

AI Pilgrimage Trail: Urban Design Concept for the Jing-Zhang Railway Heritage Park Vitality Belt and the Three-District Two-Wing Collaboration

Concept design within the provisional boundary; recompute after official redlines are released

This proposal is generated from the Prequalification Notice of the International Urban Design Solicitation of the Centennial Jing-Zhang AI Innovation Belt and the agent-facing taskbook.

Three scopes: coordinated research 43.6 km2 / overall design 11.4 km2 / key areas 368.4 ha total (provisional fit).

Spatial structure: one belt, three cores, three districts, two wings; belt = Jing-Zhang Heritage Park vitality belt; cores = Zhongzhiyuan / Beijing AI Origin Community / Dazhongsi.

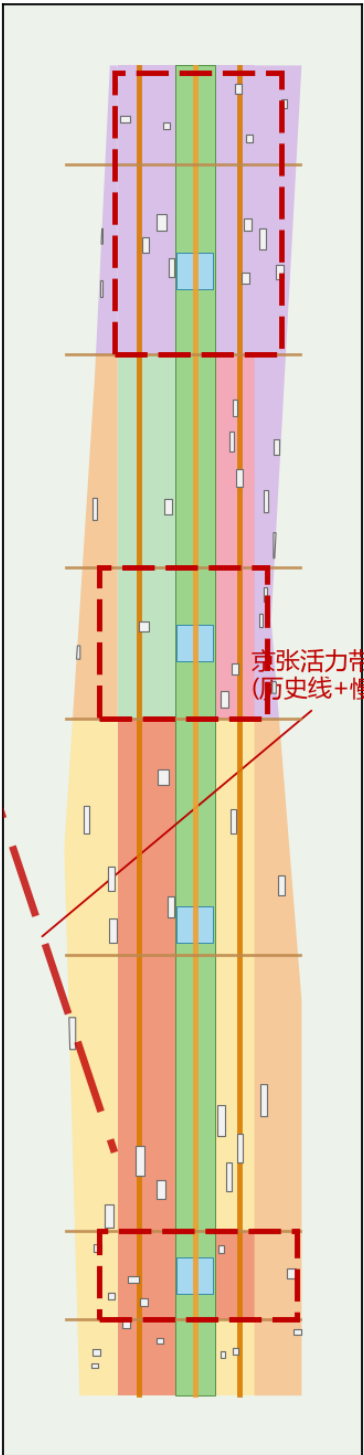

Deliverables: GeoJSON x9, metrics.json, five figures, HTML, A3 booklet, A0 boards, all machine-verifiable.

Depth: regulatory-plan-level urban design (provisional boundary); all indicators must be recomputed after official redlines are released.

01 Overall design master plan

Concept design within the provisional boundary; recompute after official redlines are released

AI朝圣之旅 • 总体设计总平面 (provisional 边界内概念设计)

边界为临时多边形 (provisional) ，不构成官方红线或权属边界

English translation of figure text

AI Pilgrimage Trail - Master Plan (concept design within the provisional boundary)

