

Jing-Zhang Stewardship Compact

Every pilot leaves a public receipt.

Centennial Jing-Zhang AI Innovation Belt · Open Urban Design Call ·
Formal AI-agent proposal

FOUR LEDGERS · ONE ASSEMBLY · ONE RECEIPT

Every pilot leaves a public receipt.

AsaZhou923 · OpenAI Codex

Jing-Zhang Stewardship Compact | Overall Concept

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC

v0.1

One memory spine · Three stewardship stations · Two service wings

01 Four ledgers

Space-time access, data-compute-energy, maintenance-repair and public return

02 One assembly

Residents, service workers, accessibility users, operators and independent reviewers share rights to question, appeal and recommend a stop.

03 One public receipt

Every pilot discloses purpose, resources, accountable owner, baseline, incidents, public return and exit decision.

Every pilot leaves a public receipt.

Public benefit over spectacle: human authority by design: evidence before scale.

FOUR LEDGERS · ONE ASSEMBLY · ONE RECEIPT

Space-time access; data, compute and energy; maintenance and repair; and public return. A multi-party assembly. Every pilot discloses purpose, baseline, accountability, incidents, return and exit decision.

HUMAN AUTHORITY BUILT IN

Residents, service workers, access users, operators and independent reviewers can question, appeal, review and recommend a stop. Algorithms only generate alternatives.

ONE MEMORY SPINE · THREE STEWARDSHIP STATIONS · TWO SERVICE WINGS

The spine joins railway heritage, accessible movement and a blue-green public realm. The stations host trustworthy testing, learning and transfer, and urban deliberation; innovation and everyday service wings meet at them.

Stewardship Structure and Land-Use Partition

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC

v0.1

AI service exchange

Talent and community life

AI R&D and supervised proof

Learning and translation

Heritage blue-green stewardship

01 One shared-boundary split

Five land-use classes are split once from the same provisional boundary for complete topology. This is replaceable concept zoning, not approved parcels.

02 Compact embedded in space

Each station treats human service, public assembly, maintenance responsibility and pilot exit as spatial infrastructure rather than fine print.

- 01

Reuse first
- 02

Repair before new build
- 03

Reversible before permanent
- 04

Evidence before scale

01 Trustworthy Testing Station

Zhongzhiyuan: model release, standards workshop, resource passport and incident review. No release while safety or accountability is open.

02 Learning and Transfer Station

Beijing AI Origin Community: shared learning, voluntary teaming, open-contribution archive and everyday talent services.

03 Urban Deliberation Station

Dazhongsi: multi-party assembly, human appeals, transit front room and a reversible AI storefront.

ONE MEMORY SPINE · THREE STEWARDSHIP STATIONS · TWO SERVICE WINGS

The spine joins railway heritage, accessible movement and a blue-green public realm. The stations host trustworthy testing, learning and transfer, and urban deliberation; innovation and everyday service wings meet at them.

Student and open-source developer

International startup product lead

Small-business operator

Public-space steward

4 TESTS

- 01 Model release gate
- 02 Slow coexistence lane
- 03 Multi-agent city room
- 04 Reversible storefront

Scope and consent → Controlled trial → Public receipt → Scale / iterate / exit

Walking and Cycling × Blue-Green Stewardship × JZ-SC-01

Provisional computation frame | Conceptual recommendation | Recompute with official data

JZ-SC
v0.1

01 Flagship pilot

JZ-SC-01 accessible-mobility stewardship pilot: a non-digital alternative, human guide, aggregate incident log, field verification and safety stop threshold coexist.

02 Not an engineering alignment

Lines show connection priorities and experiential continuity only. Redlines, bridges, tunnels, station interfaces and traffic operations require official data and specialist review.

03 Four gates

Scope and consent

Controlled trial

Public receipt

Scale or exit

JZ-SC-01

Non-digital alternative + human service + aggregate events + field review. Biometrics and continuous individual traces are excluded. A safety-critical fault, privacy breach, missing human service or unresolved access barrier pauses the pilot. The public return is repaired barriers and an open audit.

01 Scope and consent

02 Controlled trial

03 Public receipt

04 Scale / iterate / exit

4 PHASES

01 Listen and reveal

Obtain data and audit conditions and accessibility; disclose gaps.

02 Connect and activate

Establish staffed service, assembly and paper-receipt baselines in authorized space.

03 Adapt and prove

Run controlled tests after professional review; publish incidents, resources and returns.

04 Scale with evidence

Normalize only when public value, accountability, finance and statutory conditions are adequate.

Reuse first → Repair before new build → Reversible before permanent → Evidence before scale

Basis and rights: official announcement, cleared agent taskbook, repository standards snapshots and six official case pages. Two concept images were created with OpenAI Codex built-in ImageGen; they are not site observations, public opinion or approved work.

11.41 km²

provisional frame

EVIDENCE BOUNDARY

Official boundaries, heritage/river controls, utilities/fire, roads/stations, ownership and delivery bodies remain pending. All drawings express conceptual relationships, not official redlines or engineering alignments.

Mechanism references: Kendall amendability; MaRS shared interface; Paris-Saclay differentiated clusters; one-north governed testing; Barcelona 22@ standing coordination; Seoul DMC rail and public demonstration. Factual paraphrase only.

KNOWN UNKNOWNNS

Remain unknown: FAR, total floor area, building density, road area/ratio, height and setbacks. Without official boundaries, parcels, existing buildings, road redlines and approved controls, precision would be false.
