

B1 · Overall Design Structure

One Line · One Network · Three Stations · Two Wings · Multi-point Mending

Jing-Zhang Token Line — Overall Concept

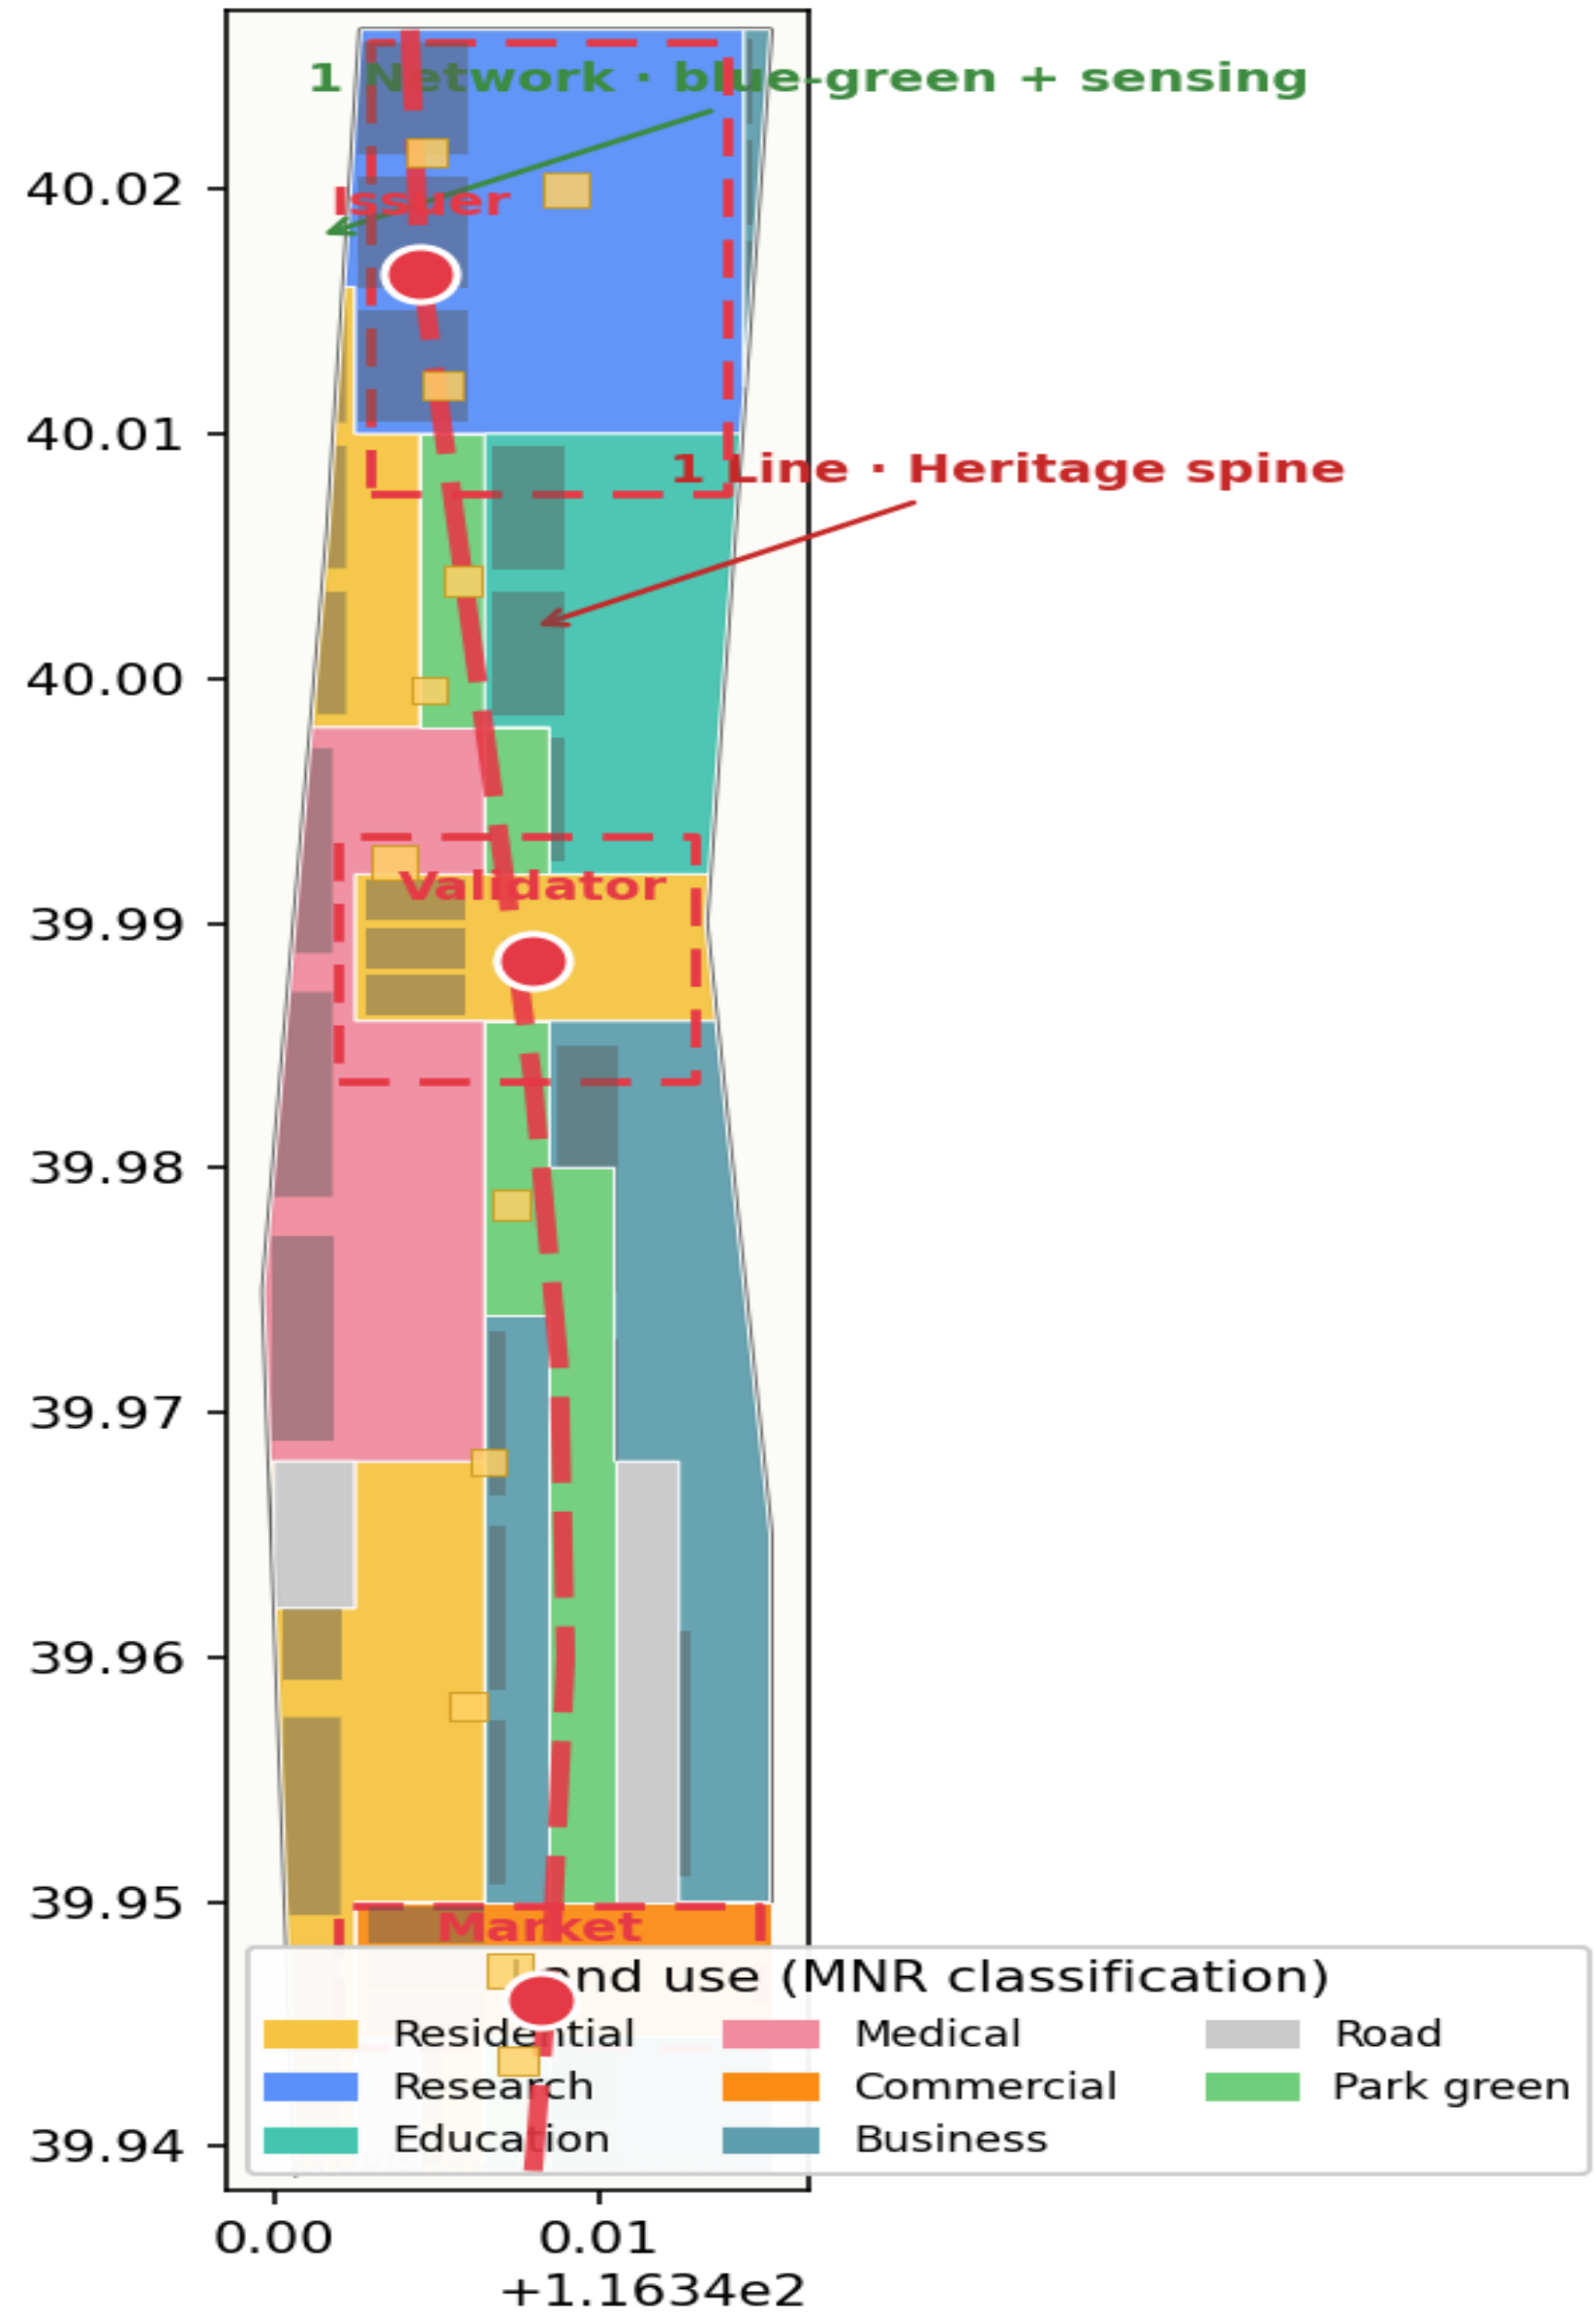

Source: submitted geometry (provisional constraint, EPSG:4326 display) · Agent-generated concept diagram

The Token Line — heritage spine, blue-green + sensing network, three token-station anchors, two wings.

