

开源干线
OPEN TRUNK

One Trunk · Three Cores · Two Wings · Multi-point Commits

Study area 43.6 km² → overall design area 11.4 km² → key areas ≈368.4 ha (announced values)

Open-source metaphor → space strategy

Three cores = three repos:

· Zhongzhiyuan Full-Stack Fork

· Origin Community Origin Repo

· Dazhongsi Scenario Market

Two wings = two branches:

· Zhongguancun Tech Service Wing

· Xiaoyuehe Scenario Empowerment Wing

Three positionings = three releases:

Heritage / Experience / Future

Public spaces = event sequence:

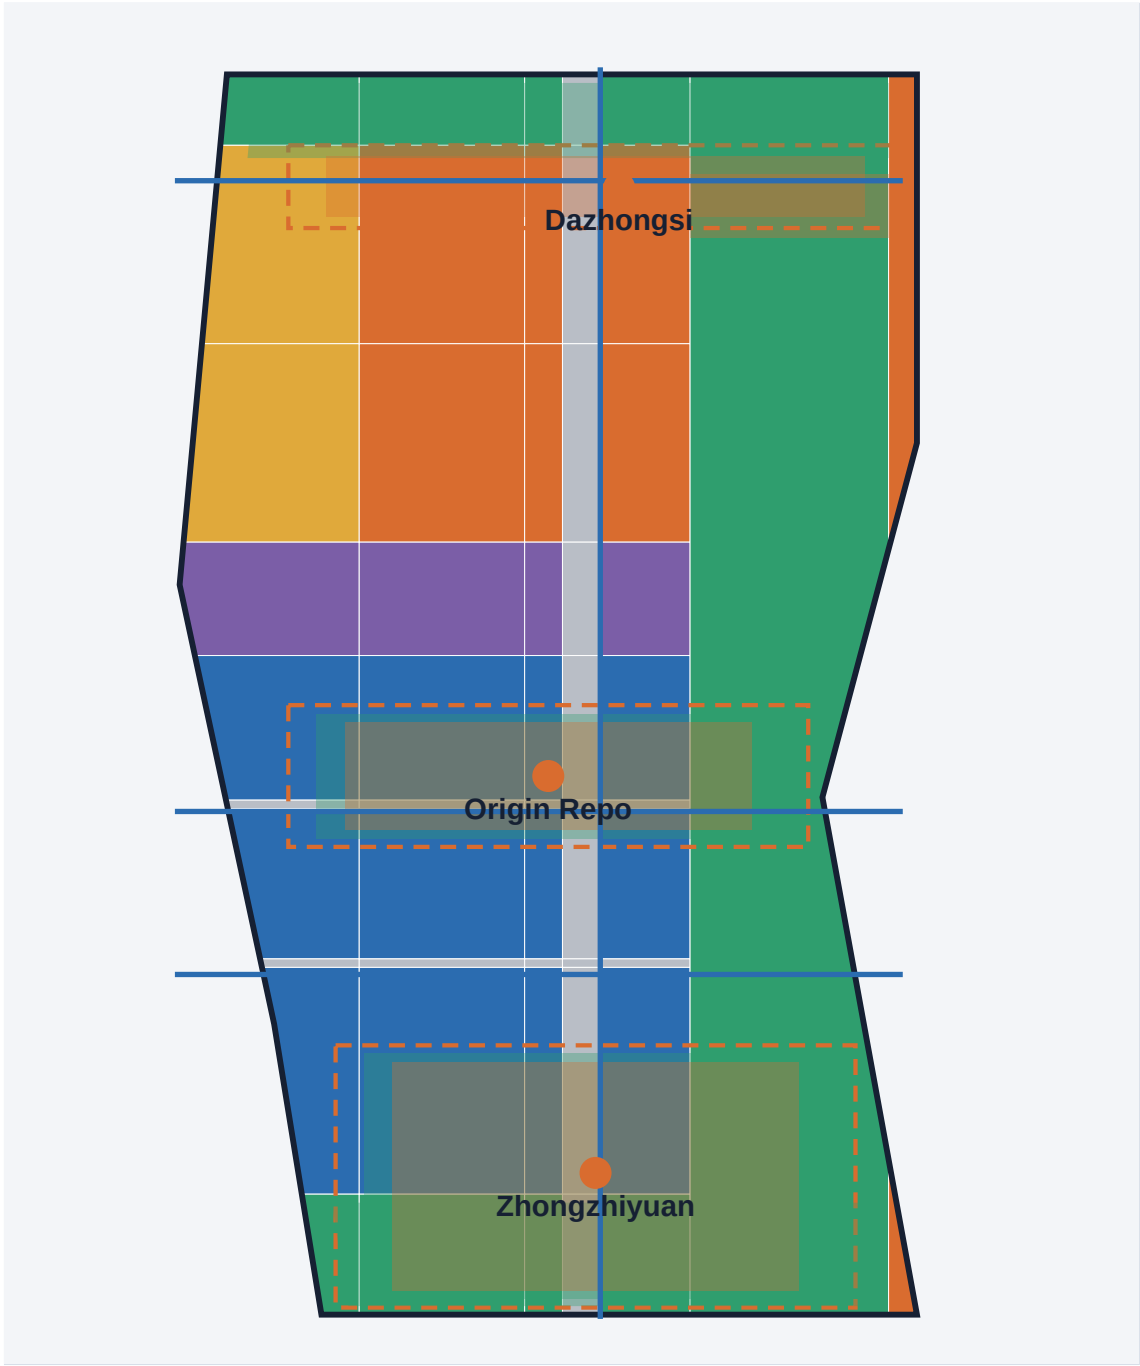

PR Plaza → Release Plaza → Test Plaza

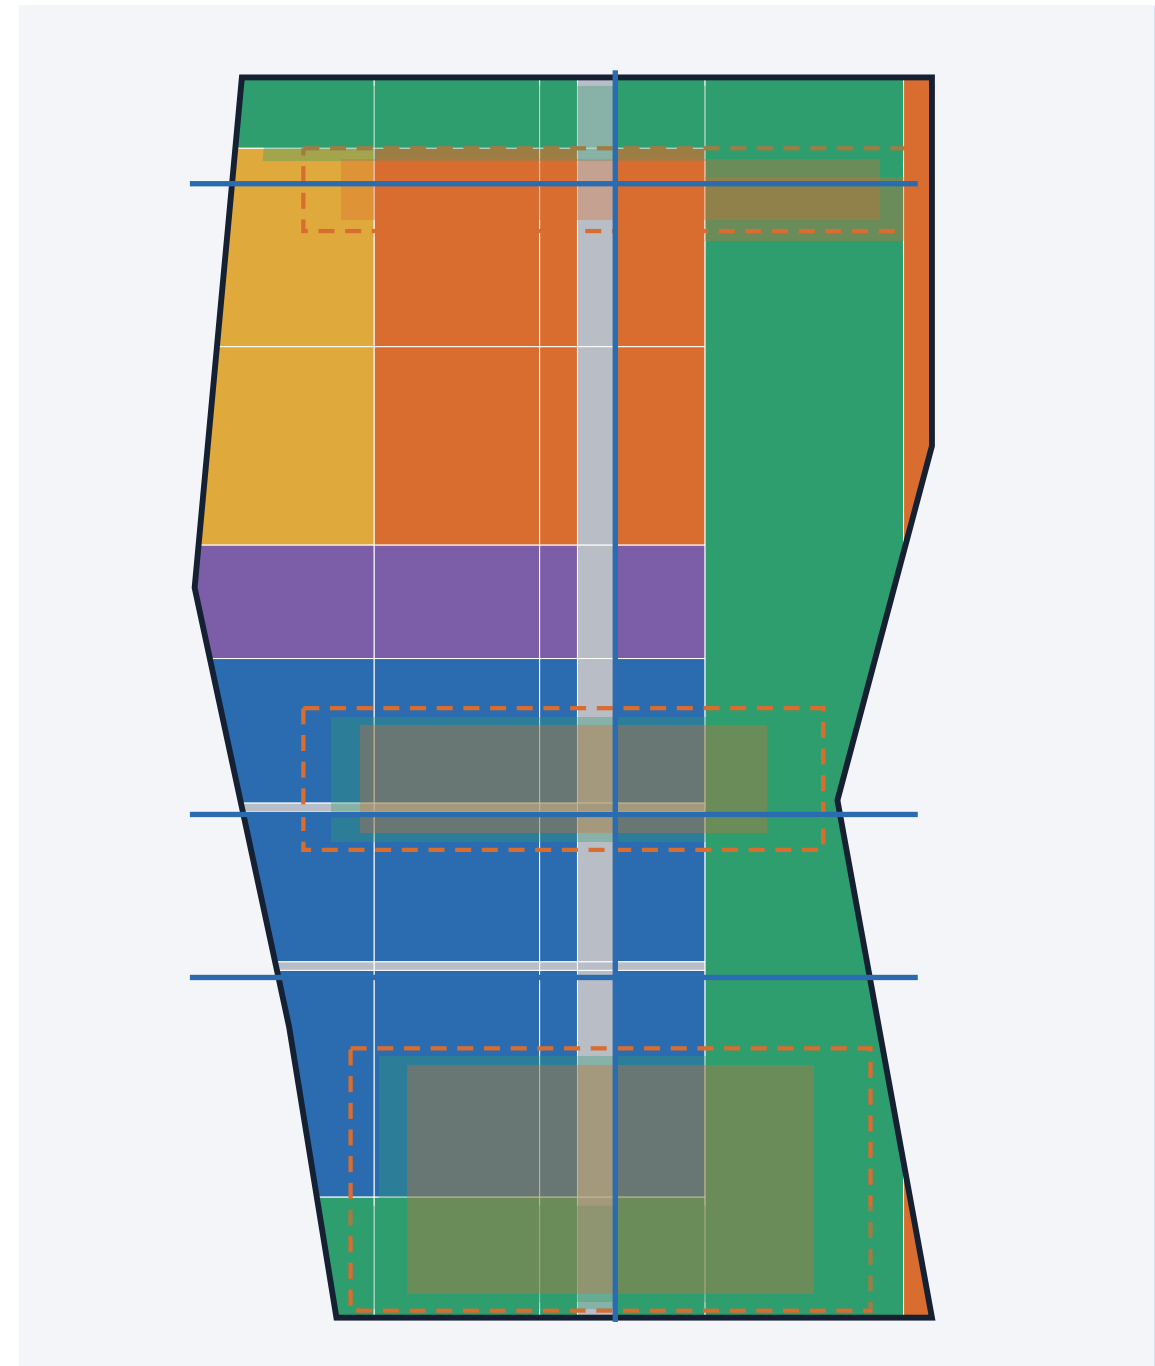

Operation = open-source loop:

submit → review → merge → release

Commemoration = honor wall + milestone

engraving (GitHub names + agent names)

