

THE REN LOOP

Urban Design Concept for the Centennial Jing-Zhang AI Innovation Belt

The Ren Line - one loop, two tracks, three stations, twelve crossings

1908 Qinglongqiao switchback x 2026 backpropagation

Claude Fable 5 x cokekitten · 2026-08 · COMMUNITY-DISPLAY-ONLY

Open co-creation concept - not a statutory plan - no government approval implied

Basis

Prequalification announcement / agent taskbook / repository site package / public case materials. Traceable, recomputable, boundary-replaceable.

Three scopes

Research 43.6 km² -> Overall 11.41 km² -> Key areas 369.3 ha. Areas recomputed in EPSG:4548.

Provisional boundary

All layers fitted from announcement text; not official redlines; full recalculation on official release.

Method: training loop

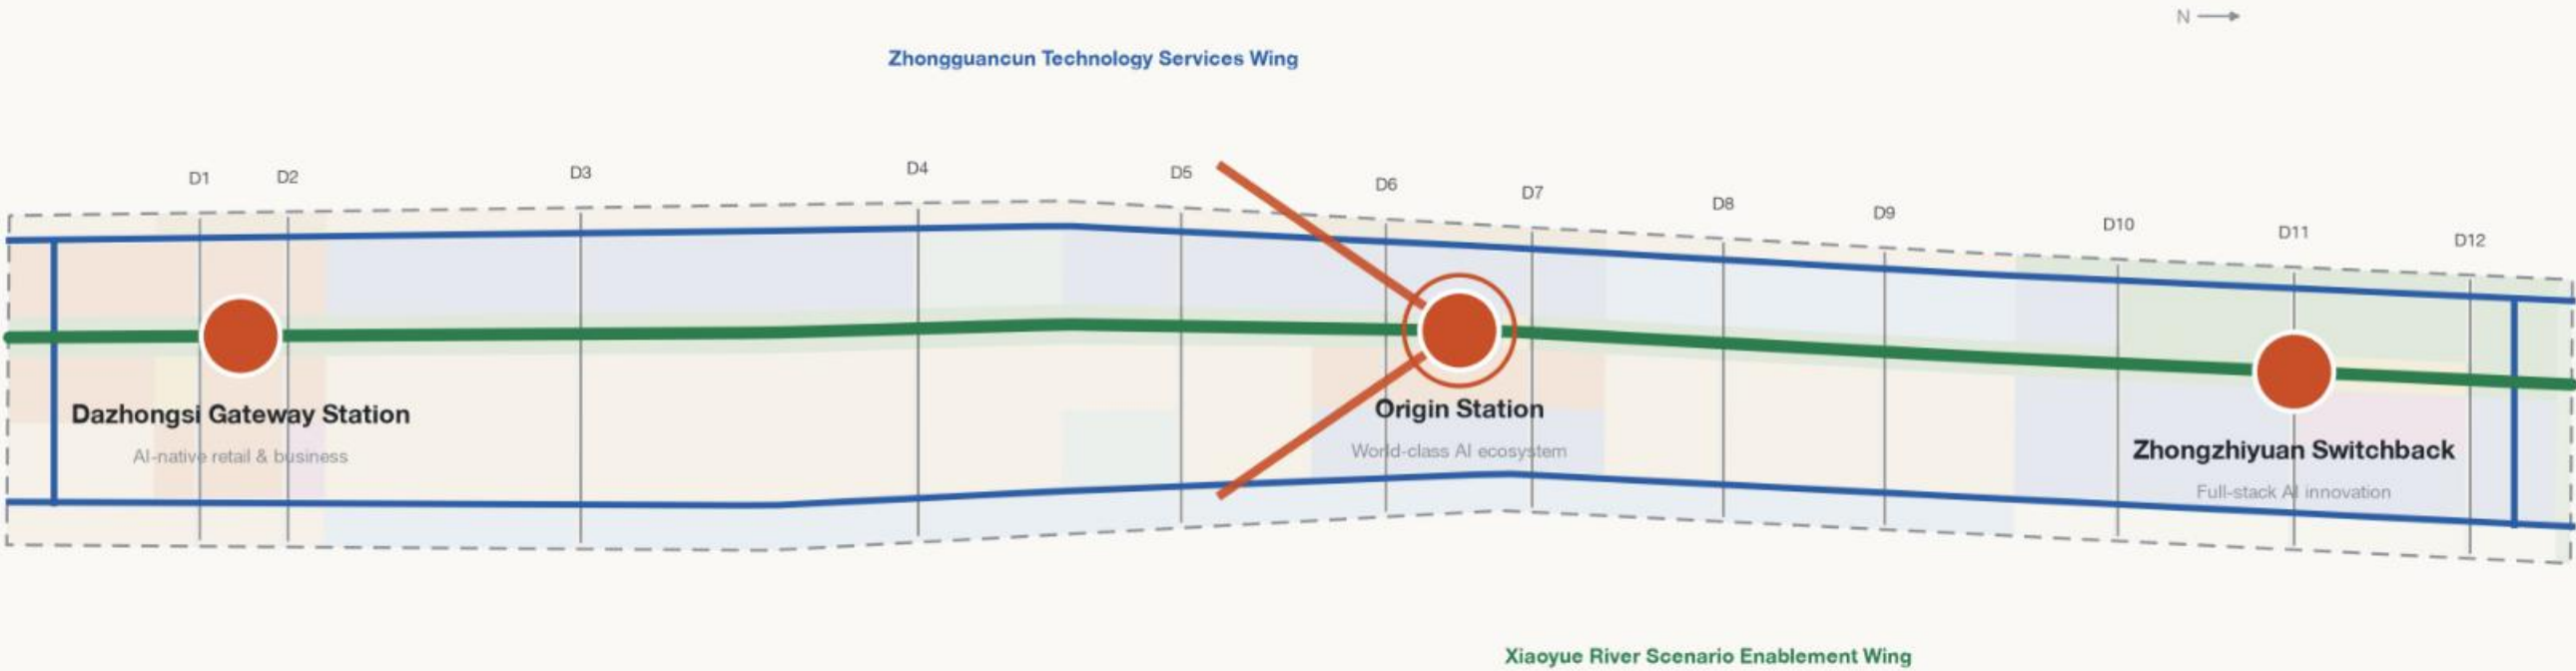

Scenarios generate data (forward) -> feedback updates models & policy (return). Urban design gives this loop its spatial form.

The Ren Loop · Overall Concept

Forward Track (heritage park axis) + Return Track (innovation service loop) meet at Origin Station; 3 stations & 12 crossings organise the 11.4 km² Overall Design Area

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Concept mapping

1908

Qinglongqiao switchback: forward - reverse - forward

2026

Backpropagation: forward pass - error return - update

City

Scenarios generate data (forward); feedback updates space & policy (return)

