

Jingzhang Smart Artery · Centennial Jingzhang AI Innovation Belt

One Spine · Three Areas · Two Wings · Five Veins · Overall design 11.4 km² · Research 43.6 km²

Fig.1 Site overview & three-tier scope

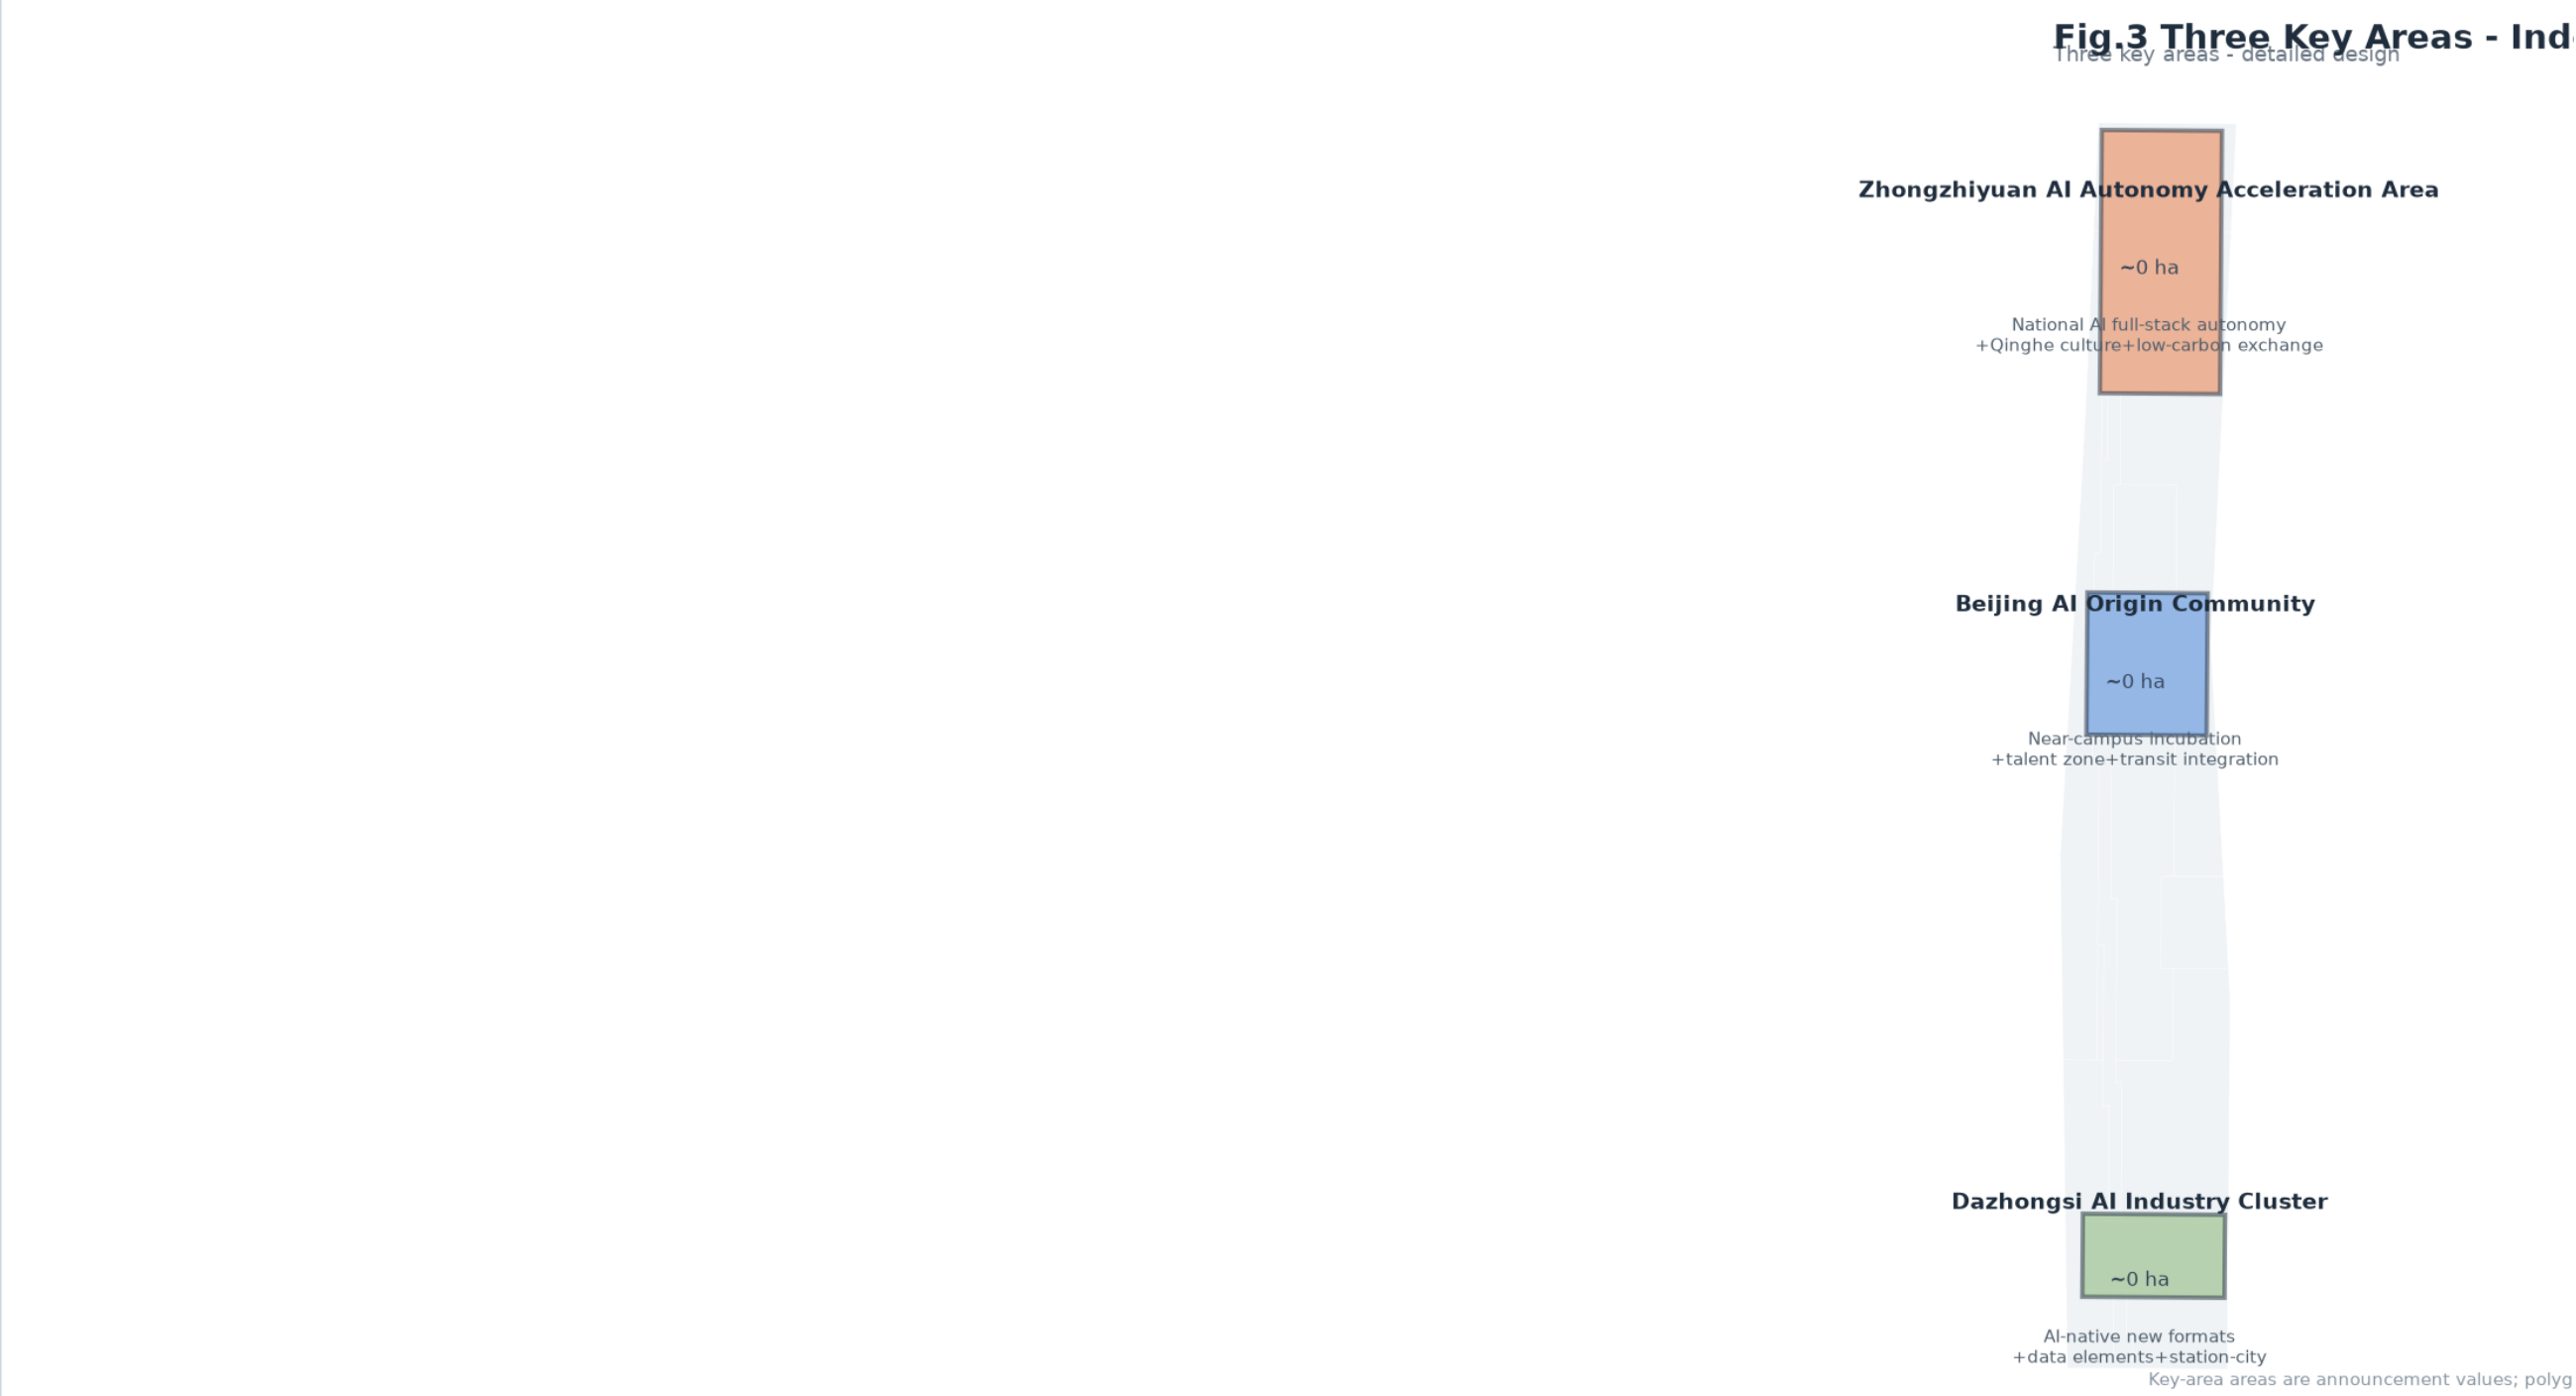

Three tiers: research 43.6 km², overall design 11.4 km², key areas 368.4 ha

Fig.2 Land-use structure & framework

Land-use zones fully cover the overall design area, coverage 1.0

Fig.3 Three key areas index

Zhongzhiyuan, AI Origin Community, Dazhongsi