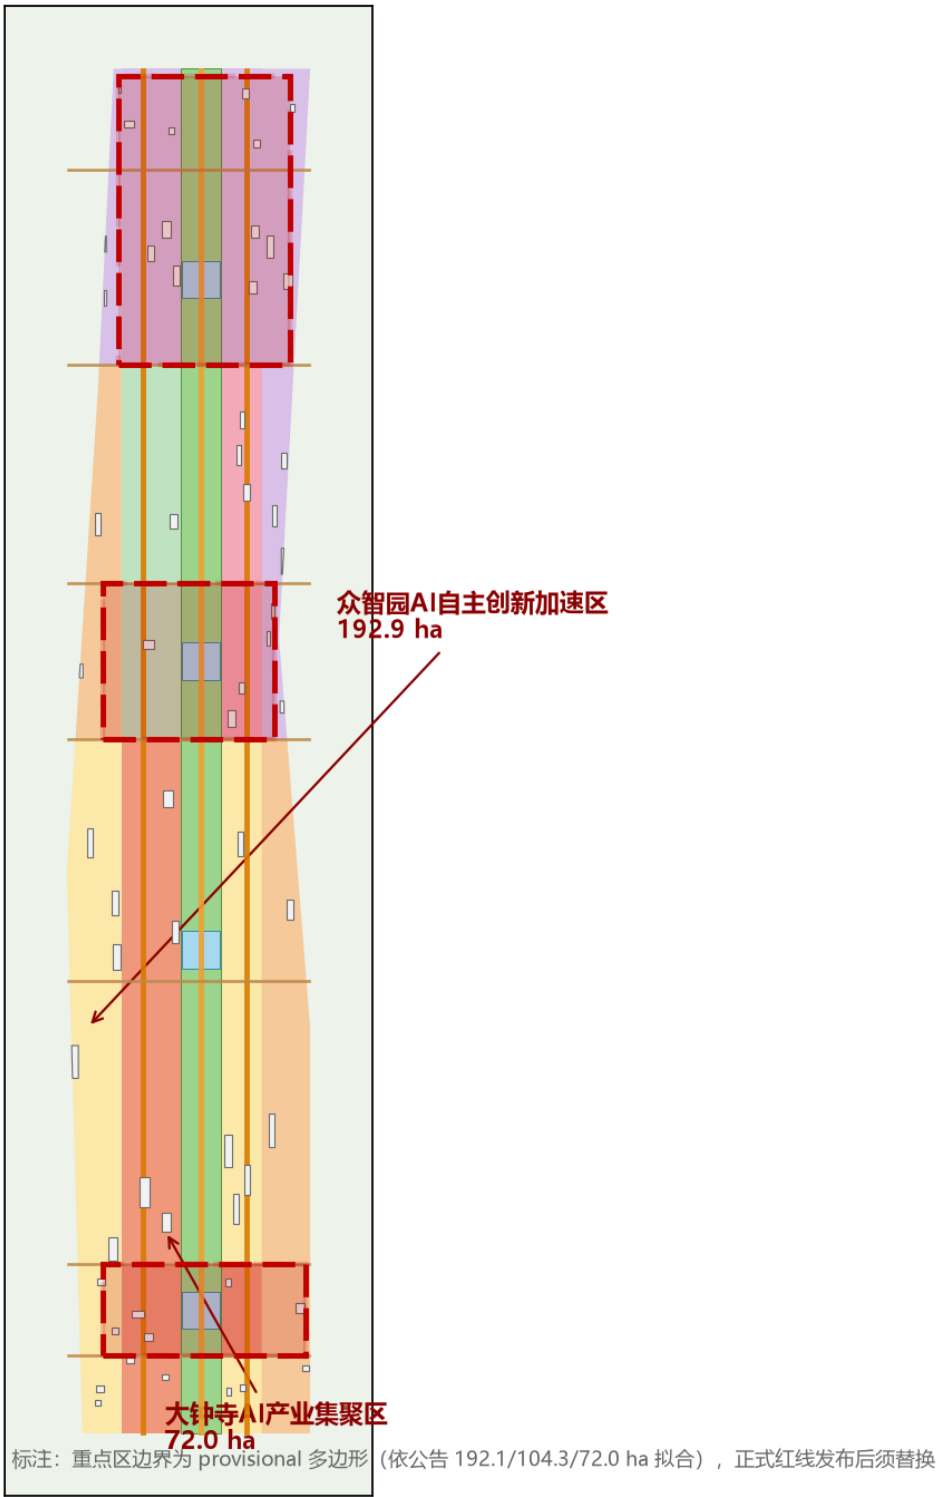

Boundary is provisional; it is not an official redline or ownership boundary. One belt, three cores, two wings: the Jing-Zhang Heritage Park vitality belt links Zhongzhiyuan, Beijing AI Origin Community, and Dazhongsi.

