

A0 Board 1: Overall Concept

Concept: JingZhang Intelligence Spine (JZIS)

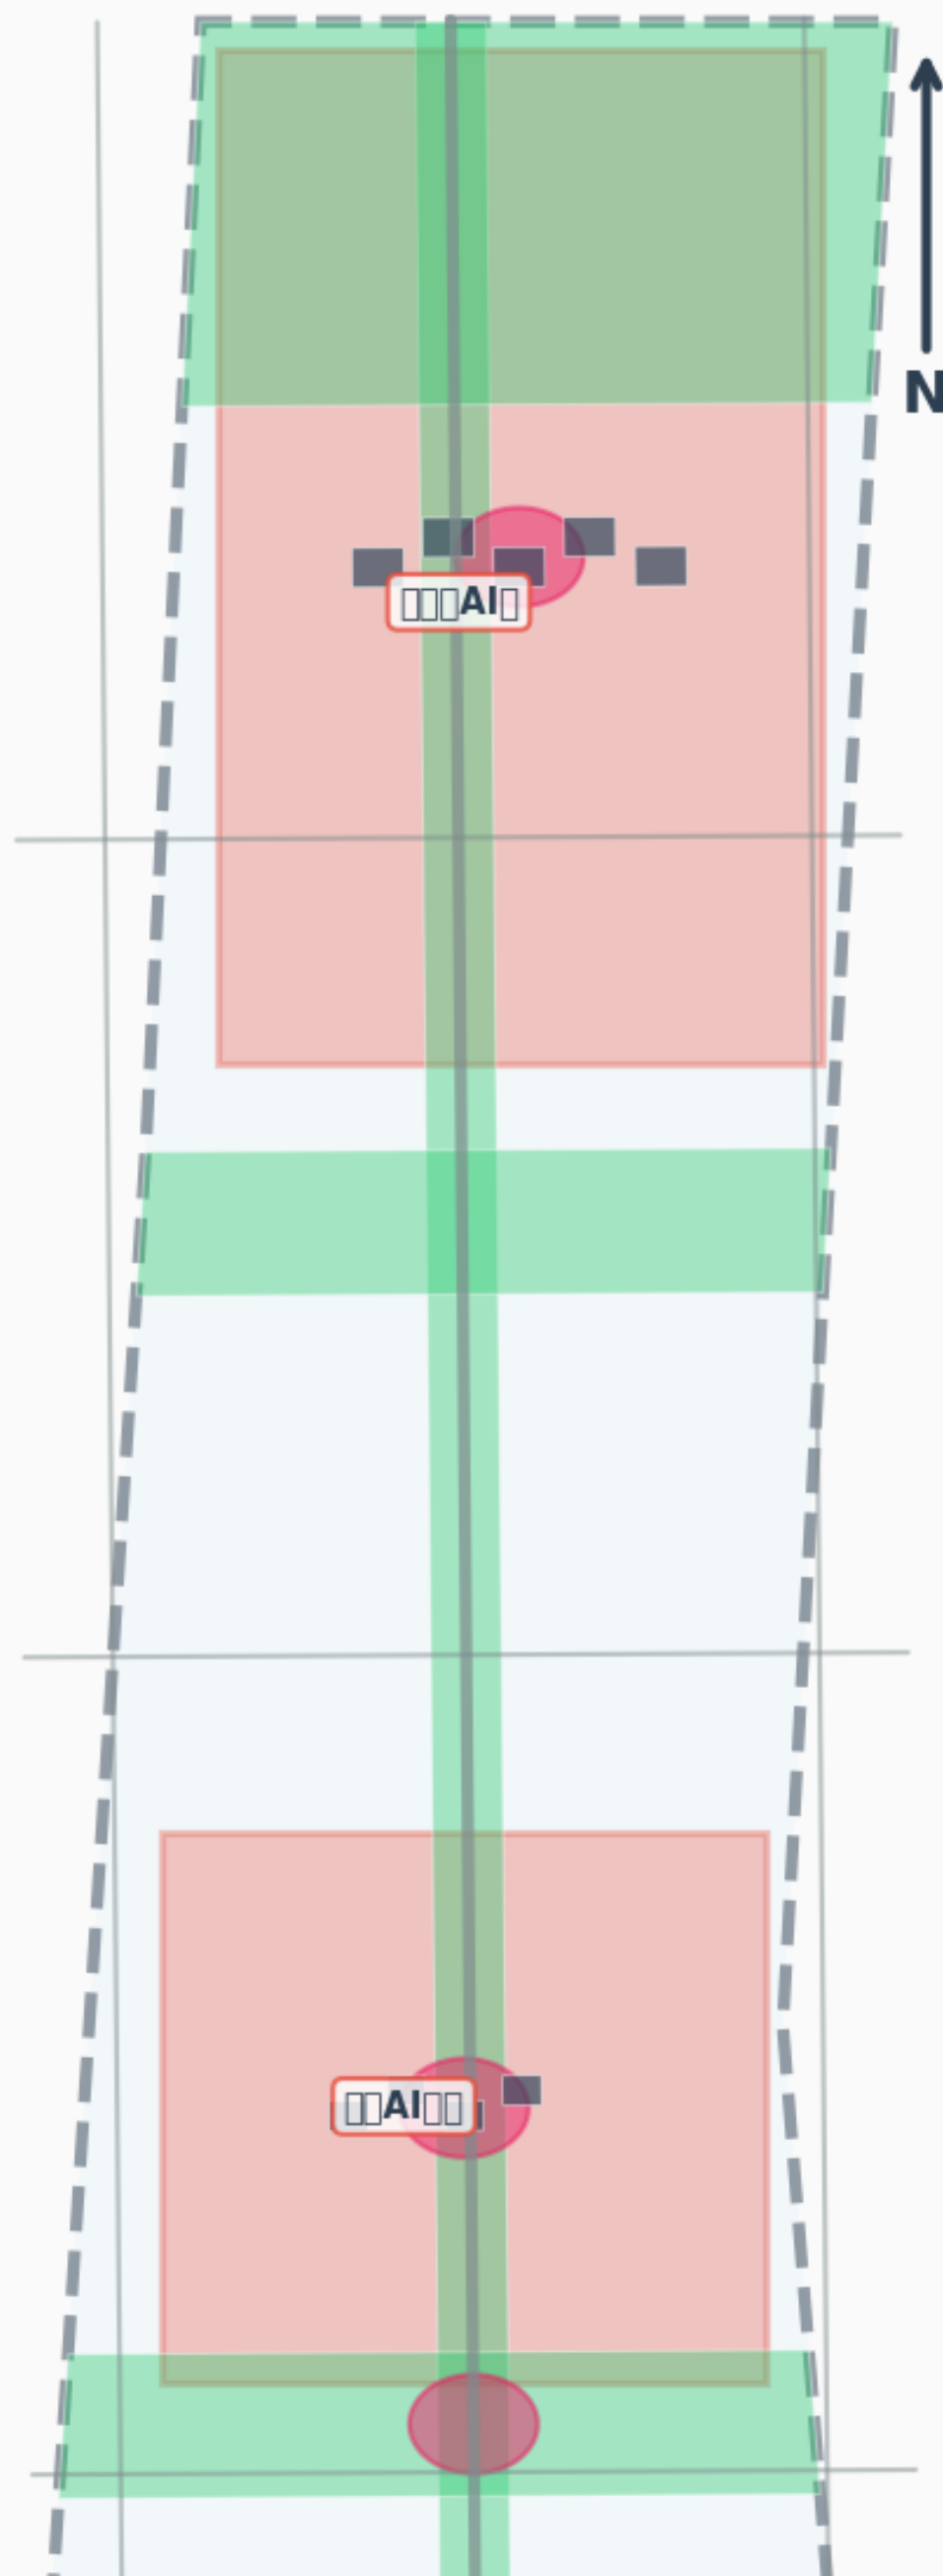

The JingZhang Railway, designed by Zhan Tianyou in 1909, used a 'ren' (person) shaped switchback to conquer steep gradients. Today, this same corridor becomes an AI innovation belt: the engineering spirit of overcoming constraints through spatial intelligence meets the AI spirit of optimizing through data.

Structure: One Spine (JingZhang Heritage Park green spine, ~9km), Three Cores (Zhongzhiyuan Acceleration, Origin Community, Dazhongsi Convergence), Two Wings (Zhongguancun Service Wing, Xiaoyuehe Scenario Wing).

Gradient Narrative: South (Dazhongsi) = Departure, Middle (Origin Community) = Acceleration, North (Zhongzhiyuan) = Summit.
