

01 Overall Structure • One Spine Two Rails Three Stations

Spine as roadbed; Zhongguancun Tech Services Wing × Xiaoyue River Scenario Enablement Wing as twin rails; Zhongzhi/Origin/Dazhong as three stations.

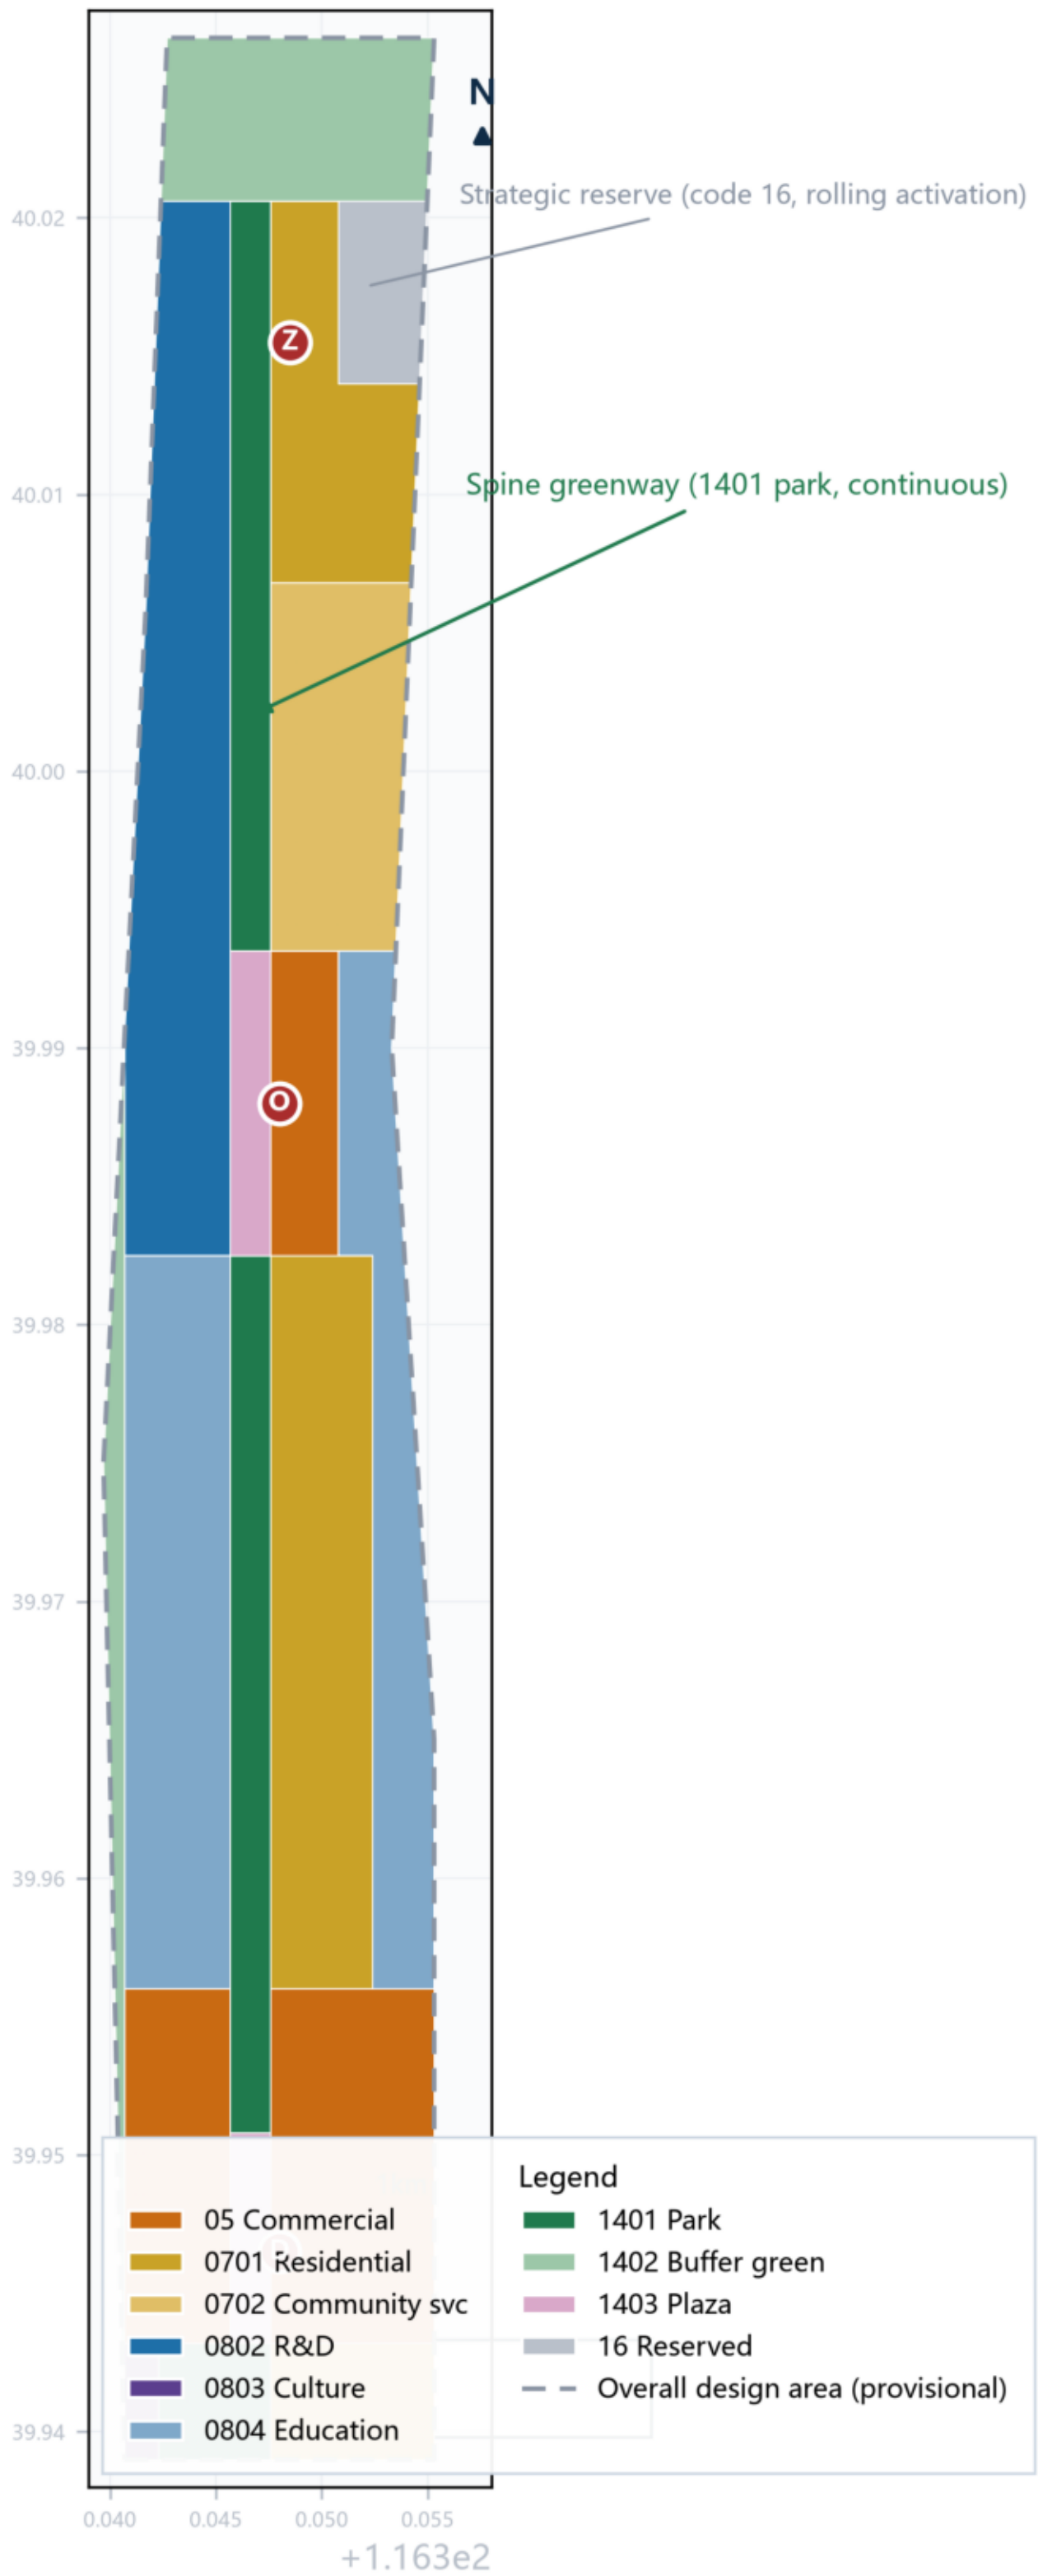

02 Land Use & Renewal • Topologically Complete

19 land-use cells cover the overall design area with gap=0, overlap=0; classes follow the national land-use guide.

