

Cover | Visible Stewardship

Renewal begins before replacement: the city is a civic object continuously inspected, repaired, upgraded, handed over, and reused.

OBJECT + STATE + RESPONSIBILITY + EVIDENCE + DESTINATION

Manifesto | Seams Stay Legible

PROVISIONAL · CONCEPTUAL

Every change retains reason, responsibility, evidence, and the next review trigger; repair does not pretend to be new.

SUP-03

Material and Component Passport

Every component retains identity, tools, risk, responsibility, and destination across service, repair, and reuse.

DIRECTIONAL CONCEPT | PROVISIONAL

v0.3 · 2026-08-11

Evidence Classes and Gaps

Formal sources, package-derived values, synthetic tests, and unknown inputs remain separate; provisional geometry supports no statutory claim.

FOUR EVIDENCE CLASSES STAY SEPARATE

FORMAL SOURCE	Task, public policy, and standard basis	Does not become site-specific statutory control
PACKAGE-DERIVED	Recomputed area and ratios from provisional geometry	Recalculate when official polygons arrive
SYNTHETIC TEST	Tests rejection, fallback, and ledger closure	Does not prove field effectiveness
UNKNOWN	Controls, ownership, utilities, real maintenance baseline	Never zero-filled or numerically displayed

Three Scope Levels

PROVISIONAL · CONCEPTUAL

43.6 km² capability coordination, ≈11.413 km² responsibility fabric, and 368.4 ha of three detailed tests answer different questions.

FIG-01

Site Overview | Maintenance Debt into a Distributed Intervention Fabric

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Four joined synthetic golden assets demonstrate method only; interventions are distributed across three scopes, with recovery, accountability, retirement/reuse, and cross-zone resource specialisms.

THREE SCOPE LEVELS

- 43.6 km² coordination | capability
- ≈11.413 km² overall | responsibility
- 368.4 ha key areas | verification

ZONE SPECIALISMS

- 1 Zhongzhiyuan: maintainability/recovery
- 2 Ai Origin: fallback/accountability
- 3 Dazhongsi: retirement/repair/reuse

service fabric repair inlay provisional
Sources/evidence: OFFICIAL-ANNOUNCEMENT; geometry/*geojson; maintenance-debt-map.json [SYNTHETIC]

Overall Fabric | Distributed Interventions

PROVISIONAL · CONCEPTUAL

Maintenance debt and service gaps generate interventions instead of one line connecting three equal cores.

FIG-01

Site Overview | Maintenance Debt into a Distributed Intervention Fabric

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Four joined synthetic golden assets demonstrate method only; interventions are distributed across three scopes, with recovery, accountability, retirement/reuse, and cross-zone resource specialisms.

v0.3 · 2026-08-11

Land Use and Two Clocks

PROVISIONAL · CONCEPTUAL

Seven non-linear service-life cells; the earlier slow/fast clock triggers human review only.

FIG-02

Land-Use Structure | Seven Non-linear Service-Life Cells + Two Clocks

Seven cells encode repair, care, learning, and reuse actions—not statutory land use; the earlier clock triggers human review only.

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Sources/evidence: geometry/land_use.geojson; two-clock-interface.json; MNR-LAND-USE [CONCEPTUAL]

v0.3 · 2026-08-11

Zhongzhiyuan | Durability and Recovery Foundry

PROVISIONAL · CONCEPTUAL

Concept plan, section, and service flow join the model/edge rollback asset to isolated fault injection, visible repair, night maintenance, human stop authority, and rollback recertification; stop on spillover, failed rollback, or budget breach.

ZONE-01

Zhongzhiyuan | Durability Foundry for Model / Edge Rollback

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

Concept plan, section, and service flow show isolated testing, human stop, rollback recertification, and night maintenance—without claiming existing buildings or engineering dimensions.