B2 · Land Use & Urban Renewal

20 parcels · no gaps · MNR 2023 codes

Land Use Structure — One Line · One Network · Three Stations · Two Wings

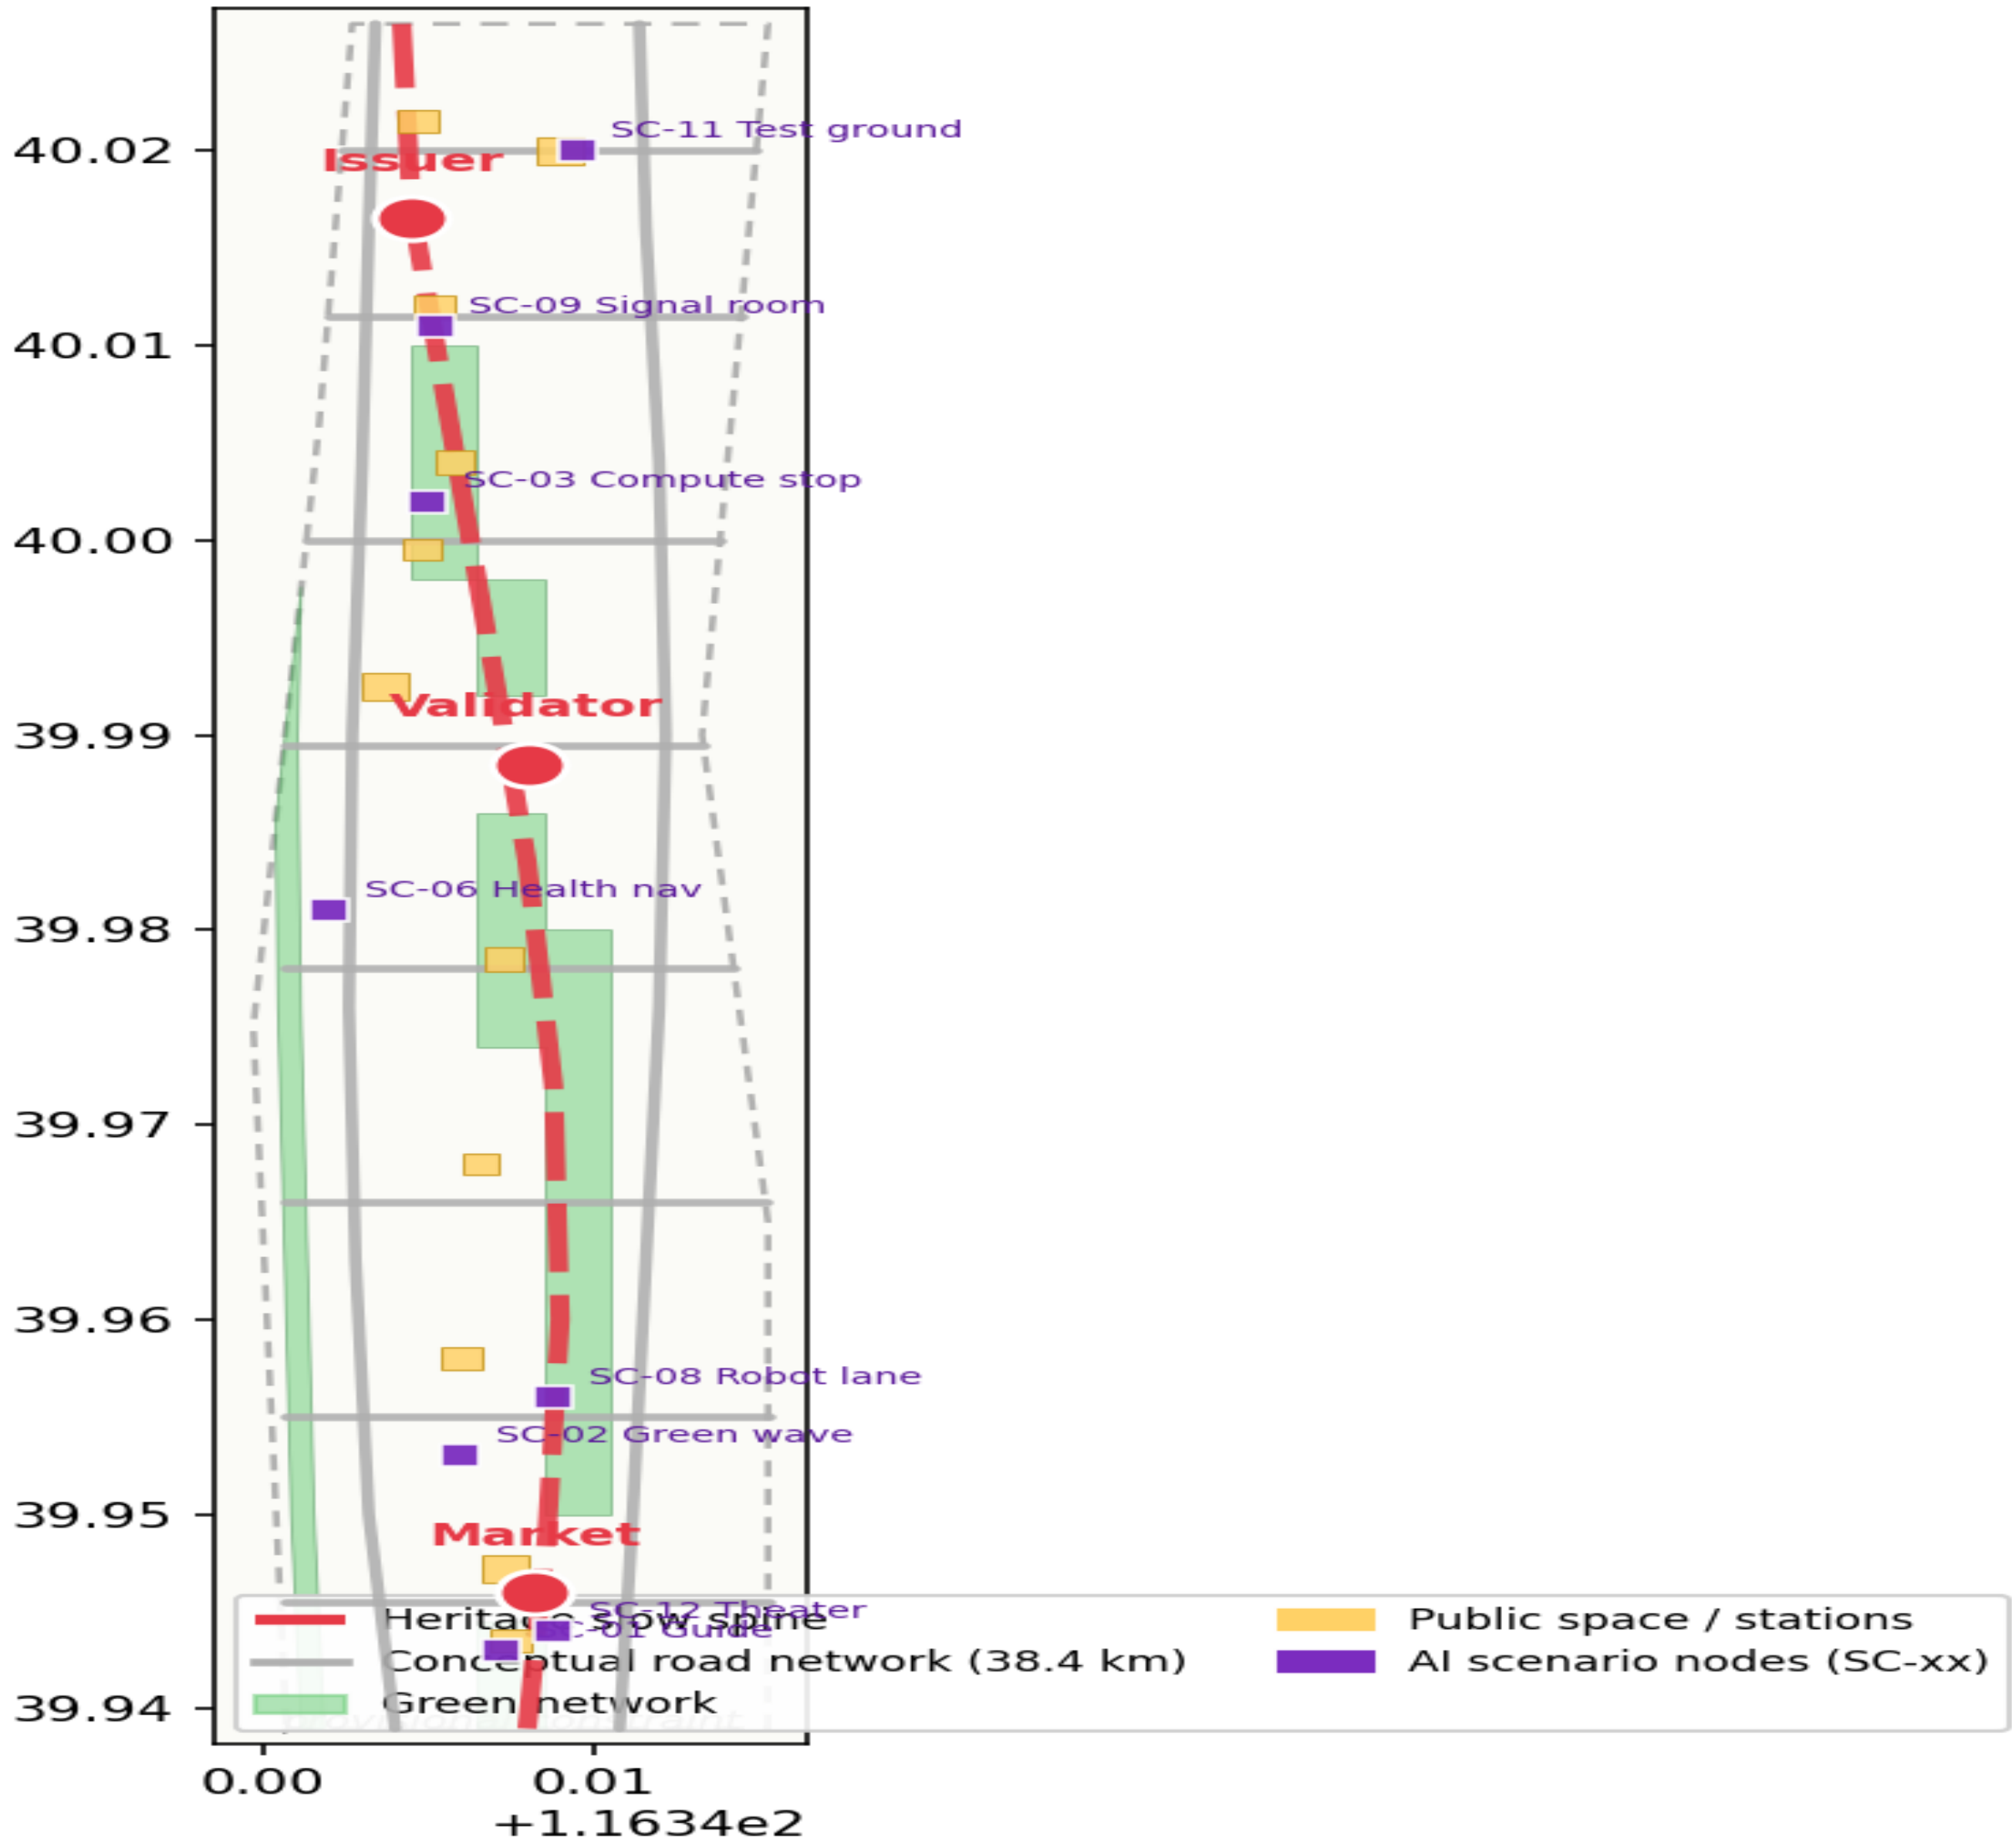

Research-led mix; preserve / retrofit / infill / reserve renewal classes.

