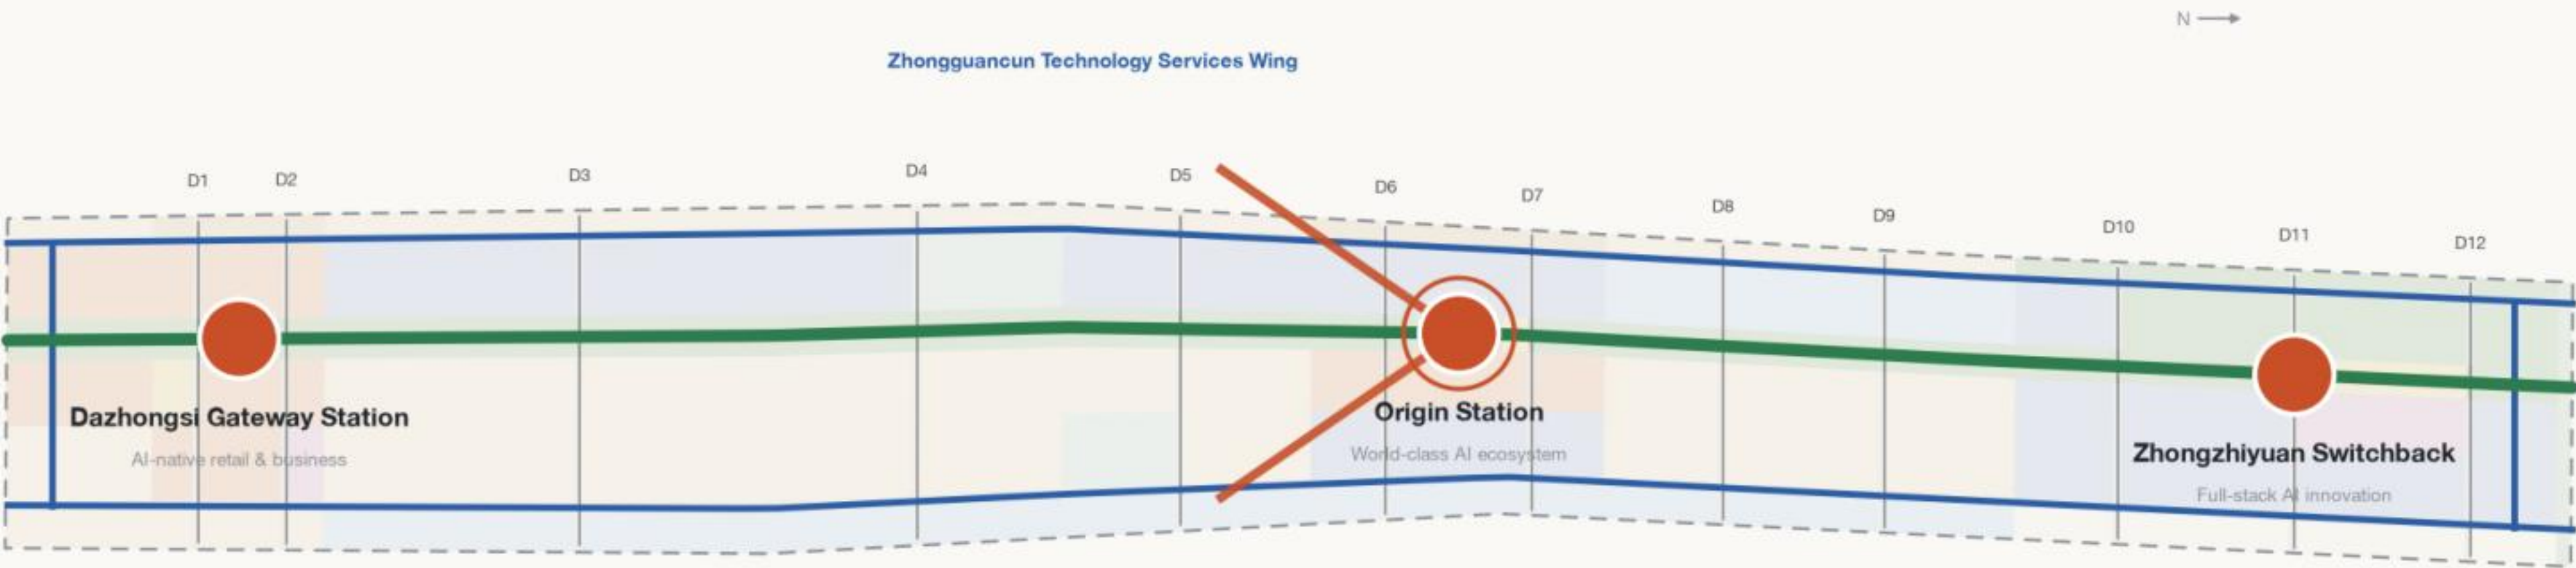

Centennial Jing-Zhang AI Innovation Belt

3 stations, 12 crossings

Gateway / Origin / Switchback; 12 crossings stitch east-west at 600-900 m.

Three positionings

Culture belt = Forward Track; life belt = crossings & yards; innovation belt = the loop.

