

The Token Line

From a century of railway staff tokens to trusted transit in the AI era

Centennial Jing-Zhang AI Innovation Belt · Urban design open call · formal AI submission

One Line · One Network · Three Token Stations · Two Wings

Zhongzhiyuan Issuer / Origin Validator / Dazhongsi Market

Concept proposal — not a statutory plan

Jing-Zhang Token Line — Overall Concept

Source: submitted geometry (provisional constraint, EPSG:4326 display) · Agent-generated concept diagram

1. Design Basis and Source List

- Primary basis: official prequalification announcement (2026-05-09); structured brief in brief/site-package/.
- Professional standards from local snapshots (MOHURD/MNR/CAC/NPC); AI compliance per Generative AI Interim Measures and Barrier-Free Law.
- Boundary disclosure: official redlines password-protected; provisional rough boundaries used and labeled provisional_constraint.
- All area outputs are interim design-model values; recompute when official polygons are published.

2. Three-Level Scope Framework

- Research area ~43.6 km² · Design area ~11.4 km² · Key areas ~368.4 ha.
- Research decides industry and future-city strategy; design maps renewal at regulatory-plan depth; key areas reach implementation-plan depth.
- One shared boundary, layer, metric, and standard set cascades across the three levels.

3. Coordinated Research: Industry & Future City

- Naming: The Token Line (■■■■■) — staff-token authorization translated into AI trusted transit.
- Logo motif: token disc + signal light + ren-shaped switchback; steel-grey / signal-red / innovation-blue.
- Five functions on a synergy loop: validate → issue → trade → service → empower → iterate.
- 8 global ecosystem cases (Kendall Square, Station F, one-north, Bengaluru, Pangyo, Shenzhen, Tel Aviv, Zhongguancun).

4. Overall Design: Renewal & Regulatory-Plan Depth

- Structure: One Line, One Network, Three Token Stations, Two Wings, Multi-point Mending.
- Land use: 20 conceptual parcels cover the boundary with no gaps; research/business/residential/education/medical/commercial/green mix.
- Renewal: preserve heritage / upgrade parks / mend gaps / reserve pending data.
- FAR, height, setbacks: unknown pending official regulatory conditions.

Land Use Structure — One Line · One Network · Three Stations · Two Wings

5. Detailed Design of Three Key Areas

- Zhongzhiyuan · Token Issuer (~192 ha): full-stack R&D;, compute, test ground, Issuer Plaza.
- Beijing AI Origin Community · Token Validator (~104 ha): near-campus conversion, open source, Validator Tower, honor wall.
- Dazhongsi AI Industry Cluster · Token Market (~72 ha): AI-native commerce, Token Museum, station plaza.
- All key-area polygons are provisional; directional design only.

Detailed Design of Three Key Areas

Source: geometry/key_areas.geojson (provisional constraint) · conceptual design diagram

6. AI Ecosystem, Personas & Scenarios

- 6 personas from startup developer to community elder.
- 12 scenario cards including 3 industry test/validation scenarios (data sandbox block, robot delivery token lane, AV test ground).
- Privacy: minimal necessary collection, human review, no approved-operation claims.

7. Land Use, Buildings & Retain-Renovate-Demolish

- 36 conceptual building footprints (~199.3 ha, density ~17.5%) as massing illustrations only.
- Retain / retrofit / infill / reserve classes with stated dependencies; no parcel-level conclusions before official data.
- Codes per MNR 2023 land-use classification guide.

8. Transport, Rail, Municipal & Public Services

- Transit integration at Dazhongsi/Wudaokou/Qinghua East Road West; barrier-free green-wave corridor on the heritage spine.
- Conceptual road network ~38.4 km as centerlines only.
- Distributed energy + edge compute + sensing fused with conventional municipal systems; capacities pending professional calculation.
- Dual circle: 15-minute living circle + innovation service circle.

Mobility, Blue-Green Network and AI Scenario Nodes

9. Blue-Green, Public Space & Character

- Green: One Belt (heritage park ~124 ha) + One River (Xiaoyue) + Many Parks; green ratio ~13.9% (concept).
- Public space: 14 plazas/living rooms/stops, ~23.2 ha, ratio ~2.0% (concept).
- Landmarks: Validator Tower, Token Museum, Issuer Plaza, signal-pole series, milestone inscriptions.
- Character: steel-grey base, signal-red accents, innovation-blue veins.

10. Renewal Projects, Policy & Phasing

- 8 renewal projects (JZ-01 ... JZ-08) with dependencies listed.
- Phasing: near 2026-28 (~226 ha), mid 2028-31 (~362 ha), long 2031-35 (~551 ha).
- Global AI events: Spring Developer Conference / Summer Scenario Day / Autumn Global AI Week / Winter Token Night.
- Token-system scenario admission: apply → issue → operate → review.

11. Metrics, Recalculation & Compliance

- Site ~11.41 km²; green ratio 13.9%; public ratio 2.0%; density 17.5%; network 38.4 km — all recomputed in EPSG:4548 from submitted geometry.
- compliance_matrix.json covers announcement 1.3/1.4/1.5 and agent.1–agent.6; 15 design-depth items complete.
- FAR and height remain unknown pending official controls.

Metrics Recalculation and Evidence Chain

Every known metric is recomputable from submitted geometry; FAR/height stay unknown pending official controls.

Provisional boundary values are interim design-model values, not official redlines.

12. Risk, Copyright & Compliance

- Public/cleared data only; no non-public planning drawings or personal information.
- Provisional boundary precision limits; pending regulatory/ownership/building/engineering conditions.
- AI scenarios designed under least-privilege and human-review principles.
- Copyright statement in report/copyright_statement.md.
