

Three key areas

Conceptual detailed-design anchors; provisional polygons shown as quiet outlines

EVIDENCE LAYERS

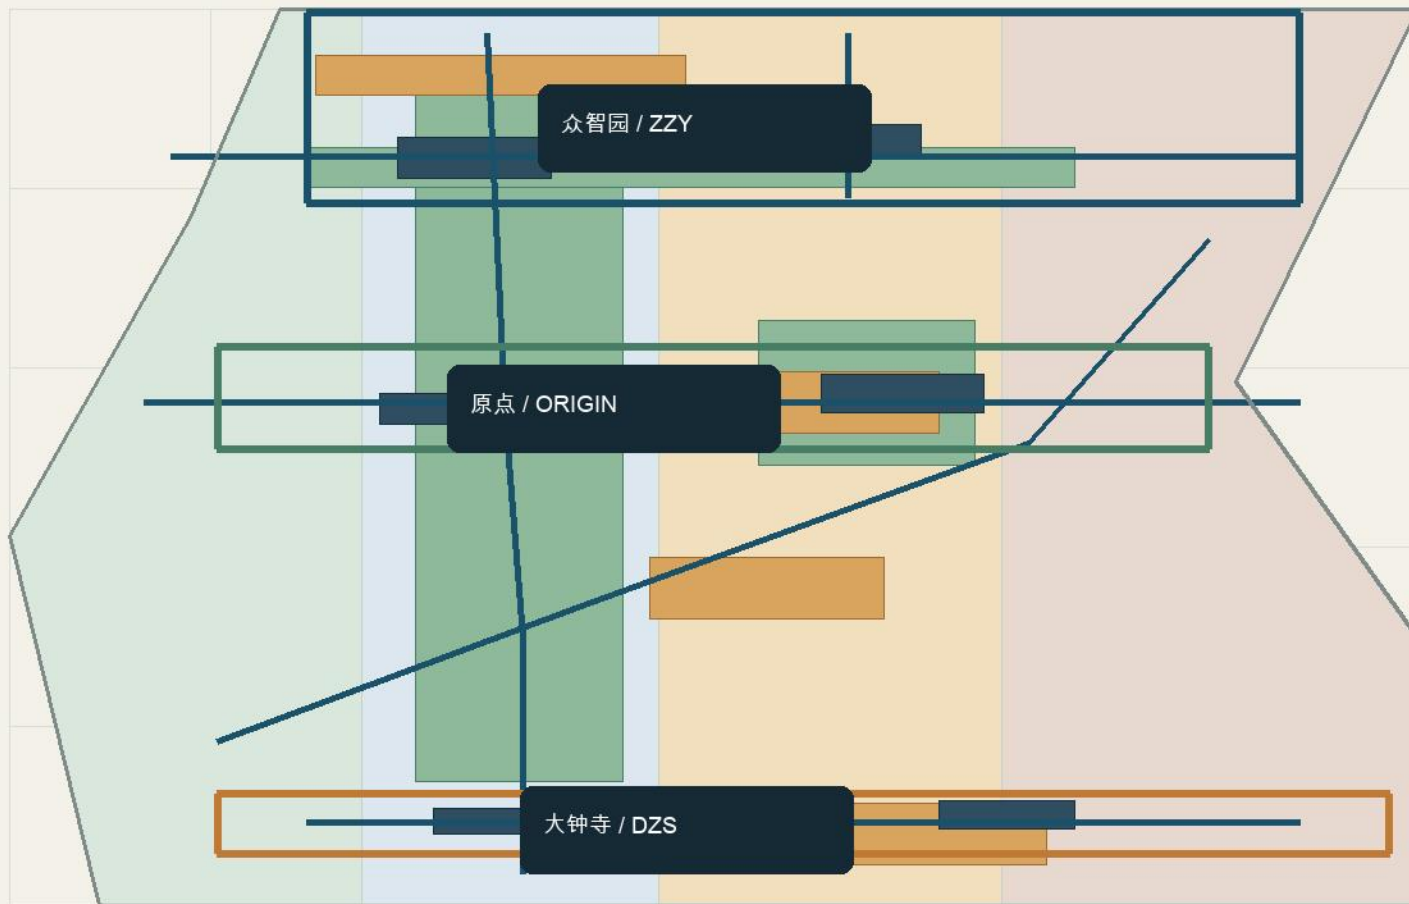

- AI / service land
- green-blue system
- public-space node
- building strategy
- slow mobility

Boundary: provisional
Role: design proposal
Area units: EPSG:4548
Source: site package +
agent-generated layers

Dashed boundary is a temporary intake geometry; it is not an official redline.

Metrics and evidence chain

Geometry-derived signals are design evidence; statutory controls remain pending.

Evidence protocol

- 1 GeoJSON features carry id / layer / source_type / confidence / geometry_role.
- 2 Area metrics are recomputed after projecting to EPSG:4548.
- 3 Provisional boundary is disclosed in proposal, sources, assumptions and visual.
- 4 FAR, height, ownership, road redlines and utilities remain unknown until official files arrive.