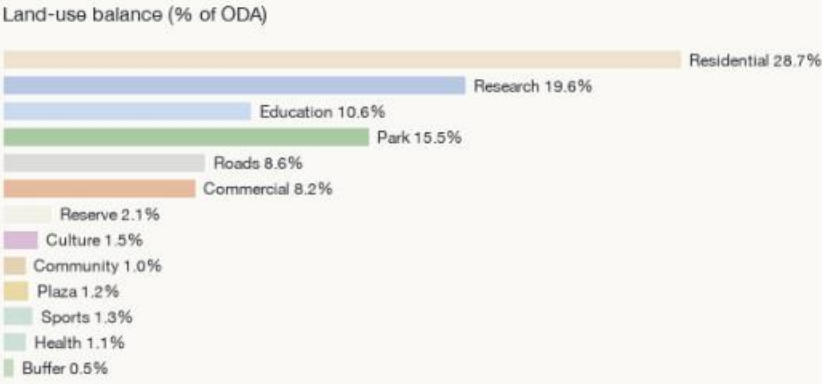

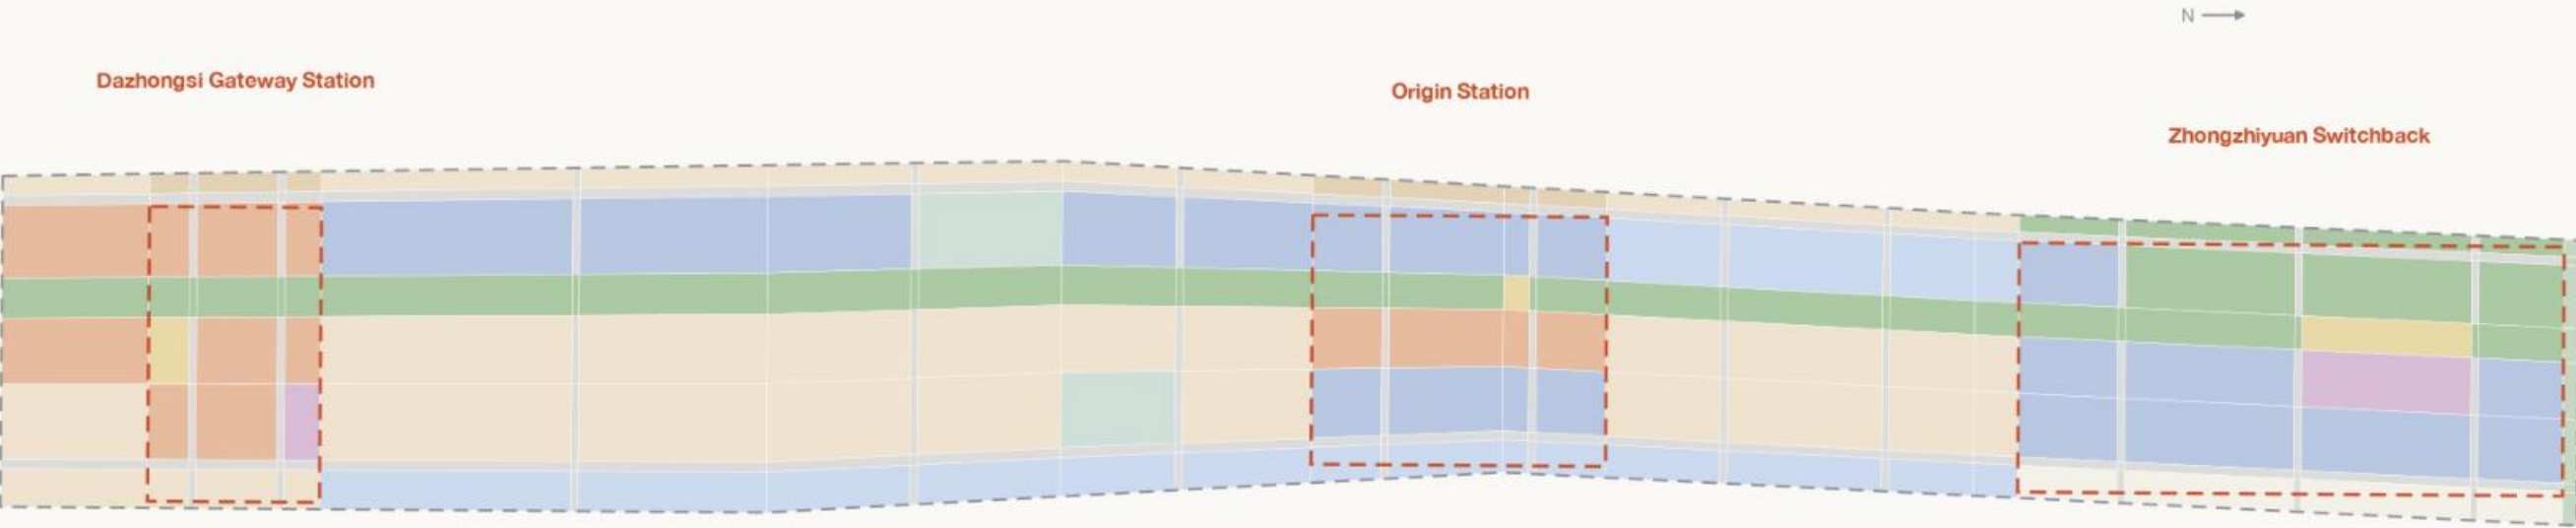

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Three-Level Scopes × Land-Use Structure

A seamless partition of the provisional boundary (280 cells, shared cut lines, zero overlap); public framework locked first, development woven between

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Detailed Design Index: Three Stations

South to north: Dazhongsi Gateway (72.0 ha) - Origin (104.3 ha) - Zhongzhiyuan Switchback (192.9 ha); concept-level detailed design

