

THE LISTENING LINE v1.2

Auditable urban listening and public repair infrastructure

Three site-grounded protocols with authority, evidence, four human gates, operations and professional handoff—without fabricated field performance.

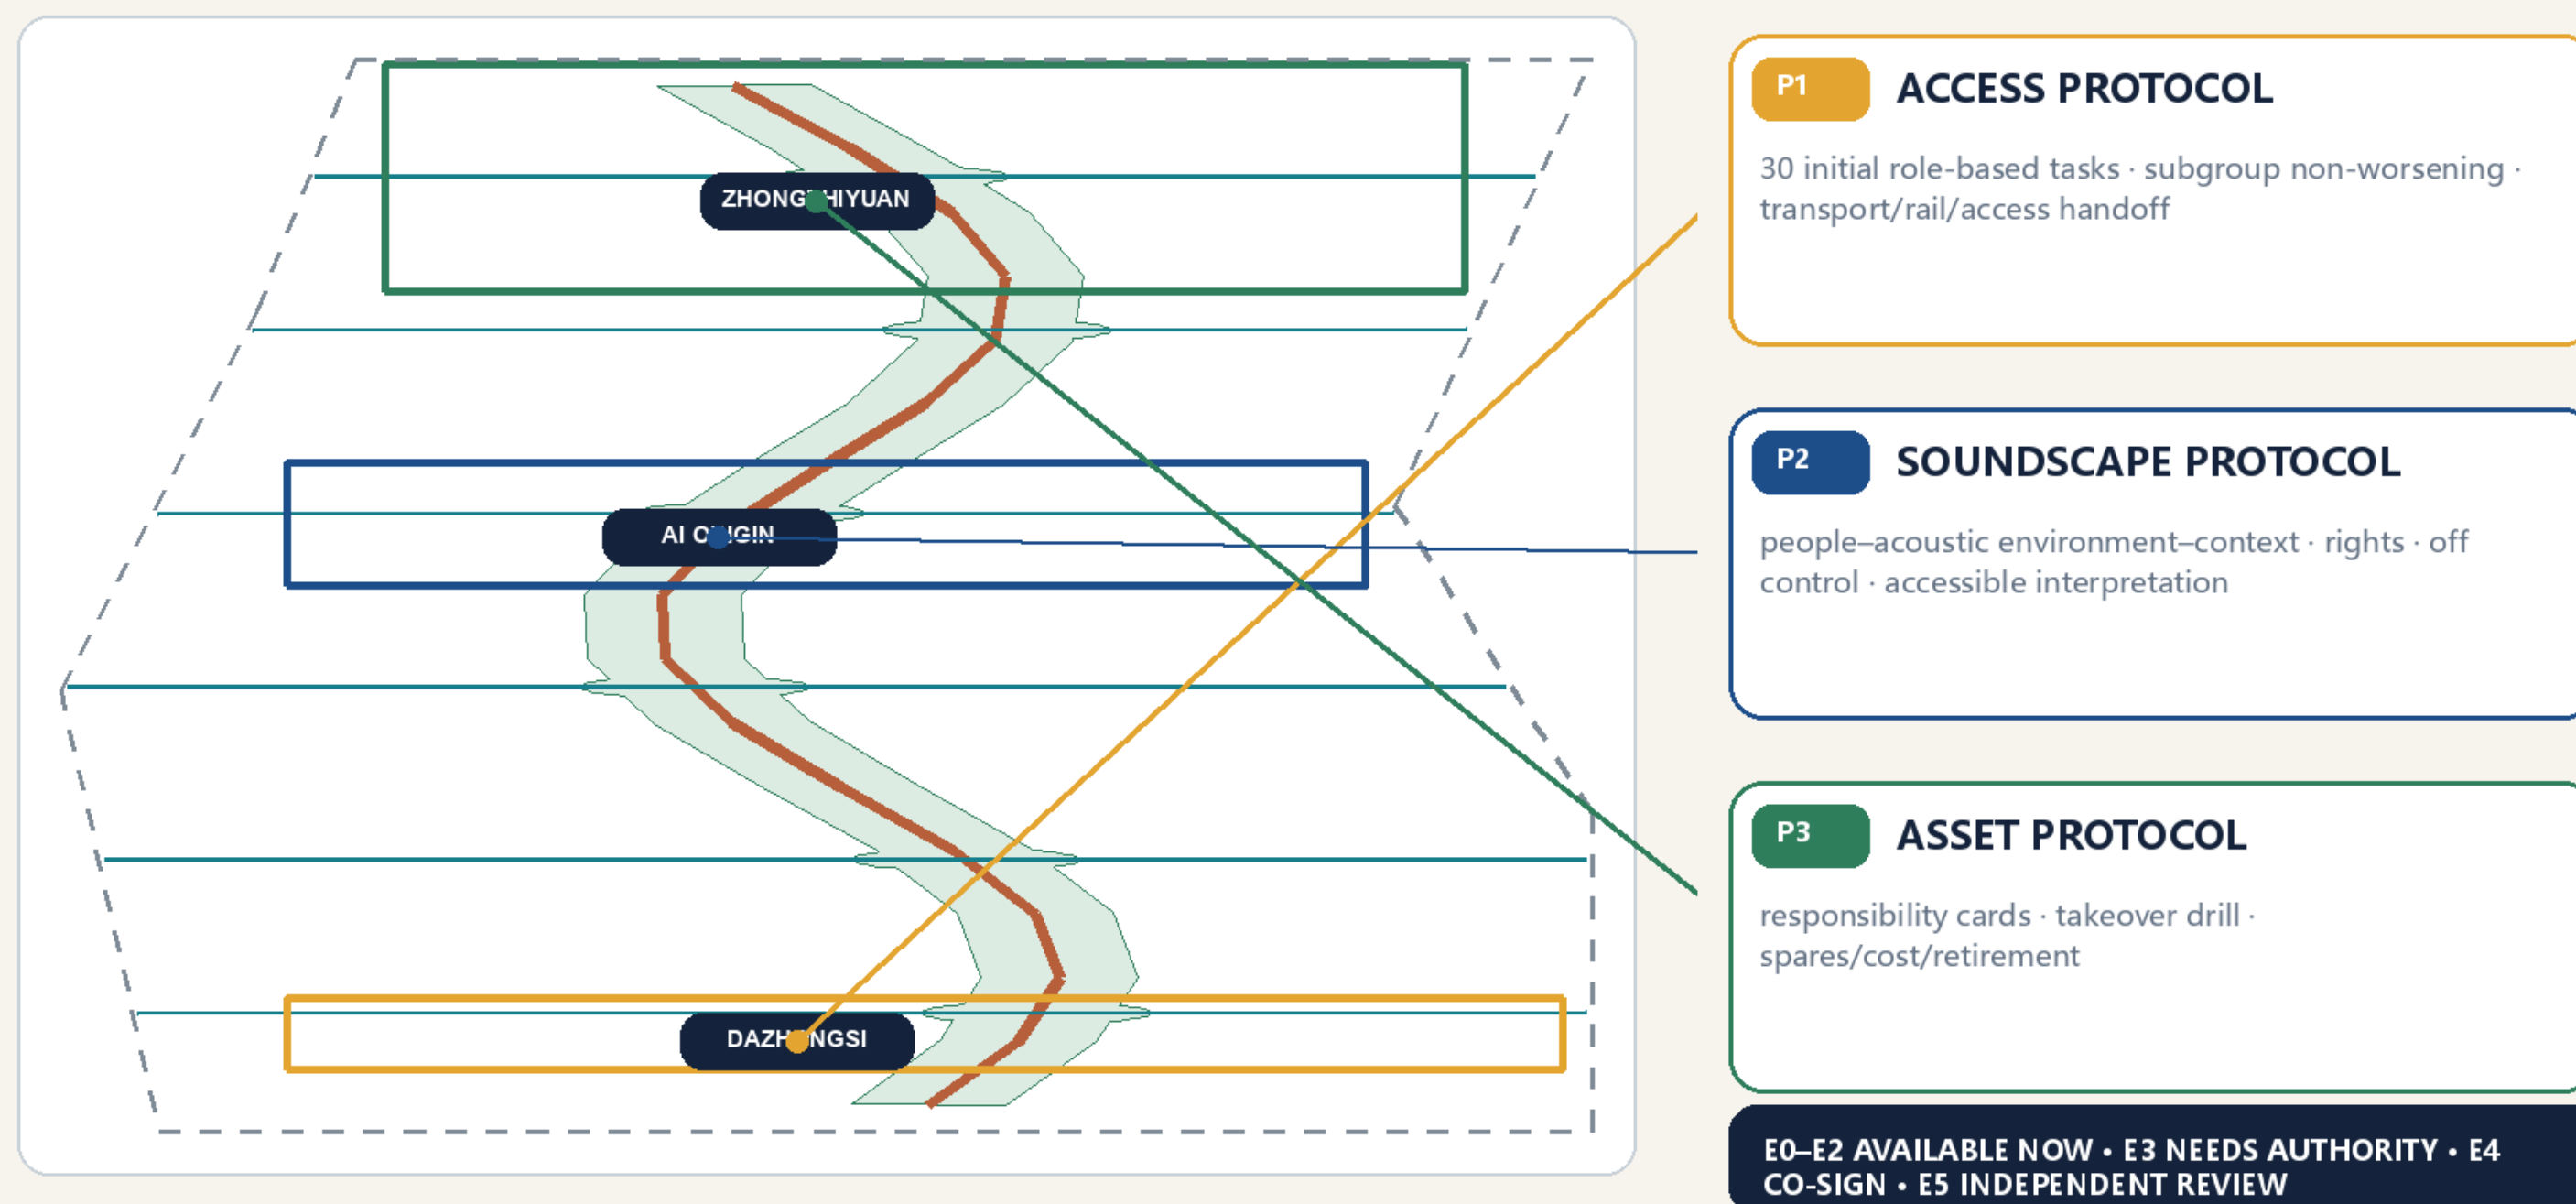

14 CONTRACT	20 RECEIPT	6 EVIDENCE
4 GATES	3 PROTOCOLS	1 NULL SLICE

No pilot is authorised; Accountable organisations, field baselines and results remain null.

