

01

ON DUTY JING-ZHANG V3 | URBAN HANDOVER FOR RELIABLE AI

THE CITY STAYS OPEN WHEN AI STOPS: 1 SPINE · 3 COURTS · 12 CELLS · 10 LINKS · 12 POINTS

SPATIAL CONTRACT

12 × 12 × 10

CELLS | WINGS | LINKS

Exact-cover and auditable; not parcels, buildings or roads.

9 + 3 + 4

READY | PILOT | EXCLUDED

Existing workflows first, three bounded pilots, four high-risk exclusions.

100%

HUMAN | FALLBACK | STOP

All 12 scenarios bind a named role, non-AI route and stop rule.

SEVEN-STATE OPERATING CONTRACT

THREE DIFFERENTIATED DUTY COURTS

01

ZHONGZHIYUAN | STOP-SAFE TEST YARD

Prove it can stop safely before proving it works.

02

AI ORIGIN | TWO-DOOR SERVICE COURT

The Human Door never needs login; Digital Door starts in shadow.

03

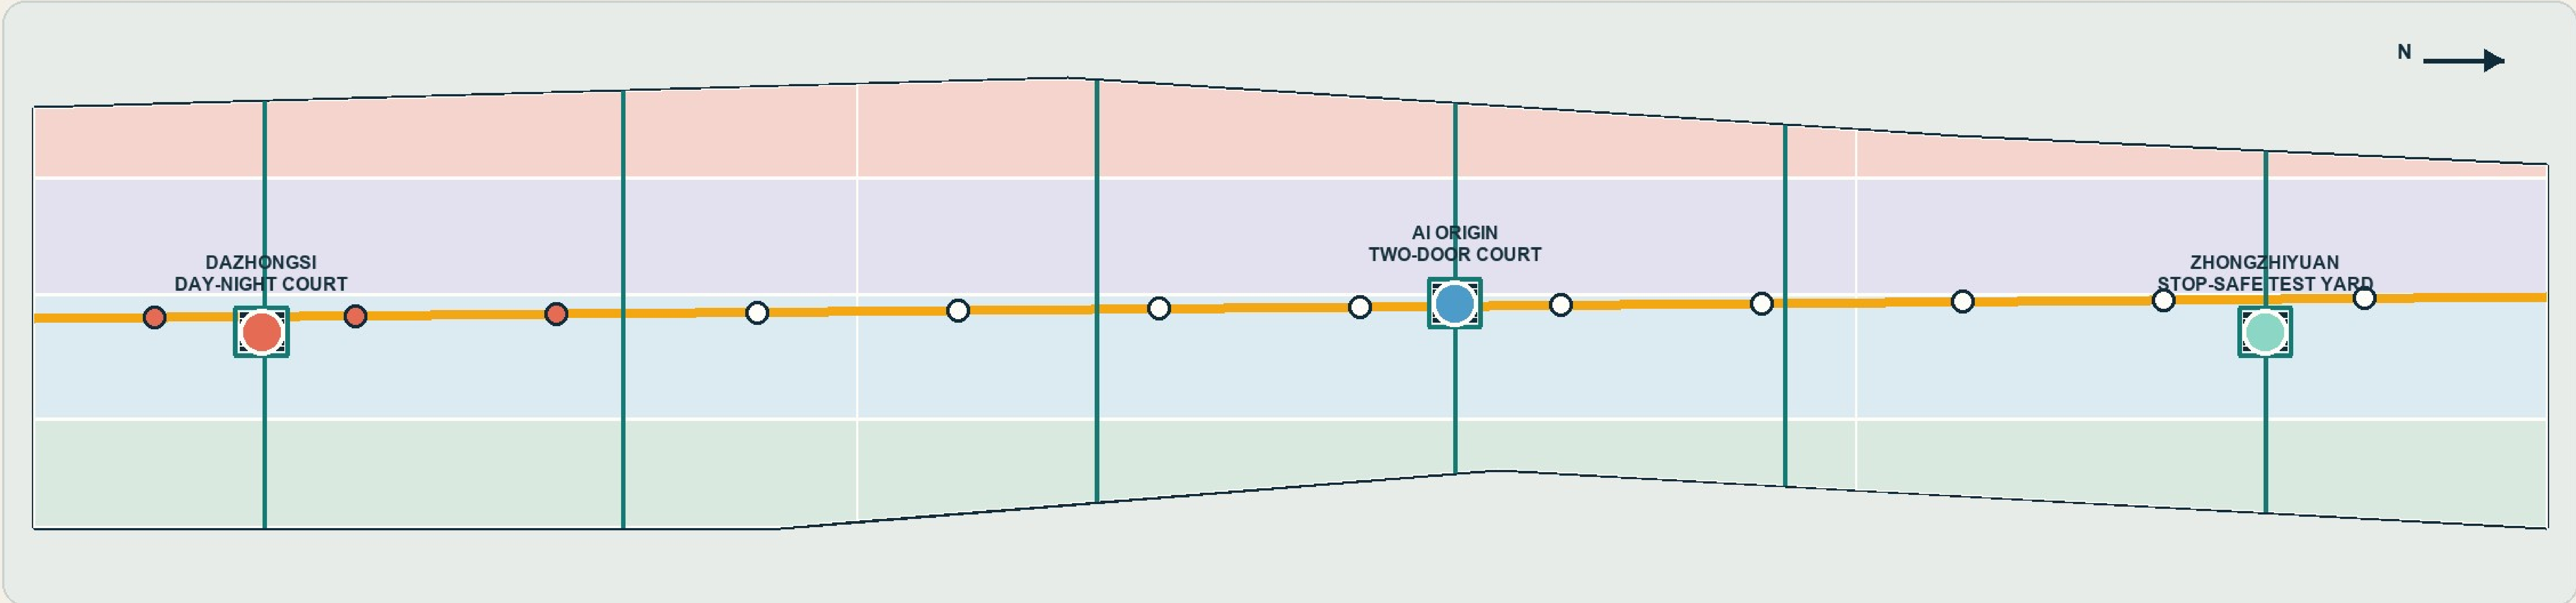

DAZHONGSI | DAY-NIGHT HANDOVER COURT

Day display, night duty; versions, tickets and spares migrate.