Concept mapping

1908

Qinglongqiao switchback: forward - reverse - forward

2026

Backpropagation: forward pass - error return - update

City

Scenarios generate data (forward); feedback updates space & policy (return)

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Seamless partition

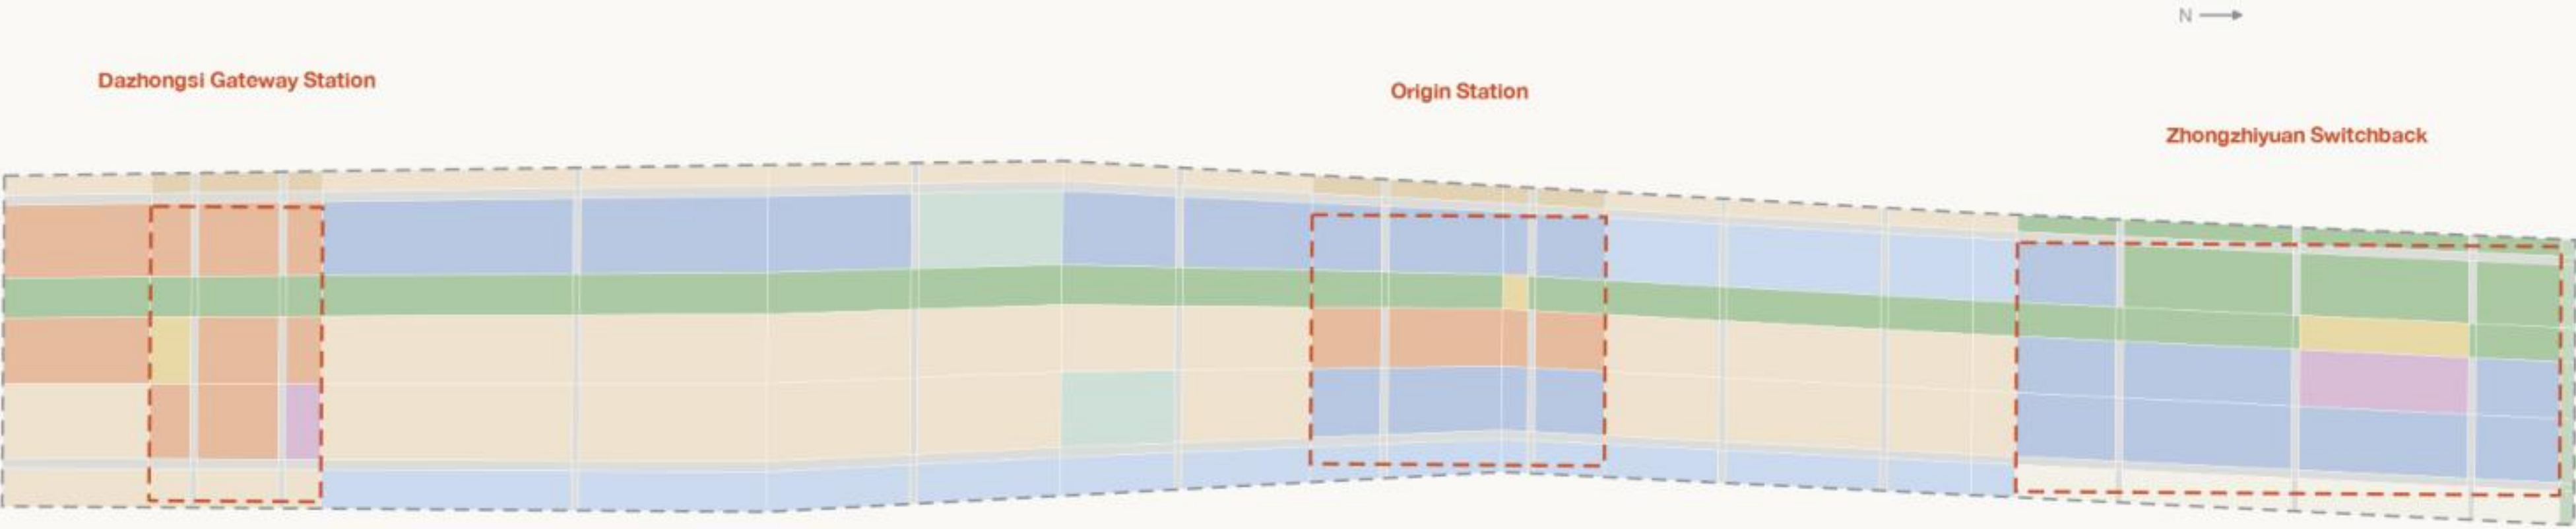

280 cells share cut lines, zero overlap; public framework locked first.

Three-Level Scopes x Land-Use Structure

A seamless partition of the provisional boundary (280 cells, shared cut lines, zero overlap); public framework locked first, development woven between

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

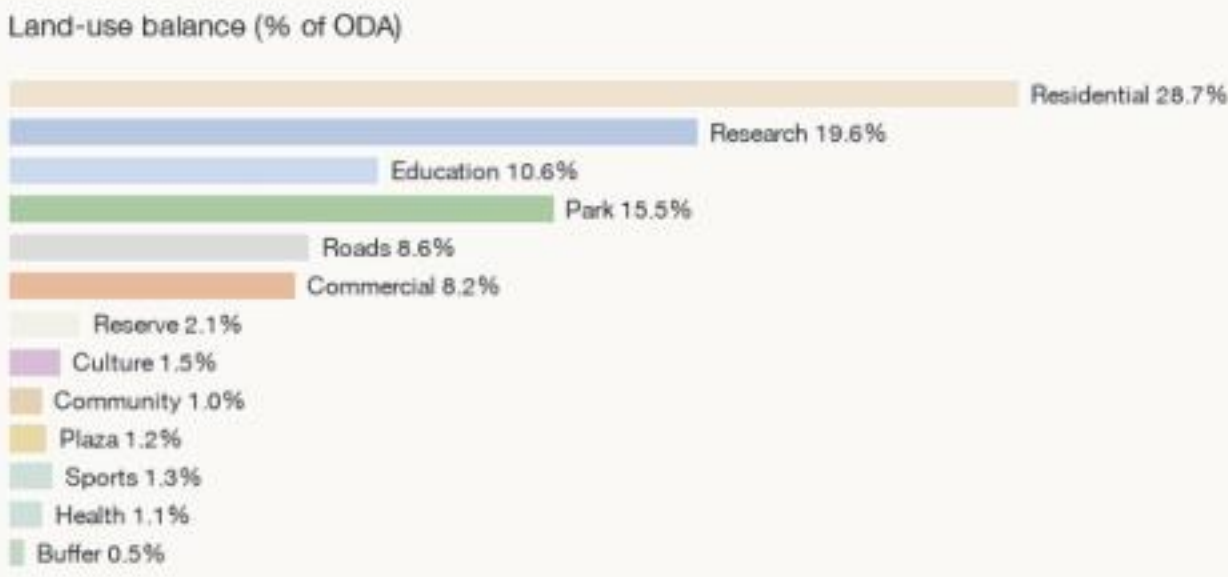

Balance

Residential 28.7% / research 19.6% / green 16.0% / education 10.6% / roads 8.6% / commercial 8.2% .