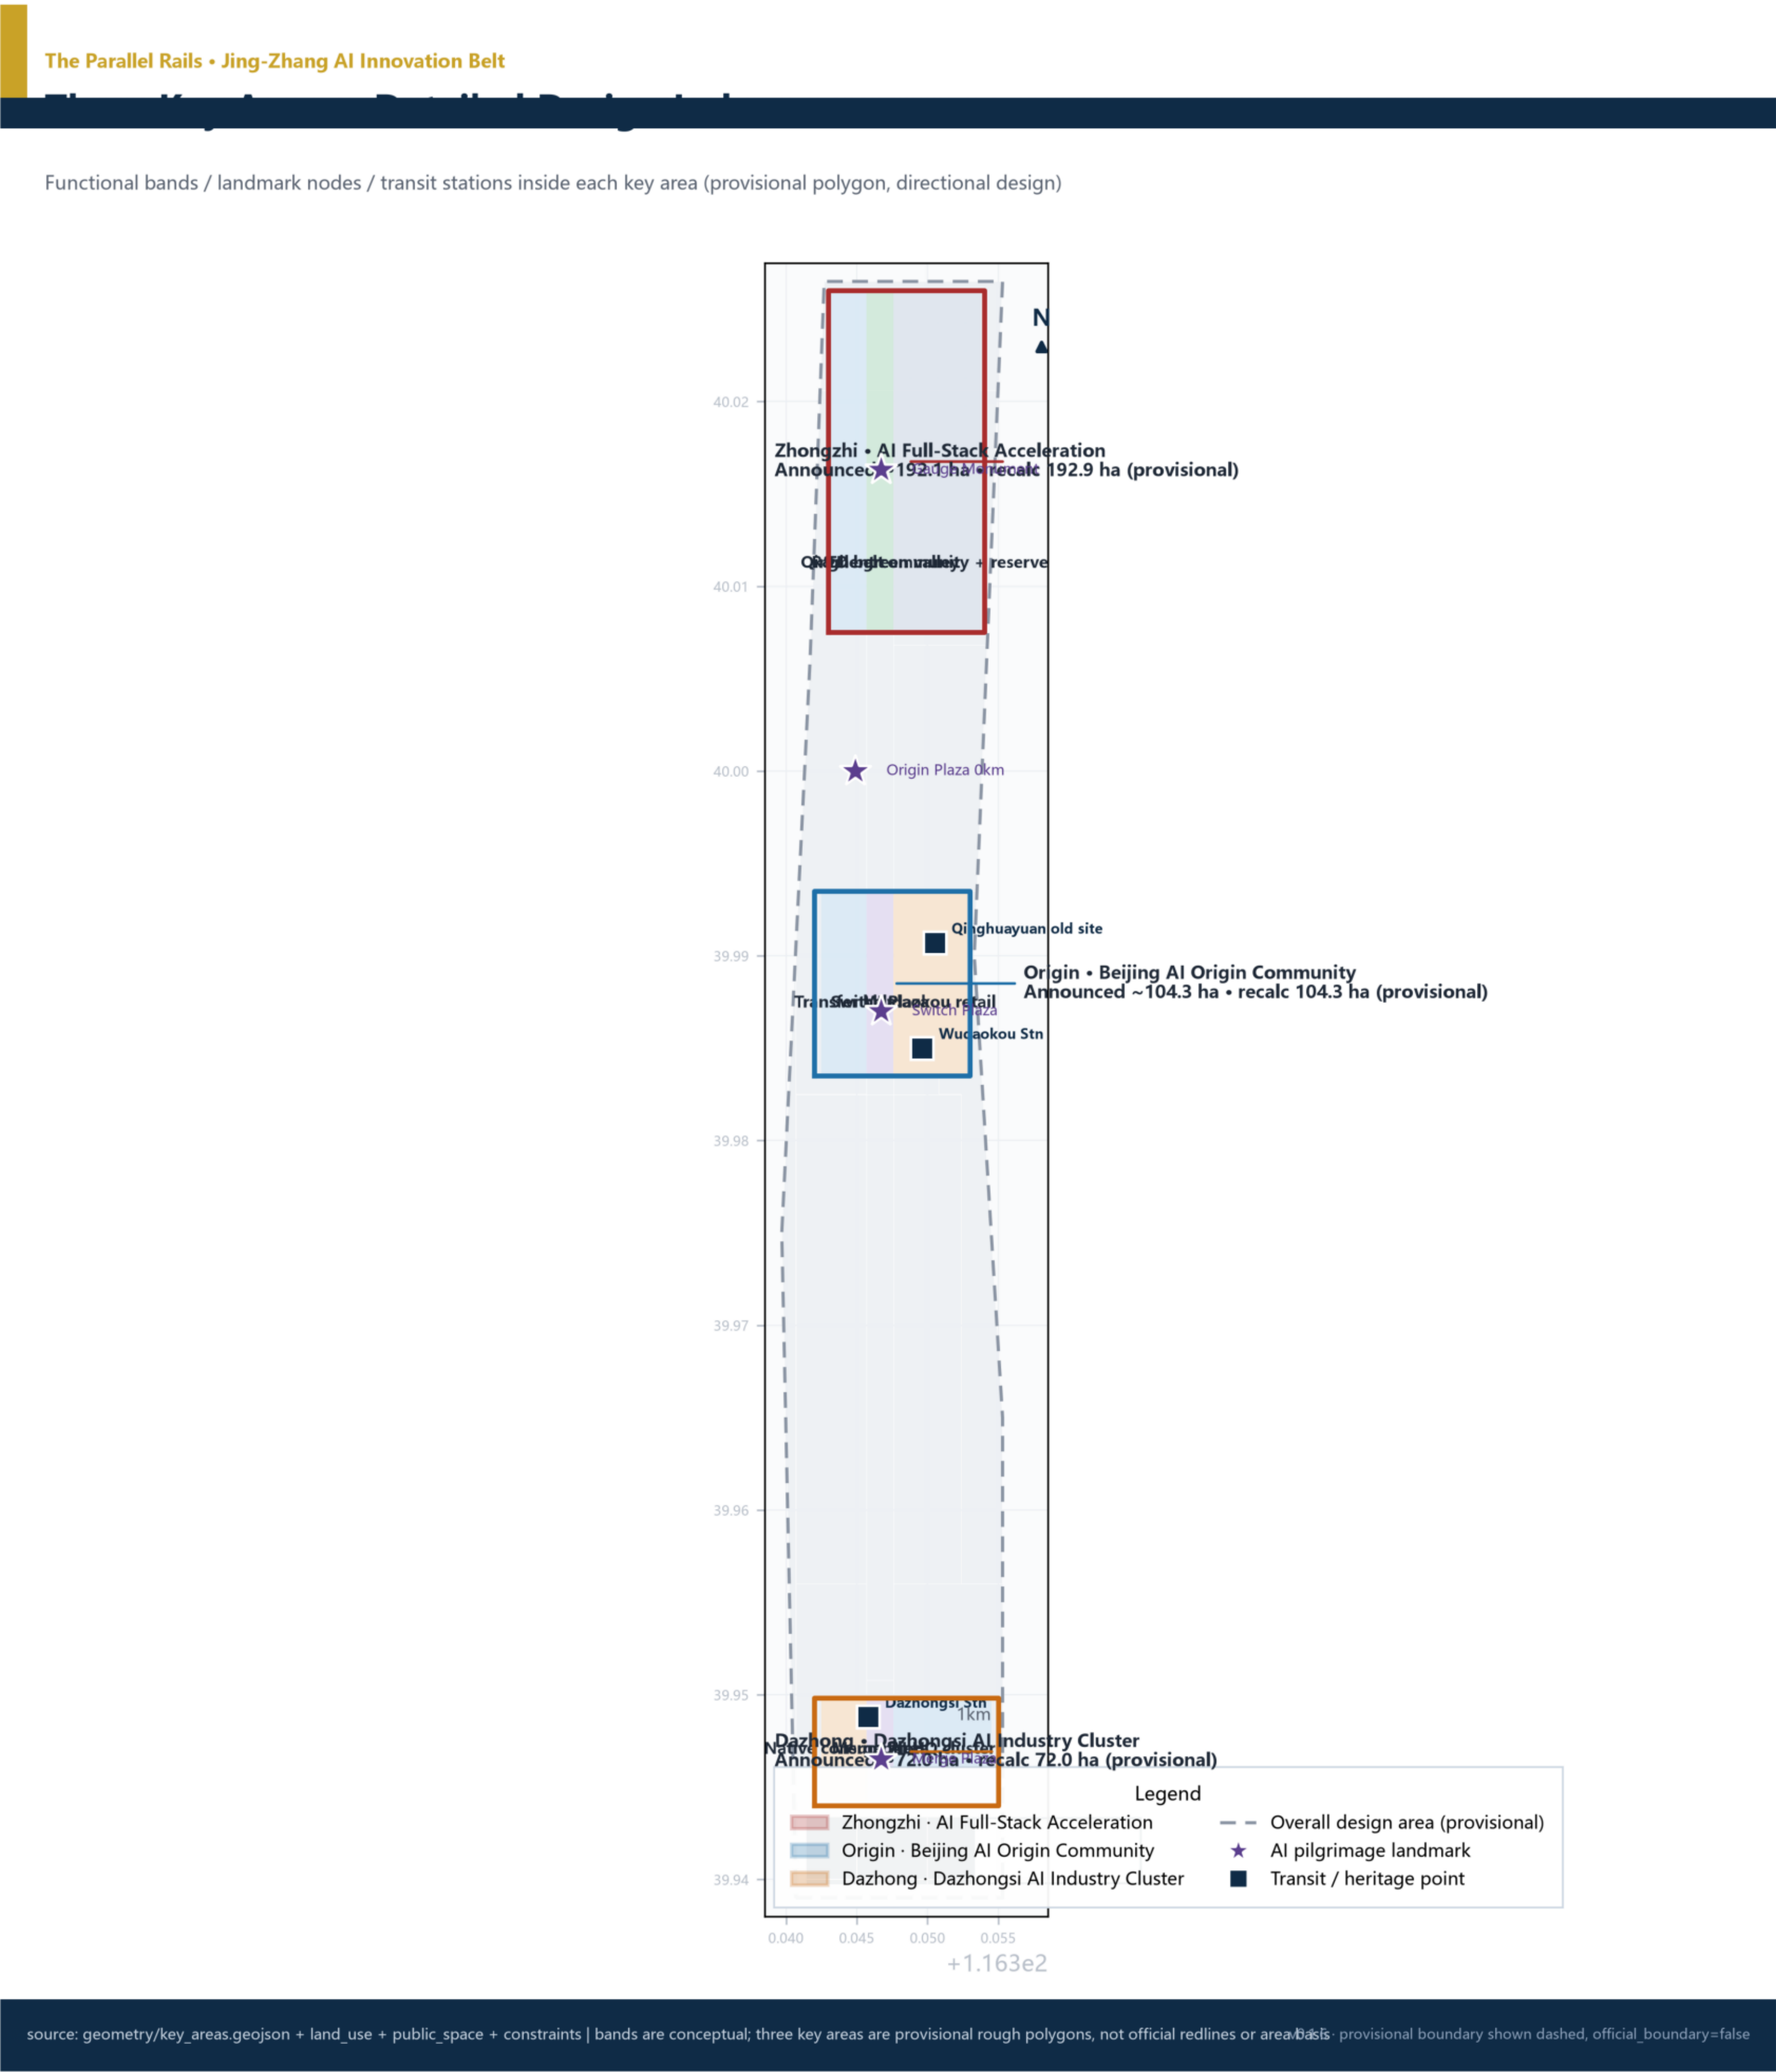

19 land-use cells cover the design area with no gap / no overlap (gap≈0 / overlap≈0)

source: geometry/land_use.geojson (19 features, gap=0, overlap=0) | classes per national land-use guide | areas recalculated in EPSG:4548, conceptual partition, not statutory control | provisional boundary shown dashed, official_boundary=false