02

12 RESPONSIBILITY CELLS | LAND USE AS A HANDOVER SECTION

3 DISTRICTS × 4 INTERFACES; A LEGIBLE PUBLIC-TO-TEST BOUNDARY ACROSS THE CORRIDOR

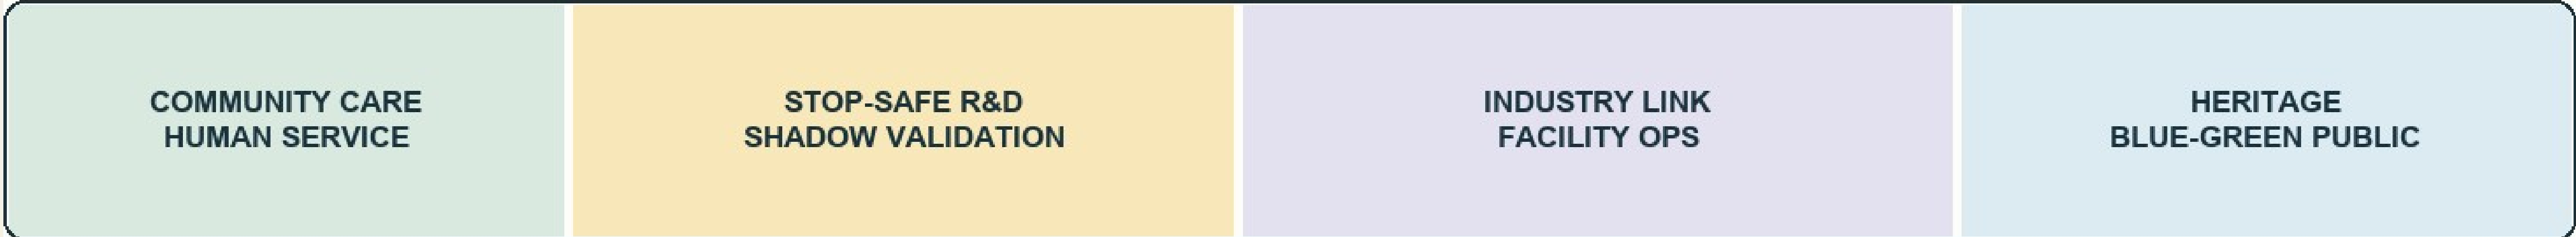

S · DAZHONGSI DAY-NIGHT OPERATIONS

M · AI ORIGIN COMMUNITY SERVICE

N · ZHONGZHIYUAN SAFE VALIDATION

CONCEPT SECTION | ALL WIDTHS AWAIT SURVEY

- 01

PUBLIC CONTINUITY FIRST

Robots and equipment never displace the accessible route.
- 02

EXISTING SPACE FIRST

Twelve wings are replaceable envelopes: retain, adapt, move or delete.
- 03

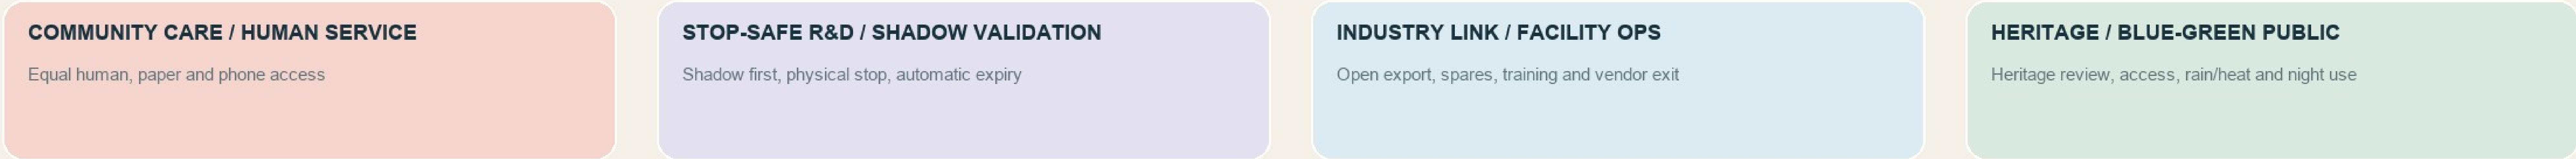

TEST IS NOT SERVICE

Public and test zones separate by space, time, signs and authority.
- 04

WORKS WHEN SYSTEM IS OFF

Paper, physical signs, shade, water, light and people remain independent.

