HUMAN RESPONSIBILITY

AI PROPOSAL PENDING VALIDATION

CORE THESIS

AFTER GO-LIVE turns service lifecycle into spatial form. Every place works normally, accepts AI reversibly, degrades to staffed service, and returns to ordinary use after exit.

SPATIAL VALUE

Three distinct typologies connect controlled prototyping, civic translation and high-frequency adoption.

05

INTERFACES

PROVISIONAL / 类型化设计：非官方红线、非现状、非审批或工程依据 · CC-BY-SA-4.0 · BE-hop × OpenAI Codex

fact-function-translation-use; interface is not partnership

- six railway-operation translations
- six explicit non-transfer limits
- five method-only regional interfaces

HISTORICAL GRAMMAR, CASE LIMITS + REGIONAL INTERFACES

AFTER GO-LIVE · V3

事实 → 原始功能 → 空间转译 → 当代用途；机制可迁移，承诺不可外推

LINE	continuous movement	→	public mobility + adoption spine
PLATFORM	handover	→	equal civic interface
YARD	marshalling	→	prototype combination test
DUTY + REPAIR	continuity	→	staffed maintenance
TIMETABLE	time sharing	→	shared-space shifts
RETIREMENT	asset cycle	→	component reuse

5 × REGIONAL EXCHANGE INTERFACES

Zhongguancun AI Latitude Community	talent and public-innovation questions · public-draft context; no partnership claim
Future Science City	research testing methods and cross-district learning · conceptual interface; actors unconfirmed
Huairou Science City	public explanation and adoption-testing methods · no project or data-exchange commitment
Beijing E-Town	industrial engineering, supply-chain and maintenance practice · no company list or procurement commitment
Jing-Jin-Ji	portable service contracts, training and exit templates · method transfer only; no construction corridor

6 CASES: PUBLIC FACT → TRANSFERABLE MECHANISM → LOCAL CARRIER → NON-TRANSFER LIMIT

Barcelona Innova Lab	CitCom.ai	Smart Kalasatama
mechanism → carrier / explicit boundary	mechanism → carrier / explicit boundary	mechanism → carrier / explicit boundary
Punggol Digital District	UK AI procurement	NIST AI RMF
mechanism → carrier / explicit boundary	mechanism → carrier / explicit boundary	mechanism → carrier / explicit boundary

03 OVERALL DESIGN + TWO-LAYER PLAN

provisional base separated from recomputable design intent

- north-south public adoption spine
- cross-links join expertise and daily feedback
- full recalculation after official data

总体城市设计 / OVERALL URBAN DESIGN

AFTER GO-LIVE · V3

一条采用脊 · 三座接力场 · 两翼五接口 / one adoption spine · three relay grounds · two supporting wings

TWO-LAYER PLAN

The base shows provisional extents and gaps; the design layer adds spine, stitches, prototypes, co-design nodes and phases.

SPATIAL JUDGMENT

North-south continuity is not a device corridor; each cross-link reconnects expertise, daily feedback and public realm.

RECALCULATION TRIGGER

Official polygons, controls, survey, title, heritage, mobility or utilities replace the base before every layer and metric is recalculated.

PROVISIONAL / 类型化设计：非官方红线、非现状、非审批或工程依据 · CC-BY-SA-4.0 · BE-hop × OpenAI Codex

- ordinary-space minimum
- retain-adapt-insert-decide
- states change interfaces and components

SPATIAL BASE + FOUR-STATE SYSTEM

AFTER GO-LIVE · V3

法定分类待补齐；设计功能覆盖层不冒充控规 / functional overlays do not replace statutory land use

ORDINARY-SPACE MINIMUM

Continuous movement, accessibility, shade/stormwater, free stay, fixed information and staffed service remain without digital systems.

RENEWAL PATH

Retain → adapt → reversible insert → decide after evidence; typological envelopes never determine demolition.

FOUR STATES ARE SPATIAL CONDITIONS ACROSS THE SERVICE LIFE CYCLE

PROVISIONAL / 类型化设计：非官方红线、非现状、非审批或工程依据 · CC-BY-SA-4.0 · BE-hop × OpenAI Codex

05 ZHONGZHIYUAN PROTOTYPE YARD

typological plan, public/test section, failure return and concept view

ZHONGZHIYUAN · PROTOTYPE MARSHALLING YARD

典型平面 + 关系断面 + 四态变化 / typological plan + relational section + four operating states

AFTER GO-LIVE · V3

PROVISIONAL / 类型化设计：非官方红线、非现状、非审批或工程依据 · CC-BY-SA-4.0 · BE-hop × OpenAI Codex

AI-generated conceptual visualization / not existing or approval evidence

- controlled test separated from observation
- repair connects to back-of-house
- ordinary bypass avoids machine domain

06 AI ORIGIN TRANSLATION PLATFORM

open ground, accessible model garden, day/night section and view

AI ORIGIN · TRANSLATION PLATFORM

典型平面 + 关系断面 + 四态变化 / typological plan + relational section + four operating states

AFTER GO-LIVE · V3

PROVISIONAL / 类型化设计：非官方红线、非现状、非审批或工程依据 · CC-BY-SA-4.0 · BE-hop × OpenAI Codex

AI-generated conceptual visualization / not existing or approval evidence

- physical, paper, phone and staff remain
- protected quiet/care space
- people decide public interest

07 DAZHONGSI ADOPTION CONCOURSE TYPOLOGY

official anchoring pending; PROV-KEY-003 is not station evidence

DAZHONGSI · URBAN ADOPTION CONCOURSE TYPOLOGY

AFTER GO-LIVE · V3

典型平面 + 关系断面 + 四态变化 / typological plan + relational section + four operating states

AI-generated conceptual visualization / not existing or approval evidence

- public hall separated from maintenance
- staff visible in every state
- exit restores ordinary movement

08 COMPONENTS, 12 SCENARIOS + 3 BLUEPRINTS

every contract contains human, ordinary, maintain, appeal, stop and exit

- three full industry-test blueprints
- twelve contracts with fifteen fields
- completeness is not field performance

12 SCENARIO CONTRACTS + 3 FULL SERVICE BLUEPRINTS