Retain first

Retain heritage, communities, campuses; renew inefficient stock; demolish least, pending survey.

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Lateral permeability

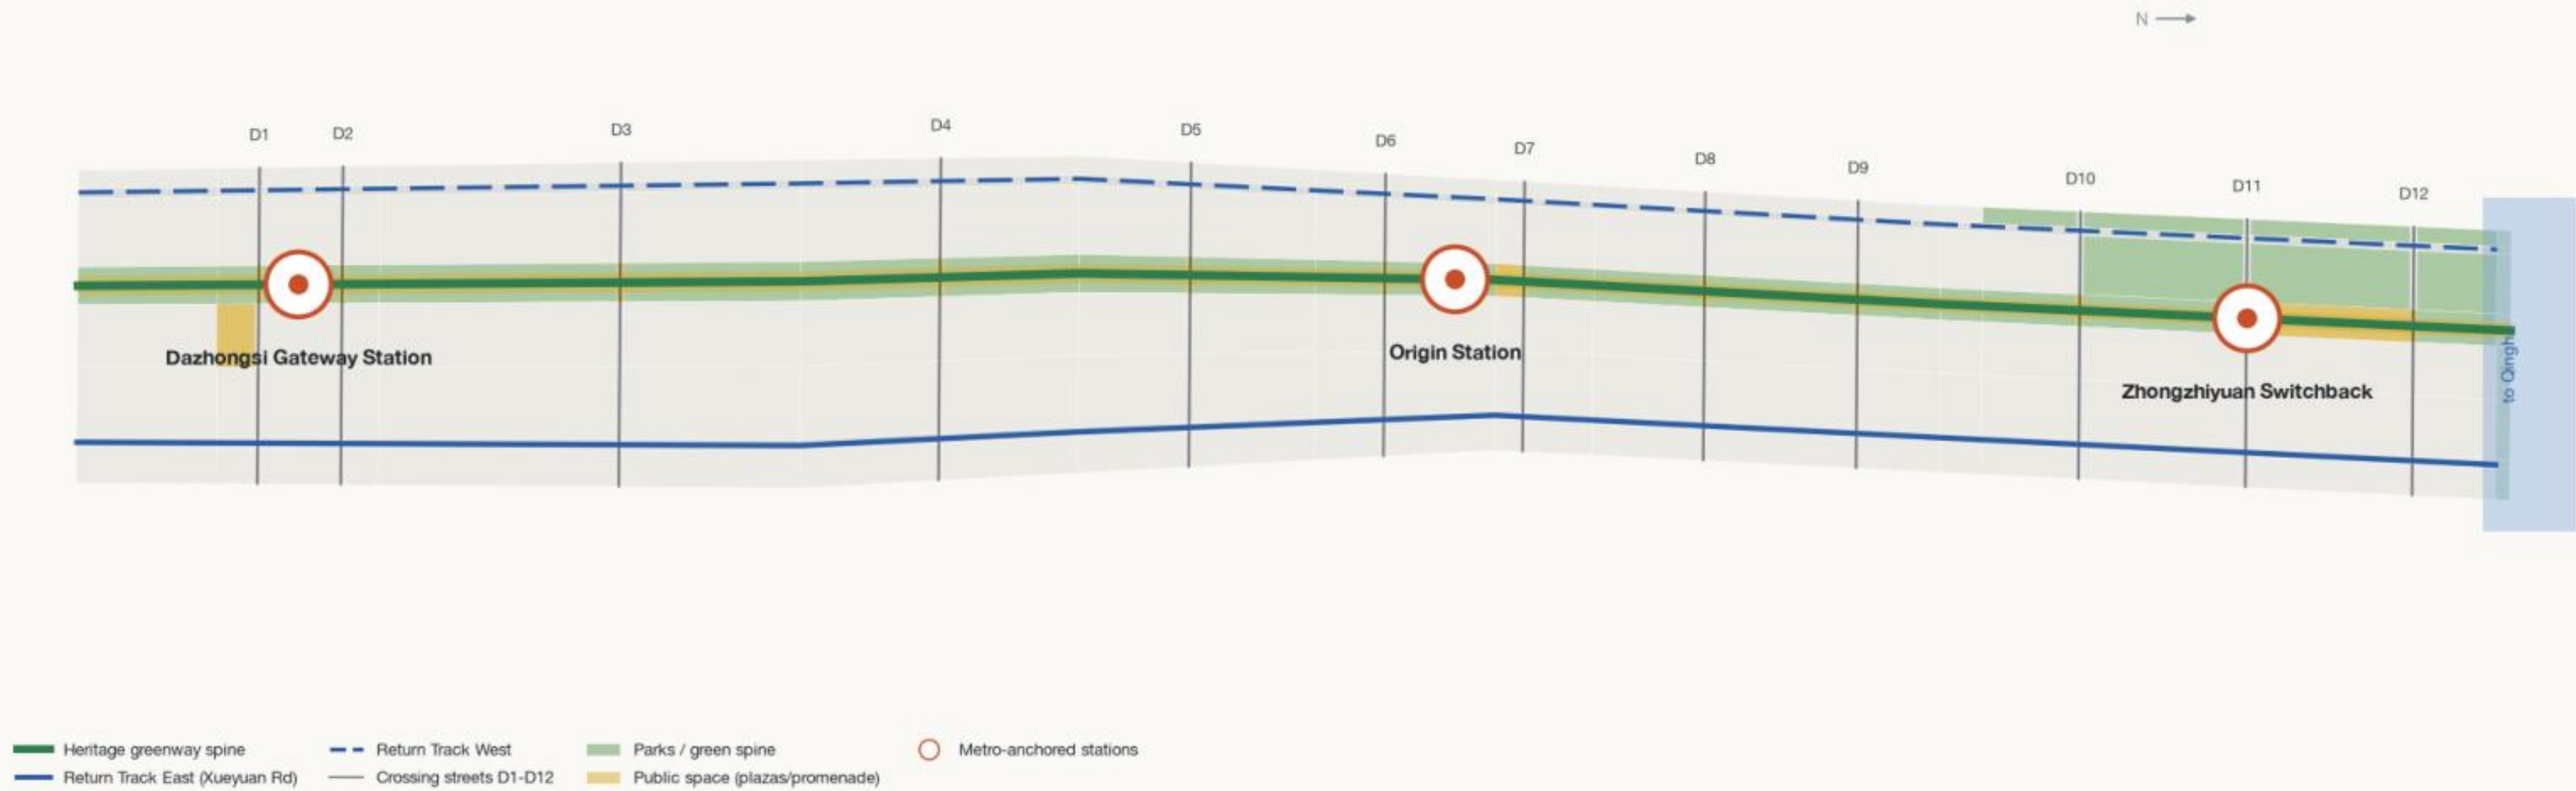

Scarce resource is crossing permeability, not capacity; 12 crossings rebuild microcirculation.

Mobility x Blue-Green Public Space System

9.7 km greenway spine; 12 crossings stitch east-west at 600-900 m spacing; ~23.6 km slow network; stations anchored on existing metro (conceptual)

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Metro anchoring

Stations anchor on existing metro; no alignment engineering claims.

AI infrastructure

Edge compute + regional compute + anonymous sensing + energy-carbon return.

AI scenario nodes (selected)

S01 Crossing Guardian (x12) S04 Proving Ground* S05 Qinghe Waterfront* S06 Smart Market* S07 Model Hospital S10 Energy Return