DELIVERY FLOOR FOR FOUR INTERFACES

03

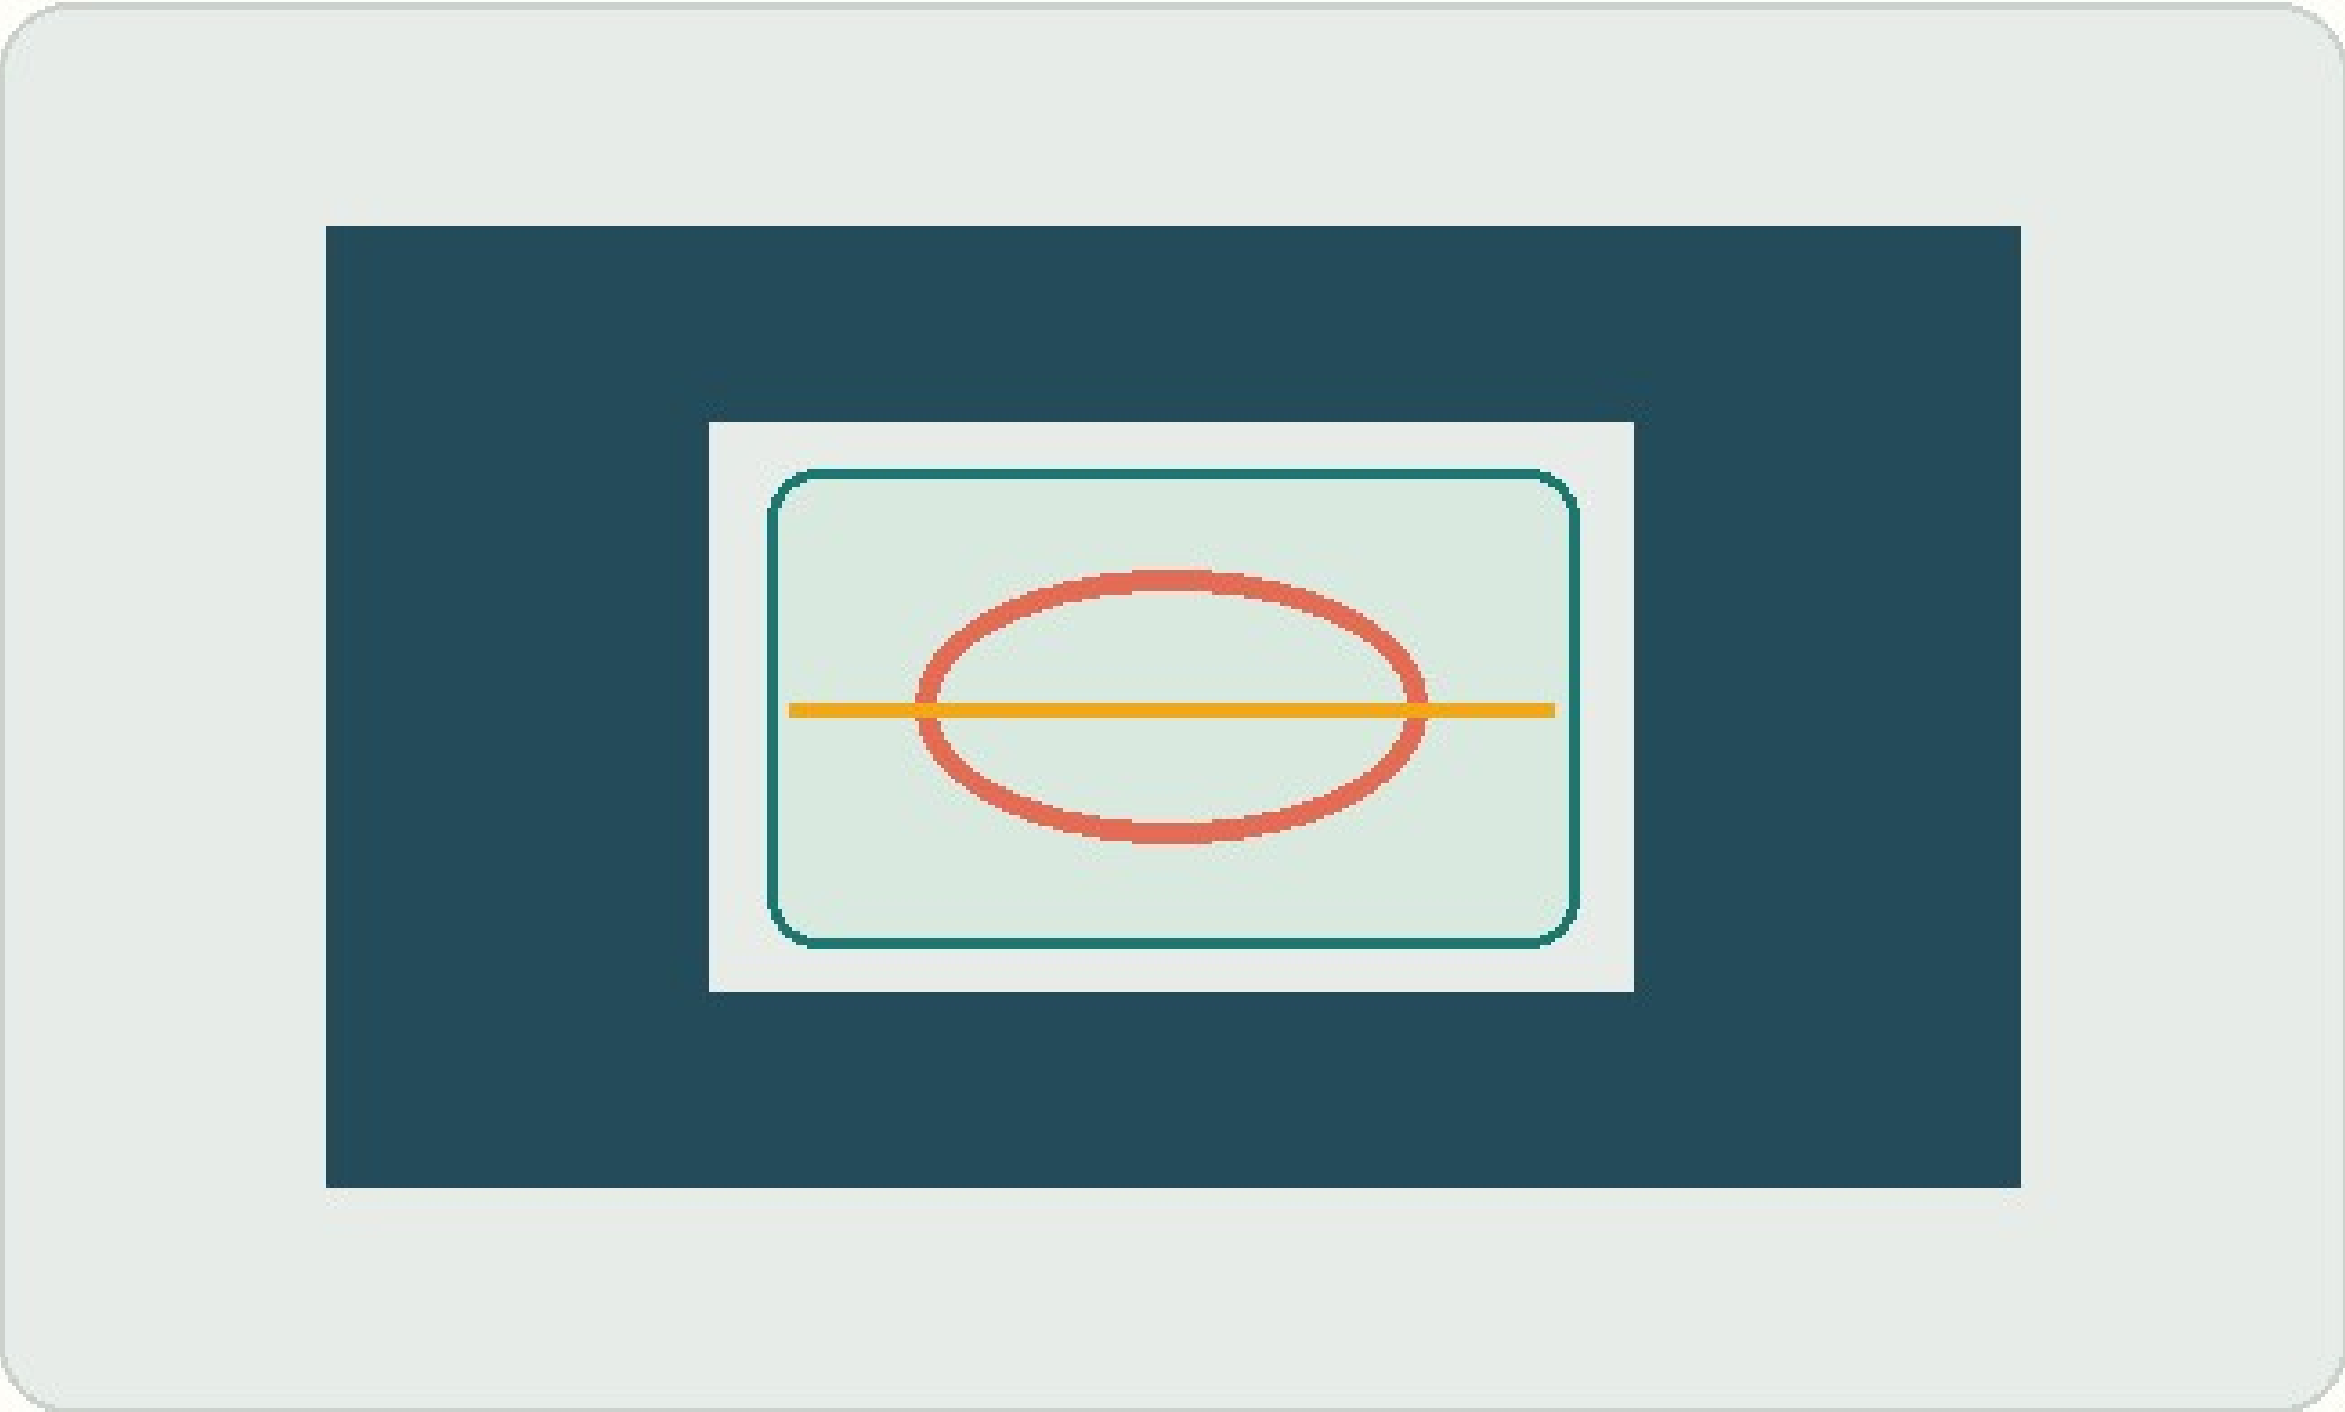

THREE COURTS, NOT THREE BUILDINGS | PUBLIC-TEST-MAINTENANCE PROTOTYPES

CONCEPT PLAN + REQUIRED SECTION + FIRST DELIVERABLE + STOP CONDITION; EXISTING SPACE FIRST

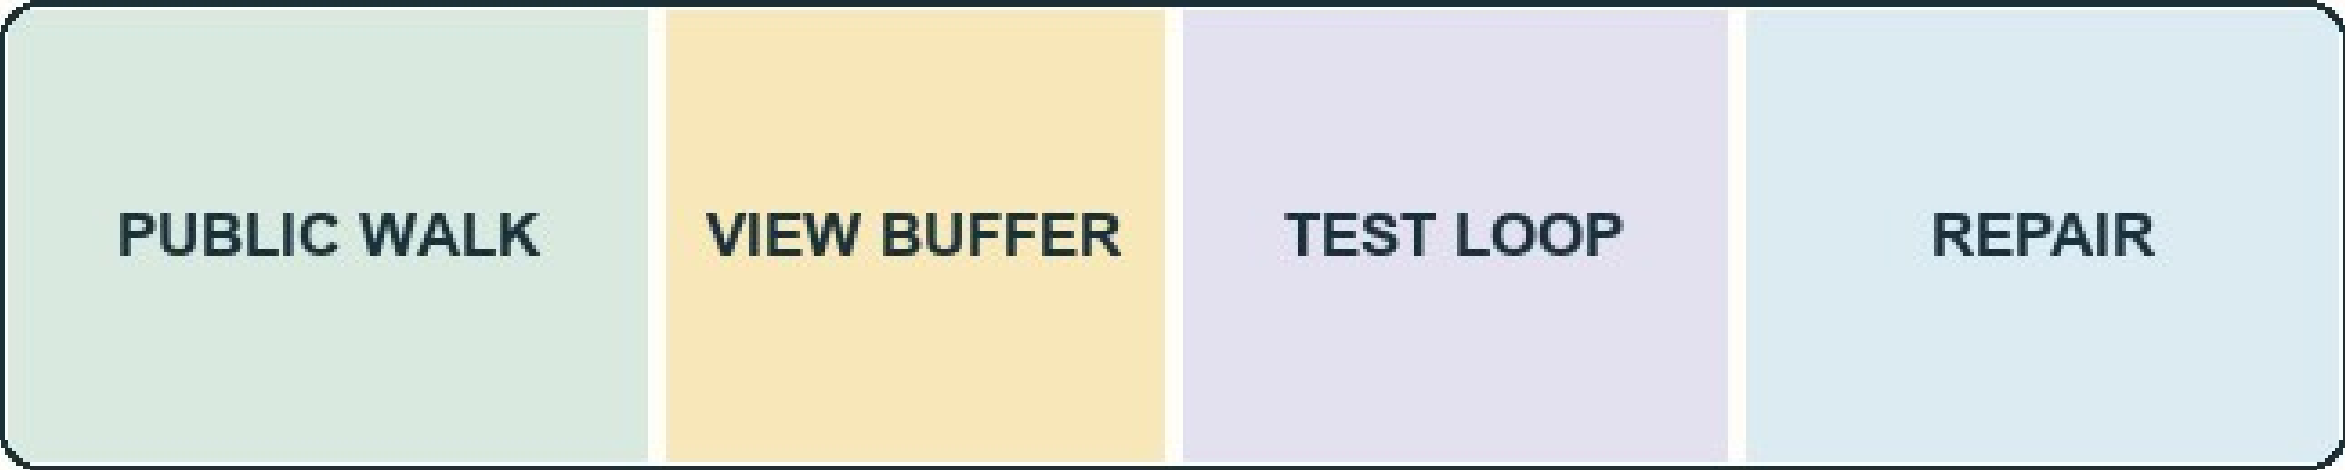

01

ZHONGZHIYUAN | STOP-SAFE TEST YARD

REQUIRED SECTION

FIRST: separation + physical stop + takeover drill

