

One spine, three stations, two wings and a stoppable evidence loop

Read the whole-belt relation and S-02 state together; separate tabletop replay, field window and ordinary service

Taskbook collaboration interfaces only; no partnership is claimed

North Latitude / Haidian universities

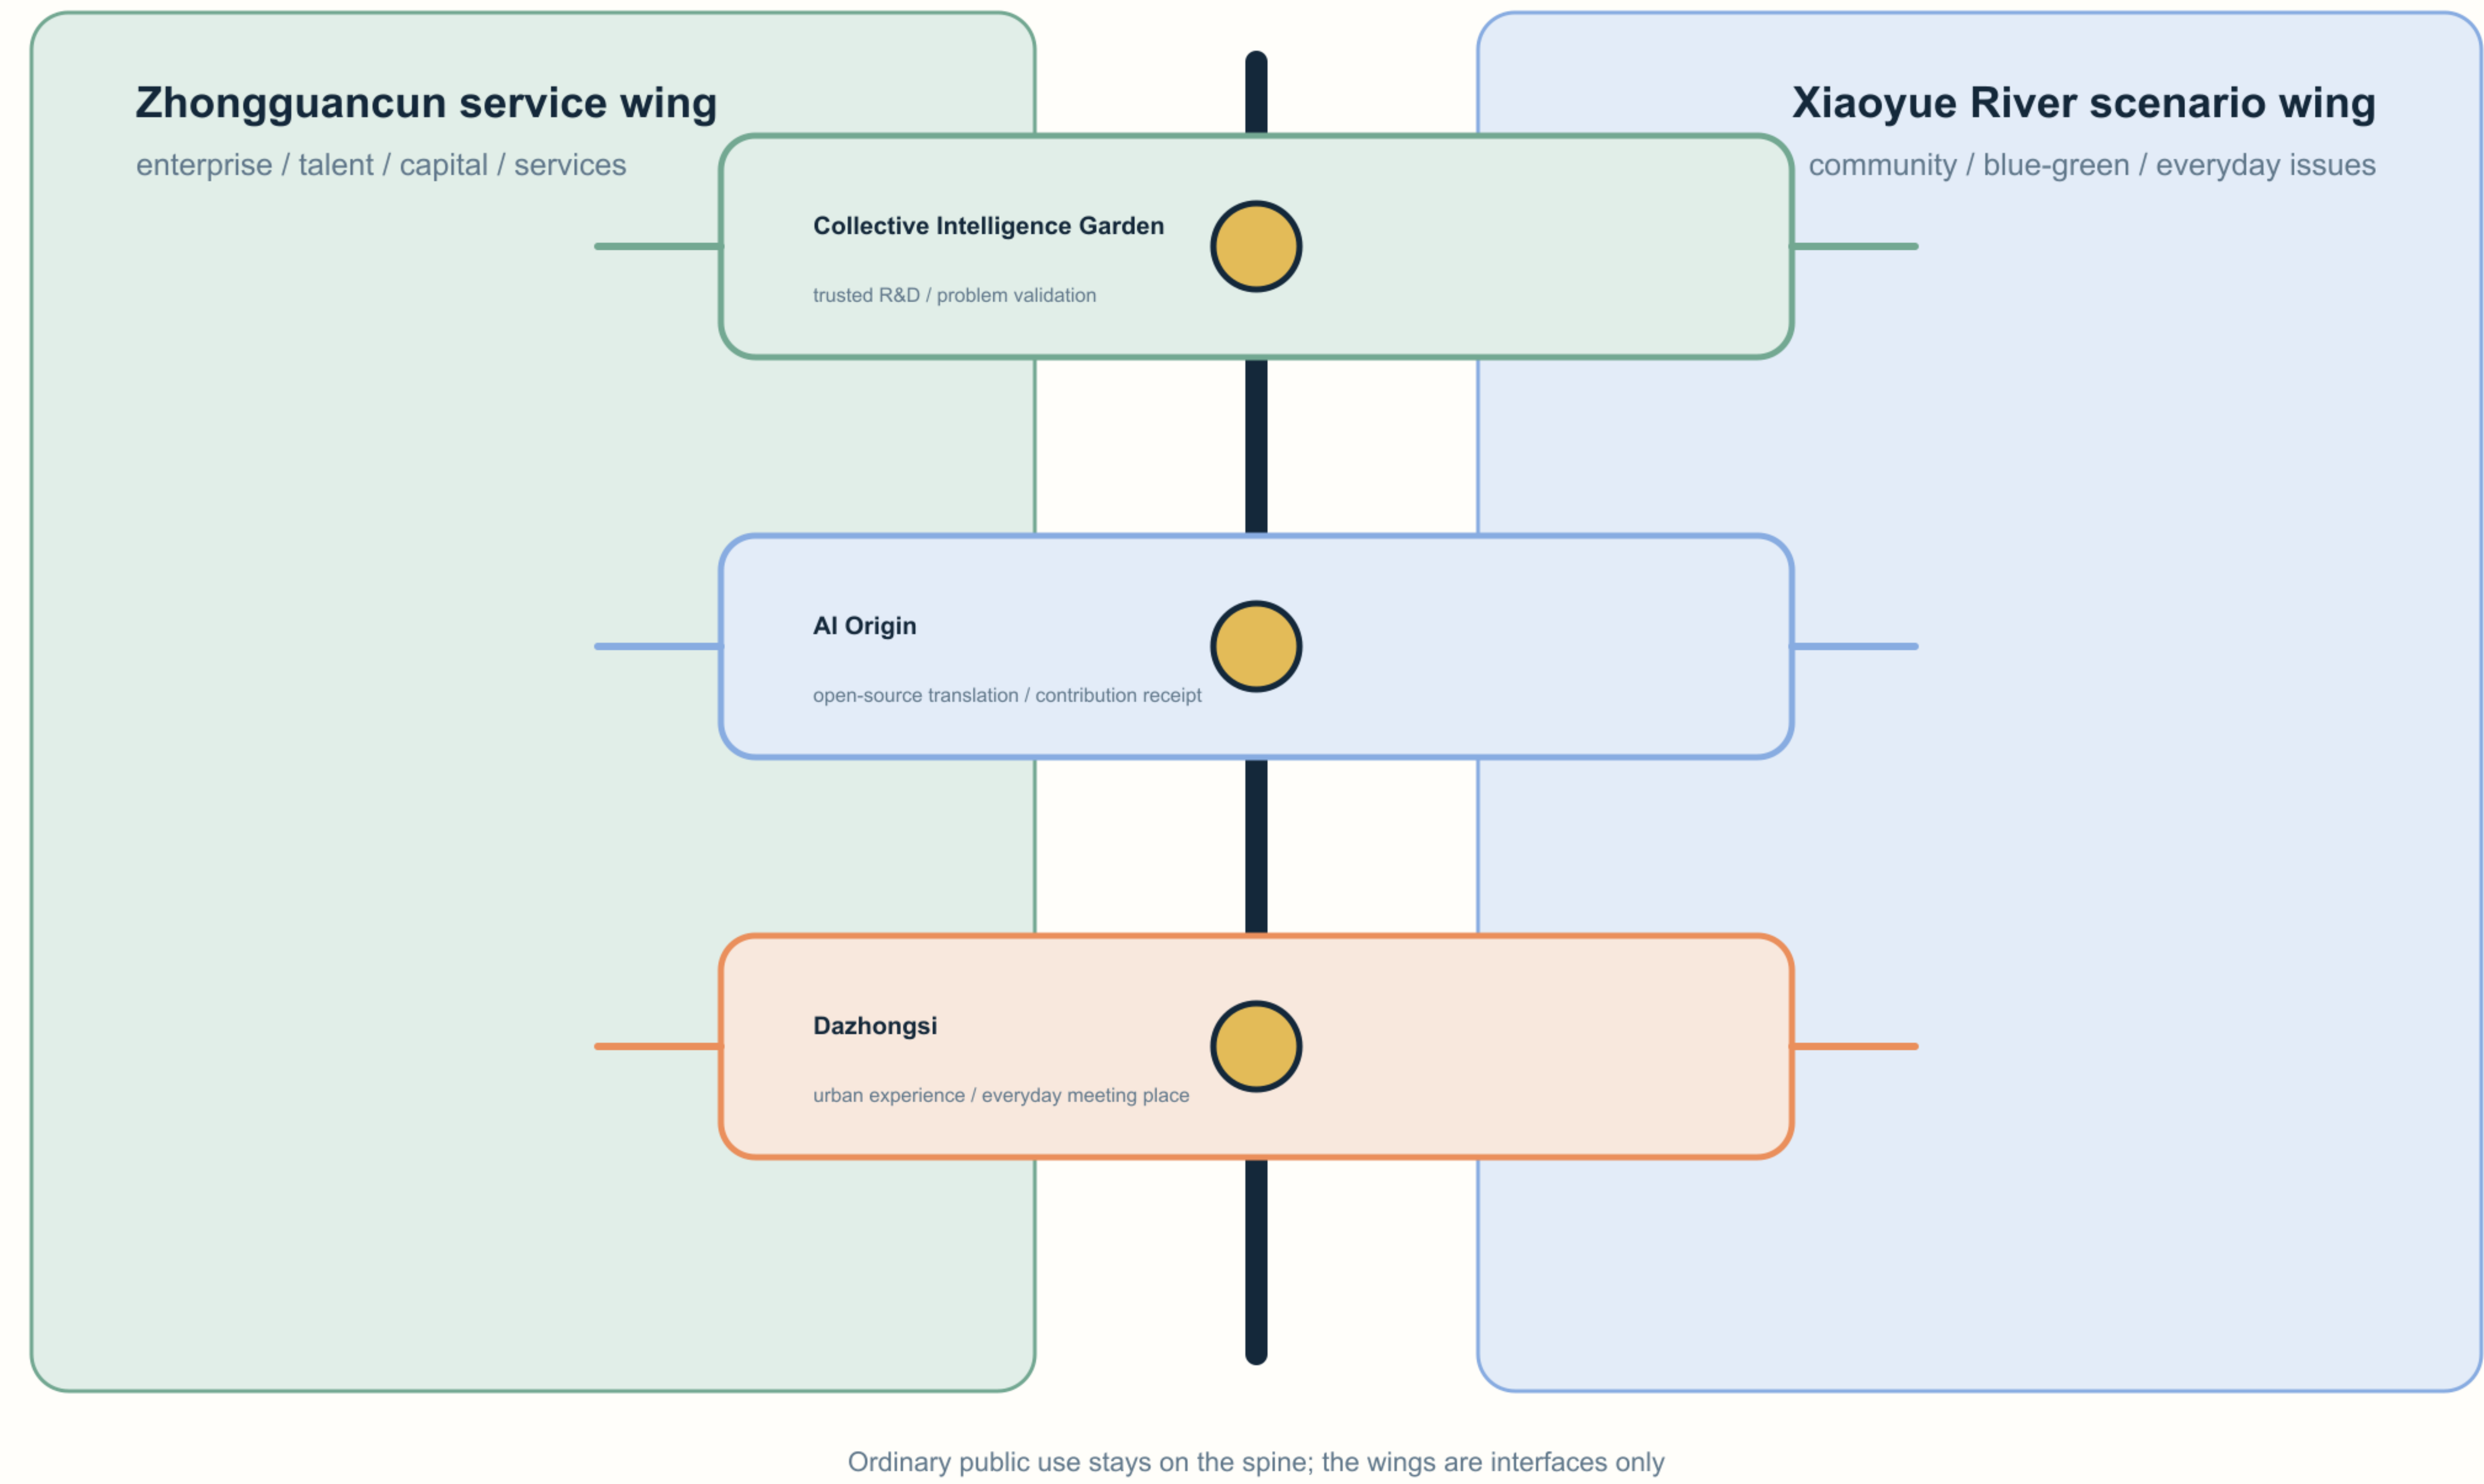

Future Science City

Huairou Science City

Beijing E-Town

Beijing-Tianjin-Hebei network

ONE SPINE, THREE STATIONS, TWO WINGS

S-02 SAMPLE RECEIPT / LOW-SPEED DELIVERY ROBOT

Question
Can it yield and return to its bay without blocking the accessible route?

LOCAL SYNTHETIC TABLETOP

LOCAL / SYNTHETIC

PASS 4/4 + 6/6 + 5/5

Replays stop, withdrawal and restoration logic only
Zero network or real transaction
Zero field operation

BOUNDED FIELD WINDOW

FIELD / HOLD

HOLD / NOT AUTHORIZED / NOT RUN

Route, accessibility and safety evidence is absent
Accountable owner is not assigned
No live public route or delivery may start

NEXT GATE

G2

Independent accessibility and safety review

Confirm place, route and permission first
Assign maintenance and human takeover
Only then consider one witnessed bounded test