B3 · Mobility, Rail & Municipal Support

38.4 km concept network · barrier-free green wave

Mobility, Blue-Green Network and AI Scenario Nodes

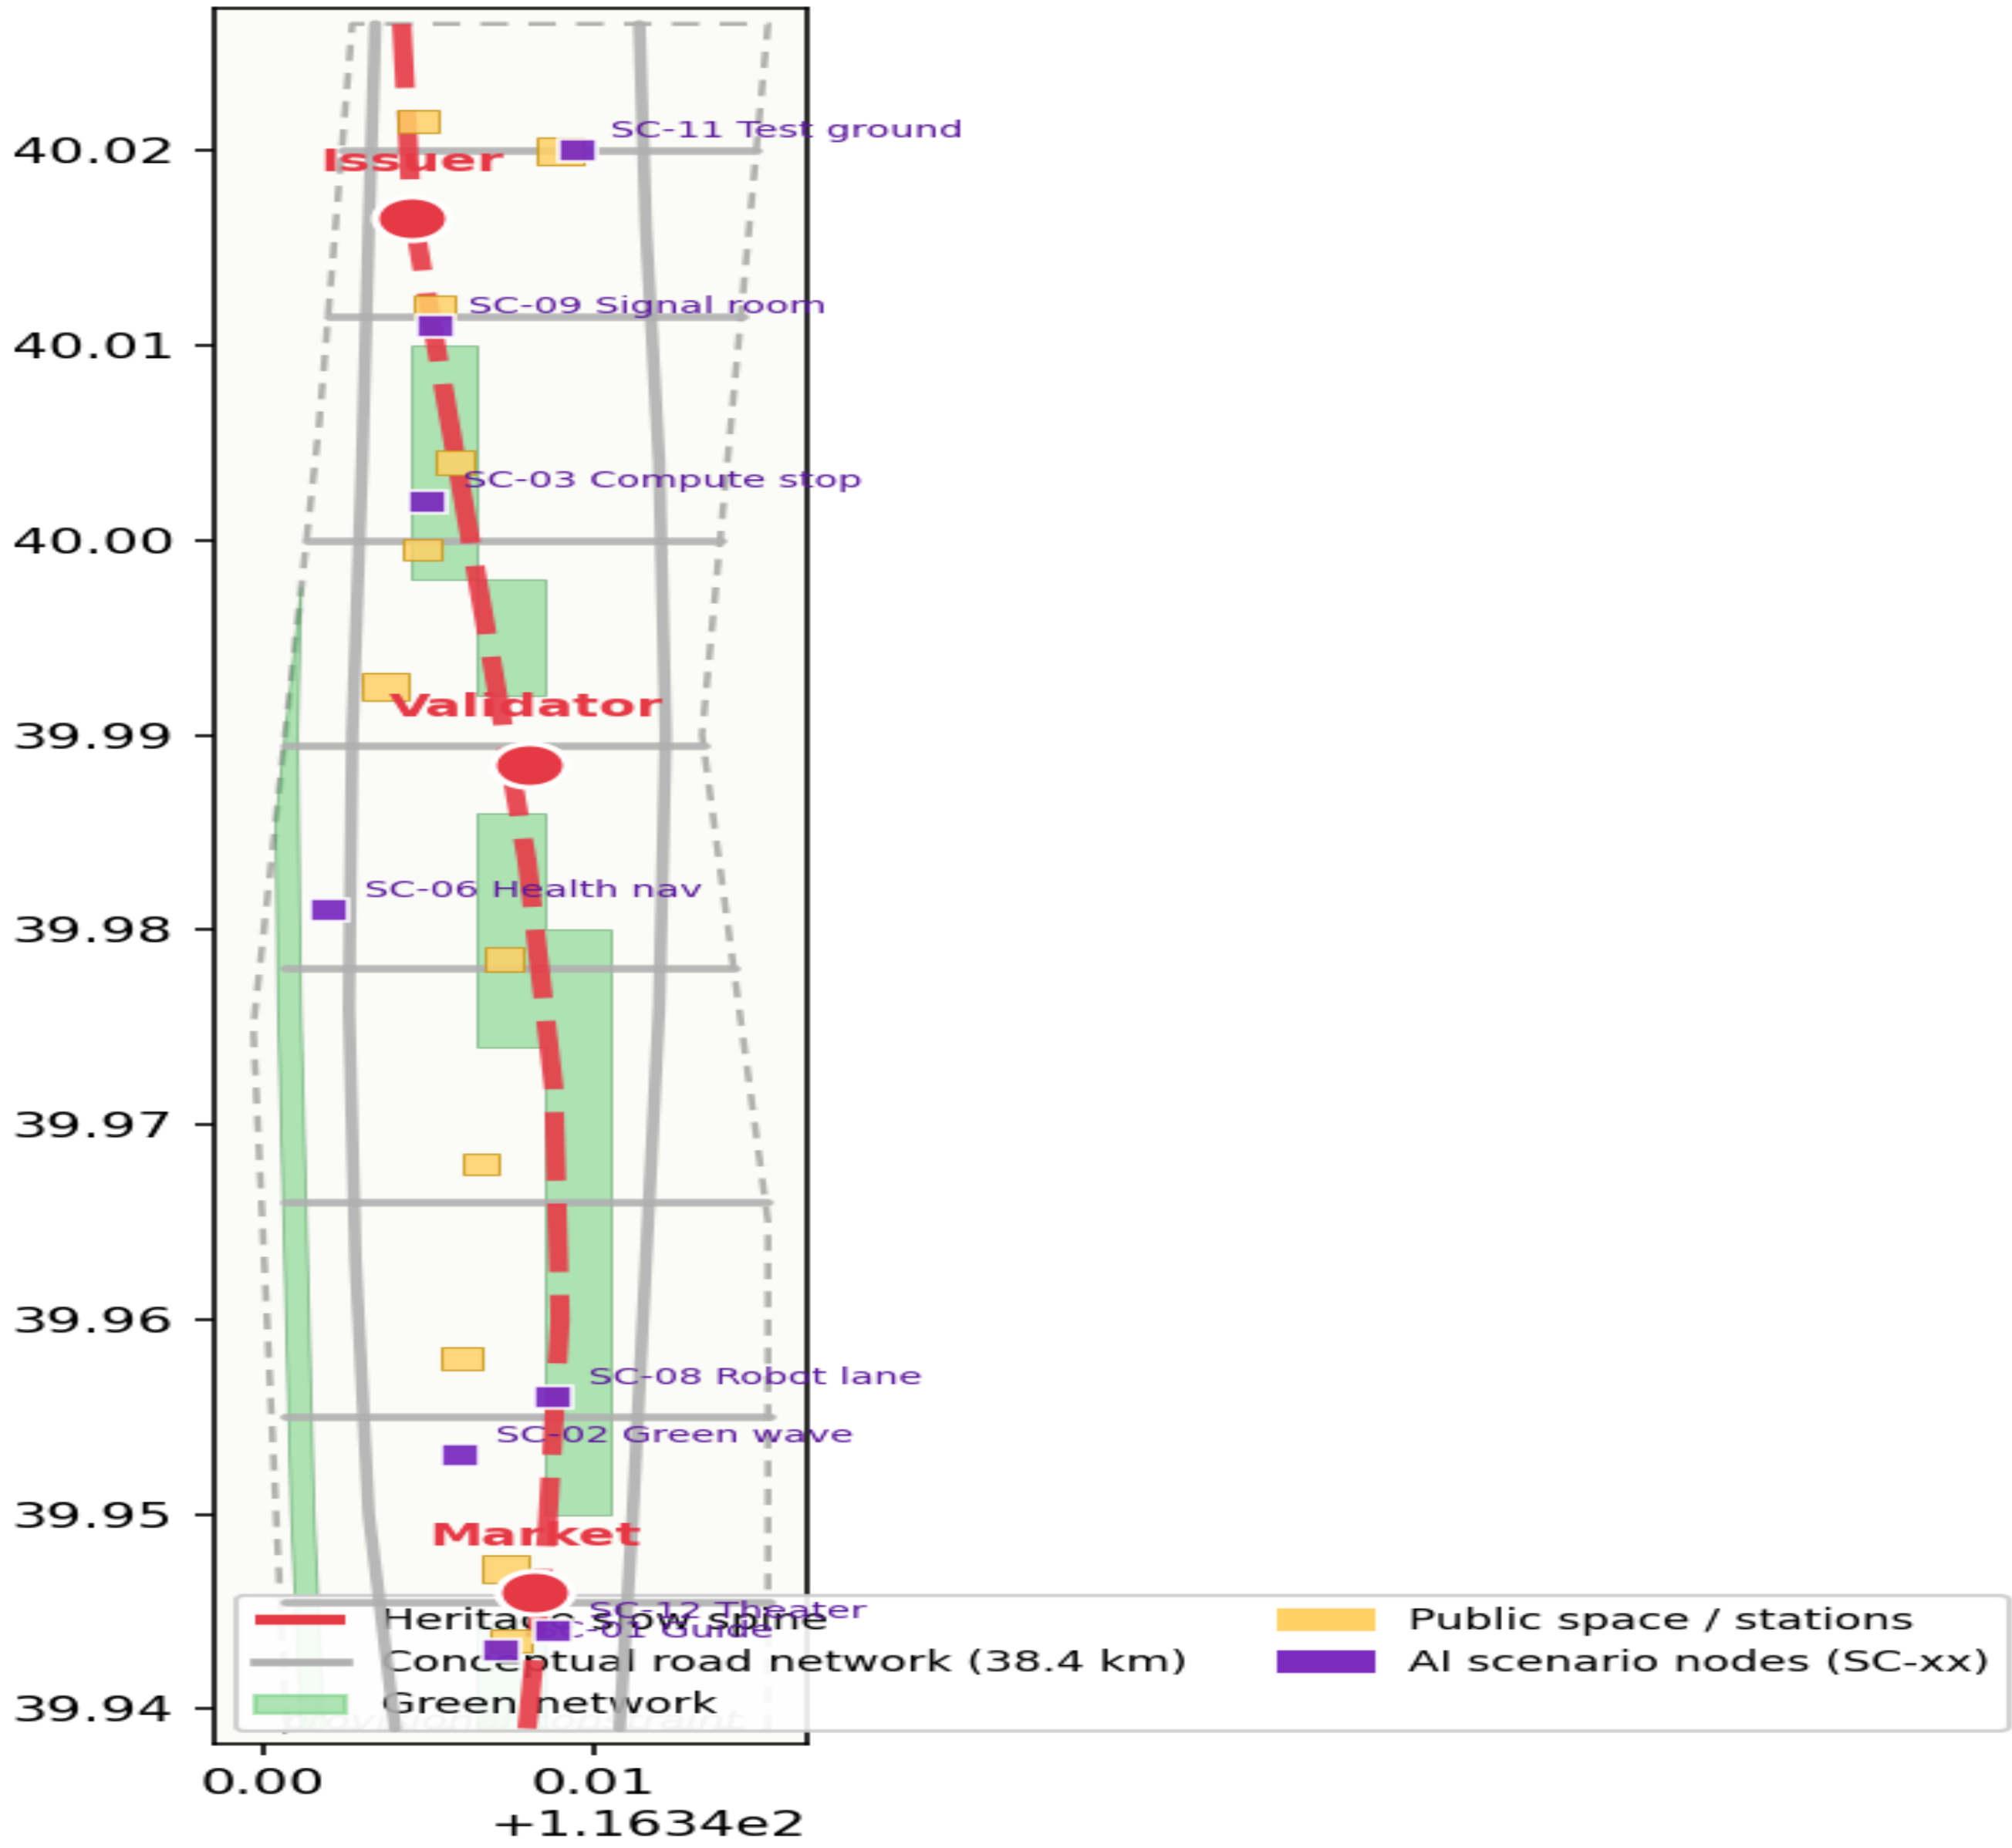

Transit integration at three stations; edge compute, distributed energy, and sensing fused with municipal systems.

B4 · Heritage Park Vitality Belt & Blue-Green

green 13.9% · public space 2.0% (concept)