01 / PLACE-BASED EVIDENCE

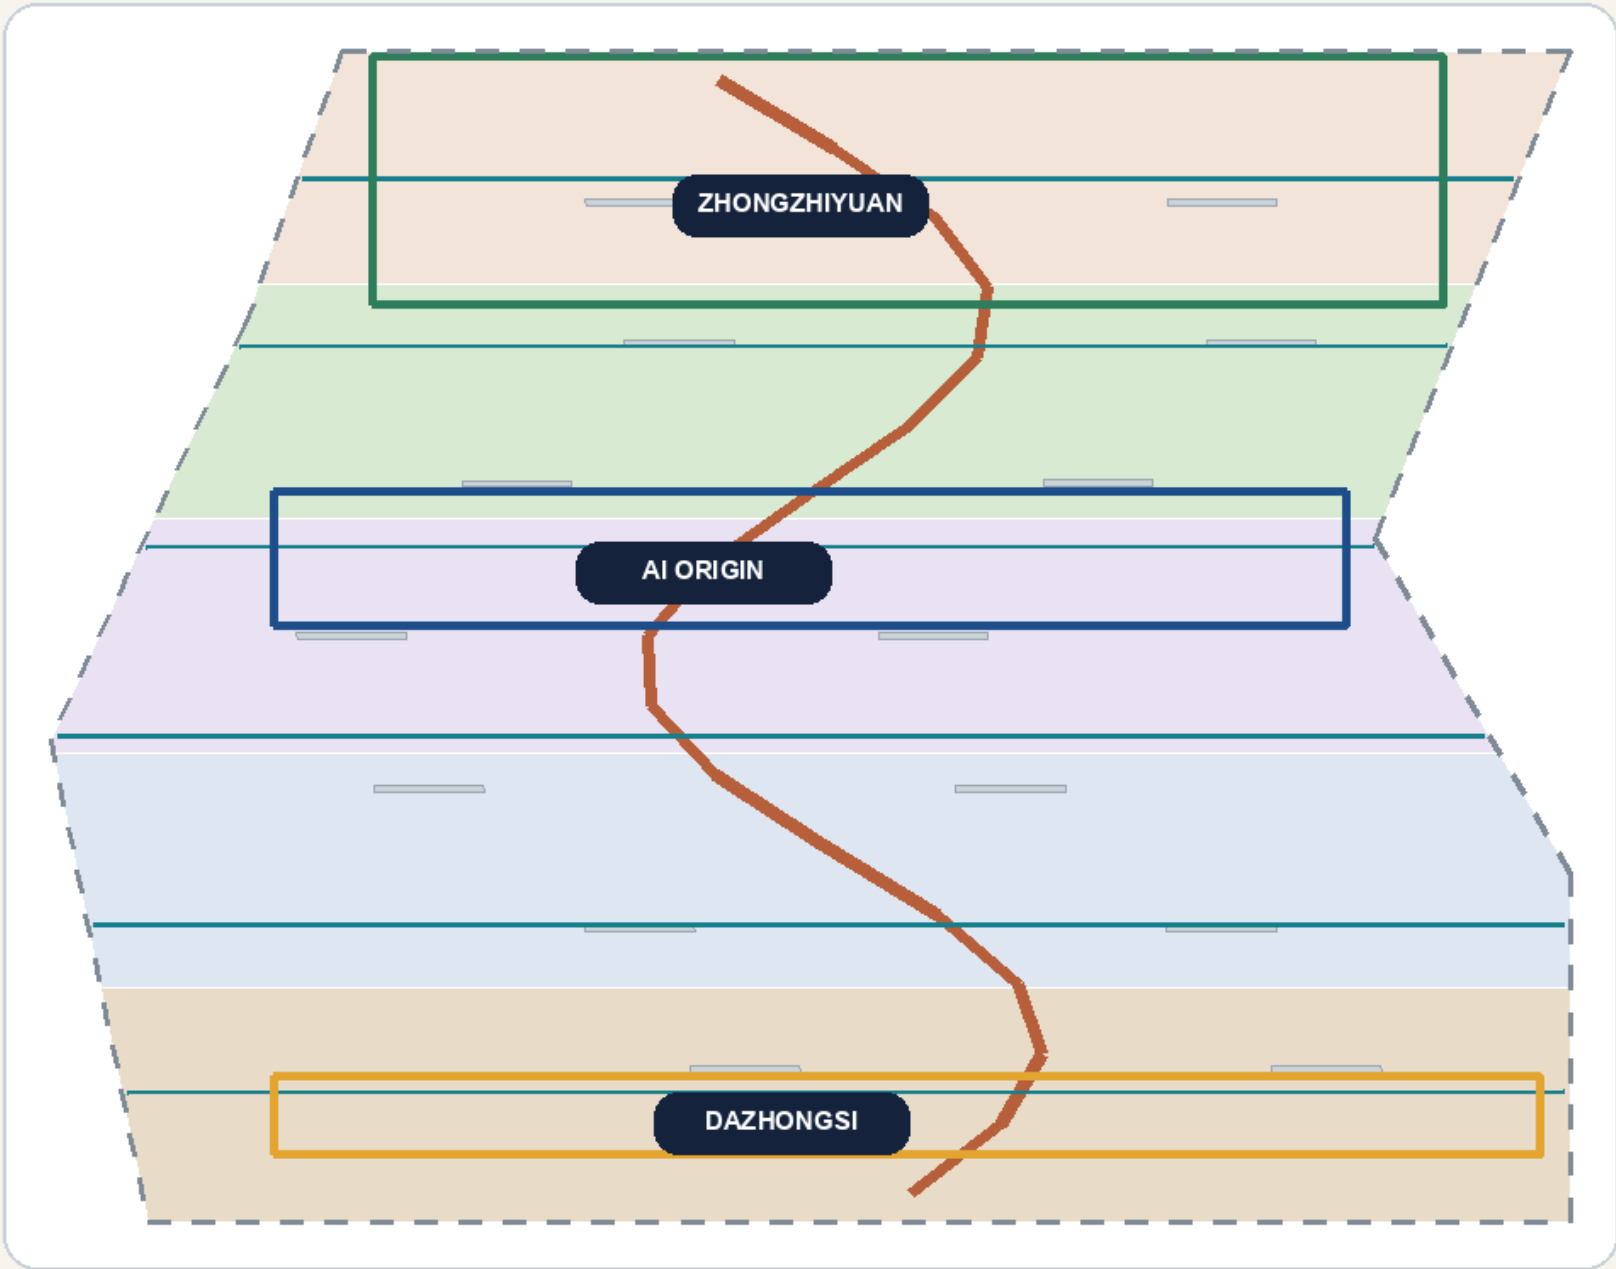

REAL PROBLEMS → AUTHORISABLE PROTOCOLS

Local facts reach E1. Authority, field baseline, co-signature and independent review upgrade evidence step by step.