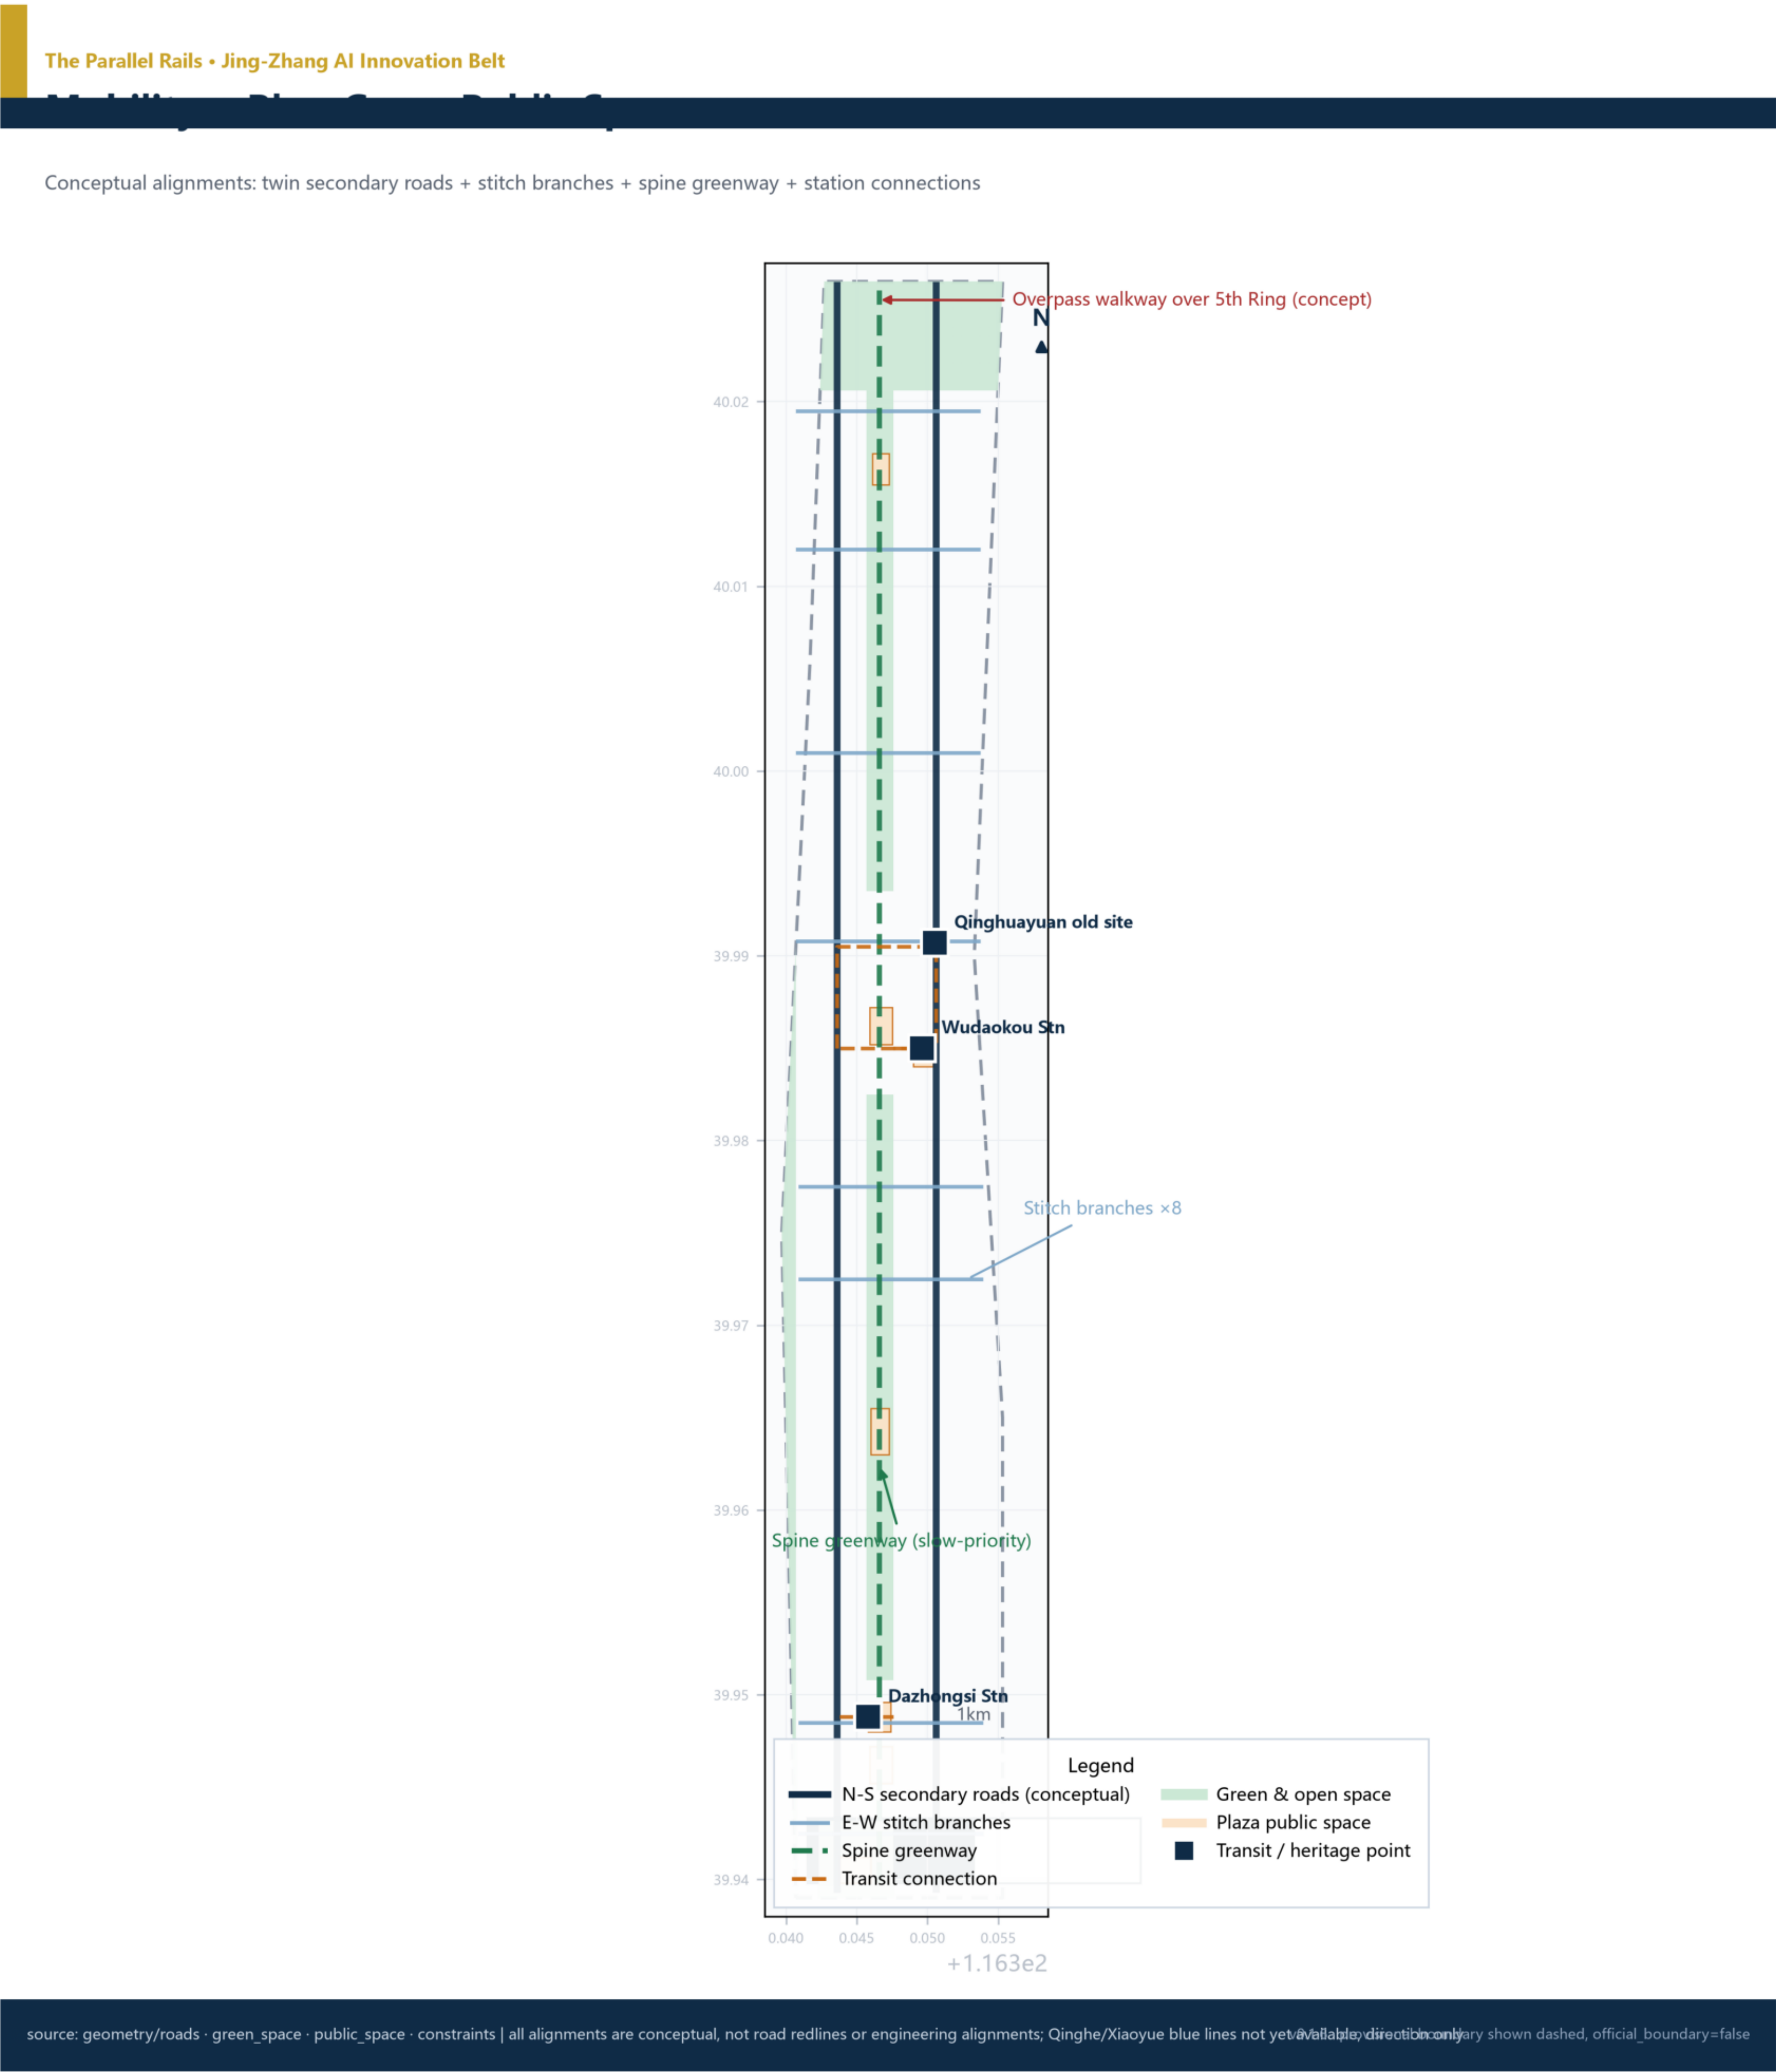

03 Key Areas • Three-Station Detailed Design

Directional detailed design of Zhongzhi/Origin/Dazhong; provisional polygons for display only.