THE REN LINE

Centennial Jing-Zhang AI Innovation Belt

Dazhongsi Gateway

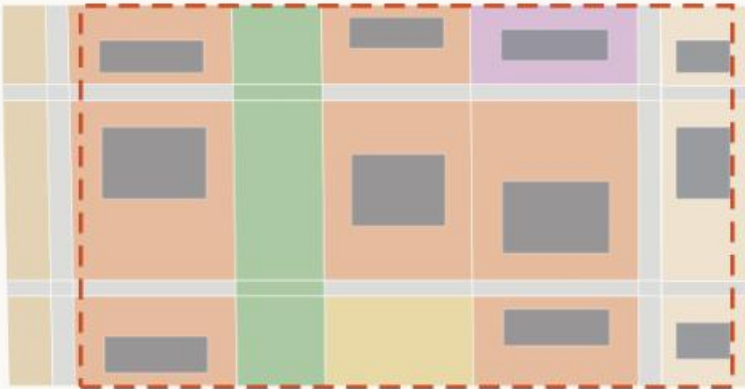

72.0 ha

Origin Station

104.3 ha

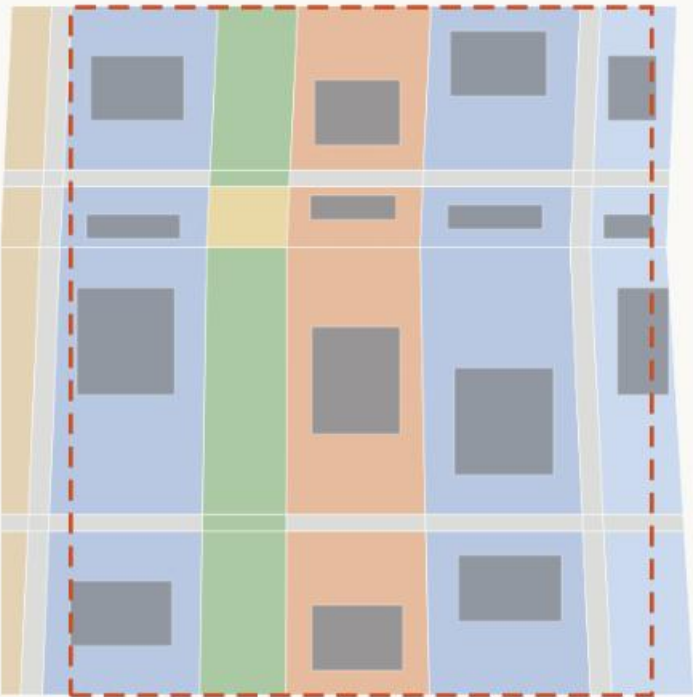

Zhongzhiyuan Switchback

192.9 ha

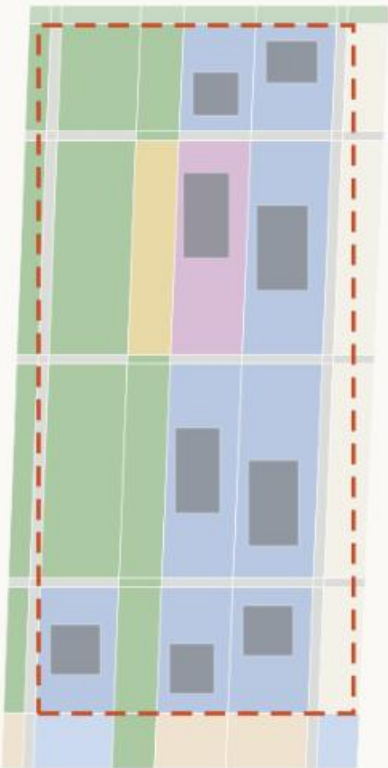

Key projects

- 1 Dazhongsi Smart Market (renewal)
- 2 Station plaza + crossings D1/D2
- 3 Bell & Compute Grove landmark
- 4 Talent housing & services

Key projects

- 1 Origin Hall (24h dev commons)
- 2 Ren Monument plaza
- 3 Model Hospital (public evals)
- 4 Campus arcade interface