SIX STATIONS FOR PEOPLE; NINE STATES FOR MACHINES

Appeal is a right, not a compulsory state. Incidents, withdrawals, repairs and deletion branch from any stage.

PUBLIC SIX STATIONS

- ASK
- EXPLAIN
- VERIFY
- APPEAL
- REPAIR
- ARCHIVE / EXIT

MACHINE LIFECYCLE

- PROPOSED
- BASELINED
- AUTHORISED
- LIMITED TRIAL
- REVIEWED
- ADOPTED
- MODIFIED
- PAUSED
- EXITED

FOUR REPEATED GATES

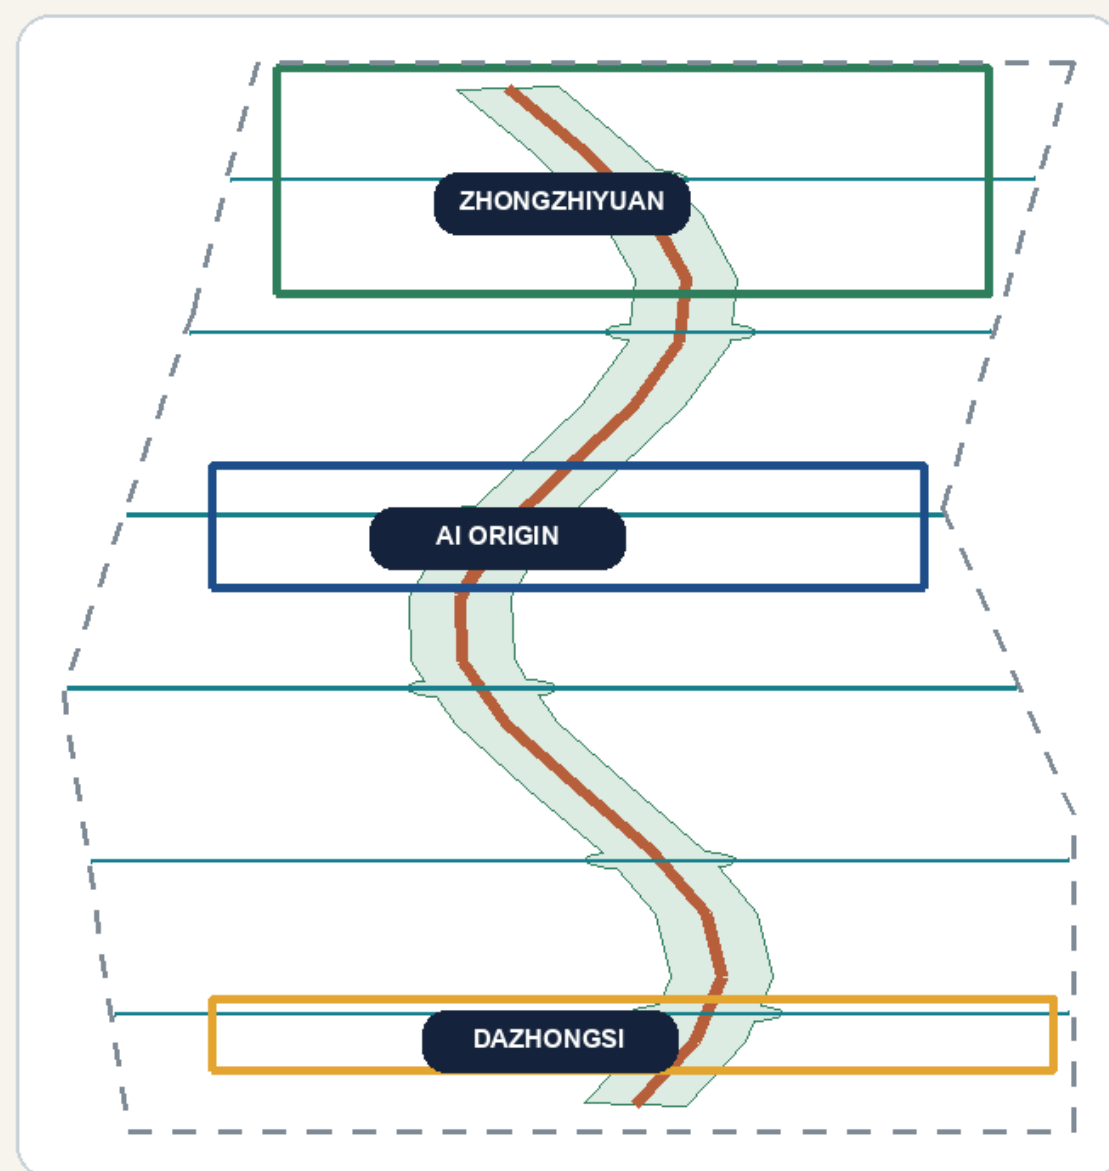

- G1 PROFESSIONAL
- G2 PUBLIC INTEREST
- G3 DATA + RIGHTS
- G4 OPERATIONS + EXIT

14 CONTRACT DIMENSIONS • 20 RECEIPT FIELDS • EVENTS BRANCH AT ANY STATE

03 / PILOT HANDOFF

THREE PILOTS; THREE PROFESSIONAL HANDOFFS

Each pilot has one future Accountable slot, a 90-day auditable delivery, four gates and explicit stop conditions.