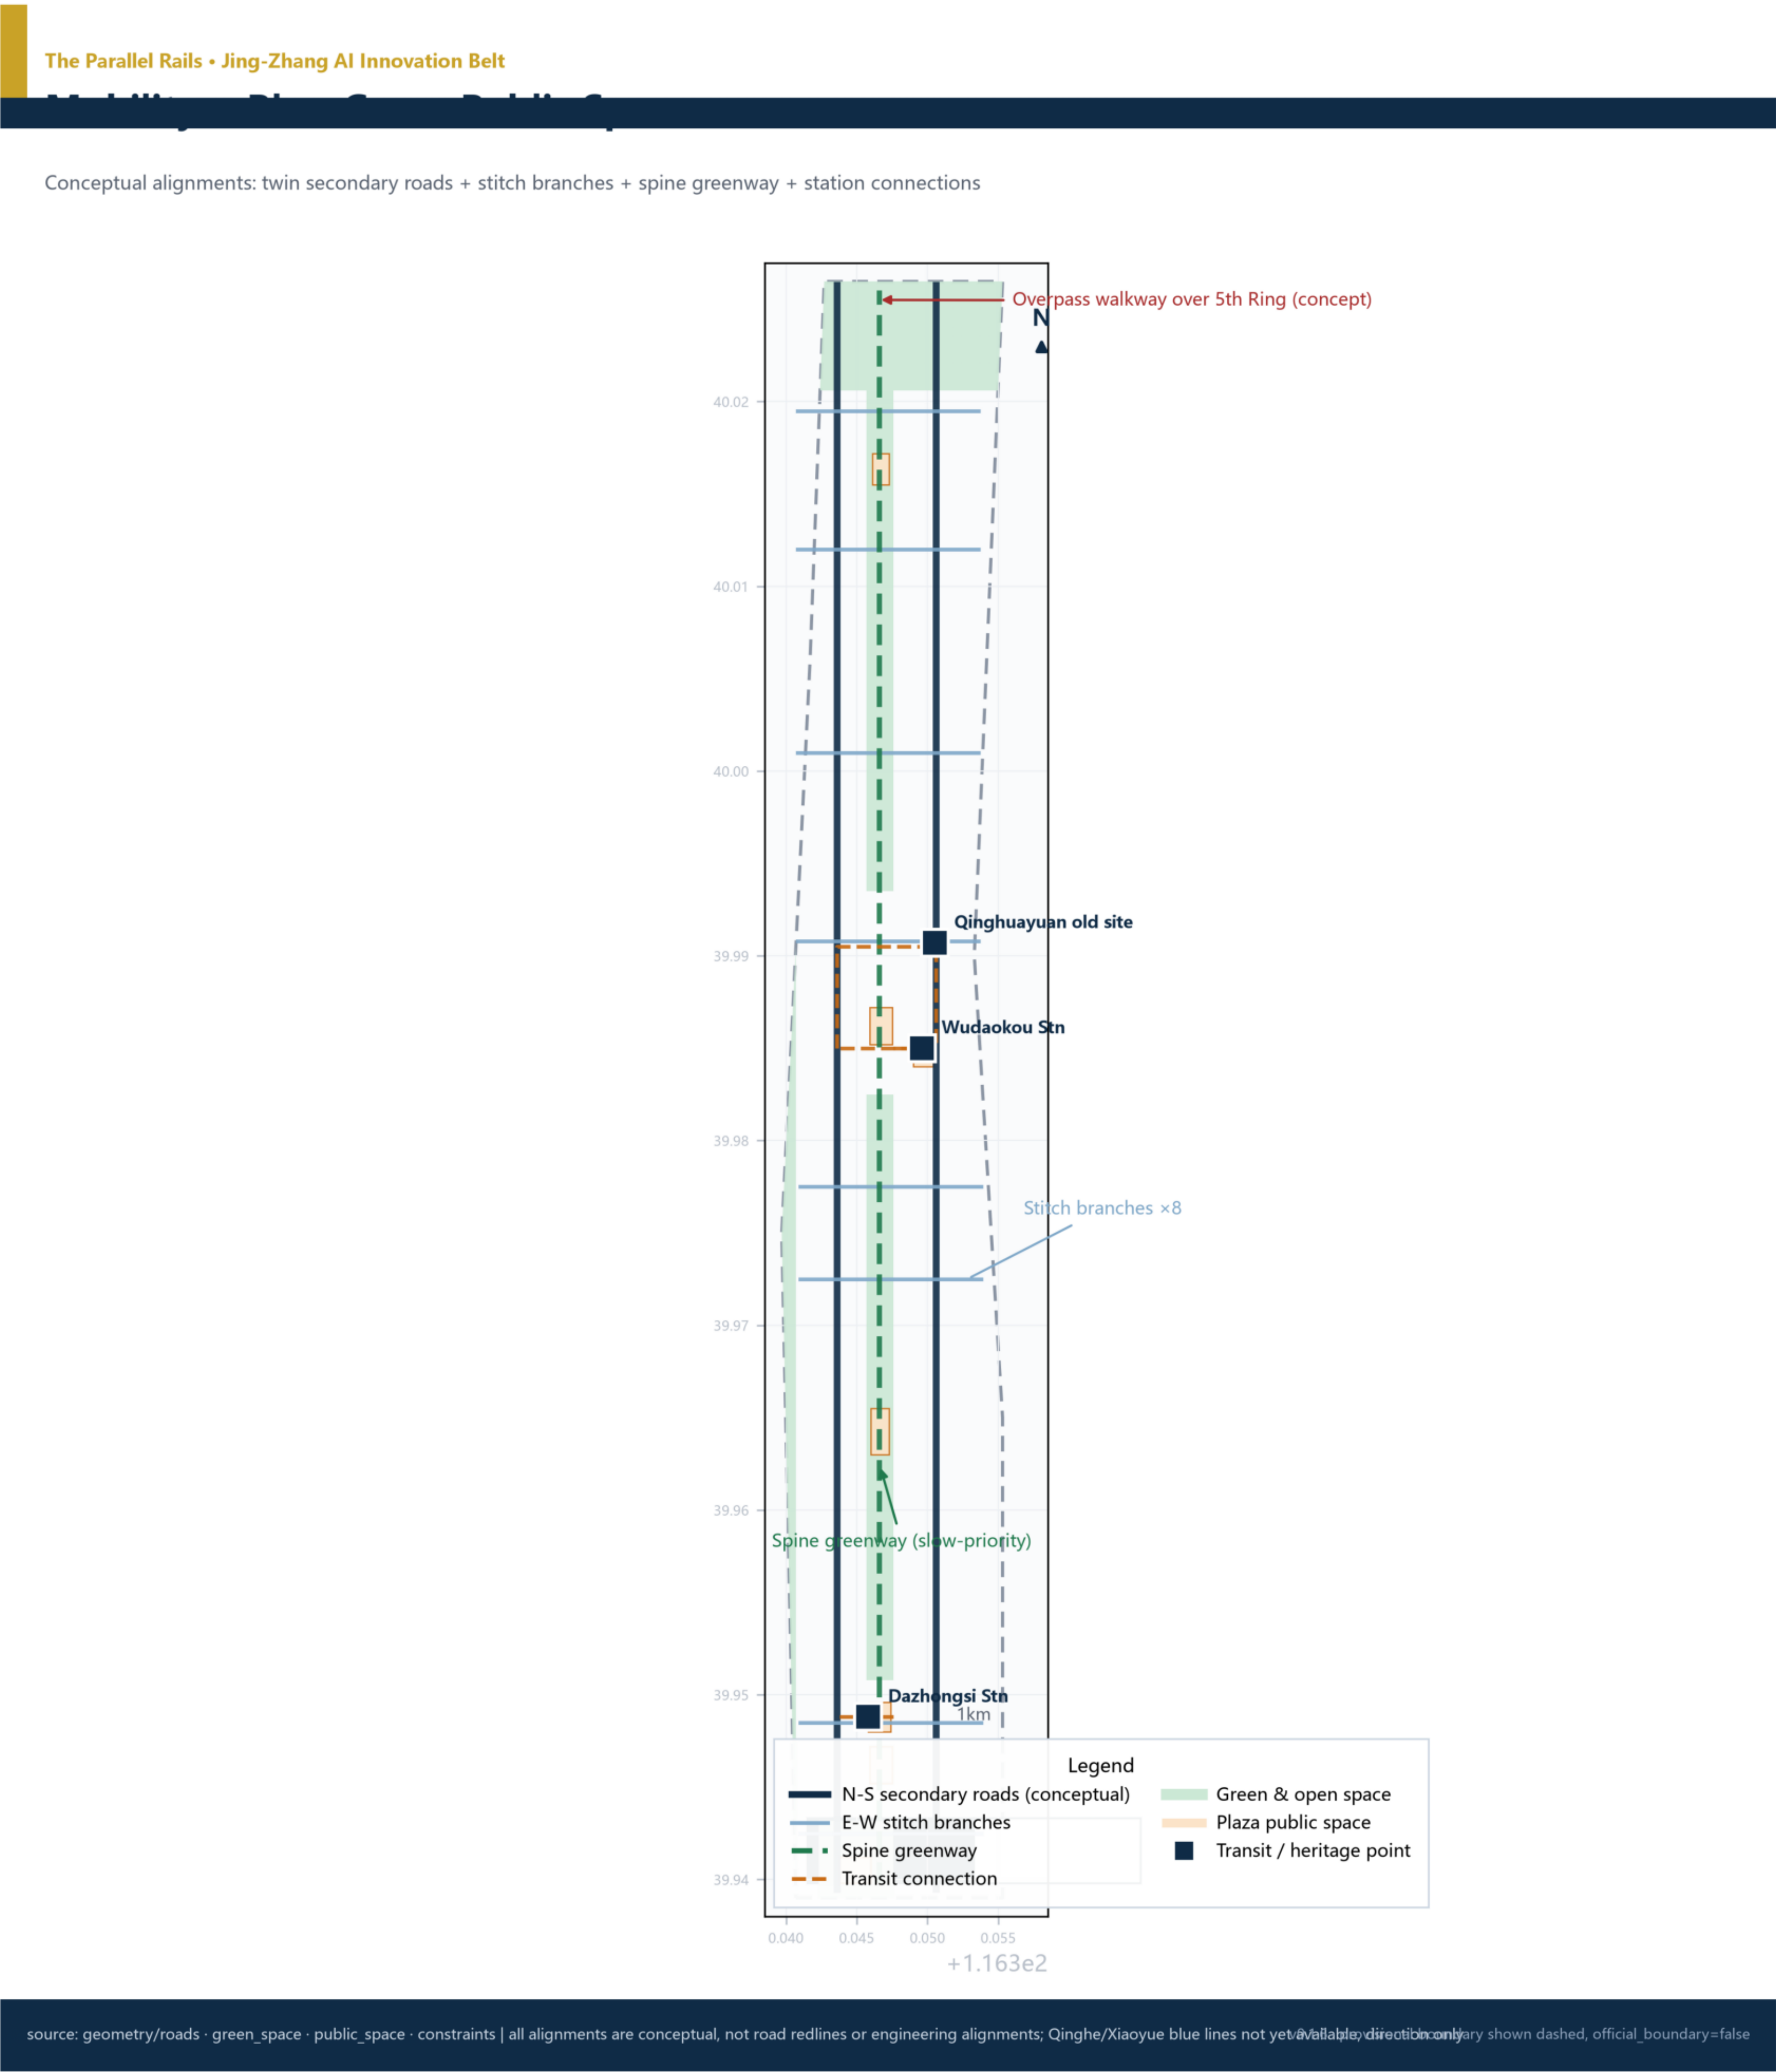

04 Mobility & Municipal • Conceptual Network

Twin secondary roads + 8 stitch branches + spine greenway + station connections; alignments are not redlines.