PROV-KEY-001 × BLDG-001 → SYN-ASSET-ZZY-001 → MDEBT-ZZY-001 · 3.35 → SYN-RECEIPT-ZZY-001
SYN-CLOSING-ZZY-001 · 4 LEDGERS CLOSED SEPARATELY → SYN-ESCROW-ZZY-001 · ESCROW 20 + 7 - 9 = 18

CONCEPT SECTION: isolated yard / openable service layer / night-maintainer room

SERVICE FLOW

P0—P3 GATE

ACCEPT: Rollback reproducible · human stop works · four ledgers=0

STOP on real-service spillover / failed rollback / budget breach

ordinary/fallback stop/repair destination

v0.3 · 2026-08-11

AI Origin | Civic Fallback and Accountability Commons

PROVISIONAL · CONCEPTUAL

A concept court combines a staffed desk, paper receipt, static wayfinding, accessible route, and offline appeal as equal service paths; pause if AI gates eligibility, fallback fails, or users are excluded.

Dazhongsi | Retirement, Clearing, and Reuse Logistics

PROVISIONAL · CONCEPTUAL

A concept logistics wedge and quarantine section organize return, data clearing, test/repair, grading, and destination receipt; quarantine unclear clearing, destination, or responsibility, and never revive L7 assets.

Lifecycle State Plate

PROVISIONAL · CONCEPTUAL

Eight stages from monitoring to public return are not automatic; manual, rollback, quarantine, and safe modes form the exception ring.

Failure-Recovery Section

PROVISIONAL · CONCEPTUAL

Detection, isolation, degradation, manual fallback, restoration, and review produce separate logs, signatures, versions, and acceptance.

Material Passport

PROVISIONAL · CONCEPTUAL

Component ID, material, joint, tool, hazard, life, repair rights, residual value, and next use remain traceable.

SUP-03

Material and Component Passport

Every component retains identity, tools, risk, responsibility, and destination across service, repair, and reuse.

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

ID / LOCATION / CUSTODY

v0.3 · 2026-08-11

AI Scenarios and Eight Personas

Twelve service scenarios organize real tasks, minimum data, human review, offline alternative, and exit conditions.

TWELVE AI SERVICE SCENARIOS: EACH HAS HUMAN AND EXIT BOUNDARIES

SC-01 Asset health	SC-07 Resource budget
SC-02 Service booking	SC-08 Part passport
SC-03 Dual-route duty	SC-09 Data clearing
SC-04 Recovery drill	SC-10 Return grading
SC-05 Upgrade rollback	SC-11 Night support
SC-06 Robot repair	SC-12 Return + appeal

Mobility and Blue-Green Commons

PROVISIONAL · CONCEPTUAL

Ordinary/non-digital routes come first; repair access, night safety, stormwater care, and accessible detours share the ground.

Four Separate Ledgers

PROVISIONAL · CONCEPTUAL

Service, care labor, material/resource, and public value cannot be summed across units; each closes independently.

Metrics, Two Non-Successes, Audit Blocker

PROVISIONAL · CONCEPTUAL

Of sixteen synthetic tasks, only SIM-003 schema rejection and SIM-004 energy-budget exceedance are non-successes; SIM-016 restores successfully with its audit blocker retained; unknown metrics never become zero.

FIG-05

Metrics + Evidence | Receipt → Four Separate Ledgers → Escrow → Closure

DIRECTIONAL CONCEPT | PROVISIONAL
BOUNDARIES | SYNTHETIC, NOT FIELD DATA

SIM-003 and SIM-004 are the only two non-successes; SIM-016 restores successfully with its audit blocker retained.

service labor material public value

Sources/evidence: state-receipts.json; *-ledger.json; renewal-escrow.json; closure-results.json; simulation.json

v0.3 · 2026-08-11

Phasing, Responsibility, Acceptance

PROVISIONAL · CONCEPTUAL

P0–P3 are obligation gates rather than schedule promises: RACI/human veto, coverage of 23 tasks, 15 depth items, and 9 standards, plus official, provisional, synthetic, and unknown gap triggers jointly determine entry, contraction, or stop.

Boundary, Rights, and Recalculation

Programmatic graphics do not impersonate field imagery; all layers recalculate when official polygons and professional inputs arrive.

BOUNDARY, RIGHTS, AND THE NEXT RECALCULATION

NOT FIELD IMAGERY	All media are programmatic concept and evidence graphics	No photograph, remote map, logo, or portrait
NOT APPROVAL	Provisional, conceptual, synthetic, and unknown remain visible	No statutory, government, or engineering claim
NEXT TRIGGER	Official polygons, controls, ownership, professional surveys	Recalculate nine layers, six spatial metrics, and drawings together