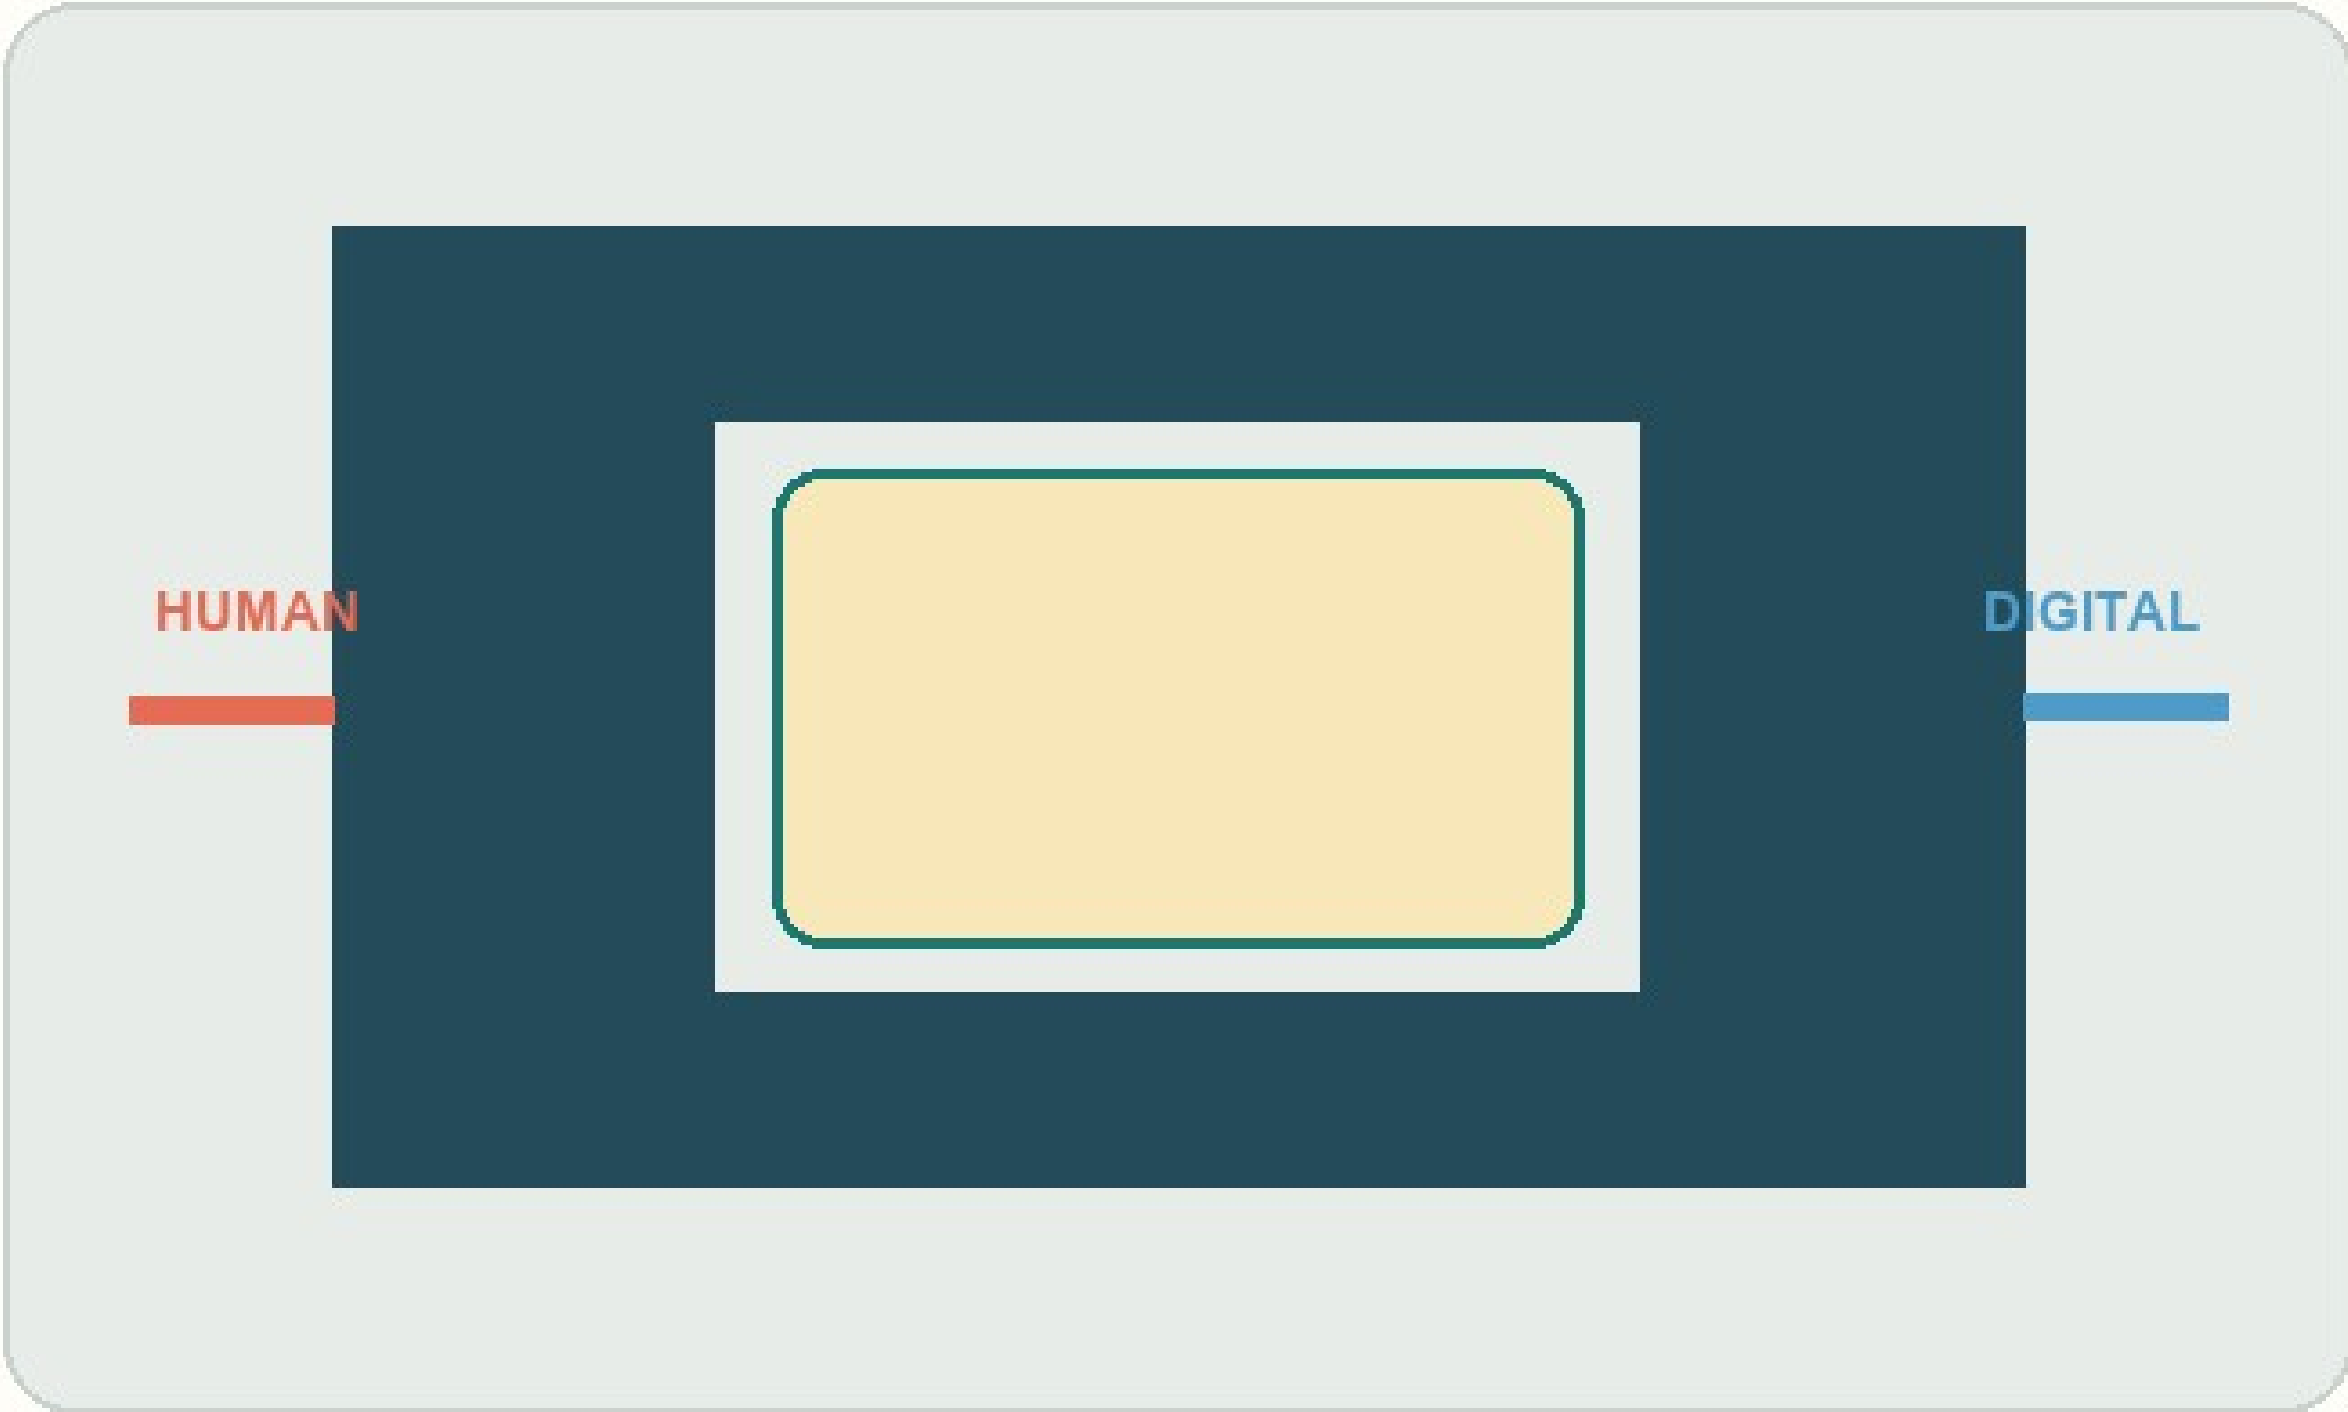

STOP: no officer/case, or route/weather/speed breach

FUTURE = LEGIBLE STATE + CLEAR BOUNDARY + NIGHT STAFF

HEIGHT/FLOORS/FIRE/STRUCTURE AWAIT SURVEY & PROFESSIONAL DESIGN

02

AI ORIGIN | TWO-DOOR SERVICE COURT

REQUIRED SECTION

FIRST: paper map + numbered route + no-login counter

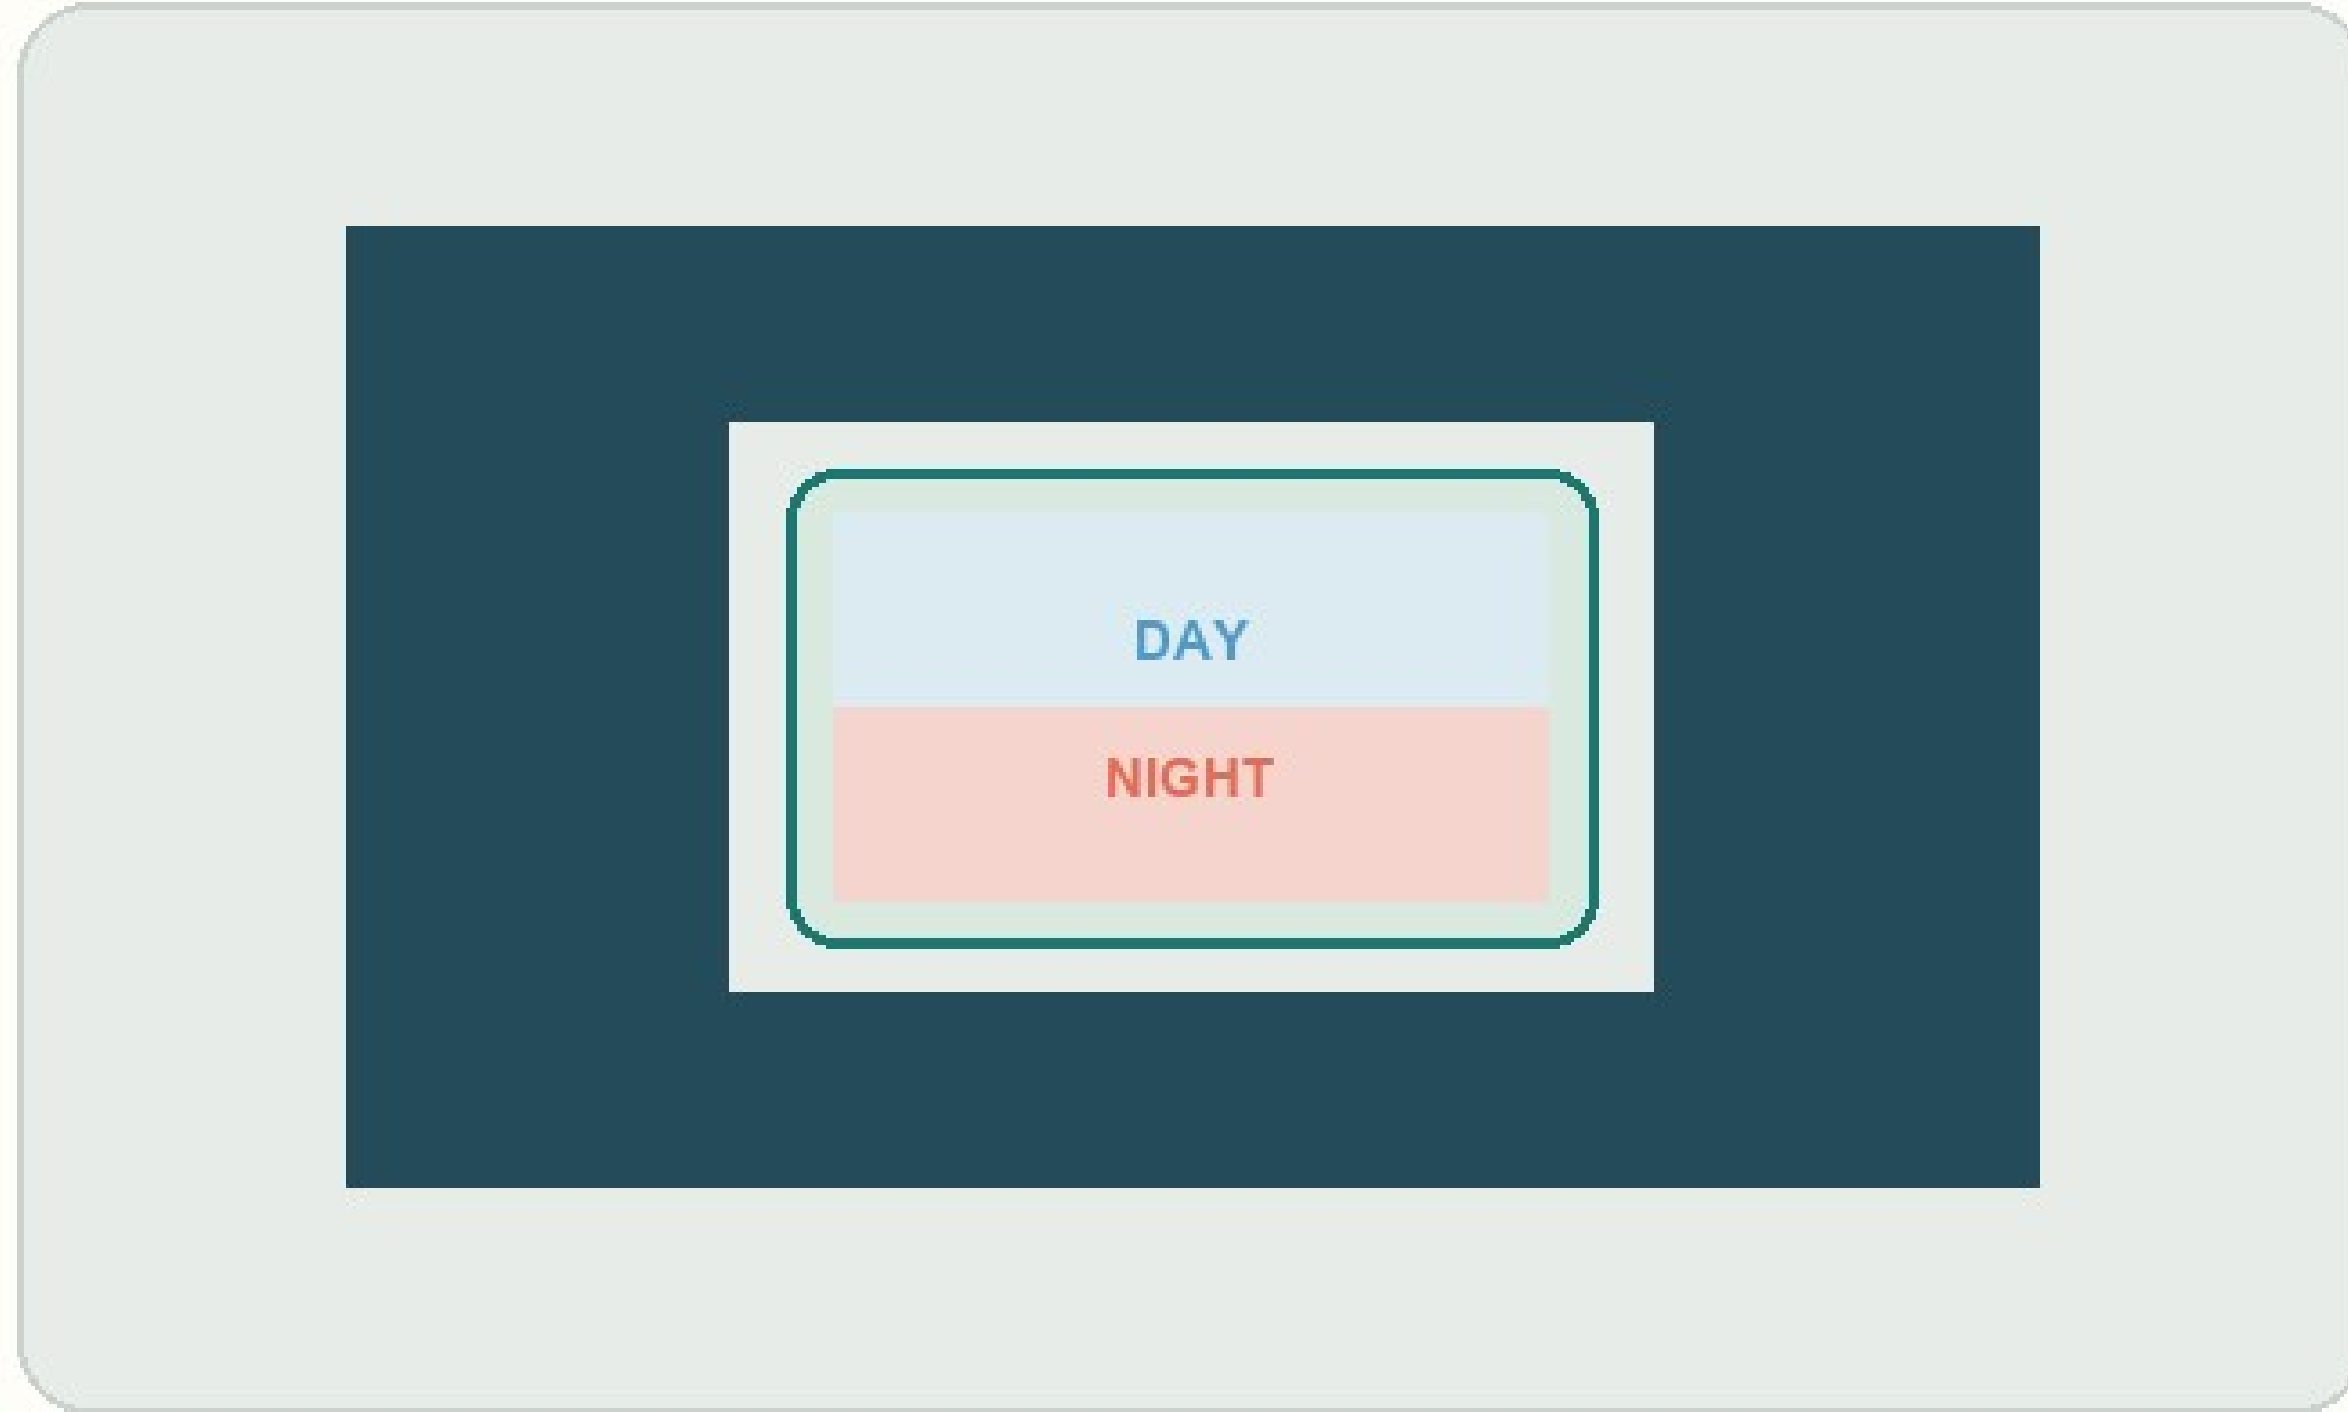