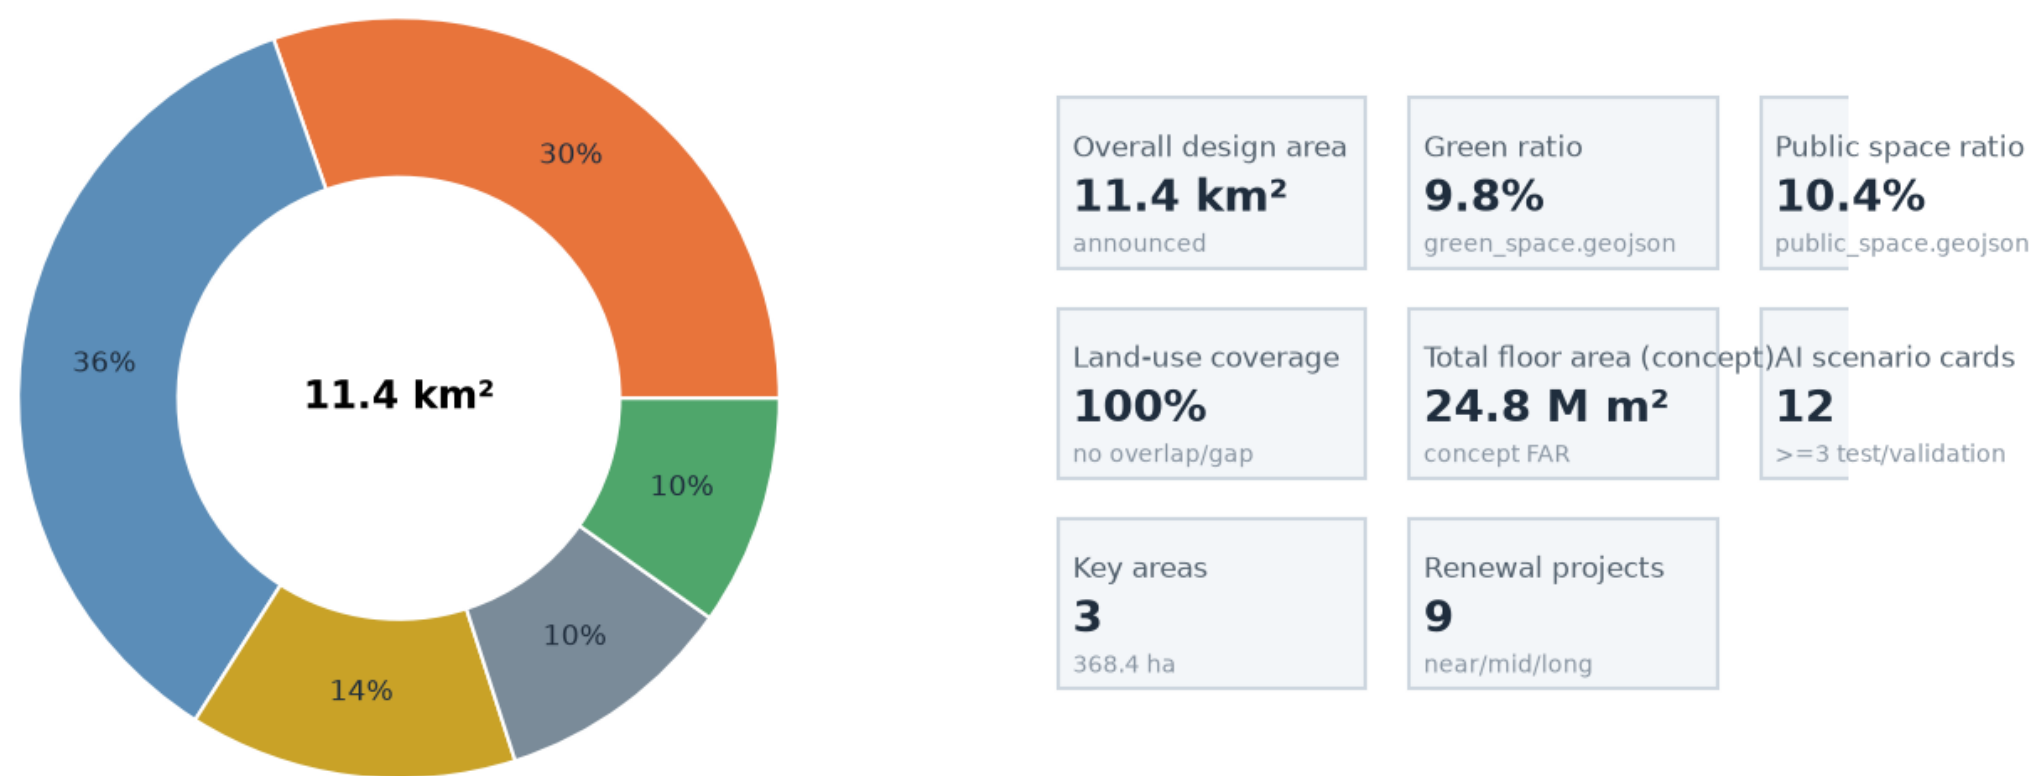

Fig.4 Mobility & blue-green

The smart-artery spine runs N-S; the public-space network supports walkability and innovation exchange

Fig.5 Metrics evidence chain

Fig.5 Core Metrics Recompute & Evidence Chain
Land-use structure (% of overall design area)

Evidence chain: GeoJSON (EPSG:4548 recompute) -> metrics.json -> compliance/design_depth matrices -> proposal text.

To be supplemented: official redline, existing buildings, tenure, regulatory indicators (recompute & review after obtained).

Zhongzhiyuan AI Autonomy Acceleration Area (N)

A national-grade AI full-stack autonomy and governance highland, Garden-style innovation block, Qinghe culture excavation, national platforms, standards and security governance bodies, international exchange and low-carbon green exchange environment. External transport integrates with the 5th Ring Road.

Beijing AI Origin Community (C)

A near-campus innovation block around the original innovation sources of Tsinghua, Peking University and CAS, with incubation and conversion zones, Wudaokou and Qinghua East Road West Stations integrated, campus-park walkable links, Talent zone, open-source system, brand events.

Dazhongsi AI Industry Cluster (S)

An urban AI innovation block with AI-native and AI+ formats such as agents, smart terminals and content consumption, plus circulation of data factors and digital assets. Dazhongsi Station integration, four-quadrant walkable connectivity, non-motorized parking, composite green-space use.