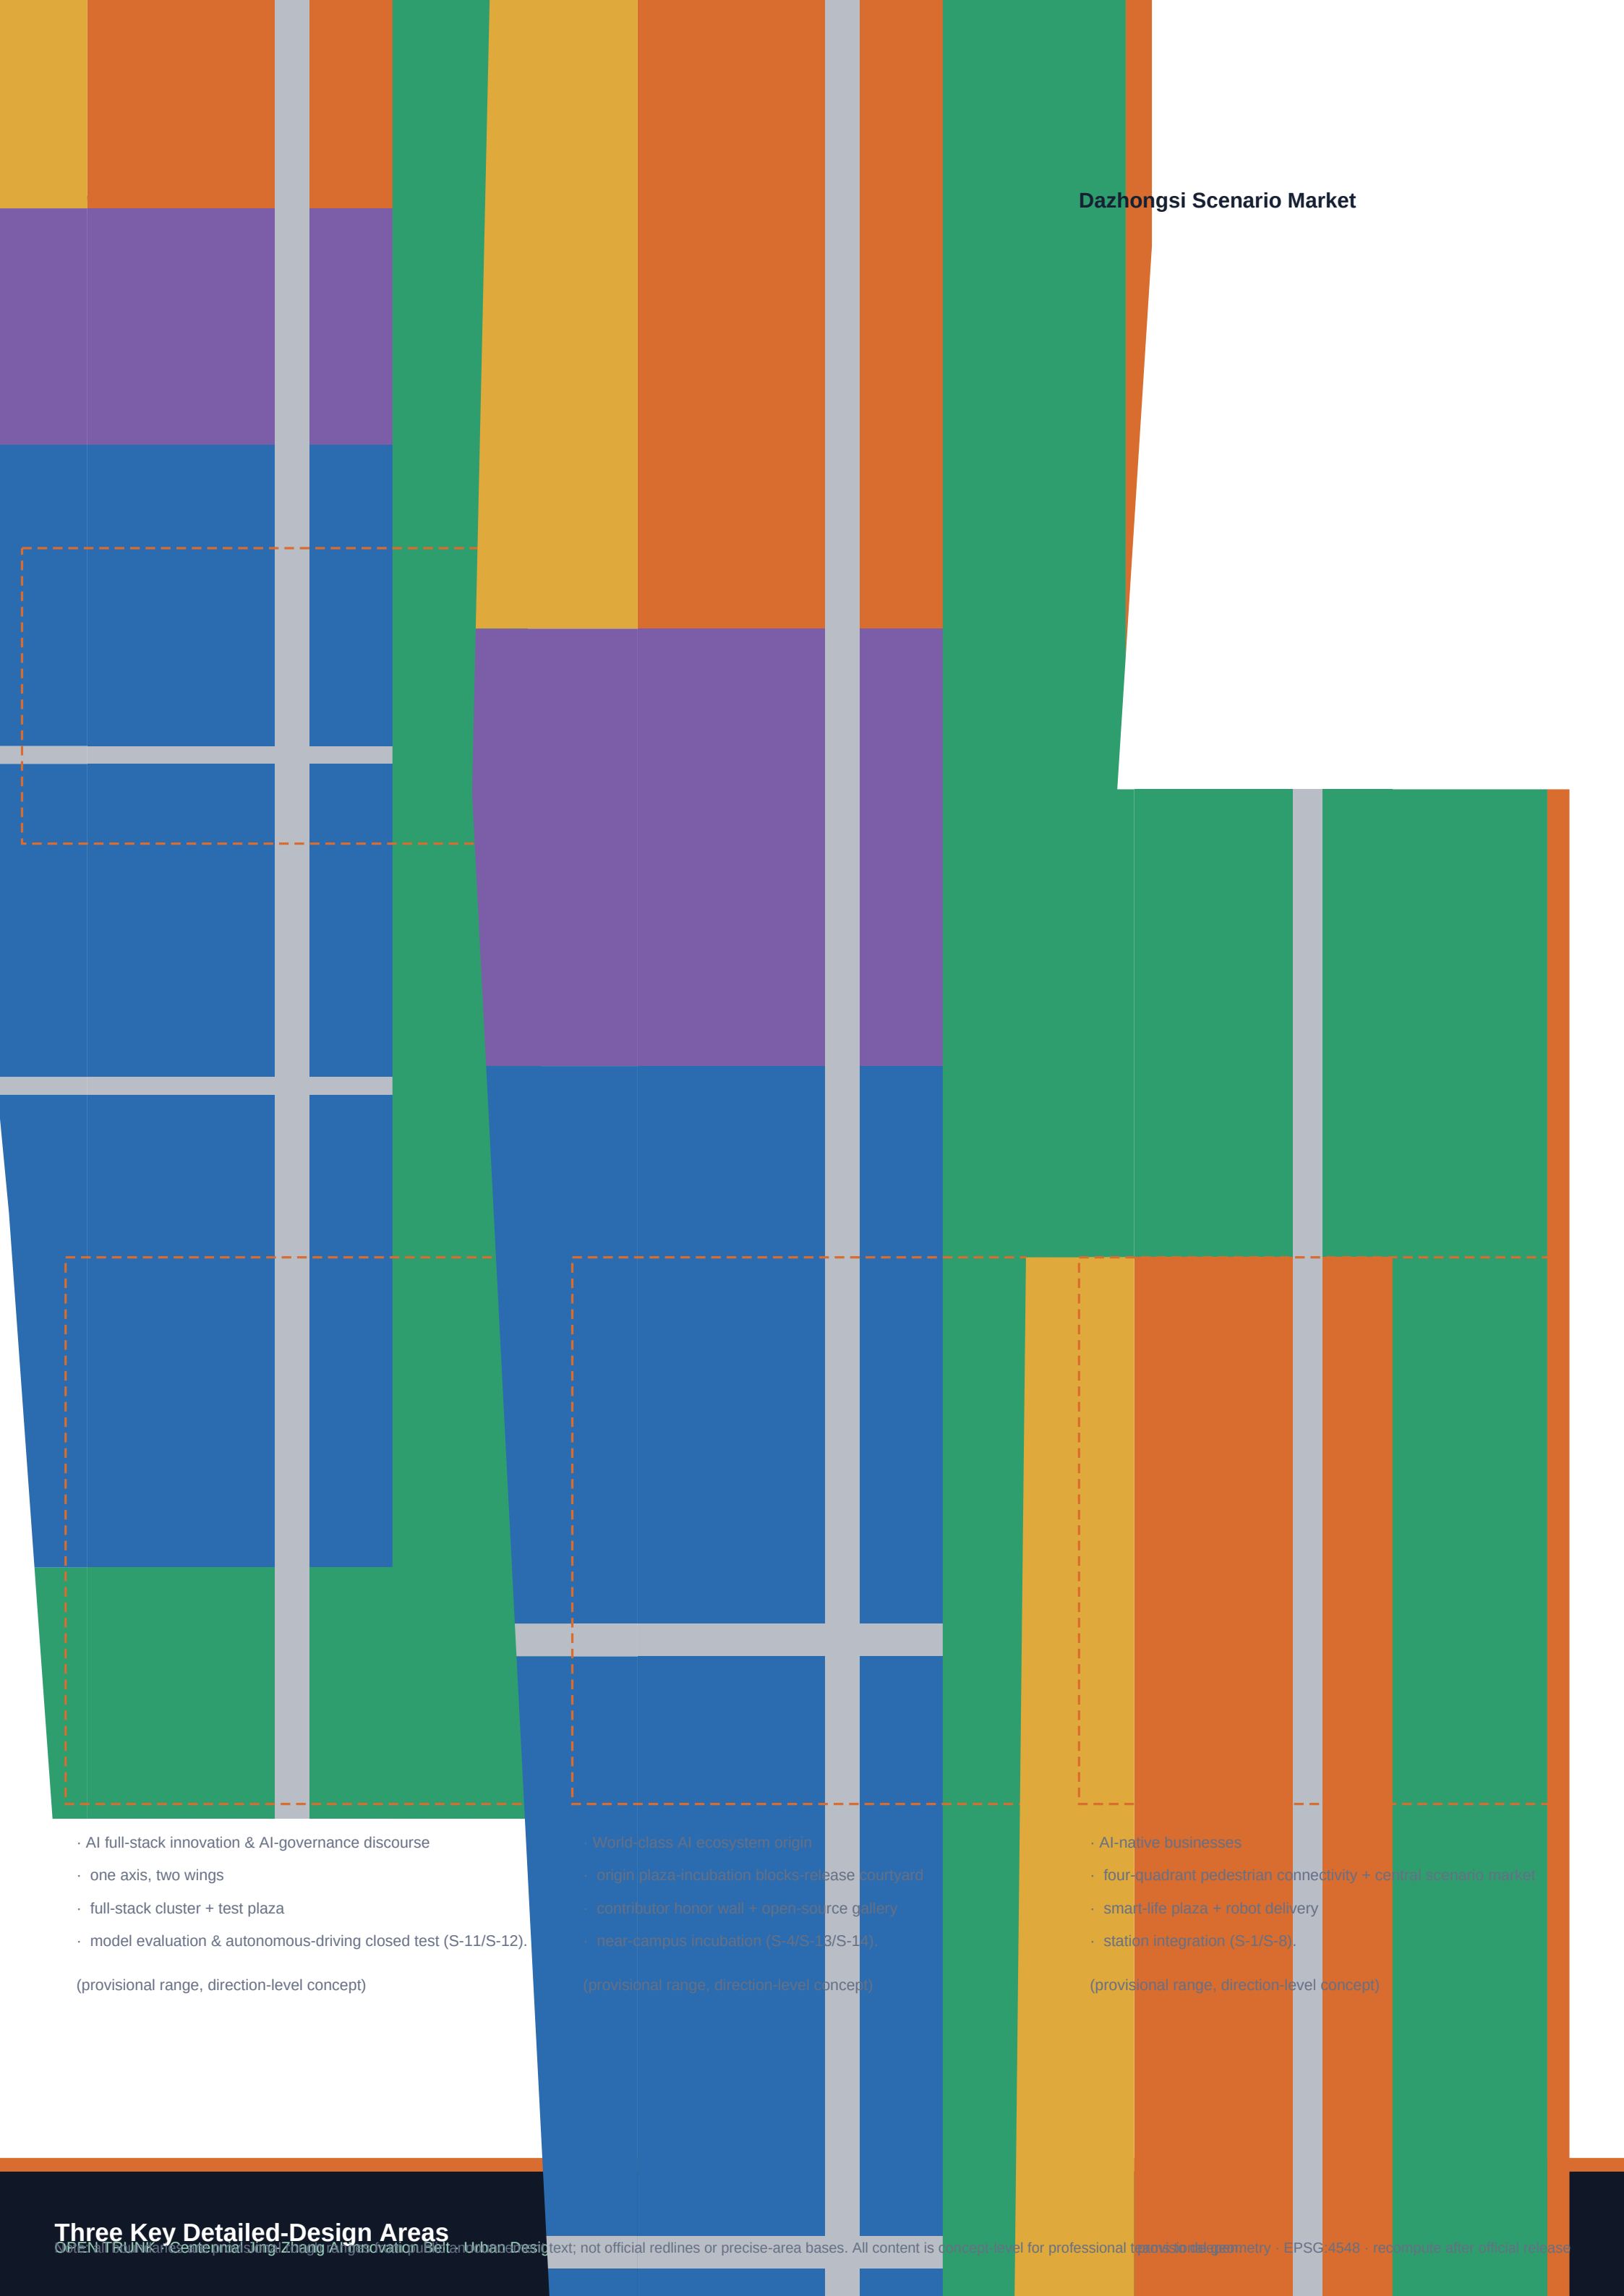

Land composition (recomputed)

Research 0802	25.9%
Commercial 05	16.2%
Green/open 1401	36.9%
Residential 0701	7.7%
Education 0804	6.6%
Roads 1207	6.7%

Key metrics

Overall design area	11.41 km²
Key areas total	3.69 km²
Building footprint	32.0■ m²
Scenario cards	14
Personas	6
Landmarks	4
Phases	3

Statutory controls (FAR/height): pending official control conditions (floor_area_ratio=unknown).

Dazhongsi Scenario Market

- AI full-stack innovation & AI-governance discourse
 - one axis, two wings
 - full-stack cluster + test plaza
 - model evaluation & autonomous-driving closed test (S-11/S-12).
- (provisional range, direction-level concept)

- World-class AI ecosystem origin
 - origin plaza-incubation blocks-release courtyard
 - contributor honor wall + open-source gallery
 - near-campus incubation (S-4/S-13/S-14).
- (provisional range, direction-level concept)