* Industry test & validation scenarios; all with privacy boundary + human review

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Spine, river, buffer

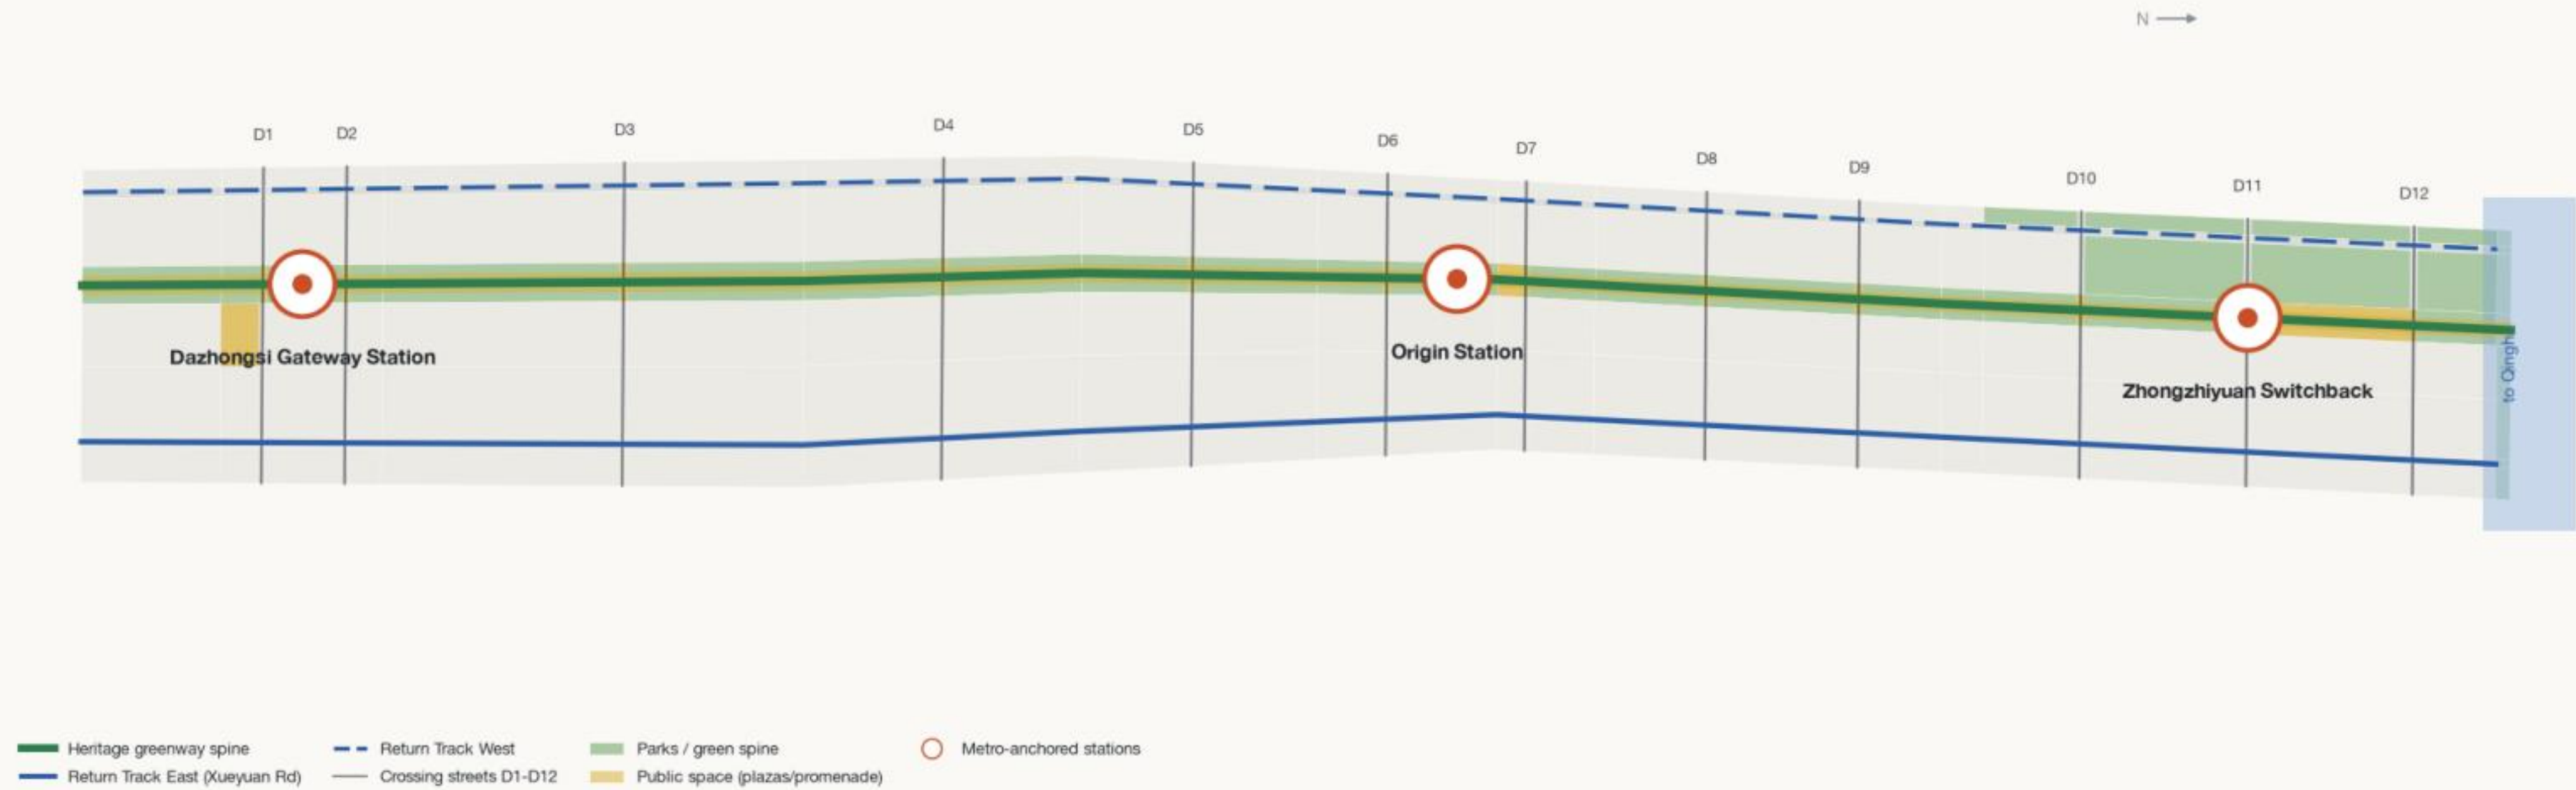

9.7 km spine; Qinghe waterfront; 5th-Ring buffer; green ratio 16.0%.

Mobility x Blue-Green Public Space System

9.7 km greenway spine; 12 crossings stitch east-west at 600-900 m spacing; ~23.6 km slow network; stations anchored on existing metro (conceptual)

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Pilgrimage landmarks

Ren Monument / Amphitheater / Bell & Compute Grove / Crossing Museum; milestones + Ren Prize.

Character

Engineering rationality + campus green; brick-red & warm grey; bilingual machine-readable signage.

AI scenario nodes (selected)

S01 Crossing Guardian (x12) S04 Proving Ground* S05 Qinghe Waterfront* S06 Smart Market* S07 Model Hospital S10 Energy Return

* Industry test & validation scenarios; all with privacy boundary + human review

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Gateway 72 ha

Smart Market / Bell Grove / station-city integration; market pilot first.

Detailed Design Index: Three Stations

South to north: Dazhongsi Gateway (72.0 ha) - Origin (104.3 ha) - Zhongzhiyuan Switchback (192.9 ha); concept-level detailed design

