

JING-ZHANG: A NEW PATH FOR INNOVATION

From breakthrough to everyday life—and from real needs to the next breakthrough.

AI-ASSISTED CONCEPTUAL ILLUSTRATION | NOT A SITE PHOTO, EXISTING-CONDITION RECORD, OR STATUTORY PLAN; NOT AN EXACT PARCEL, BUILDING, OR IMPLEMENTATION SCHEME.

AI-assisted conceptual illustration	Not a site photo or statutory plan
-------------------------------------	------------------------------------

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Three working resolutions answer one brief

43.6 km² coordinates research, 11.4 km² organises overall design, and 368.4 ha develops three key areas.

F-01 · SITE OVERVIEW

Three Scales and Brief Response | One Integrated Innovation Structure

Three nested design depths; one Public-life Base organizes positions, functions, zones and wings.

Resources are close, yet innovation still breaks

Trend, actors, users, and carriers show that the gap is cross-boundary conversion—not another centre.

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

The New Path is an urban condition, not a new road

A public foundation, three networks, five interfaces, P/T/C access, and long-term operation work together.

F-02 · LAND-USE STRUCTURE

Spatial and Urban-renewal Structure | Services First, Space Adapts Over Time

One Public-life Base carries four functions; three connection networks organize a renewable multi-area system.

Find / Meet

Make / Use

Return

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

43.6 km² studies regional and global connection

The announced area is a brief fact; the proposal does not fabricate a precise coordinated-area polygon.

Technology and universities	Capital and services	Scenarios and global partners
-----------------------------	----------------------	-------------------------------

Seven cases transfer mechanisms, never form

Their value lies in enabling conditions and transfer boundaries, not visual resemblance.

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Resources become projects through responsibility

Eight resource families enter joint projects with complete Problem, Technology, Operation, and Accountability roles.

8 resources

4 accountable roles

5 parallel interfaces

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Industry relationships require spatial interfaces

Every capability gains a public, transitional, or controlled setting without turning industry labels into land-use polygons.

D-03 · INDUSTRY-SPACE MAPPING

Industry–Space Mapping | Relationships Become Spatial Interfaces

Not industry labels on land: distinct access, spatial carriers and operations support innovation.

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Protect the public foundation, then connect areas and wings

Four conceptual functions occupy segments, interfaces, and nodes. Services come first; space keeps adapting.

F-02 · LAND-USE STRUCTURE

Spatial and Urban-renewal Structure | Services First, Space Adapts Over Time

One Public-life Base carries four functions; three connection networks organize a renewable multi-area system.

Continuous public base

Three connection networks

Conditional renewal

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Ordinary life first; professional systems remain controlled

Fast, slow, and discovery links keep distinct roles; controlled logistics never occupies public walking.

F-04 · MOBILITY-BLUEGREEN

Mobility, Blue-green and Public-service Base | Ordinary Life First

Fast, slow and discovery connections have distinct roles; professional logistics and digital systems remain bounded.

East-west seams

Last-mile access

Minimum necessary infrastructure

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

High-threshold capability becomes shareable professional capacity

A public foyer, controlled collaboration court, and professional platform form a legible gradient with side logistics.

AI-ASSISTED CONCEPTUAL ILLUSTRATION | NOT A SITE PHOTO, EXISTING-CONDITION RECORD, OR STATUTORY PLAN; NOT AN EXACT PARCEL, BUILDING, OR IMPLEMENTATION SCHEME.

--------------------	------------------------------	---------------------

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Lower the cost of a first step while protecting resident life

Near-campus small units, a public entry, and adaptable ground floors serve new teams. Residents are never default test users.

AI-ASSISTED CONCEPTUAL ILLUSTRATION | NOT A SITE PHOTO, EXISTING-CONDITION RECORD, OR STATUTORY PLAN; NOT AN EXACT PARCEL, BUILDING, OR IMPLEMENTATION SCHEME.

No permanent C	Human and paper entry	AI-assisted concept
----------------	-----------------------	---------------------

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Bring capability into clients, markets, and ordinary city life

A station foyer, client collaboration, training, after-sales service, and normal ground floors replace the sealed showroom.

AI-ASSISTED CONCEPTUAL ILLUSTRATION | NOT A SITE PHOTO, EXISTING-CONDITION RECORD, OR STATUTORY PLAN; NOT AN EXACT PARCEL, BUILDING, OR IMPLEMENTATION SCHEME.

Station last mile	First customer and support	AI-assisted concept
-------------------	----------------------------	---------------------

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Real problems enter space through four accountable roles

Six personas, twelve scenarios, and four validation settings define entry, human alternatives, and exit.

Everyday life, AI-native services, and shared waymarks coexist

Waymarks record open-source work, breakthrough, scenario access, and long maintenance—never personal or community ranking.

F-03 • KEY AREAS

Three Key Areas | Distinct Prototypes, Multi-directional Collaboration

Different areas, equal design weight: north, middle and south use distinct spatial languages.

Area values come from the brief; provisional geometry and conceptual modules are not statutory boundaries, land use or engineering alignments.

4 shared waymarks

Public component library

Contribution system

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Independence, breakthrough, connection, operation

Jing-Zhang culture becomes a maintainable civic-infrastructure ethic. Identity, wayfinding, and historical fact remain distinct.

Daily, 90-day, annual, and long-term rhythms coexist

Eighteen projects move from diagnosis and service to spatial adaptation, professional capacity, and long-term renewal.

NEW PATH 90

Open Week

P0-P4 maturity

CONCEPTUAL PROPOSAL / PROVISIONAL GEOMETRY / NOT A STATUTORY, ENGINEERING, OR IMPLEMENTATION COMMITMENT.

Facts, recalculations, gaps, and baselines never share one status

Announced areas, provisional geometry, conceptual modules, pending controls, and future baselines remain separately auditable.

F-05 · METRICS-EVIDENCE

Metrics, Evidence and Completion Status | Facts, Recalculations and Gaps Separated

Evaluation is not one score: separate evidence states, then establish local baselines for three outcomes.