Mobility, Blue-Green Network and AI Scenario Nodes

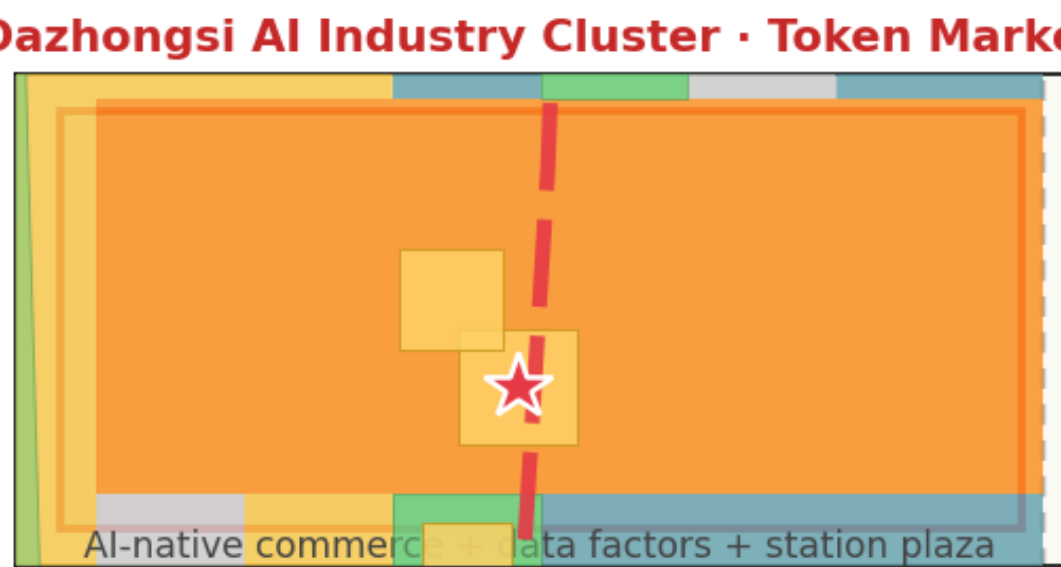

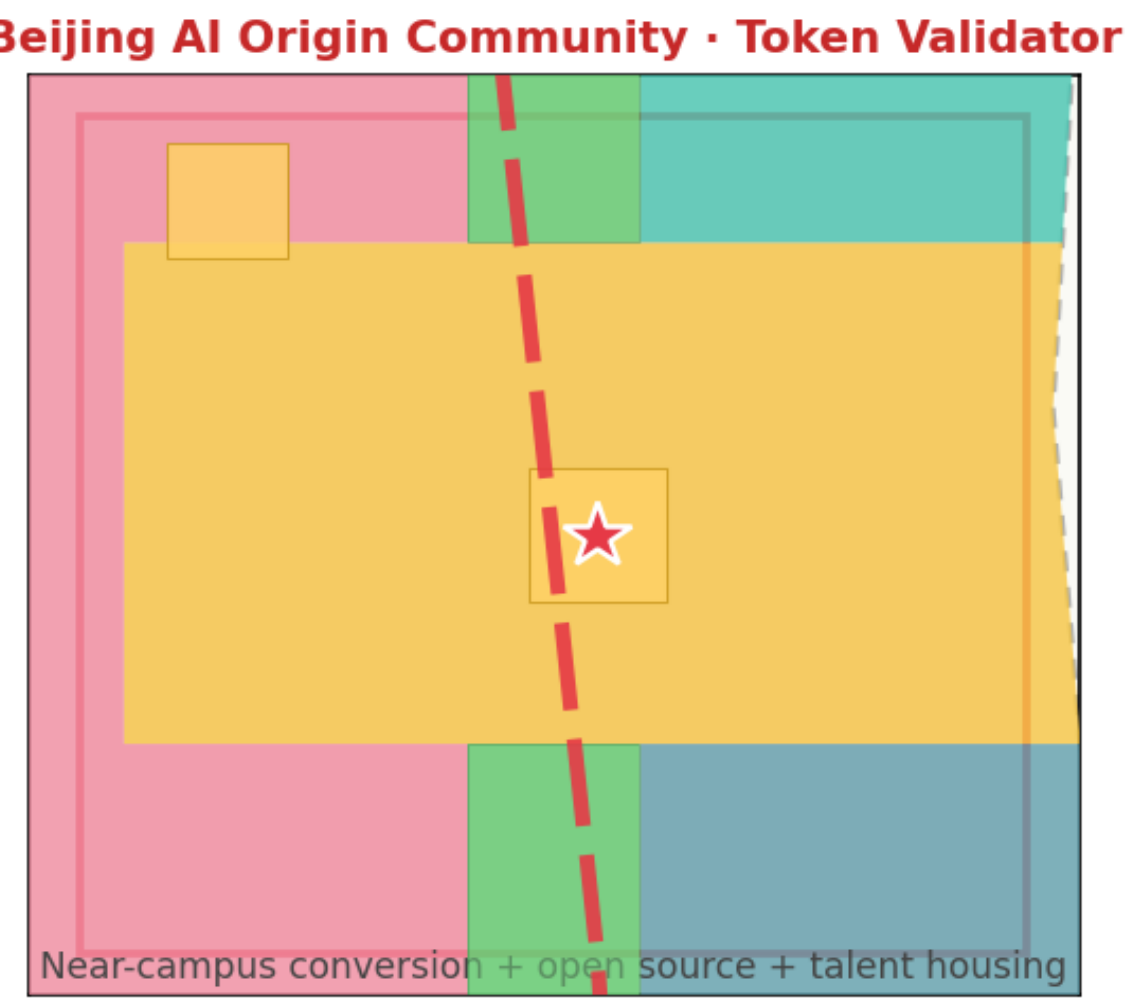

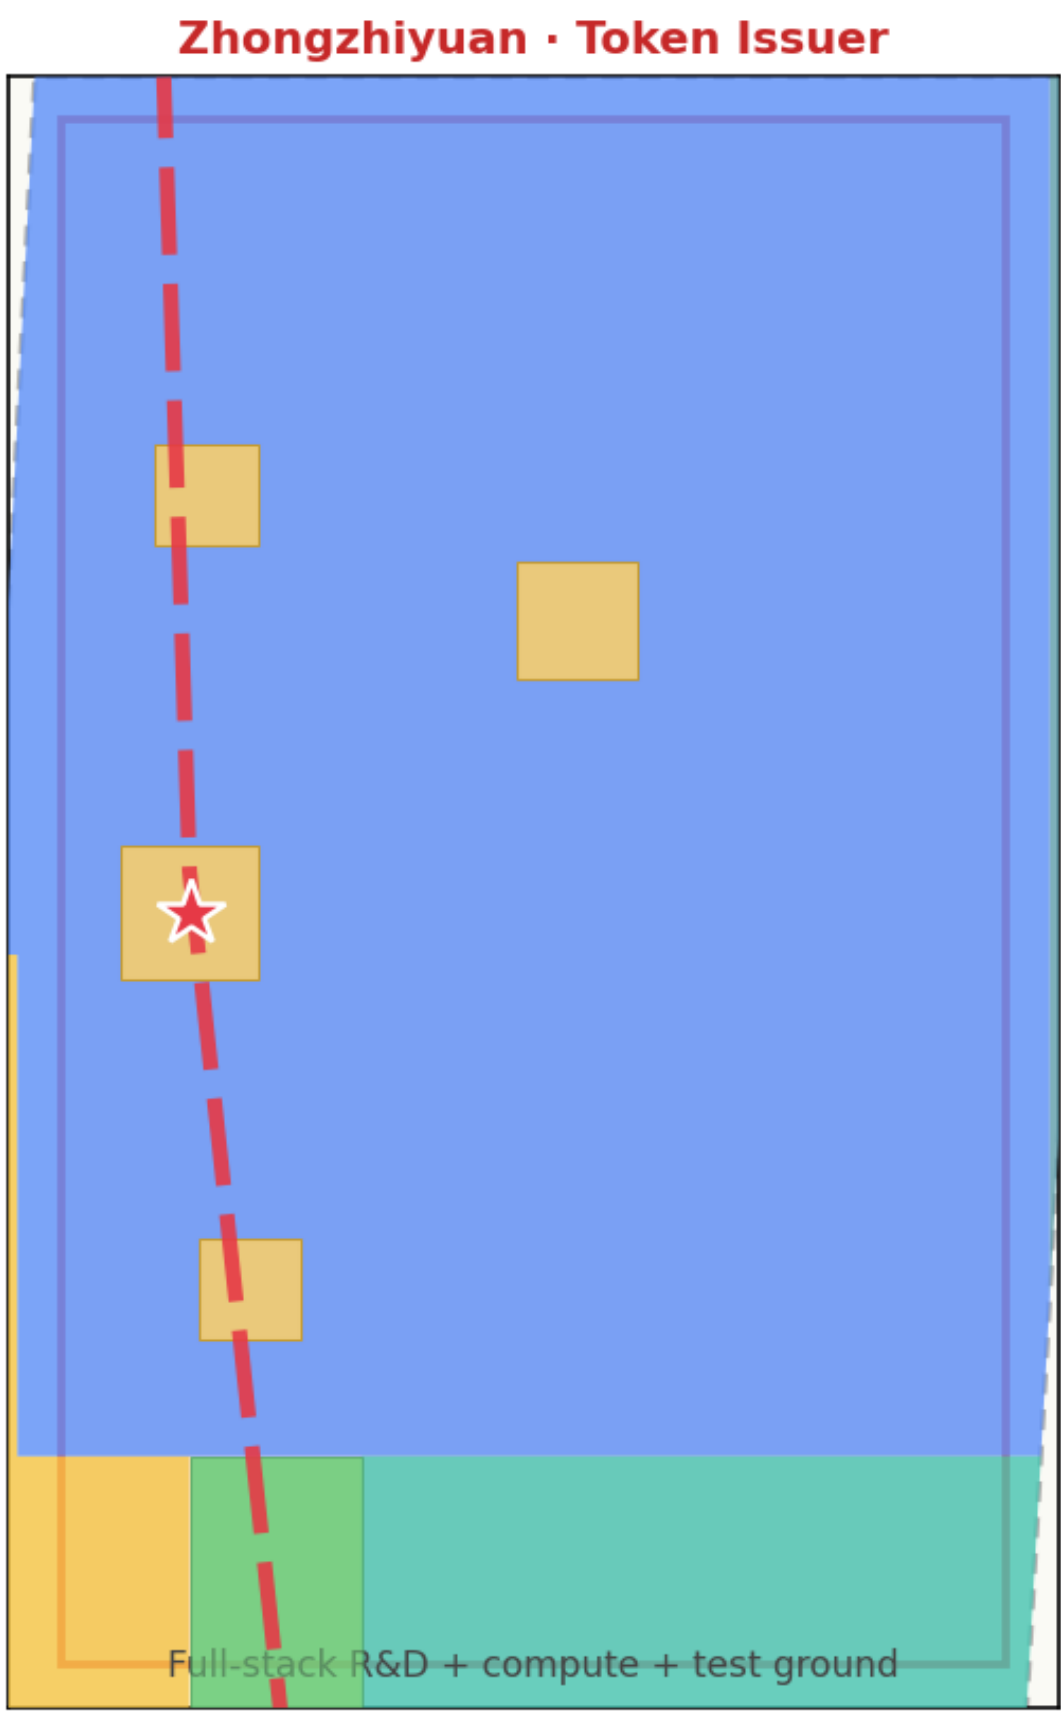

One Belt (heritage park) + One River (Xiaoyue) + Many Parks; 14 public spaces; landmark honor system.