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Dazhongsi Gateway

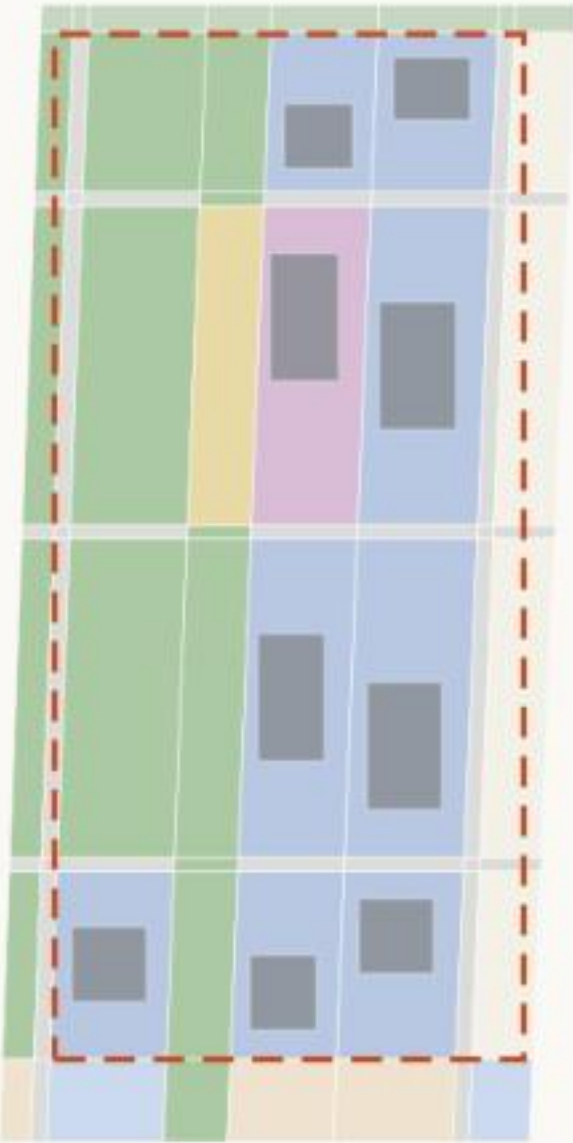

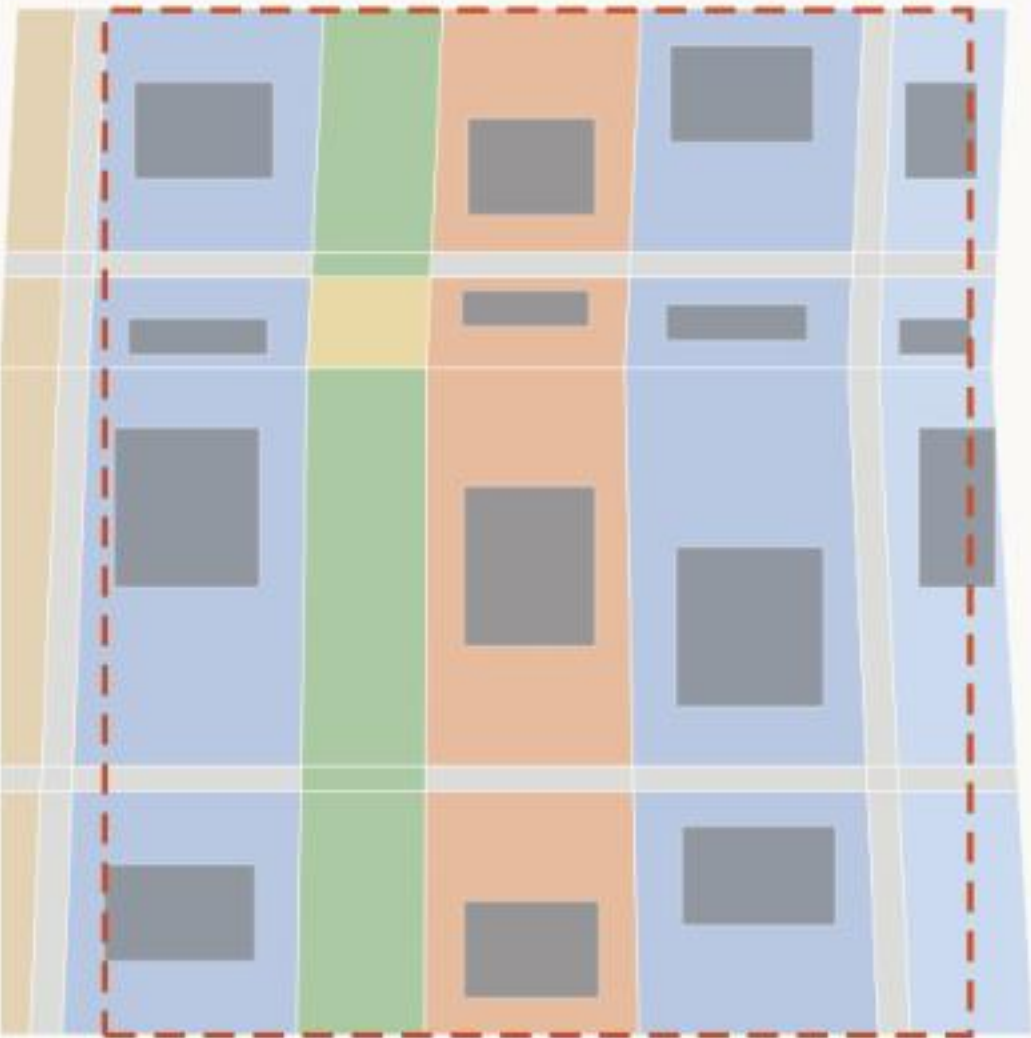

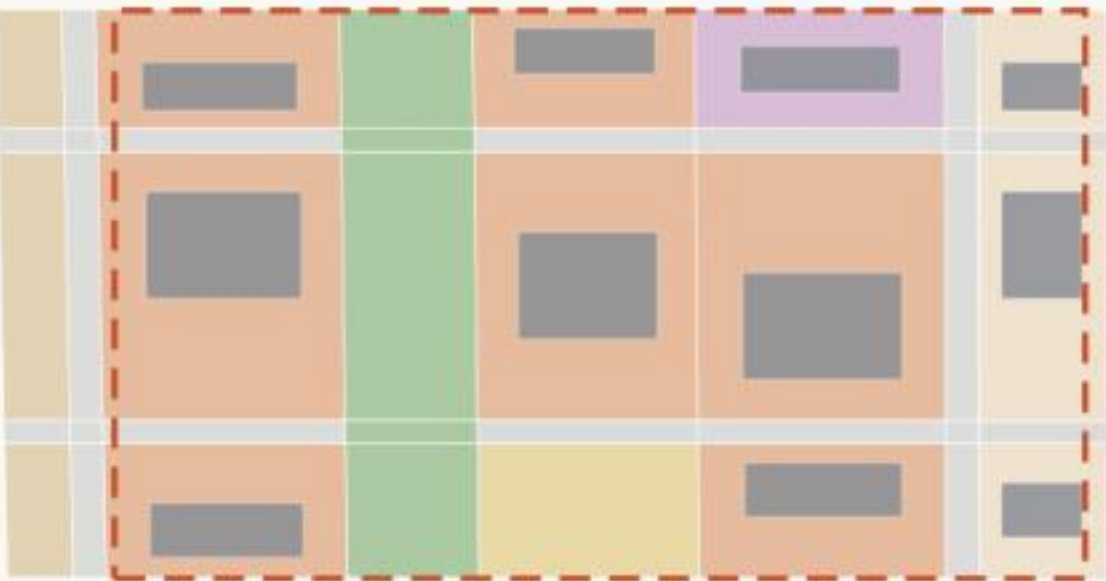

72.0 ha

Origin Station

104.3 ha

Zhongzhiyuan Switchback

192.9 ha

Origin 104.3 ha

Origin Hall / Ren Monument / Model Hospital / campus arcade; interface pacts.