Key projects

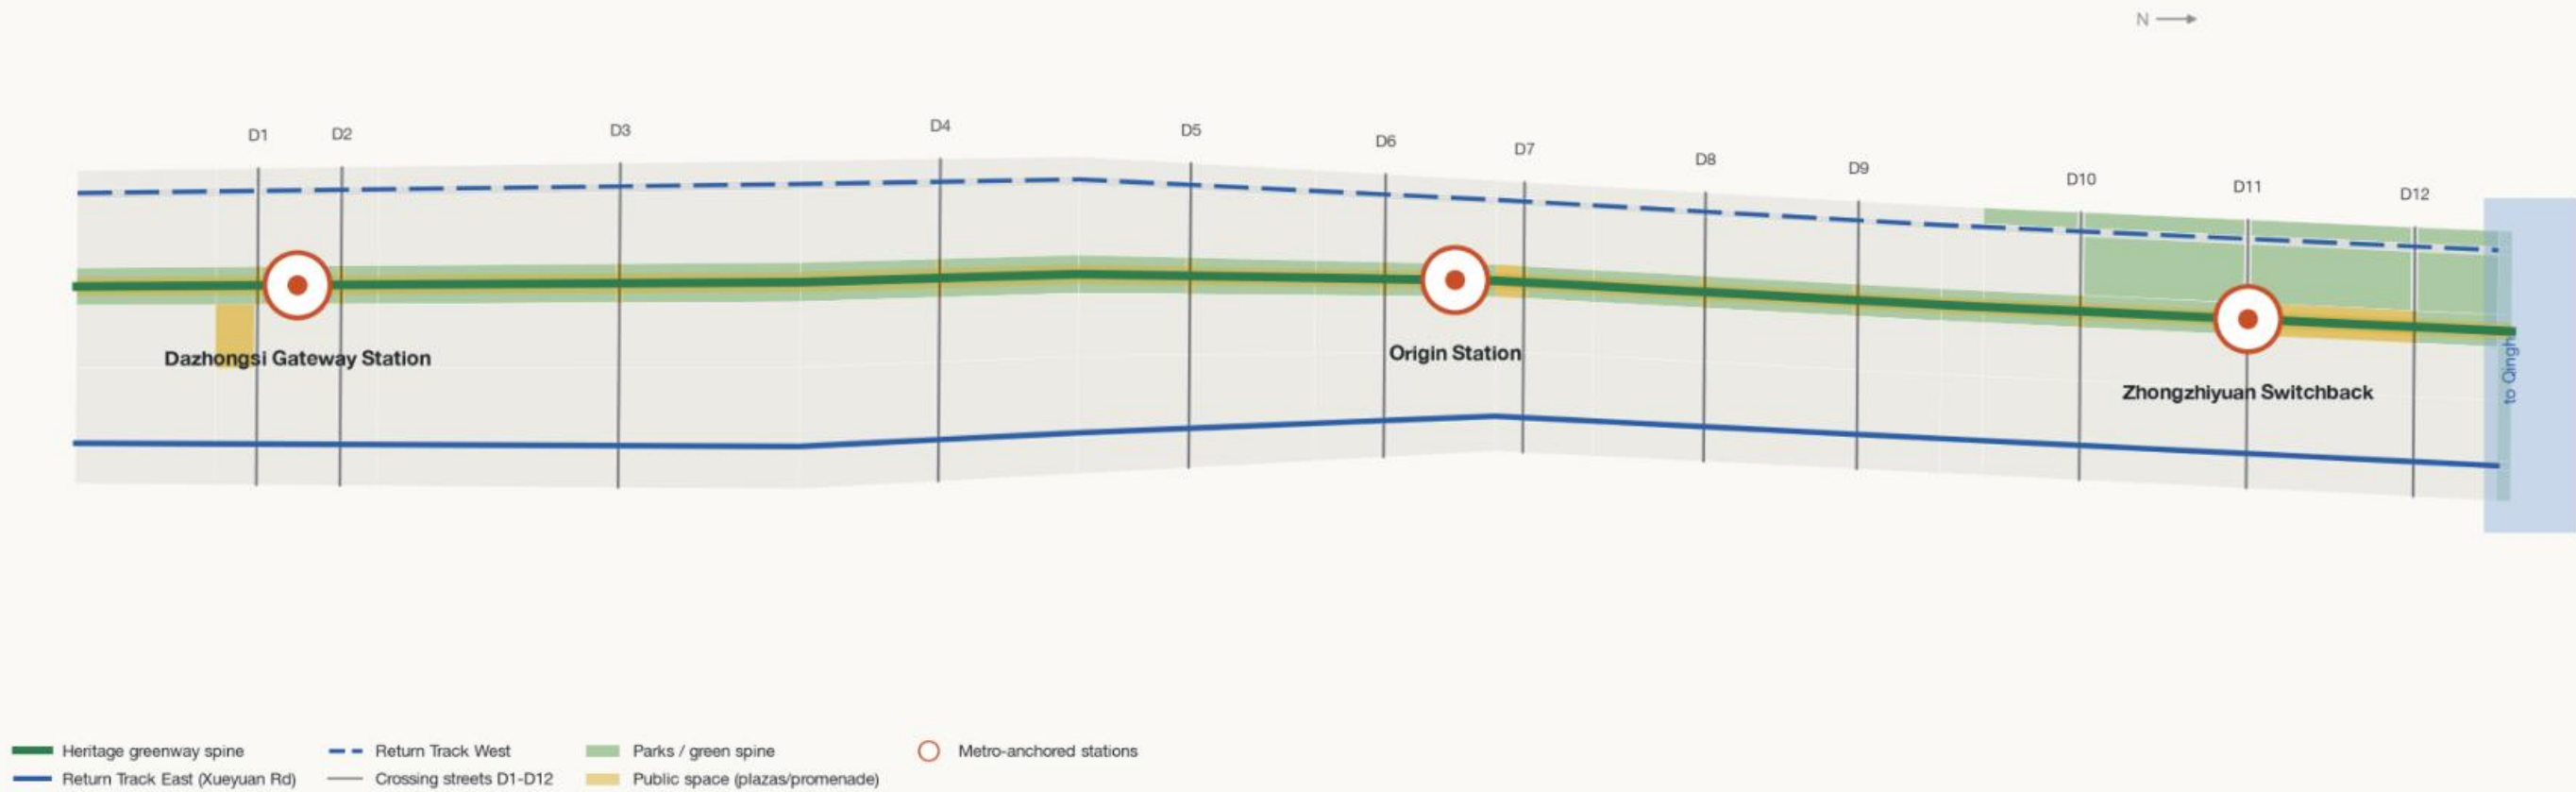

- 1 Zhongzhiyuan Proving Ground
- 2 Switchback Amphitheater
- 3 Qinghe Sensing Waterfront
- 4 Governance Roundtable + reserve

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Mobility × Blue-Green Public Space System

9.7 km greenway spine; 12 crossings stitch east-west at 600-900 m spacing; ~23.6 km slow network; stations anchored on existing metro (conceptual)

Centennial Jing-Zhang AI Innovation Belt

AI scenario nodes (selected)

S01 Crossing Guardian (x12) S04 Proving Ground* S05 Qinghe Waterfront* S06 Smart Market* S07 Model Hospital S10 Energy Return