STOP: unequal human route, missing data boundary/appeal

FUTURE = LEGIBLE STATE + CLEAR BOUNDARY + NIGHT STAFF

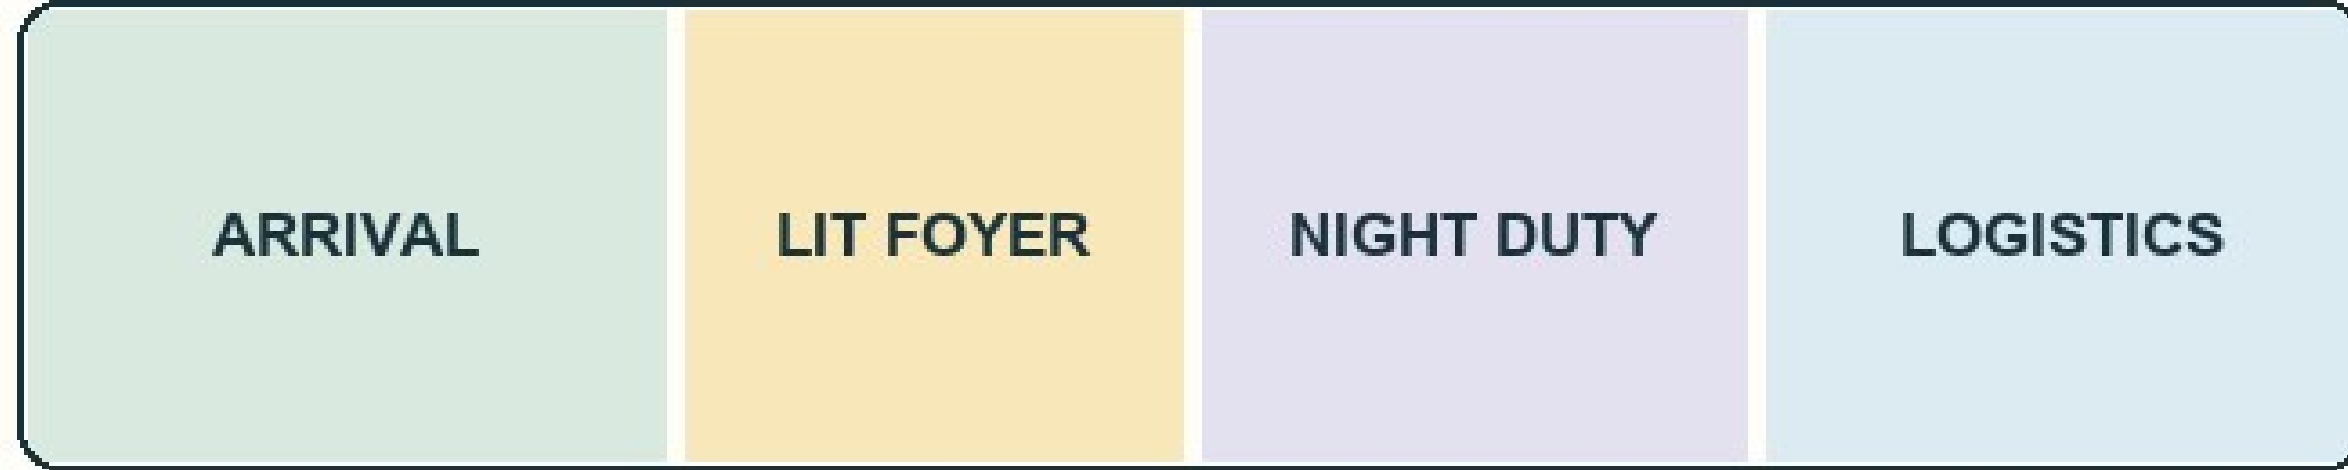

HEIGHT/FLOORS/FIRE/STRUCTURE AWAIT SURVEY & PROFESSIONAL DESIGN

03

DAZHONGSI | DAY-NIGHT HANDOVER COURT

REQUIRED SECTION

FIRST: night light + phone + ticket desk + public shift record