Provisional polygons are not official redlines, approval bases, or ownership bases

02 Index of the three key areas

Concept design within the provisional boundary; recompute after official redlines are released

三处重点区域索引 • 三区两翼结构 (provisional)

English translation of figure text

Index of the Three Key Areas - Three-District Two-Wing Structure (provisional)

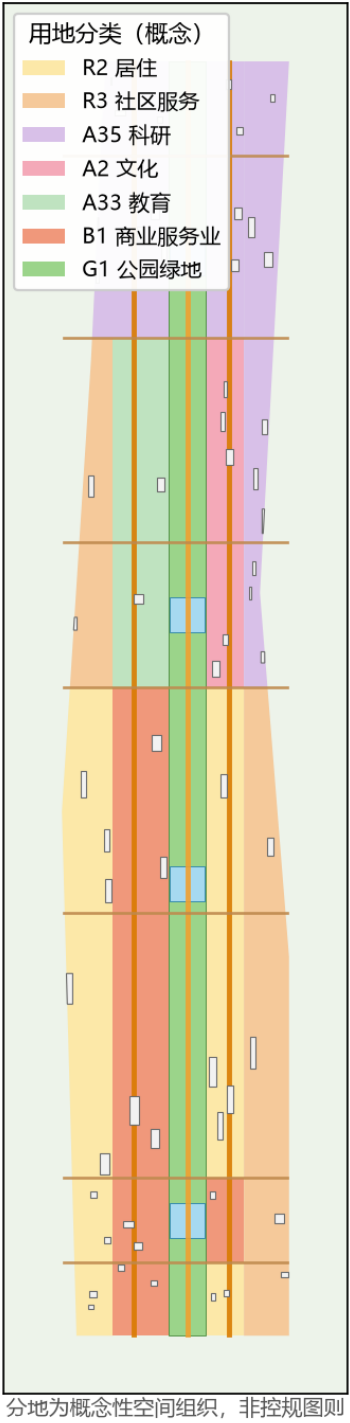

Key-area boundaries are provisional polygons fitted to the announced 192.1 / 104.3 / 72.0 ha; they must be replaced when official redlines are released.

Provisional polygons are not official redlines, approval bases, or ownership bases

03 Land-use functional structure

Concept design within the provisional boundary; recompute after official redlines are released

用地功能结构（概念方案） • 07类居住社区服务 / 08类科研文化教育 / B1商业 / G1公园绿地

分地为概念性空间组织，非控规图则

English translation of figure text

Land-Use Functional Structure (concept scheme)