ORDINARY SERVICE

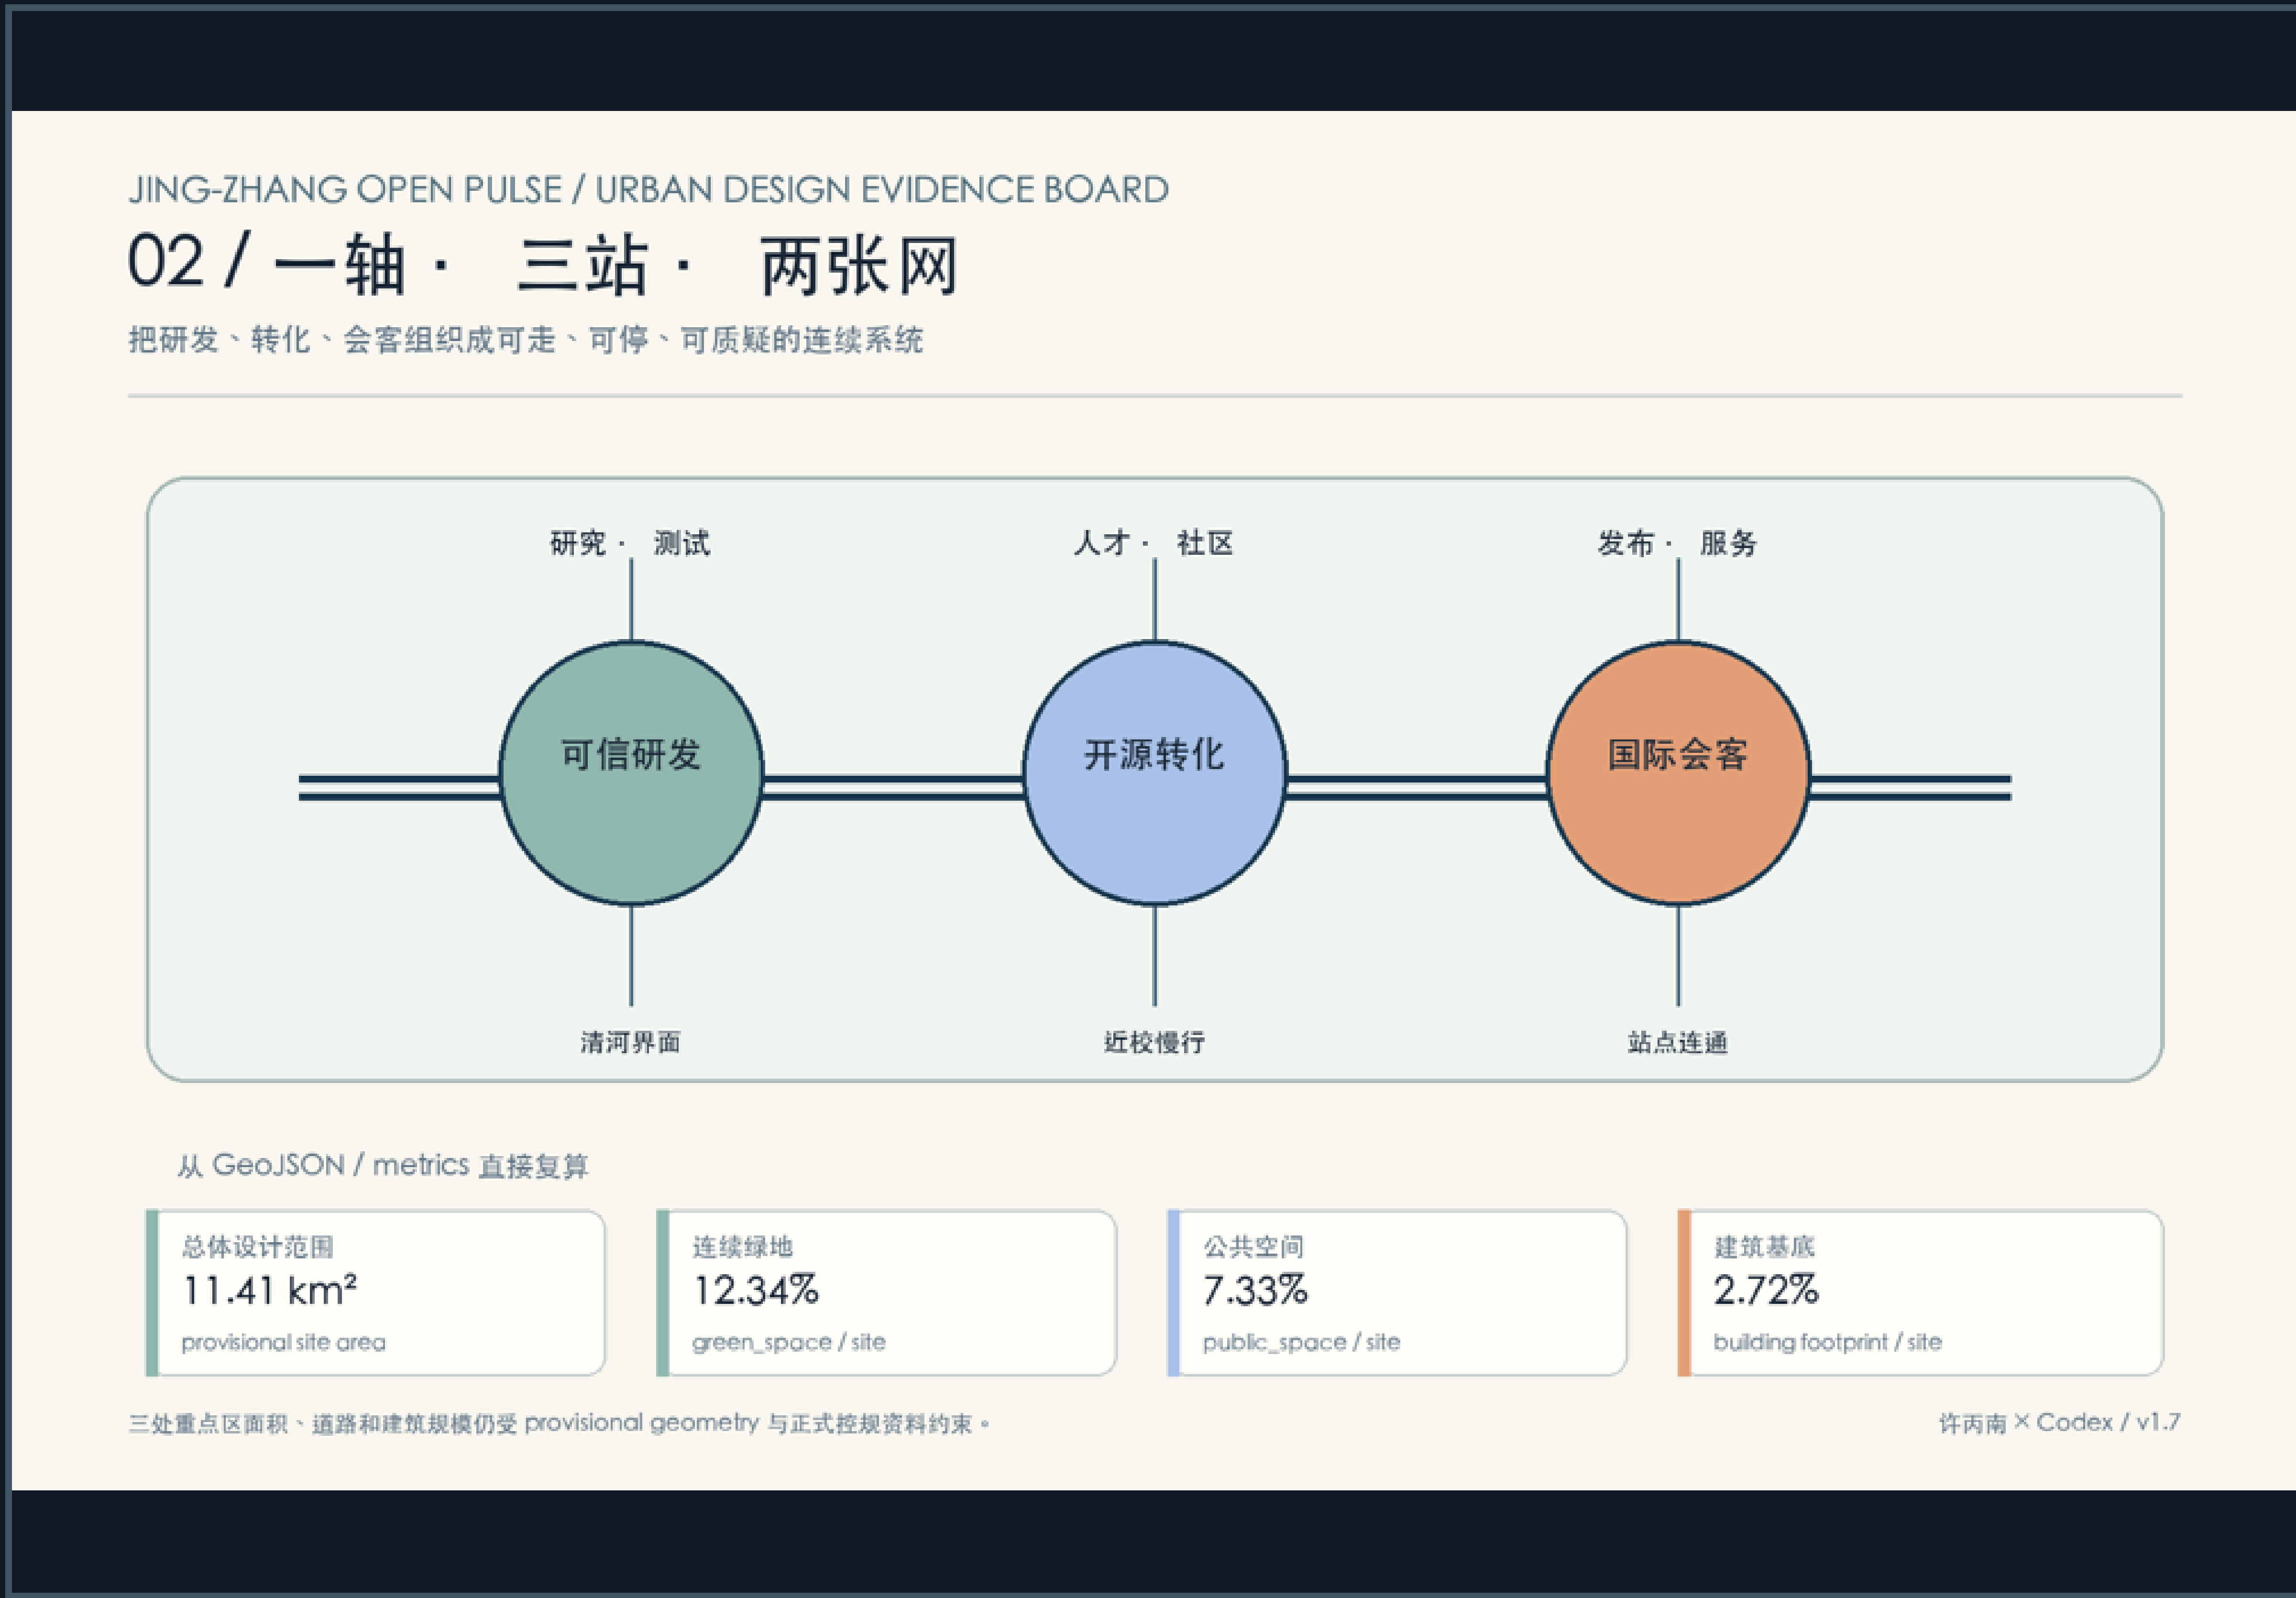

Walking stays open; hand-cart or human delivery remains available. Any person may ask to stop.

READING BOUNDARY

Tabletop PASS proves an offline fixture can replay. It does not prove robot performance, safety, permission or deployment.

02 / Three-level scope

Research area, overall design area and key-area design share one evidence chain.

