

A0-1 Overall Structure

Evidence Spine stitches heritage park logic with AI production and community life
West verify/learn, center public spine, east convert/service, south live/care
Three cores align required key detailed design areas
Dual wings: university knowledge wing + rail-hub service wing

SITE OVERVIEW · Evidence Spine Protocol

EVIDENCE SPINE v2.1

Protocol loop on one walkable spine

VERIFY open eval · LIVE 15-min life · CONVERT roadshow · GOVERN audit

Site(prov) 11,412,842 sqm

Green 17.59% · Public 7.88% · Density 0.25%

Buildings 90 · Public features 11 · Scenarios 14 · Projects 14

- Spine 1401
- R&D 0802
- Education 0804
- Service 05
- Culture 0803
- Community 0702
- Evidence nodes
- Provisional edge

Provisional constraint only · VERIFY / LIVE / CONVERT / GOVERN · EPSG:4326 display / EPSG:4548 metrics

A0-2 Key Areas + Public Evidence Nodes

Zhongzhiyuan: open eval courts, pilot street, contribution plaza
AI Origin: 15-min care loop, community living room, family-safe streets
Dazhongsi: roadshow dome, enterprise service corridor, night-safe frontage
Public nodes form pilgrimage circuit for residents, builders, visitors

KEY AREAS · Three cores on the spine

EVIDENCE SPINE v2.1

Zhongzhiyuan = VERIFY campus edge / open eval / contribution plaza
AI Origin = LIVE 15-min care loop / community living room
Dazhongsi = CONVERT roadshow dome / enterprise service front
Dual wings: university knowledge wing + rail-hub service wing (concept)

Provisional polygons · program callouts dominate, not bbox aesthetics

A0-3 Mobility Blue-Green + Evidence Board

Walk-first corridor with transit edge conditions
Blue-green continuous park + pocket network
Metrics board discloses known/unknown and provisional precision limits
Implementation: open evidence update when official polygons arrive

MOBILITY + BLUE-GREEN · Walk-first evidence corridor

EVIDENCE SPINE v2.1

Arrive by transit/edge parking -> walk the spine -> complete verify/live/convert loops

- Blue-green
- Evidence plazas
- Greenway
- Secondary
- Transit link
- Cycleway

Conceptual network only · not road redline · transit-edge arrival + internal walking

A0-4 Metrics / Compliance / Operations

Known ratios: green 17.59%, public 7.88%, road 14.53%
Program counts: 14 scenarios / 4 tests / 6 personas / 5 landmarks / 14 projects
Risk honesty: provisional geometry, missing FAR/redlines/ownership/utilities
Long-term ops: developer season + open days + civic council + contribution ledger

METRICS + EVIDENCE CHAIN

EVIDENCE SPINE v2.1

Site area 11,412,842 sqm	Green ratio 17.59%	Public ratio 7.88%	Building density 0.25%
Road ratio 14.53%	Key areas 3	Scenario cards 14	Test scenarios 4
Landmarks 5	Renewal projects 14	Personas 6	FAR / GFA unknown

Authority: geometry -> metrics -> matrices -> proposal -> figures/PDF/HTML

Provisional geometry disclosed; official polygon arrival triggers full recalculation.

Geometry authority · EPSG:4548 · known/unknown honesty · matrices + proposal alignment