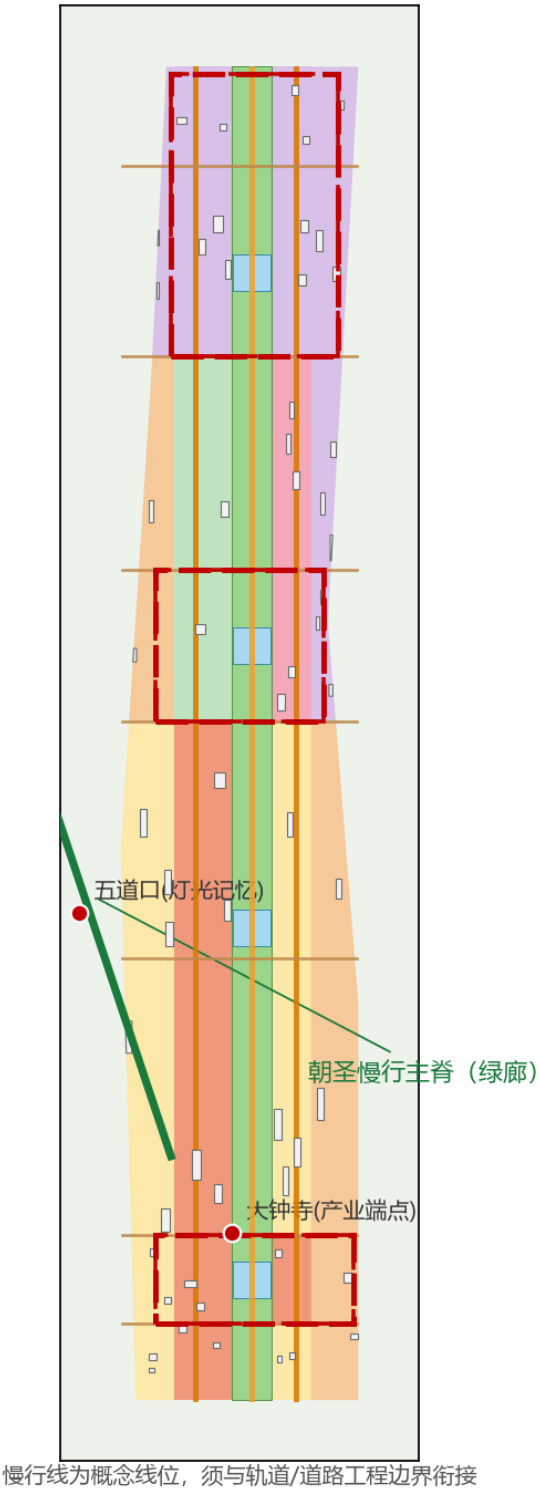

R2 residential / R3 community services / A35 R&D / A2 culture / A33 education / B1 commercial / G1 park green. Partition is conceptual spatial organization, not a statutory land-use plan.

Provisional polygons are not official redlines, approval bases, or ownership bases

04 Blue-green system and pilgrimage slow-travel network

Concept design within the provisional boundary; recompute after official redlines are released