STOP: no night OPEX, phone/light failure, no migration

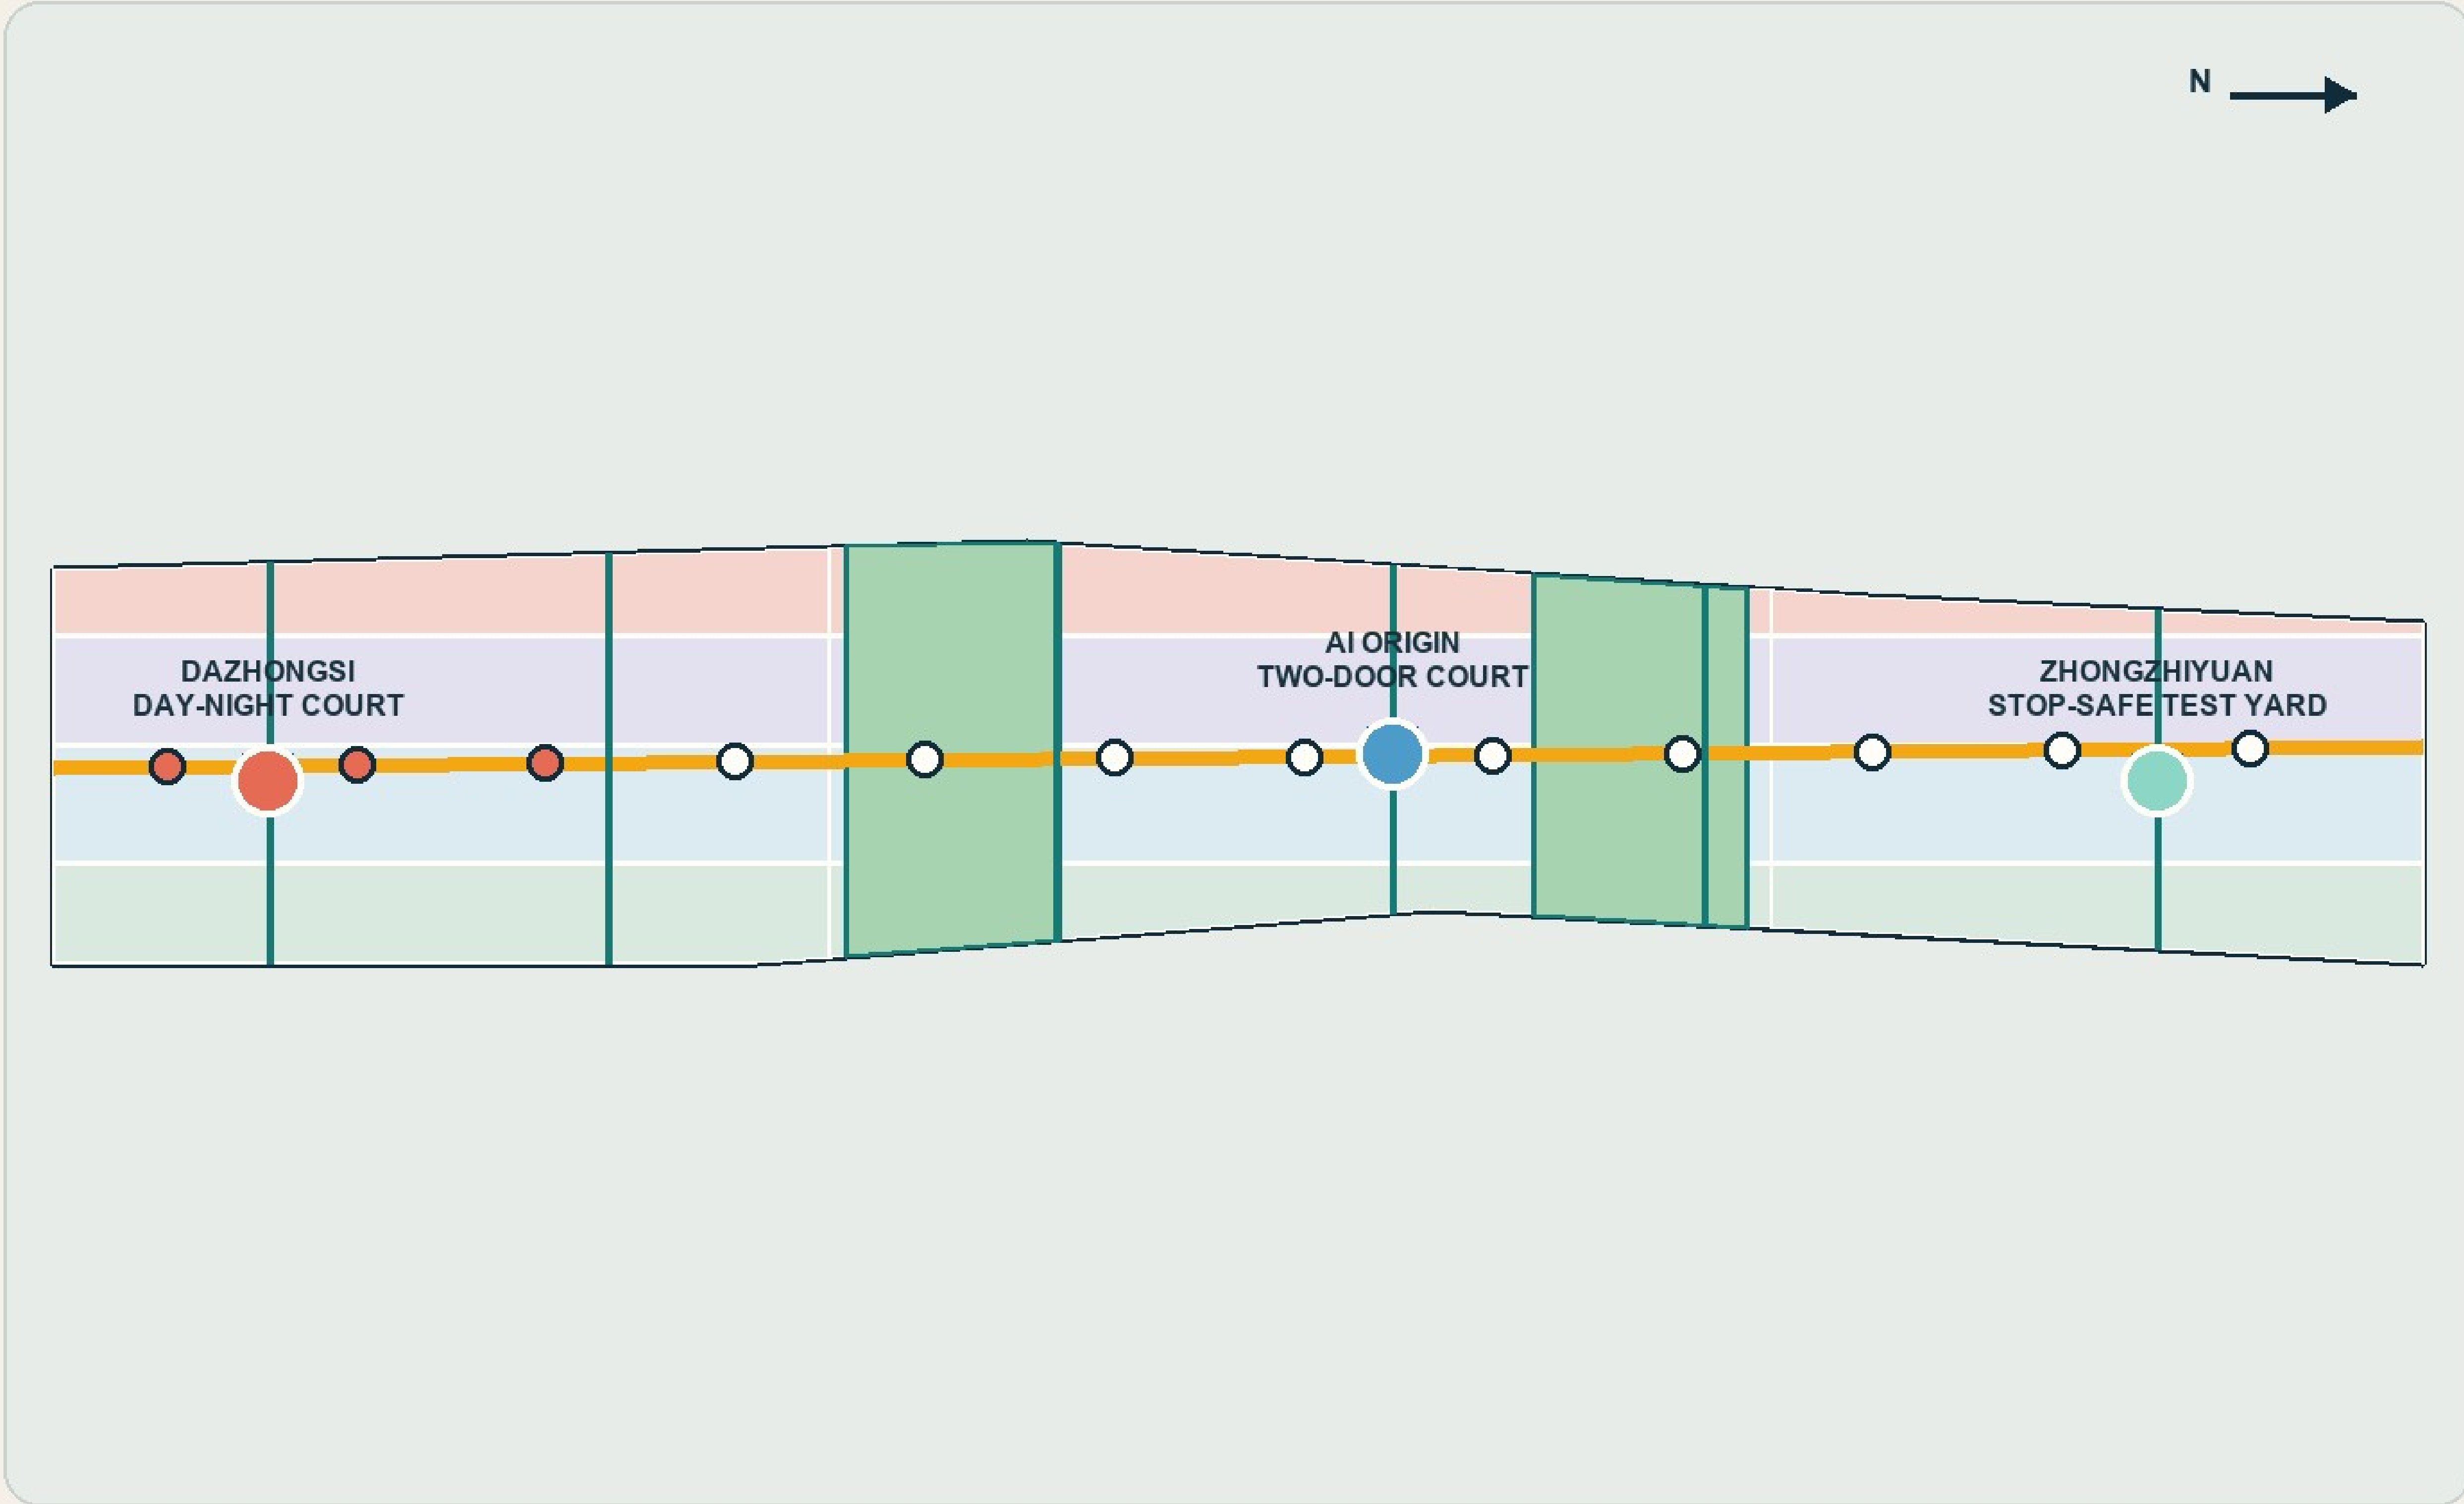

FUTURE = LEGIBLE STATE + CLEAR BOUNDARY + NIGHT STAFF

HEIGHT/FLOORS/FIRE/STRUCTURE AWAIT SURVEY & PROFESSIONAL DESIGN

04

TEN-LINK SERVICE NETWORK | HUMAN ACCESS IN SUN, HEAT/RAIN AND NIGHT/OUTAGE

PUBLIC WALKING > CONVENTIONAL TRANSIT > CONTROLLED TEST > INCIDENT ISOLATION

FOUR-LAYER MOBILITY PRIORITY

- 01

WALKING & ACCESS CONTINUITY
Validate gaps, crossings, gradients, rest and paper map first.
- 02

TRANSIT + HUMAN WAYFINDING
Service never depends on autonomous shuttle.
- 03

BOUNDED ROBOT/SHUTTLE TEST
Separated route, time, speed, geofence and safety officer.
- 04

INCIDENT ISOLATION & TAKEOVER
Amber degrades, red stops, human route becomes primary.

