

FROM MODEL TO MEAL

A Common-Table Spine links AI research, talent life and the civic everyday

EN

SPATIAL SYSTEM

One spine

tables + slow mobility + rain gardens

Three stations

food lab + talent court + market

Six gateways

hot meals + water + toilets + staff

Two wings

15-minute food and surplus network

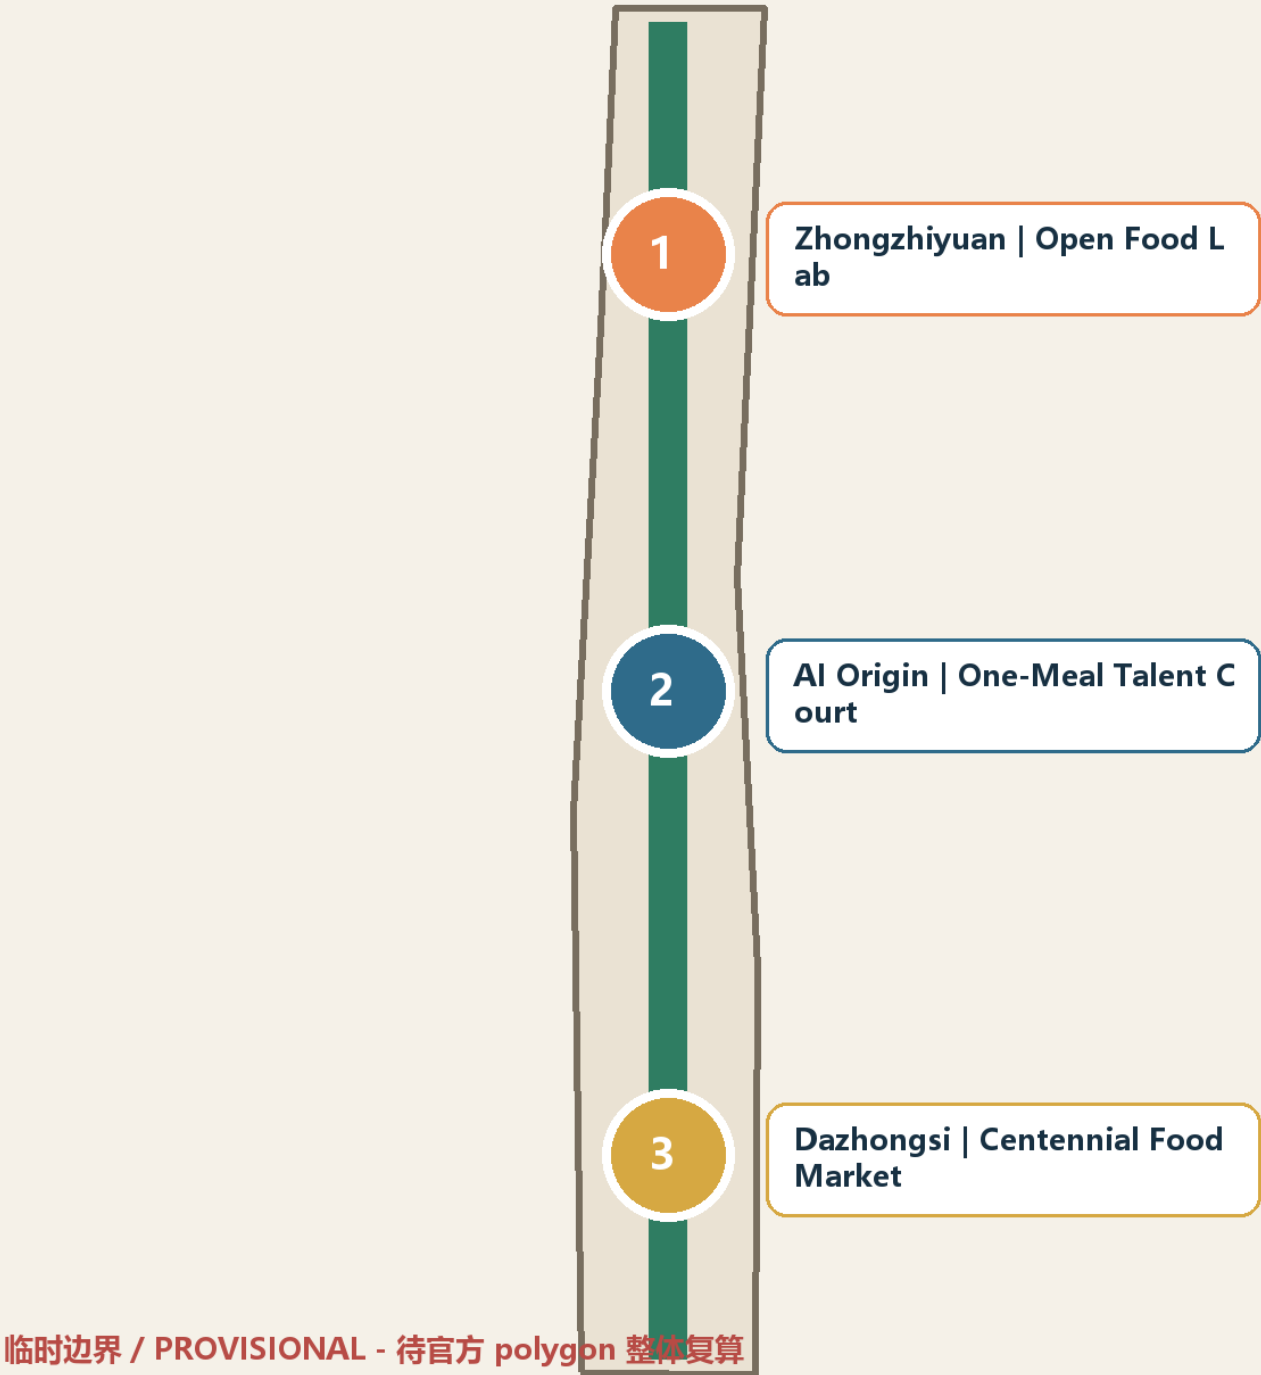

AI is never a gate to a meal: turn recommendations off, keep service running, hand faults to people.

one spine · three stations · six gateways · two wings

Statutory FAR, height, density, green ratio and setbacks remain unknown; repartition after official controls.

# THREE STATIONS, NOT THREE ISLANDS

Each station has a usable landmark, public entry, separate logistics, staffed service and shutdown path