B5 · Three Key Areas Detailed Design

[Issuer](#) / [Validator](#) / [Market](#)

Detailed Design of Three Key Areas

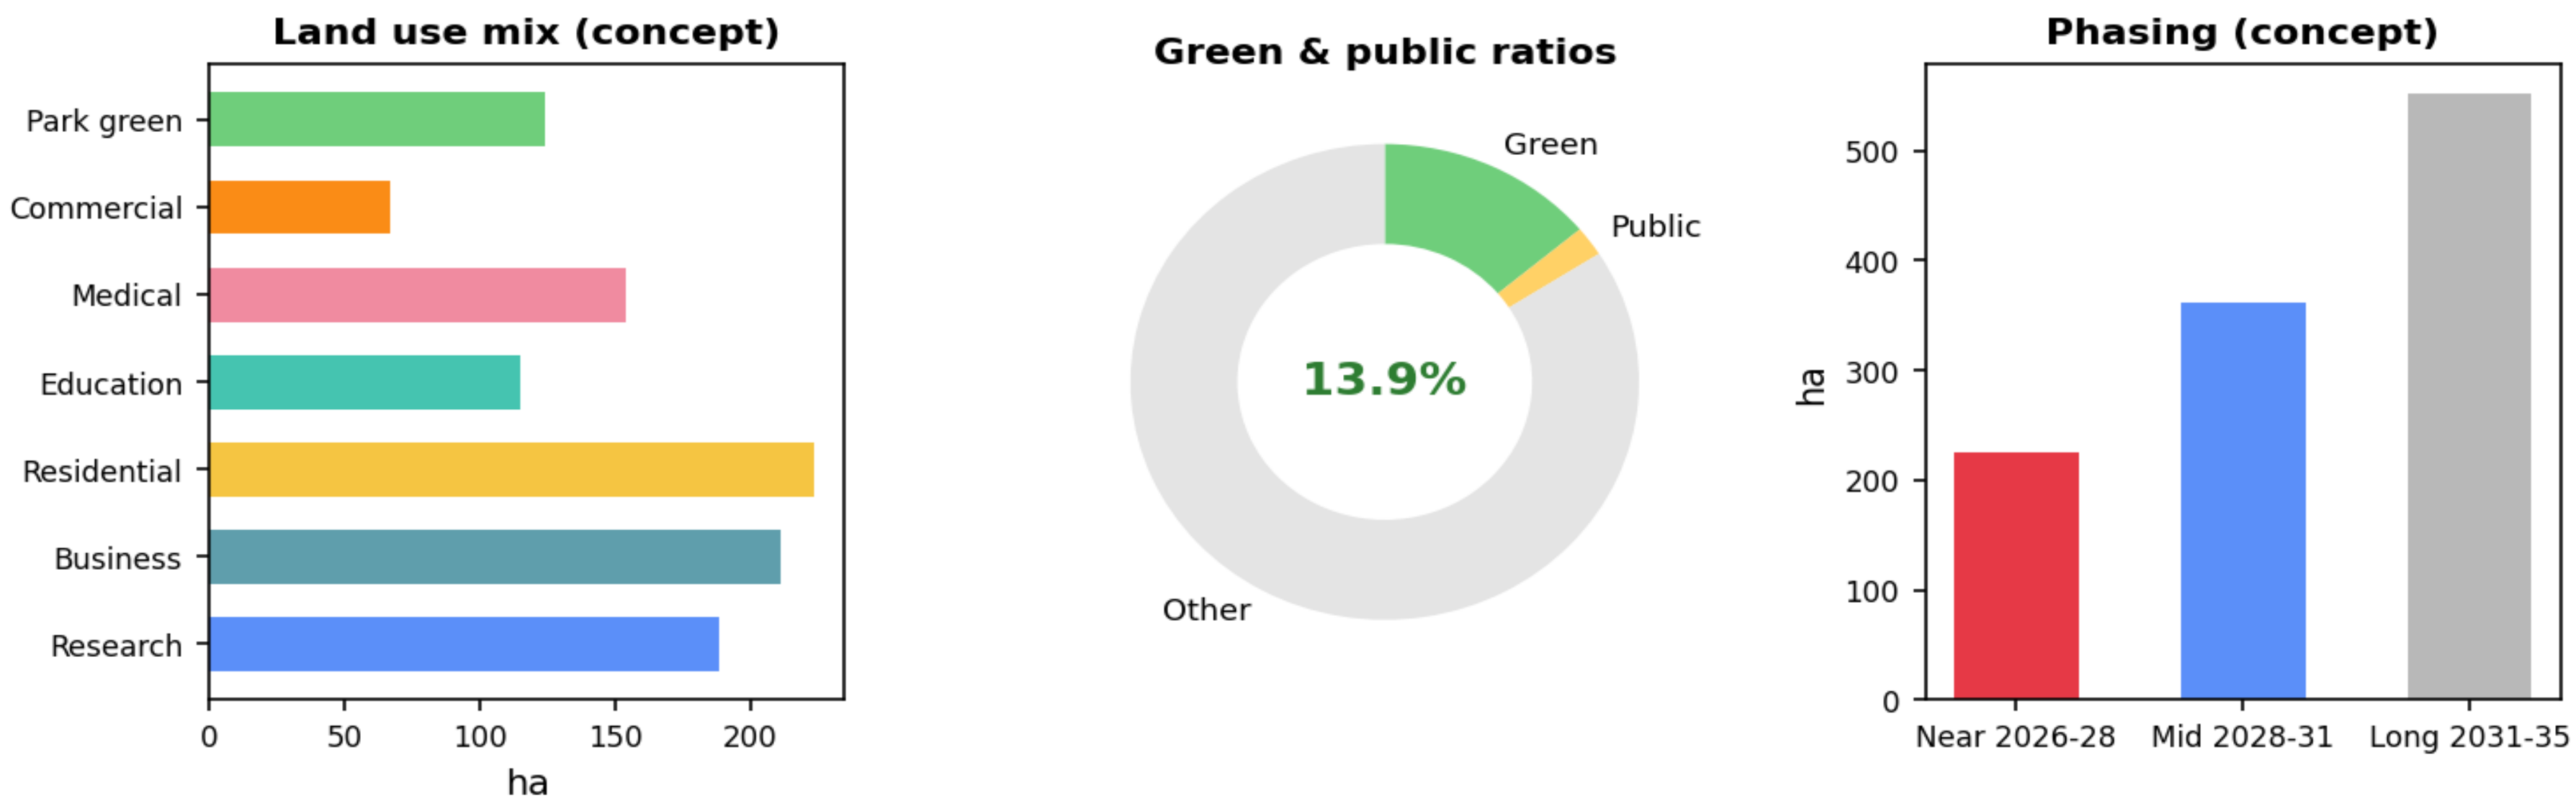

Source: geometry/key_areas.geojson (provisional constraint) · conceptual design diagram

Zhongzhiyuan (192 ha) · Origin Community (104 ha) · Dazhongsi (72 ha) — provisional polygons, directional design.