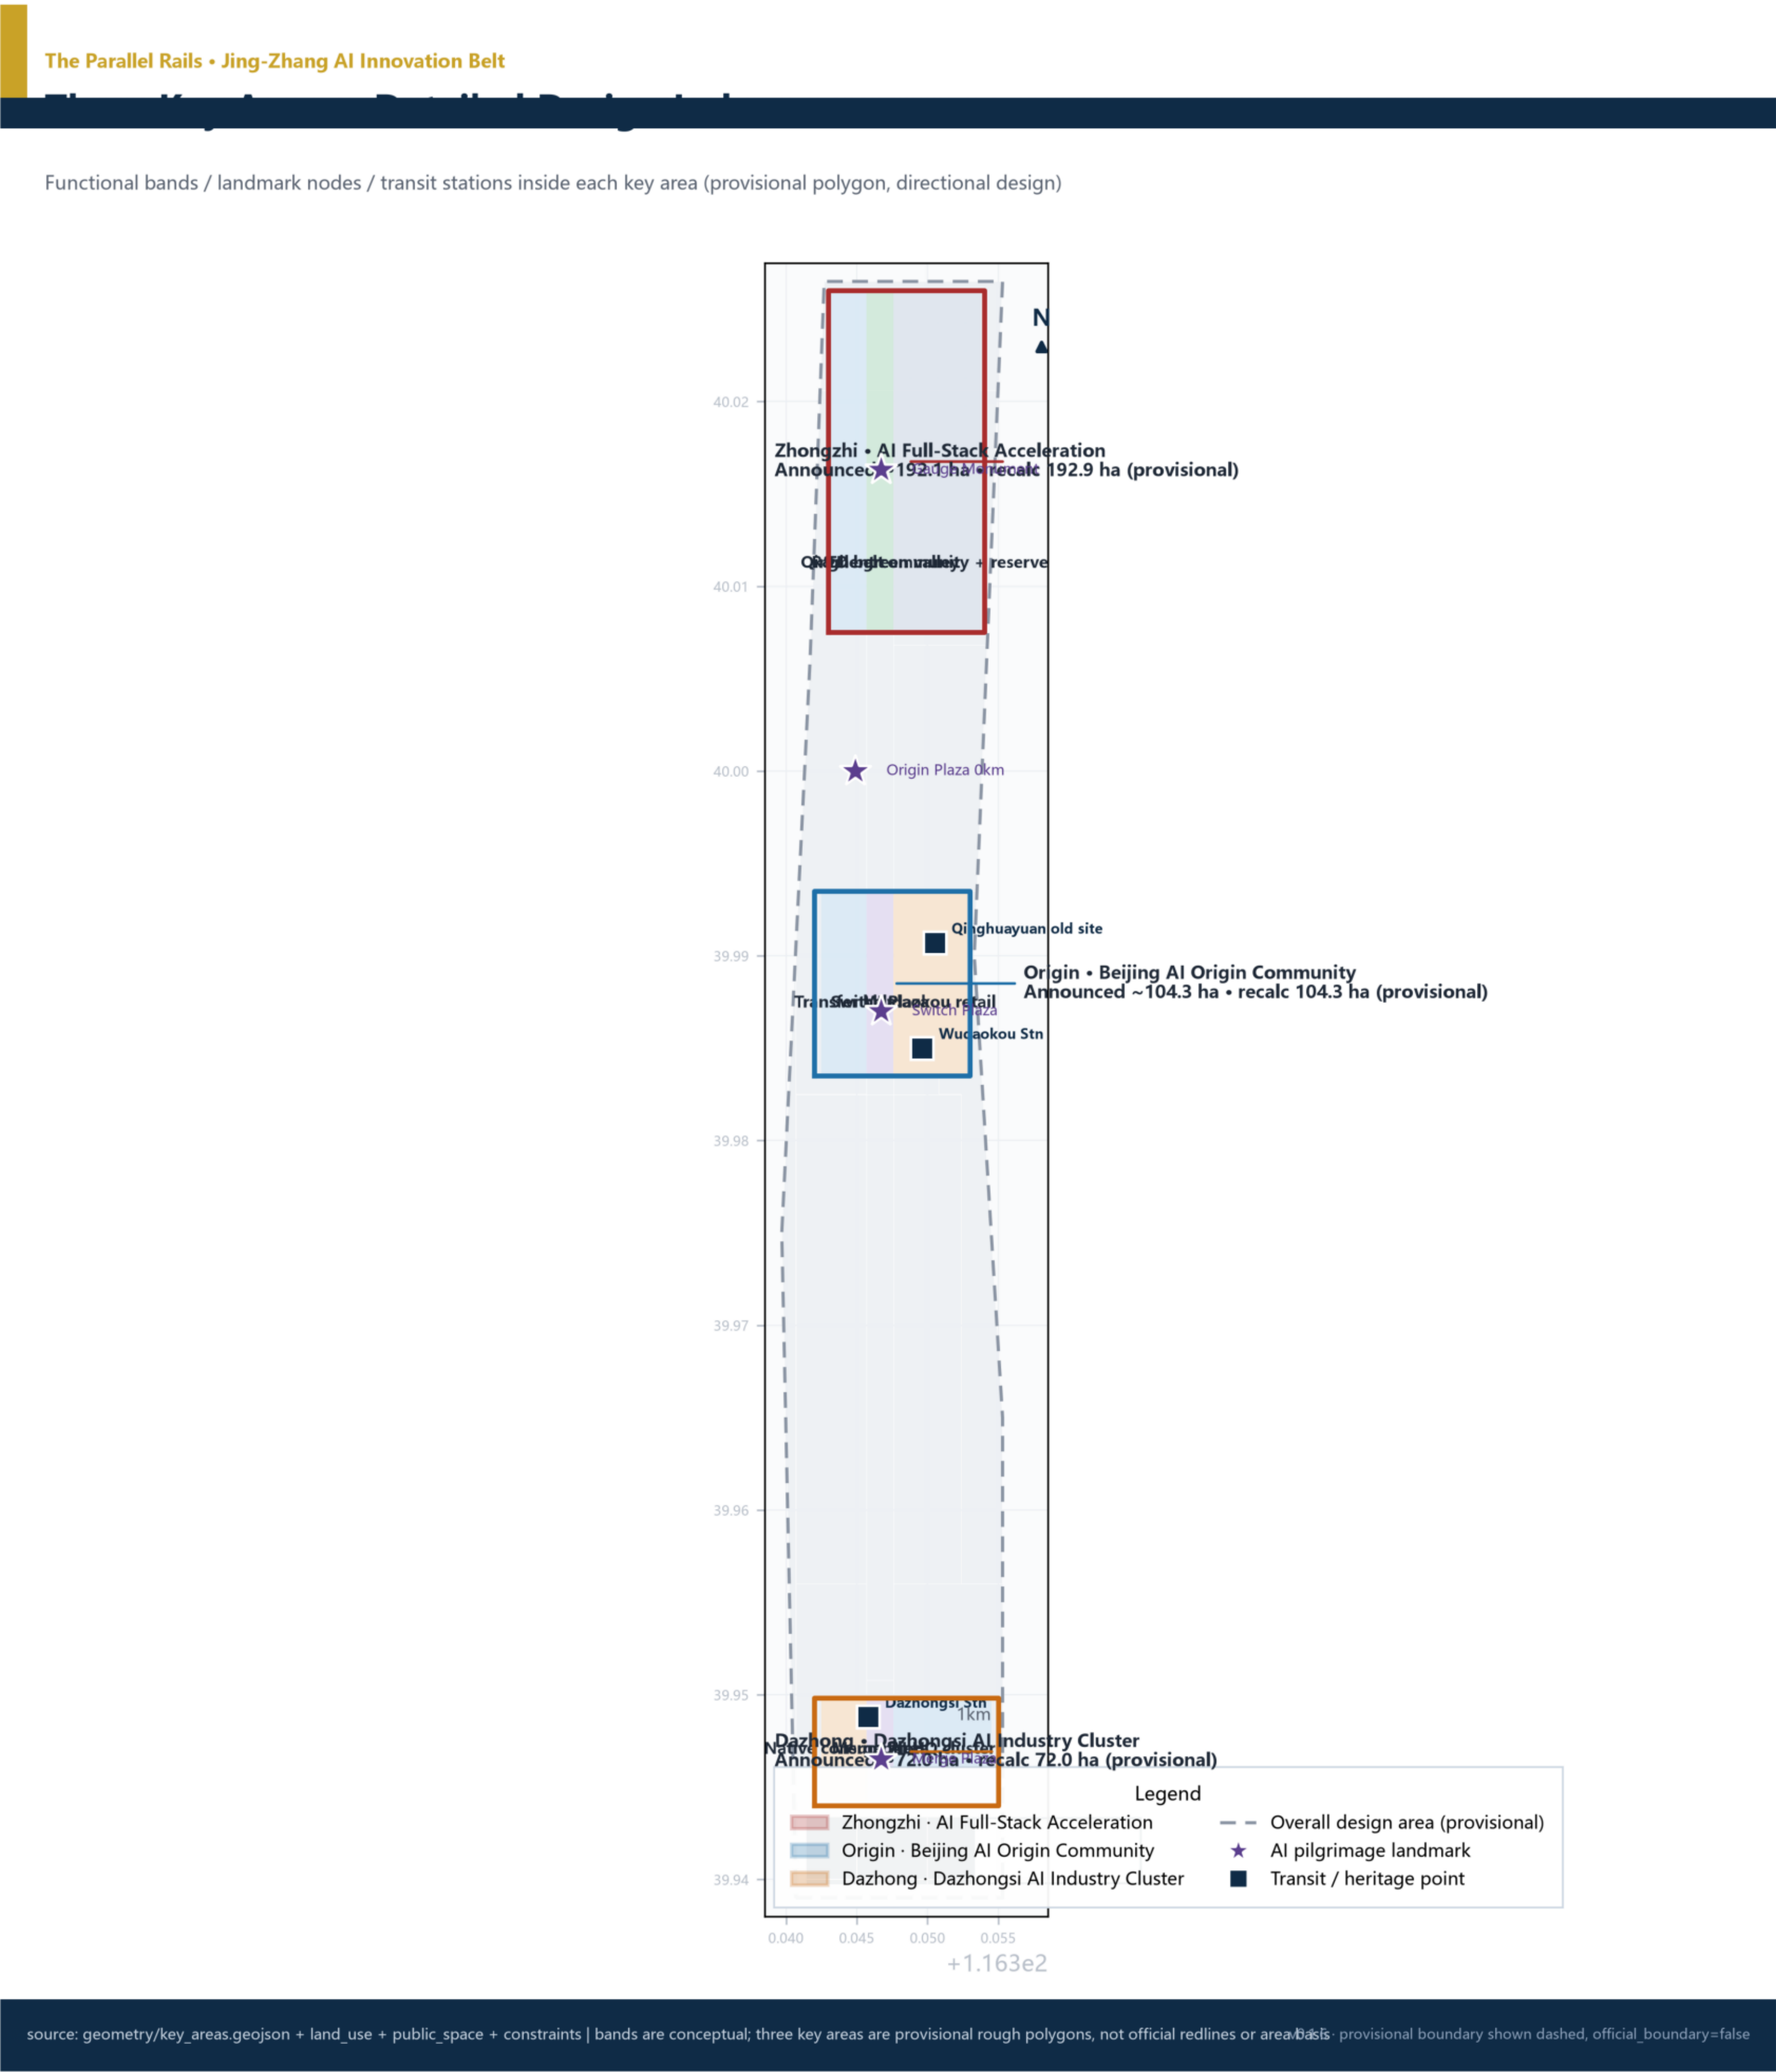

05 Blue-Green Public Space • Spine Vitality Belt

Green ratio 19.4%, public space ratio 1.6%; five AI pilgrimage landmarks along the spine.

06 AI Scenarios • 12 Scenario Cards

Including 3 industry test-validation scenarios, managed through the city-issue mechanism with professional oversight.