蓝绿系统与朝圣慢行网络 • 铁路遗址绿廊串联三核

English translation of figure text

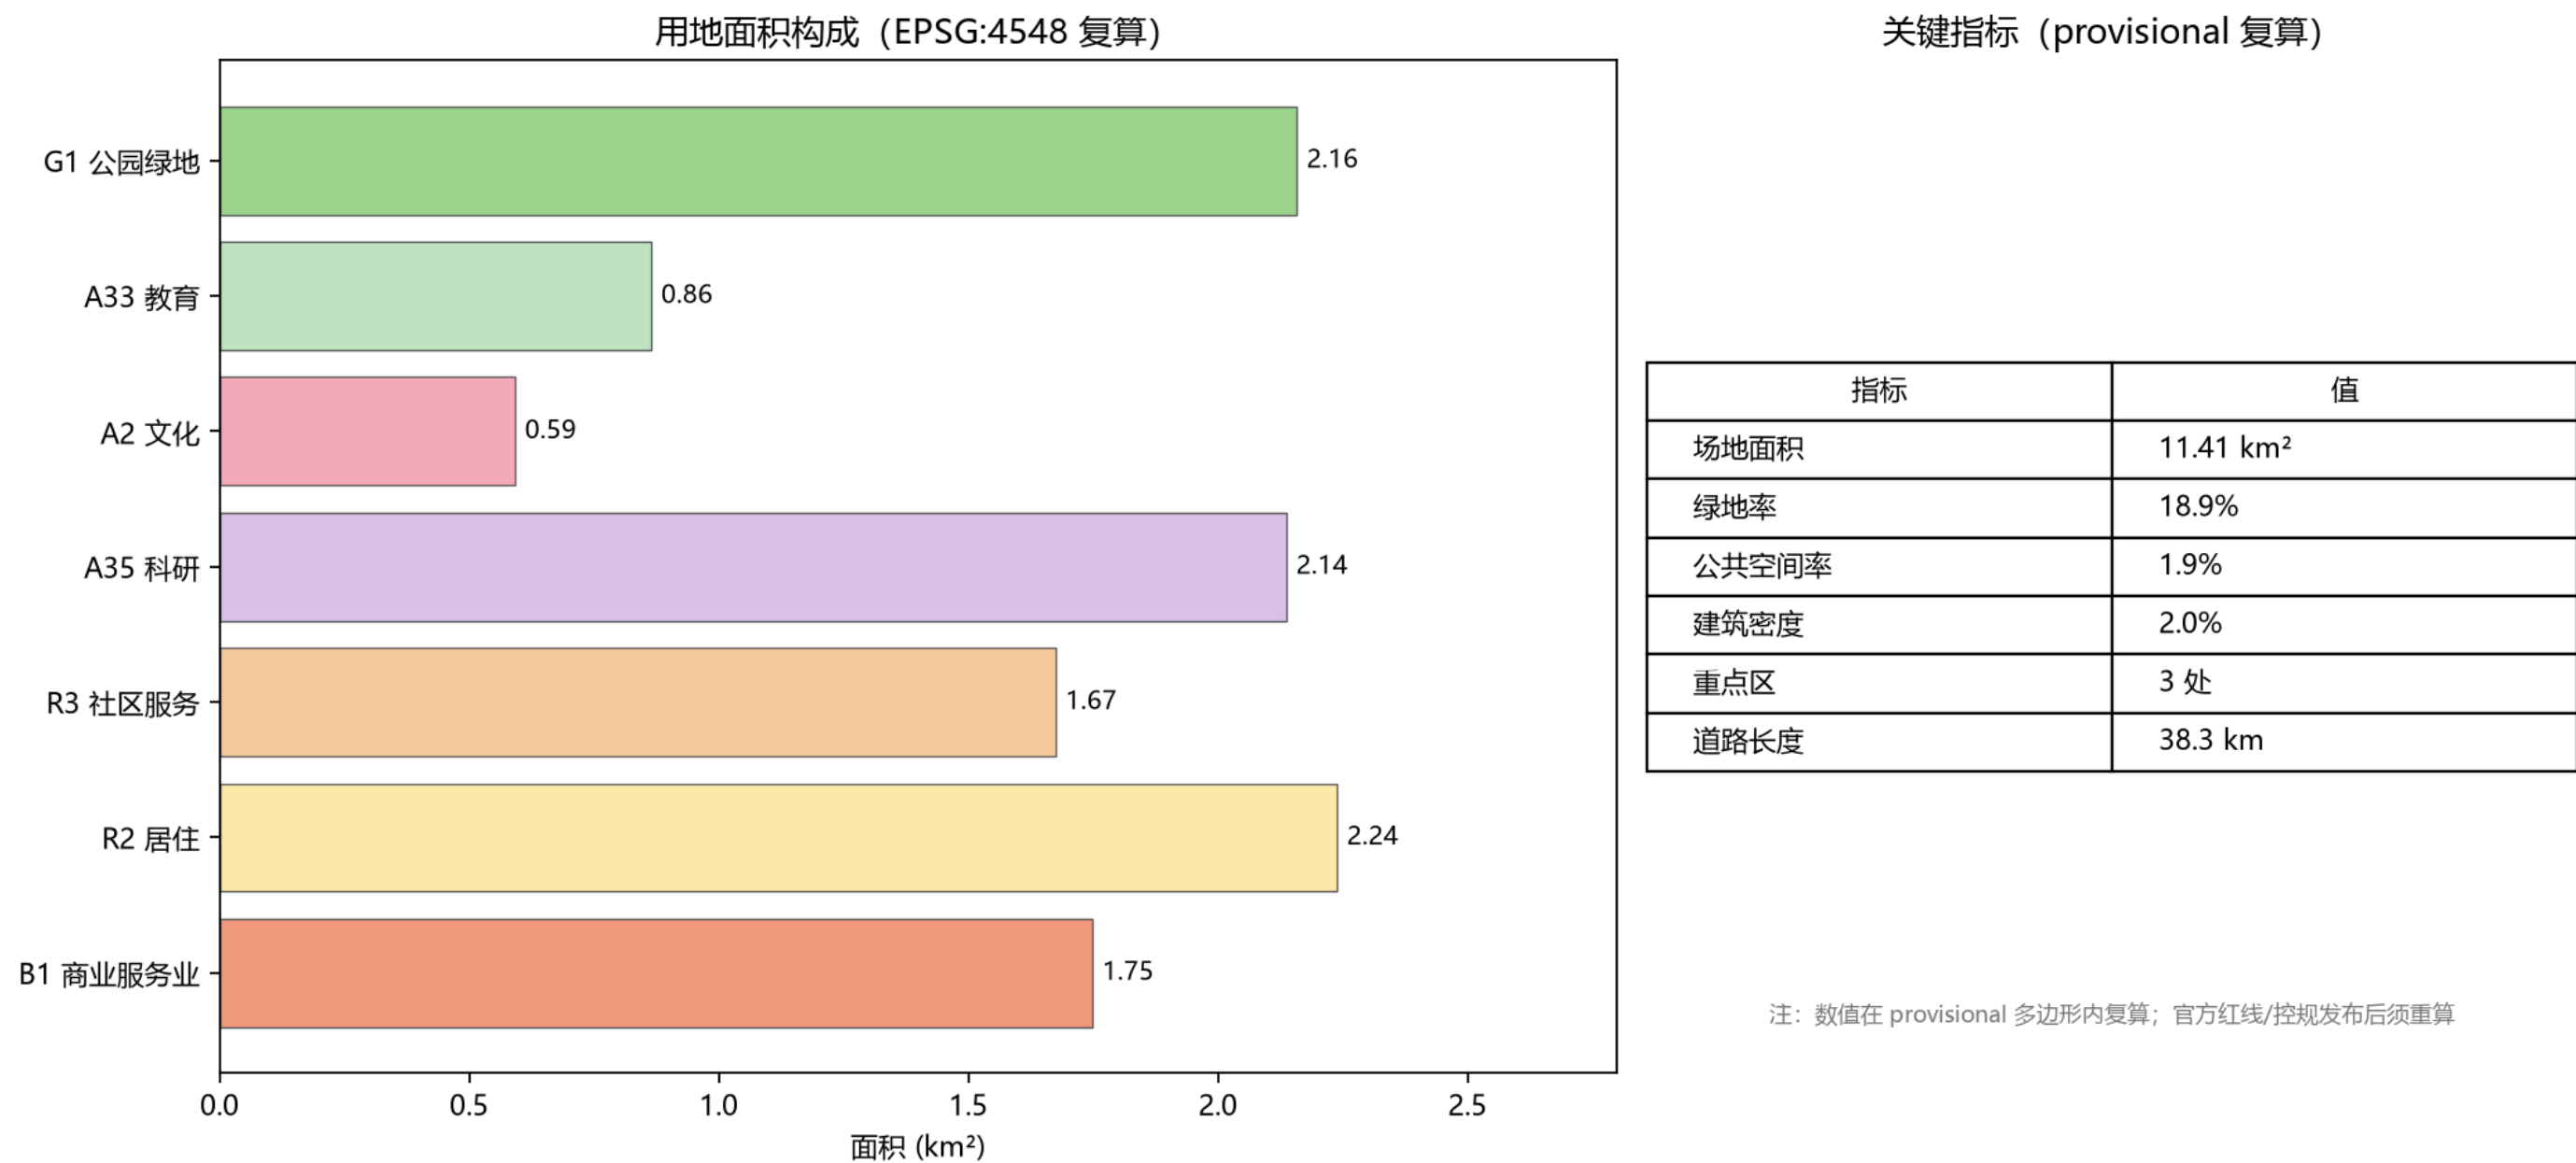

Blue-Green System and Pilgrimage Slow-Travel Network

The railway heritage green corridor links three cores; slow-travel alignments are conceptual and must connect to rail/road engineering boundaries.

Provisional polygons are not official redlines, approval bases, or ownership bases

05 Core indicator evidence

Concept design within the provisional boundary; recompute after official redlines are released

English translation of figure text

Core Indicator Recalculation (provisional)

Values recomputed within provisional polygons (EPSG:4548): site 11.41 km2, green ratio 18.9%, building density 2.0%, 3 key areas, 38.3 km of concept roads. Recompute after official redline release.

Provisional polygons are not official redlines, approval bases, or ownership bases