B6 · AI Scenarios, Landmarks & Operations

[12 scenario cards](#) · [3 test scenarios](#) · [4-season events](#)

Metrics Recalculation and Evidence Chain

Every known metric is recomputable from submitted geometry; FAR/height stay unknown pending official controls.

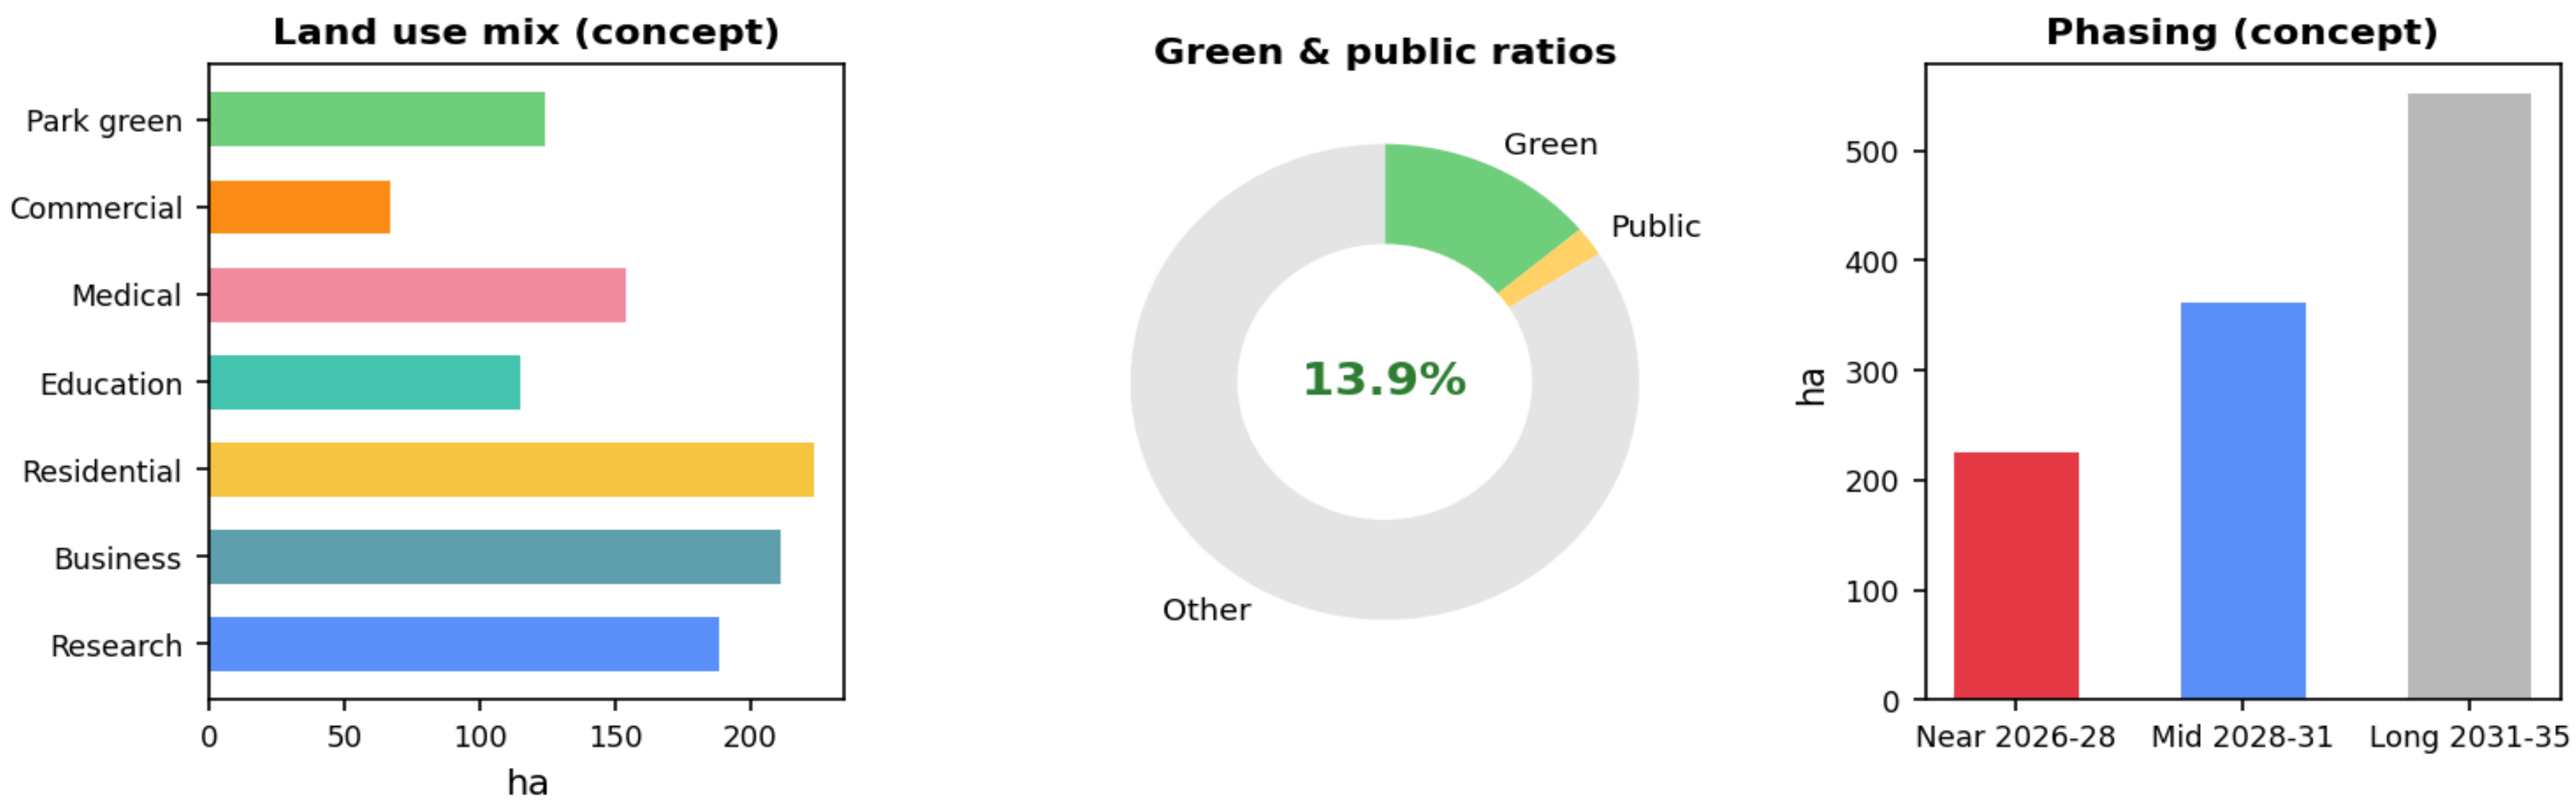

Provisional boundary values are interim design-model values, not official redlines.

Token-system admission loop; Validator Tower, Token Museum, Issuer Plaza; Spring/Summer/Autumn/Winter events.

B7 · Metrics, Compliance & Evidence

EPSG:4548 recomputation · 15 depth items complete

Metrics Recalculation and Evidence Chain

Every known metric is recomputable from submitted geometry; FAR/height stay unknown pending official controls.

Provisional boundary values are interim design-model values, not official redlines.

All known metrics recomputable from submitted geometry; FAR/height unknown pending official controls; provisional boundary disclosed.