P3 • ZHONGZHIYUAN

ASSET LIFECYCLE

A: public-asset owner = null

90d: verified assets/dependencies, faults, takeover + retirement

Handoff: asset · water/ecology · network · procurement · data

P2 • AI ORIGIN / QINGHUAYUAN

SOUNDSCAPE + RIGHTS

A: heritage-park/content operator = null

90d: people–environment–context, rights + quiet conflicts

Handoff: acoustics · heritage · access · rights · operations

P1 • DAZHONGSI

ACCESS + OPTIONS

A: public-realm decision owner = null

90d: role/task baseline, barriers + option matrix

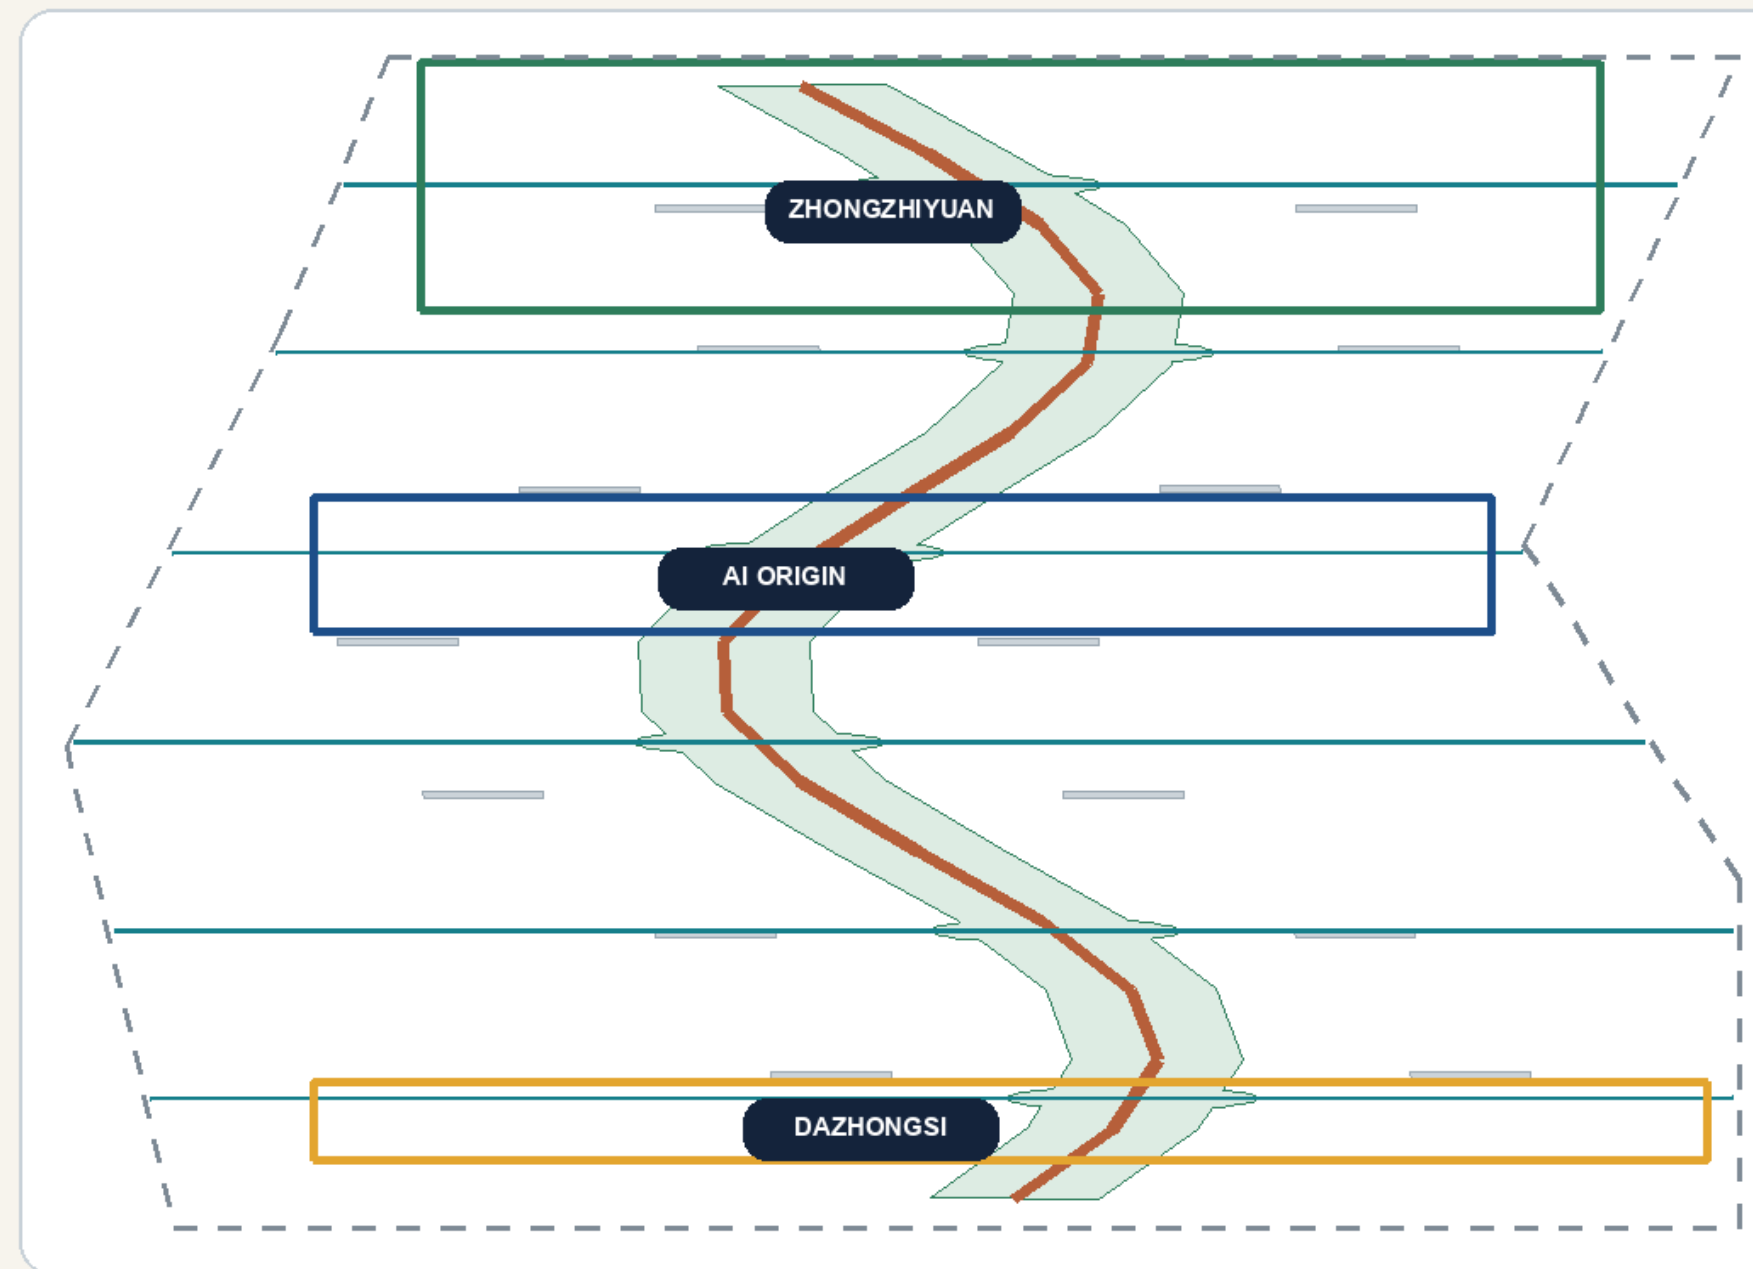

Handoff: transport · rail · park · access · safety

COMMON CONTROL • one A • proposer ≠ sole evaluator • operator ≠ expansion authority • safety/maintenance/data/access may pause

04 / PROFESSIONAL INTERFACES + PAUSE POWER

FROM RIGHT OF WAY TO THE RIGHT TO PAUSE

Walking, soundscape, waterfront and facility responsibility become one public-service network with named professional interfaces.

WHO MAY PAUSE

safety • maintenance • data-rights • accessibility • ecology roles

P1 ACCESS

accessibility • transport/rail • park • safety

P2 SOUNDSCAPE

acoustics • heritage/oral history • rights • access • operations