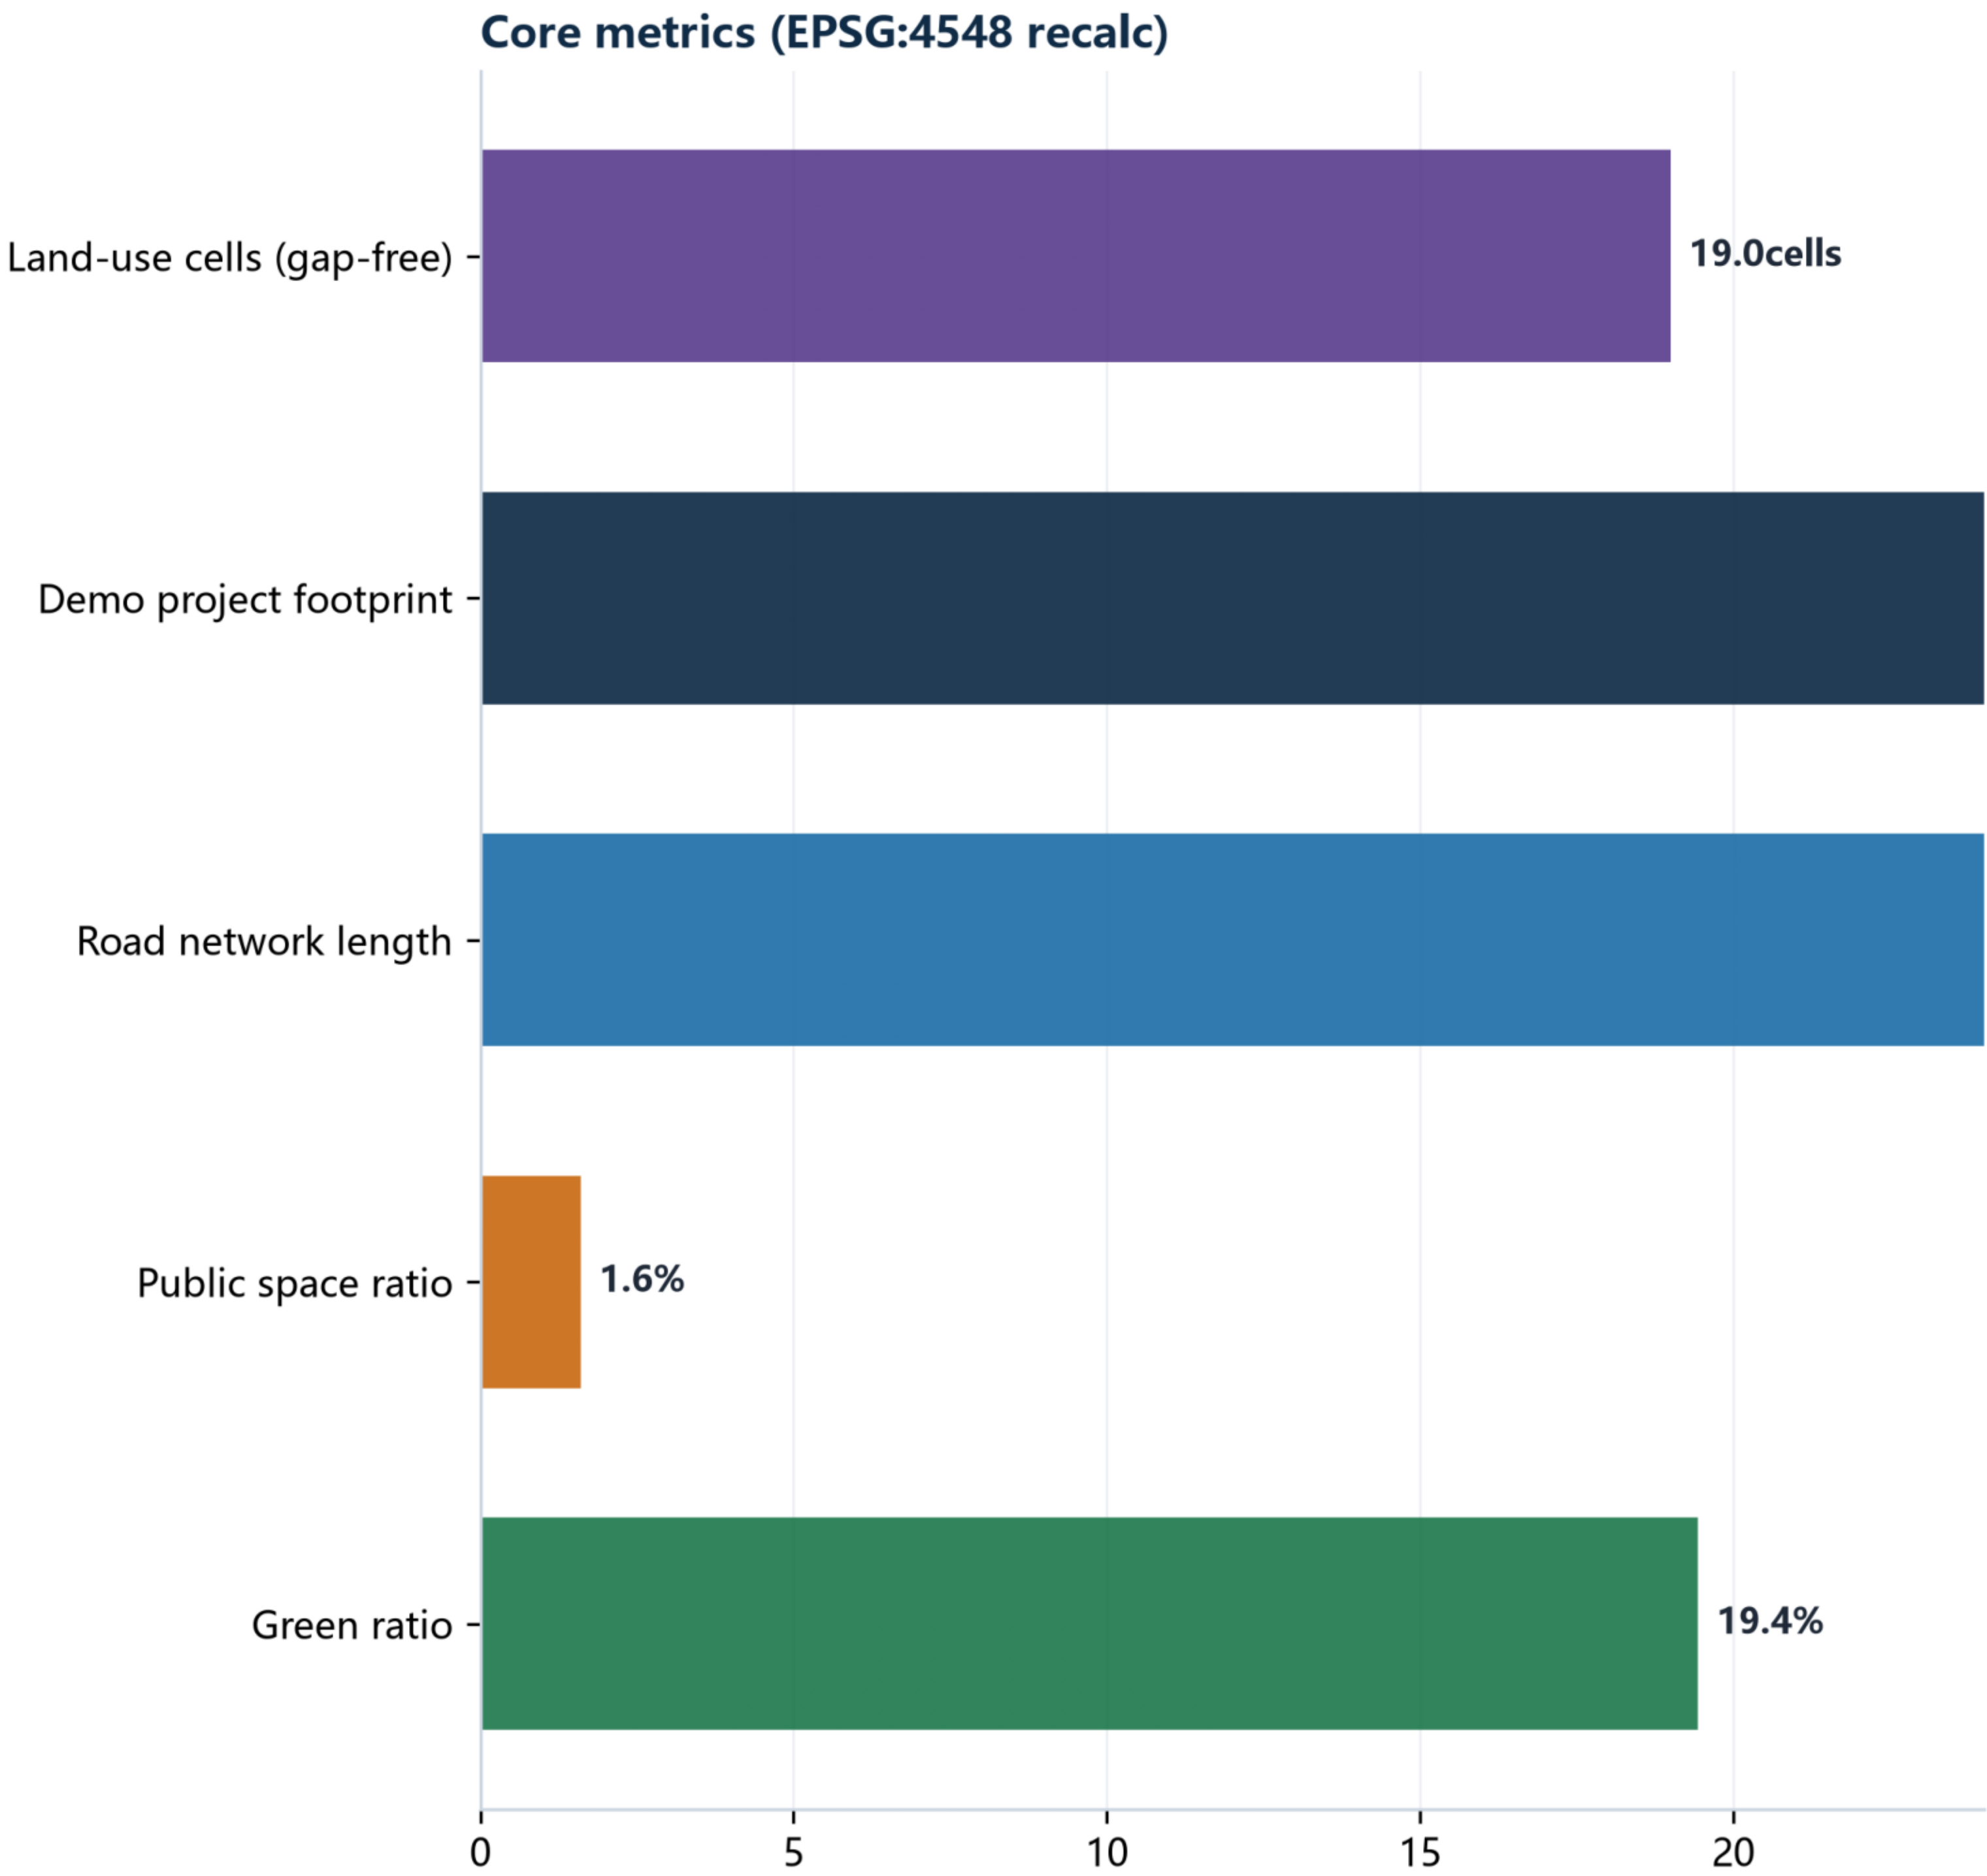

07 Metrics & Compliance • Evidence Chain

Four-layer metrics (spatial/project/content/gaps), EPSG:4548 recalculation; three matrices fully covered.

Four layers: spatial / project / content / gaps · recalculated in EPSG:4548

Evidence chain & content commitments

1. Source registry

sources.json (8 items, formal/background/provisional)
2. Spatial evidence

geometry/*.geojson (9 layers, topologically complete)
3. Metric recalculation

metrics.json @ EPSG:4548
4. Task/standard/depth mapping

3 matrices (compliance/standard/design_depth)
5. Readable narrative

proposal.md (chapters + evidence tags)
6. Presentation layer

HTML / A3A0 drawings / six figures

Countable commitments (six tasks)

- AI scenario cards: 12
- Test-validation scenarios: 3
- User personas: 6

source: metrics.json (site_area_sqm=11412825 m², green_ratio=19.4%, public_space_ratio=1.6%) | statutory controls (FAR/height/density) are unknown, pending official conditions

v0.1.6 · provisional boundary shown dashed, official_boundary=false