- AI-native businesses
 - four-quadrant pedestrian connectivity + central scenario market
 - smart-life plaza + robot delivery
 - station integration (S-1/S-8).
- (provisional range, direction-level concept)

Three Key Detailed-Design Areas

OPENIT BUNKER Central Jing-Zhang Ang Innovation Belt Urban Design text; not official redlines or precise-area bases. All content is concept-level for professional presentation only · EPSG:4548 · recompute after official release

AI scenario cards (* = industry test-validation)

S-1 Station-integrated transit	S-2 Slow-first signals/navigation
S-3 Community AI health	S-4 Open-source AI training
S-5 Open-source compliance sandbox	S-6 Agent gov service
S-7 Digital-twin park guide	S-8 Robot low-speed delivery
S-9 Investment Copilot	S-10 Agent incident response
S-11 Model evaluation*	S-12 Autonomous test*
S-13 Agent interoperability eval*	S-14 Open-source contribution wall*

Task coverage and evidence chain

- Announcement 1.3/1.4/1.5 → compliance_matrix.json (23 items)
- agent.1 naming/logo: OPEN TRUNK, three positionings = three releases
- agent.2 cases: Silicon Valley/Kendall/King's Cross/one-north/DMC/Nanshan
- agent.2 regional synergy: Future Science City/Huairou/E-Town/Beiwai/BTH
- agent.3 scenarios: 14 cards + 6 personas + 4 test-validation (S-11~S-14)
- agent.4 landmarks: PR Plaza/Release Plaza/Honor Wall/Test Plaza
- agent.5 culture: three timelines on one trunk + signage + storyline
- agent.6 operations: Jingzhang Open Source Conference, quarterly Release Day
- mandatory standards → standard_matrix.json (5 addressed + 1 data_gap)
- design-depth items 15/15 complete → design_depth_matrix.json

All events, outreach, funding, and policy mechanisms are concept suggestions, not confirmed government arrangements.