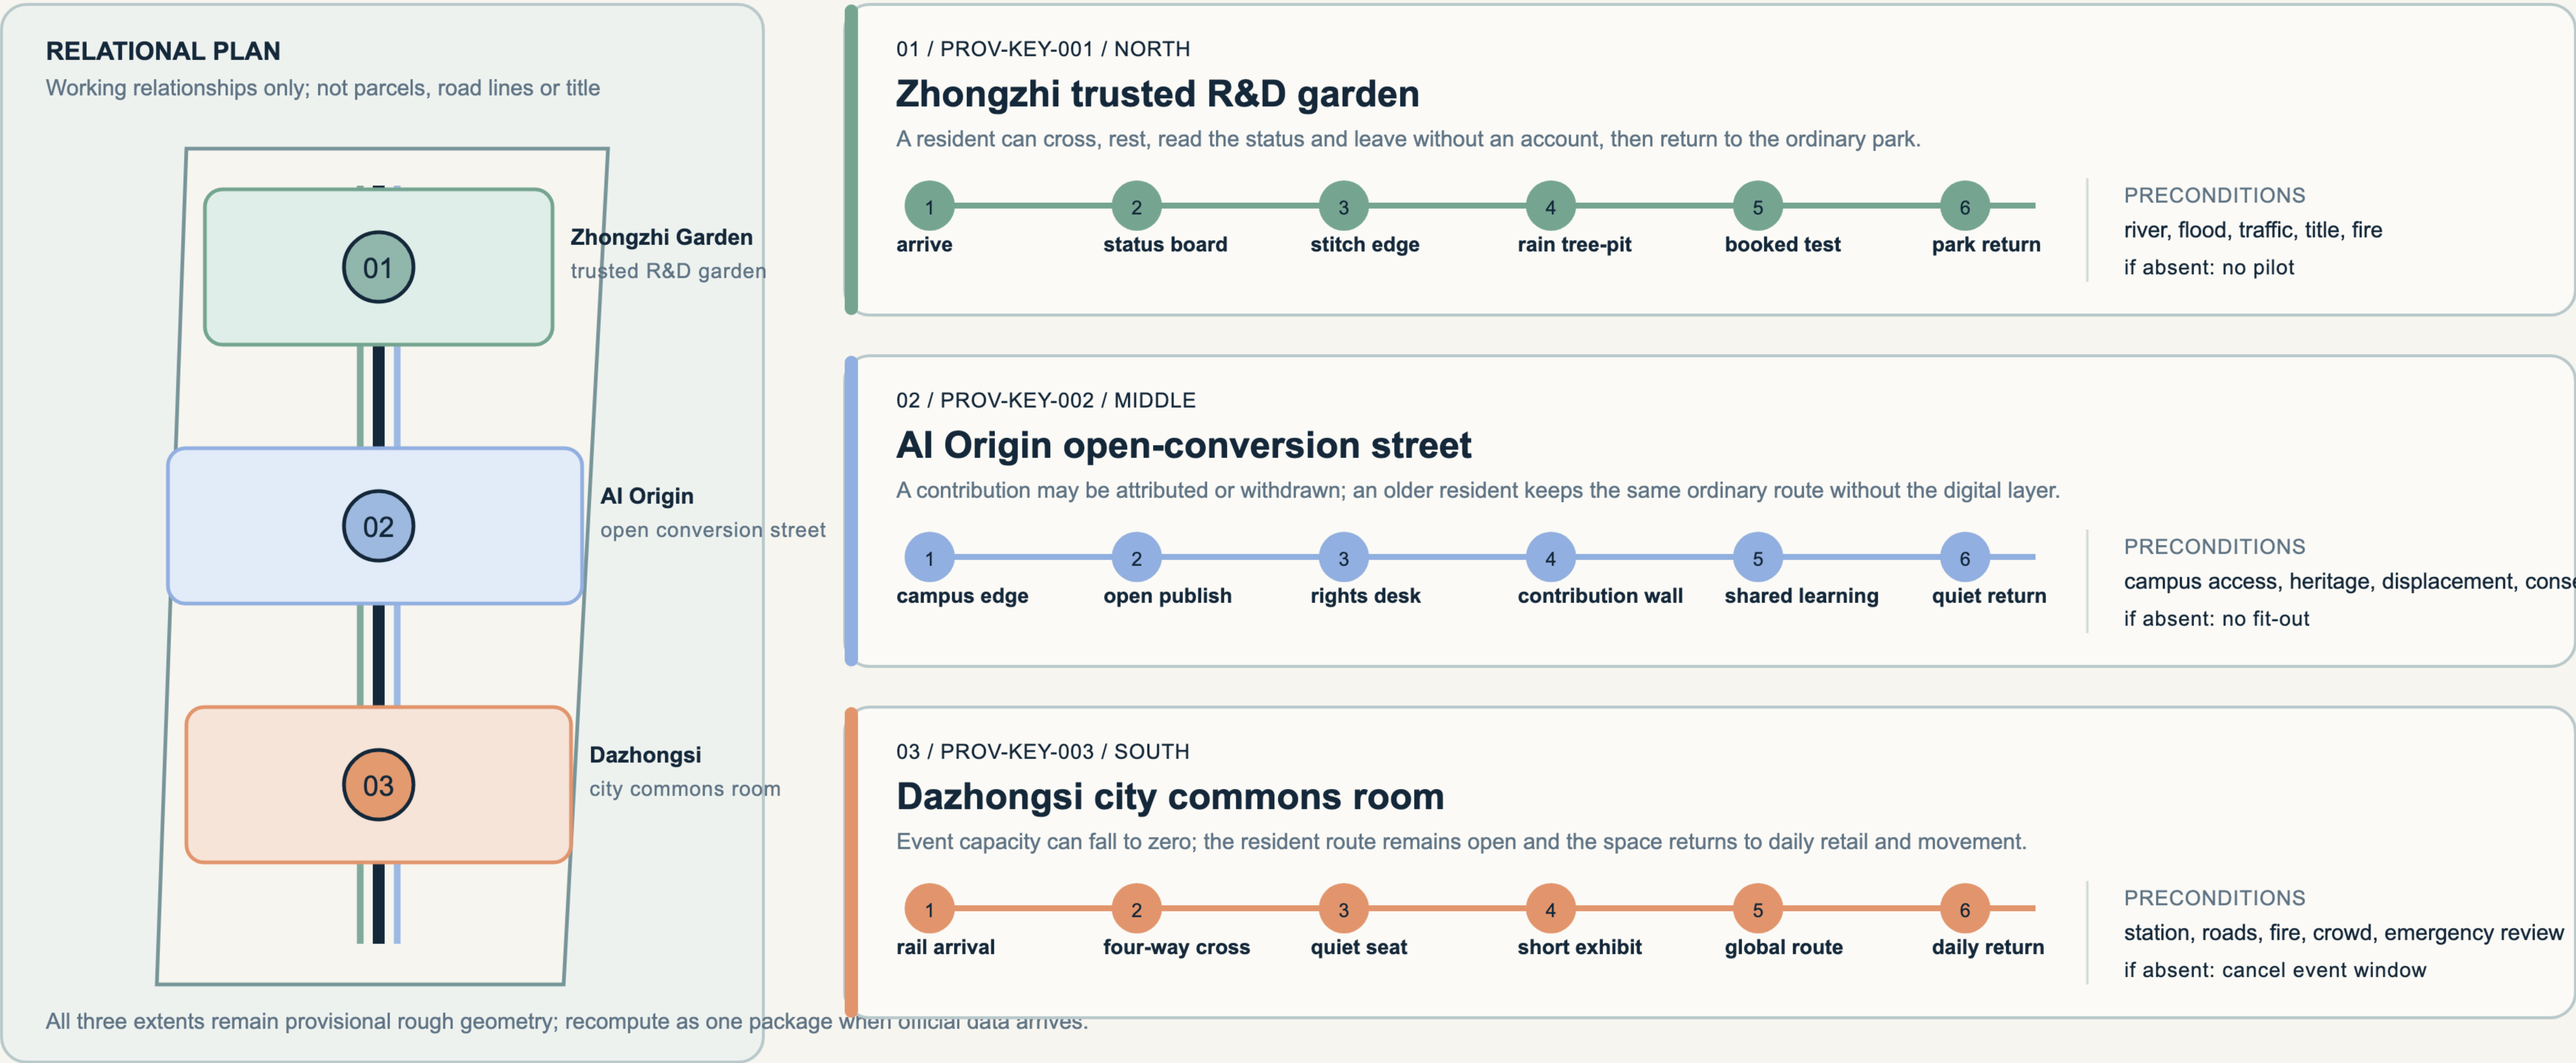

REVIEW NOTES

- English display layer for the same local asset.
- Source board thumbnail is retained for visual cross-check.
- All geometry is provisional until official polygons arrive.
- See proposal.en.md and the local JSON evidence ledger.