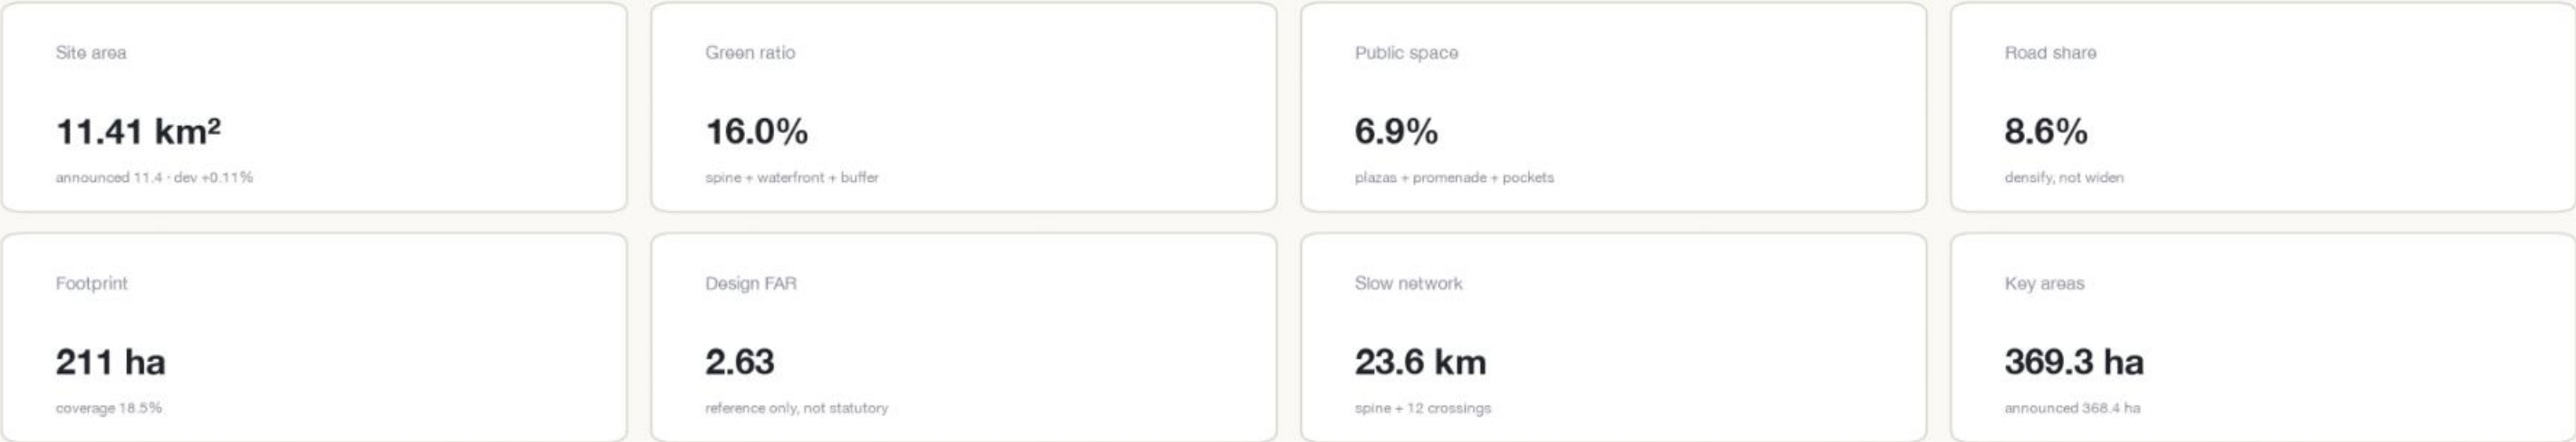

* industry test & validation scenarios; all with privacy boundary + human review

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

Metrics Recalculation & Evidence Chain

All metrics recomputed from package GeoJSON in EPSG:4548; missing official controls explicitly registered; check chain: deterministic - spatial - visual - professional

Centennial Jing-Zhang AI Innovation Belt

Evidence chain

Pending official data (registered unknown; no statutory claim)

Official redlines & key-area polygons · statutory FAR/height/density/green controls · road redlines · building & tenure baseline · heritage control lines · utilities

Boundary status: provisional rough boundary fitted from the announcement text; not an official redline; full recalculation once official polygons are released. Derived programmatically from package GeoJSON/metrics.

S01 Crossing Guardian

12 crossings | AI crossing & accessibility; anonymous stats, no face recognition

S02 Heritage Storyteller

Forward Track | multilingual guide; opt-in; expert-reviewed

S03 Origin Hall

Origin | 24h dev commons ops; human-confirmed

S04* Proving Ground

Switchback | graded embodied-AI testing; redacted archive; ethics review

S05* Qinghe Waterfront

Qinghe | environmental AI; sensors only; human-reviewed

S06* Smart Market

Gateway | AI-native retail validation; anonymous flow; stop-on-complaint

S07 Model Hospital

Origin | public evals & red-team shows; human-signed results

S08 City Memory

Crossing Museum | oral history co-editing; subject-confirmed

S09 School Route

Xueyuan Rd | segment-level safety; no individual ID; opt-in

S10 Energy Return

Belt-wide | compute-heat recovery & microgrid; human-attended

S11 Silver Companion

Communities | elder-care AI; fully voluntary; human takeover

S12 Global Link

3 stations + online | global events; human-checked translation

Six personas

Full-stack researcher / startup founder / Xueyuan Rd student / original & senior residents / international visitor & AI pilgrim / city operations worker / city's boss (happy to help to adjust AI service) / Kowloon Square / MaRS / Shenzhen Nanshan. One transferable mechanism each.

Six global cases

Brand & naming

Master name "The Ren Line"; hierarchy line-station-crossing-yard; logo: REN strokes + origin ring; open-source type, no unauthorized marks. Ren Loop Week (flagship) / quarterly red-team shows / monthly crossing fairs / Rail Hack / governance roundtable; crossing-community chapters; city training log; green-amber-red states; Ren Prize & milestones.

Events & operations

P1 2026-2028

Origin Hall renewal / crossing demos D4-D6 / Smart Market pilot / milestones phase 1. Policy: interface pacts, scenario permits.

P2 2028-2031

Proving Ground / Qinghe Waterfront / Return Track renewal / all crossings / Ren Monument. Policy: milestone fund.

P3 2031-2035

Amphitheater / Bell & Compute Grove / Energy-Carbon Return / global events. Policy: loop operating company.

Risk & copyright

Provisional boundary is not an official redline; no statutory conclusions; all scenarios privacy-bounded with human review; figures derived programmatically; see copyright statement.