Switchback 192.9 ha

Proving Ground / Amphitheater / Qinghe / Roundtable + reserve.

Key projects

- 1 Dazhongsi Smart Market (renewal)
- 2 Station plaza + crossings D1/D2
- 3 Bell & Compute Grove landmark
- 4 Talent housing & services

Key projects

- 1 Origin Hall (24h dev commons)
- 2 Ren Monument plaza
- 3 Model Hospital (publio evals)
- 4 Campus arcade interface

Key projects

- 1 Zhongzhiyuan Proving Ground
- 2 Switchback Amphitheater
- 3 Qinghe Sensing Waterfront
- 4 Governance Roundtable + reserve

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

12 scenario cards

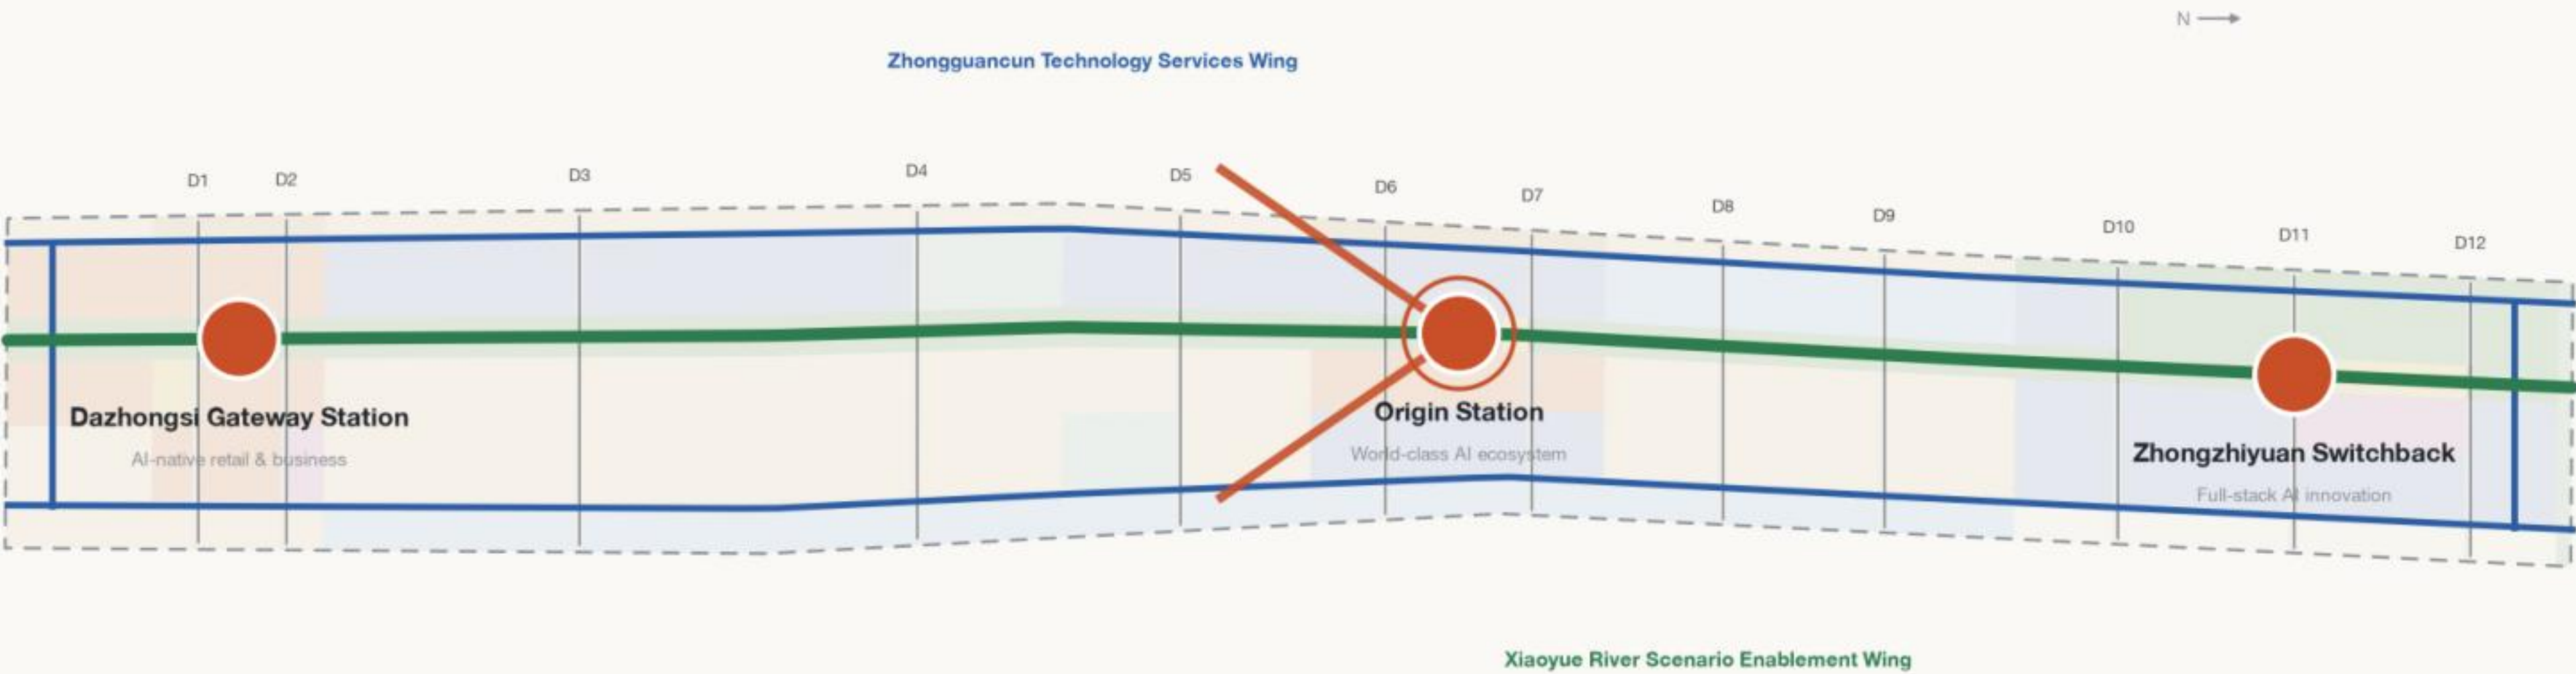

3 industry-test cards; all privacy-bounded, human-reviewed; green-amber-red states.

The Ren Loop · Overall Concept

Forward Track (heritage park axis) + Return Track (innovation service loop) meet at Origin Station; 3 stations & 12 crossings organise the 11.4 km² Overall Design Area

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Annual events

Ren Loop Week / red-team shows / crossing fairs / Rail Hack / roundtable.