P3 ASSET

asset • water/flood/ecology • electrical/network • procurement • data

BASIC SERVICE

physical wayfinding • lighting • rest • toilets • staffed help
remain offline

AI may suggest; people verify, decide, close and retire.

05 / EVIDENCE + HONEST NULLS

NULL IS AN EVIDENCE BOUNDARY

The package distinguishes protocol completeness from field performance—and makes every upgrade condition auditable.

E3 needs authority + sample + protocol · E4 needs professional and affected-user co-sign · E5 needs limited trial + independent review

SYNTHETIC SLICE • organisation=null • gates=pending • performance_results=null

0 FAKE FIELD RESULTS

ONE ACCOUNTABLE OWNER; SEPARATED DECISIONS

P1 ACCESS A=null · 30 initial tasks · barriers + option matrix · transport/rail/park/access/safety

P2 SOUNDSCAPE A=null · people–environment–context · rights + accessible interpretation · acoustics/heritage/operations

P3 ASSET A=null · assets/dependencies/faults/takeover/retirement · water/ecology/network/procurement/data

90-DAY HANDOFF PACKAGE

- 01 authority reference + accountable organisation
- 02 consent, accessibility and withdrawal route
- 03 baseline, sampling frame and data dictionary
- 04 option/impact matrix + subgroup exceptions
- 05 O&M cost, spares, faults and human takeover
- 06 decision log, pause/exit record and archive

FOUR INDEPENDENT GATES

- | | | |
|-----------|------------------------------|-------------------------------|
| G1 | professional + safety | signed discipline memo |
| G2 | public interest | affected-group review |
| G3 | data + rights | lawful, minimal, withdrawable |
| G4 | operations + exit | funded owner and stop route |

Proposer ≠ sole evaluator • operator ≠ expansion authority • safety/maintenance/data/access may pause

WHAT MUST REMAIN VISIBLE

- Provisional geometry is not a redline or approval basis.
- A Listening Receipt is not authorisation; organisation and permit references must be real.
- A synthetic slice is E2 only: organisation=null, gates=pending, performance_results=null.
- Personal traces and raw audio are prohibited by default; legal review precedes any real processing.
- Gate failure, subgroup worsening or unmaintainability makes PAUSE/EXIT a valid outcome.
- Official data triggers regeneration of geometry, metrics, figures, HTML and PDFs as one package.