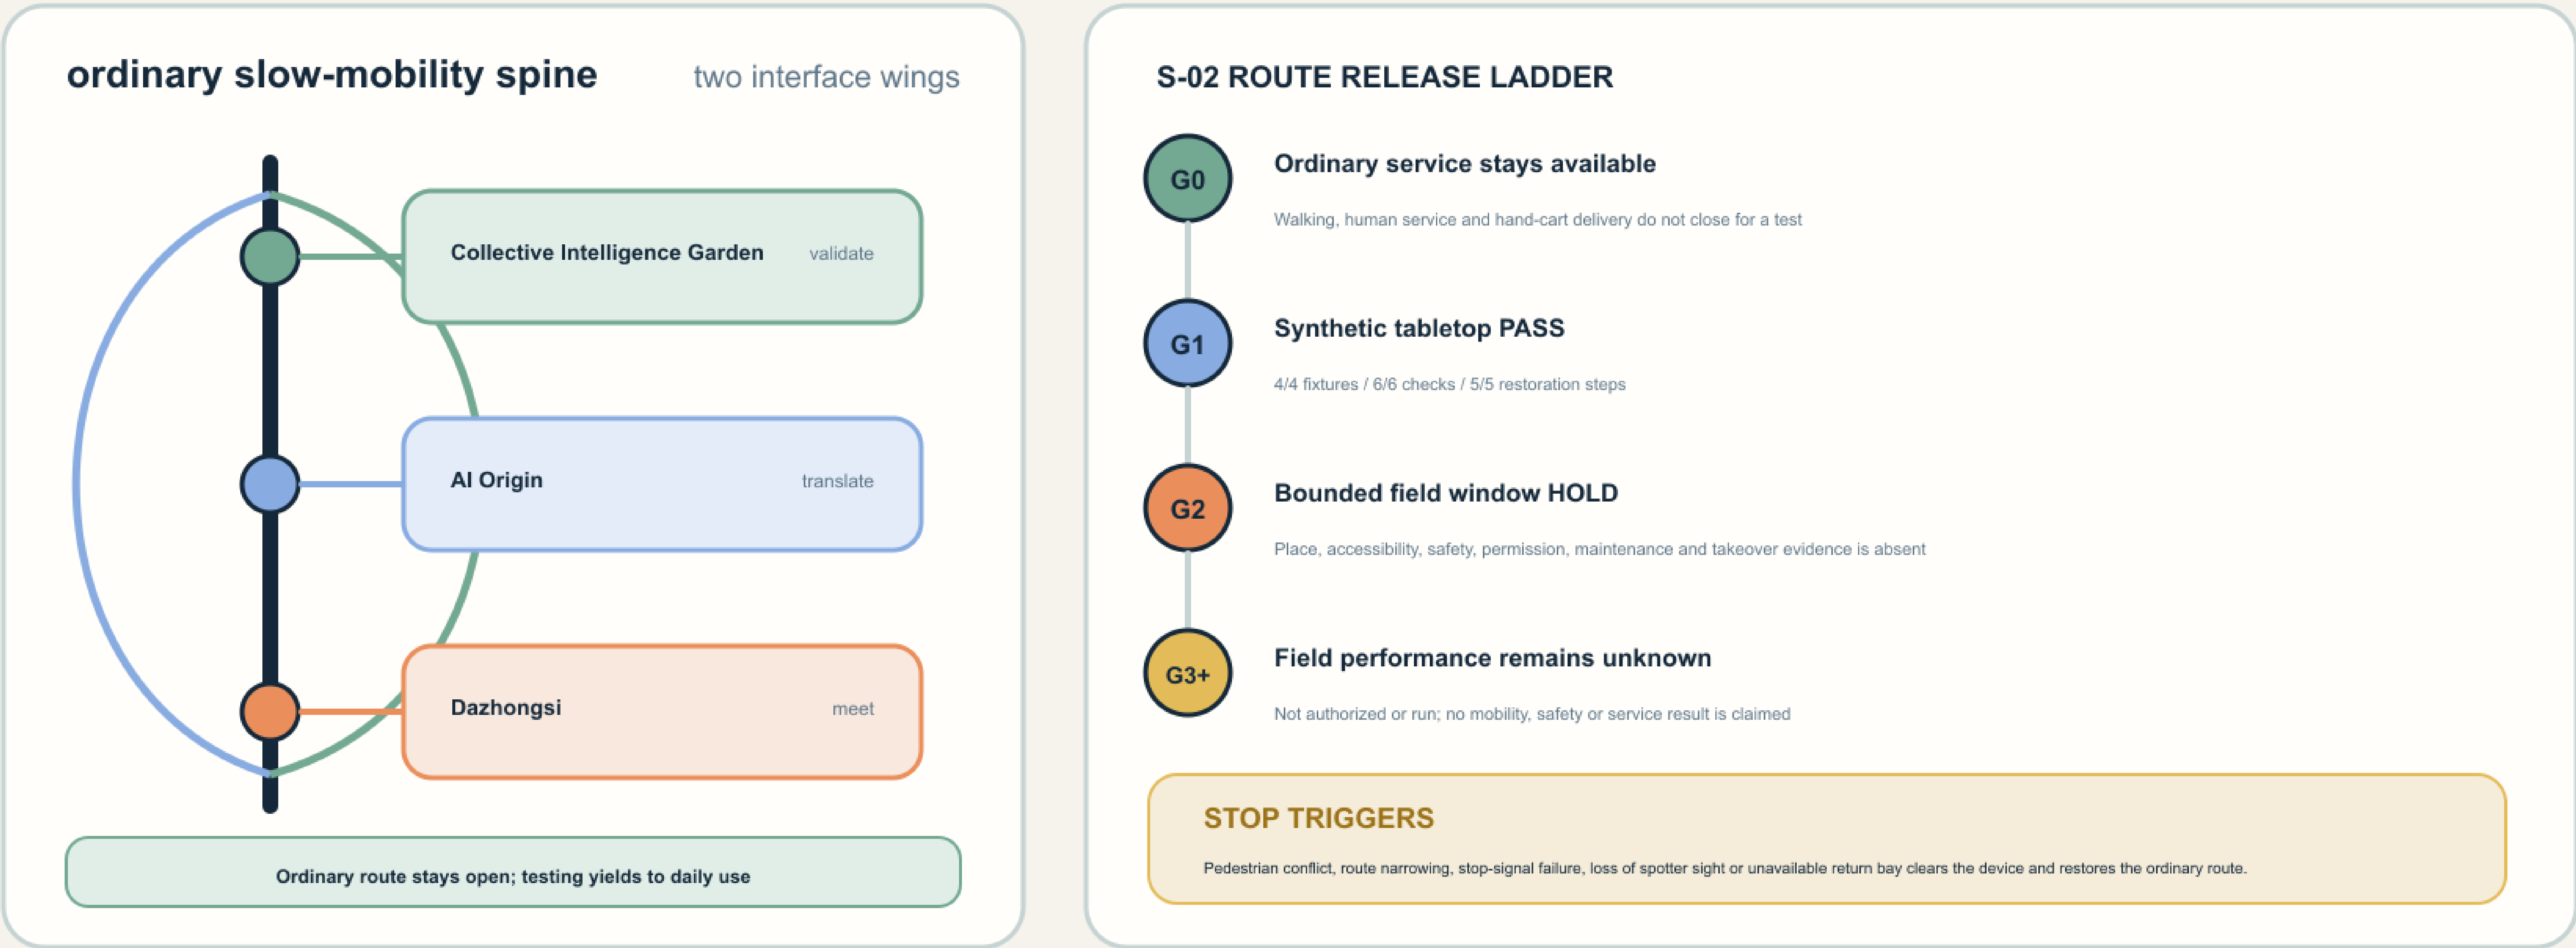

03 / Three key areas: three everyday journeys

Put provisional geometry, the ordinary route, human gate, stop condition and return to daily use on one board

04 / Keep the ordinary route open before embodied AI

Walking, blue-green space and S-02 share one release order; tabletop PASS does not establish field readiness

Slow-mobility network 13.01 km concept network	East-west links 3 key-area connectors	Public space 7.33% directly recomputable	Mapped crossings 189 low-confidence OSM
---	--	---	--

05 / Low-regret evidence

A design experiment with explicit sources, unknowns, gates and recalculation triggers.

REVIEW NOTES

- English display layer for the same local asset.
- Source board thumbnail is retained for visual cross-check.
- All geometry is provisional until official polygons arrive.
- See proposal.en.md and the local JSON evidence ledger.