12 projects

Three phases: ignite (26-28) -> stitch (28-31) -> operate (31-35).

Concept mapping

1908

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Recomputable metrics

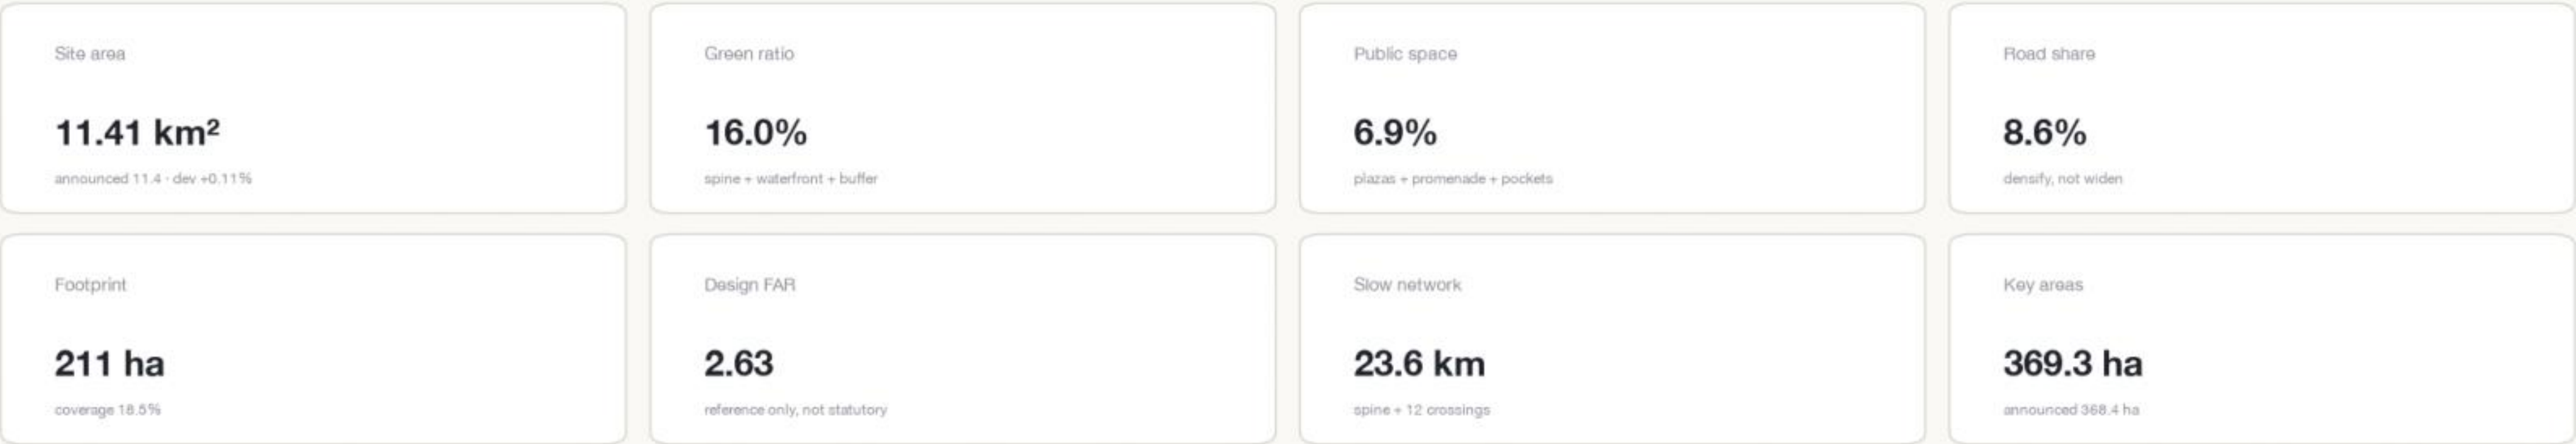

All metrics recomputed in EPSG:4548; display bit-consistent with metrics.json.

Metrics Recalculation & Evidence Chain

All metrics recomputed from package GeoJSON in EPSG:4548; missing official controls explicitly registered; check chain: deterministic - spatial - visual - professional

Centennial Jing-Zhang AI Innovation Belt

Coverage

23/23 tasks; 5 mandatory standards; 15 depth items complete.

Pending data

Official redlines / controls / baselines pending; registered unknown, no statutory claims.

Evidence chain

Pending official data (registered unknown; no statutory claim)

Official redlines & key-area polygons · statutory FAR/height/density/green controls · road redlines · building & tenure baseline · heritage control lines · utilities

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.