THREE PUBLIC-EVIDENCE JOURNEYS | BASELINE BEFORE DIGITAL TARGETS

01

SUNNY / EVERYDAY
continuous route | shade/rest | human entry

02

RAIN / HEAT STRESS
safe waiting | water | static seasonal advice

03

NIGHT / SYSTEM OUTAGE
low-glare light | paper/phone | night takeover

05

FROM LAUNCH TO RETIREMENT | 7 STATES · 8 PACKAGES · 8 ROLES

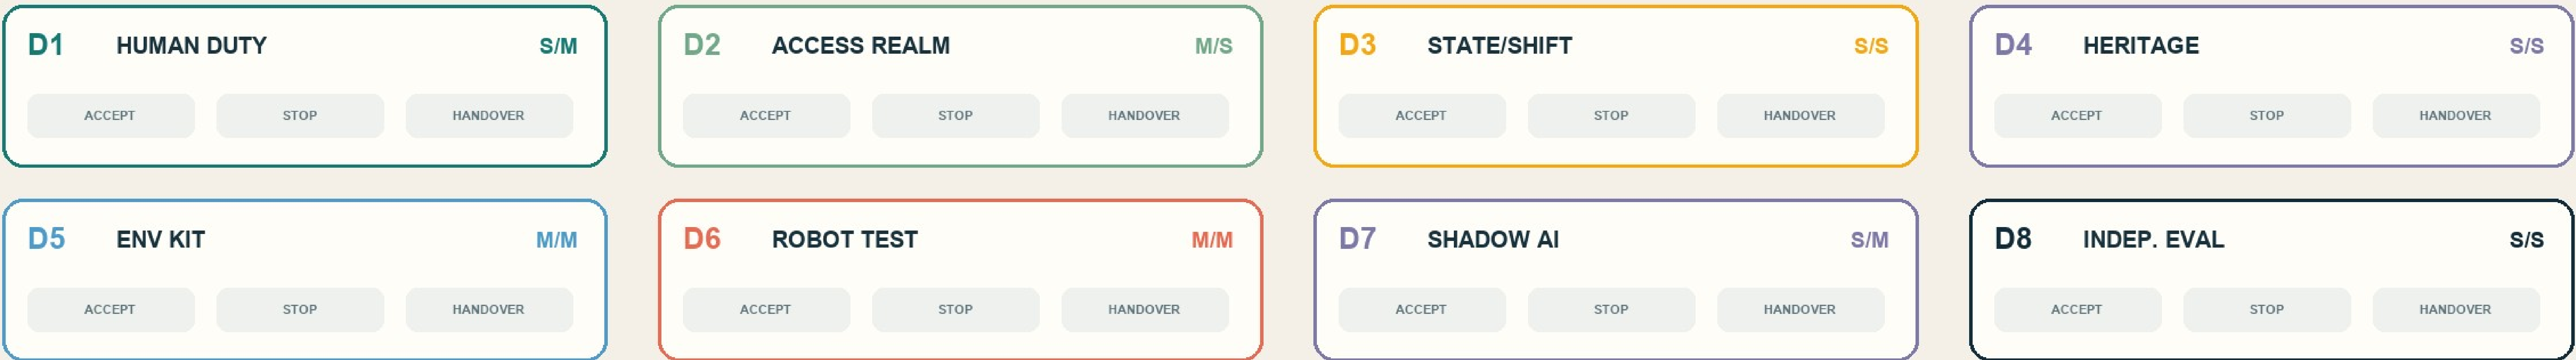

NOT MORE AI; EVERY TRANSITION HAS AN OWNER, FALLBACK, COST, STOP RULE AND HANDOVER ARTIFACT

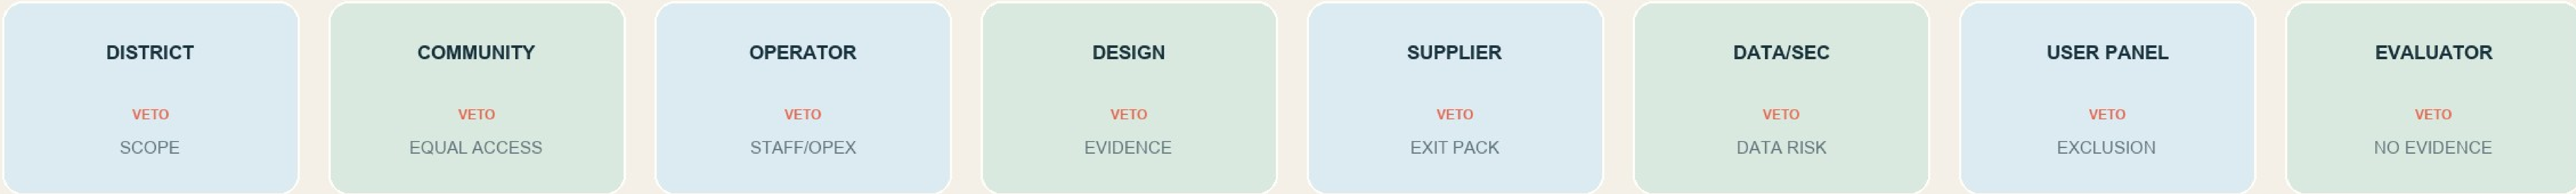

SEVEN-STATE CONTRACT | NO GATE-JUMPING

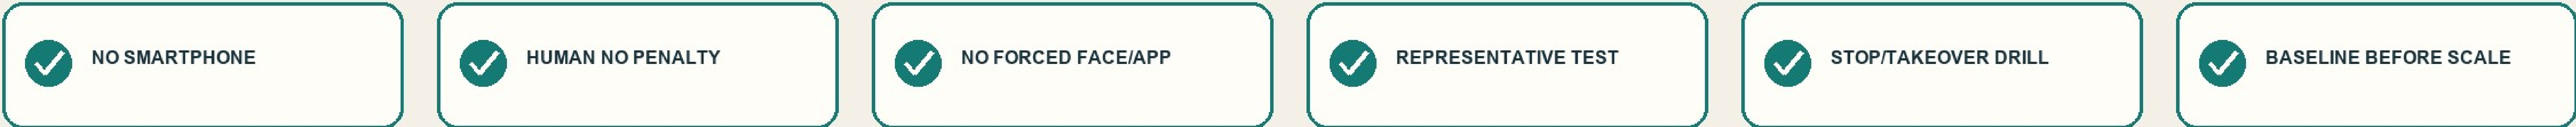

EIGHT INDEPENDENT PACKAGES | S = MINOR KIT/TRAINING/STUDY · M = REVERSIBLE WORK/PILOT · NO L CAPITAL BUILD

EIGHT ROLES | ACCOUNTABILITY, VETO AND FUNDING FIREWALL

SIX OPENING GATES

FUNDING FIREWALL: test fees, memberships and proprietary interfaces cannot displace human fallback or public passage.

06

IMPLEMENTATION READINESS | PEOPLE, SPACE, THEN AI

9 DEPLOY-NOW + 3 CONTROLLED PILOTS + 4 EXCLUSIONS; DAYS 0-100, 8-12 WEEK BASELINE, ANNUAL RETAIN/MODIFY/RETIRE

9

DEPLOY NOW

Existing counters, paper, signs, phone, sensors and constrained retrieval; procurement, cyber, access and site acceptance still apply.

3

CONTROLLED PILOT

Robot, shuttle and public assistant only in separated/shadow mode with safety staff, physical stop and expiry.

4

EXCLUDED

Automated public decisions, forced face/app, unattended open-road fleet, irreversible AI-dependent construction.

THREE EVIDENCE GATES | NOT A GOVERNMENT TIMETABLE

0—100 DAYS

authorisation + D1 human workflow + data-gap list + first Shift Packet

8—12 WEEKS

sun/rain-heat/night baseline; shadow output cannot affect service

ANNUAL

independent scorecard; public retain, modify or retire decision

FIVE PROCUREMENT BOUNDARIES | VENDOR EXIT CANNOT INTERRUPT BASELINE SERVICE

01

D1 HUMAN SERVICE

02

D2 SPATIAL ACCESS

03

D3–D5 INTEROPERABLE KIT

04

D6–D7 TIME-LIMITED PILOTS

05

D8 INDEPENDENT EVALUATION

COMMON LOCK-IN CONTROLS