EN

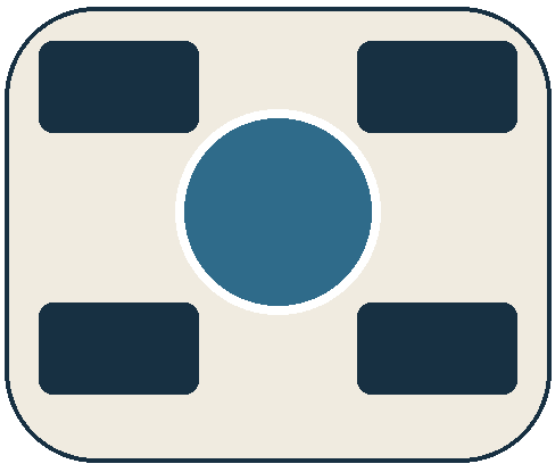

## Zhongzhiyuan | Open Food Lab

### Transparent Hearth

- robot test gallery
- safety calibration
- shared production kitchen
- public viewing ring

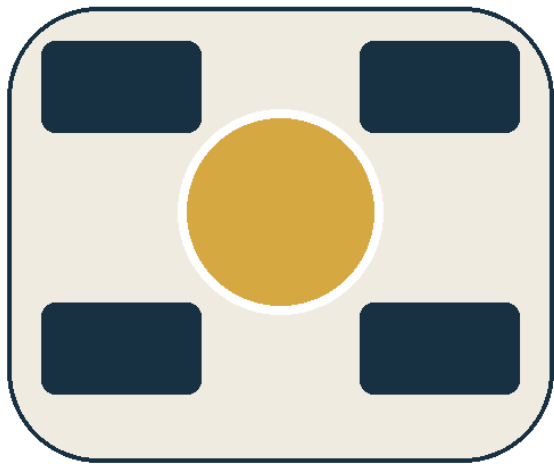

## AI Origin | One-Meal Talent Court

### Hundred-Person Table

- affordable canteen
- childcare kitchen
- quiet work rooms
- all-weather walk

## Dazhongsi | Centennial Food Market

### Centennial Recipe Gallery

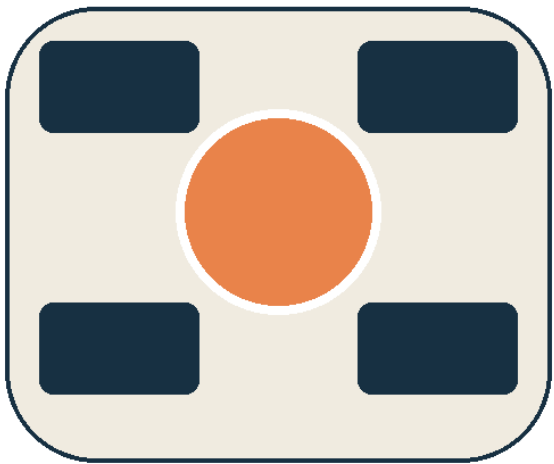

- market and first stores
- international launch hall
- oral archive
- transit walk link

slow mobility at centre; timed logistics at edge

SLOW MOBILITY AT THE CENTRE, LOGISTICS AT THE EDGE

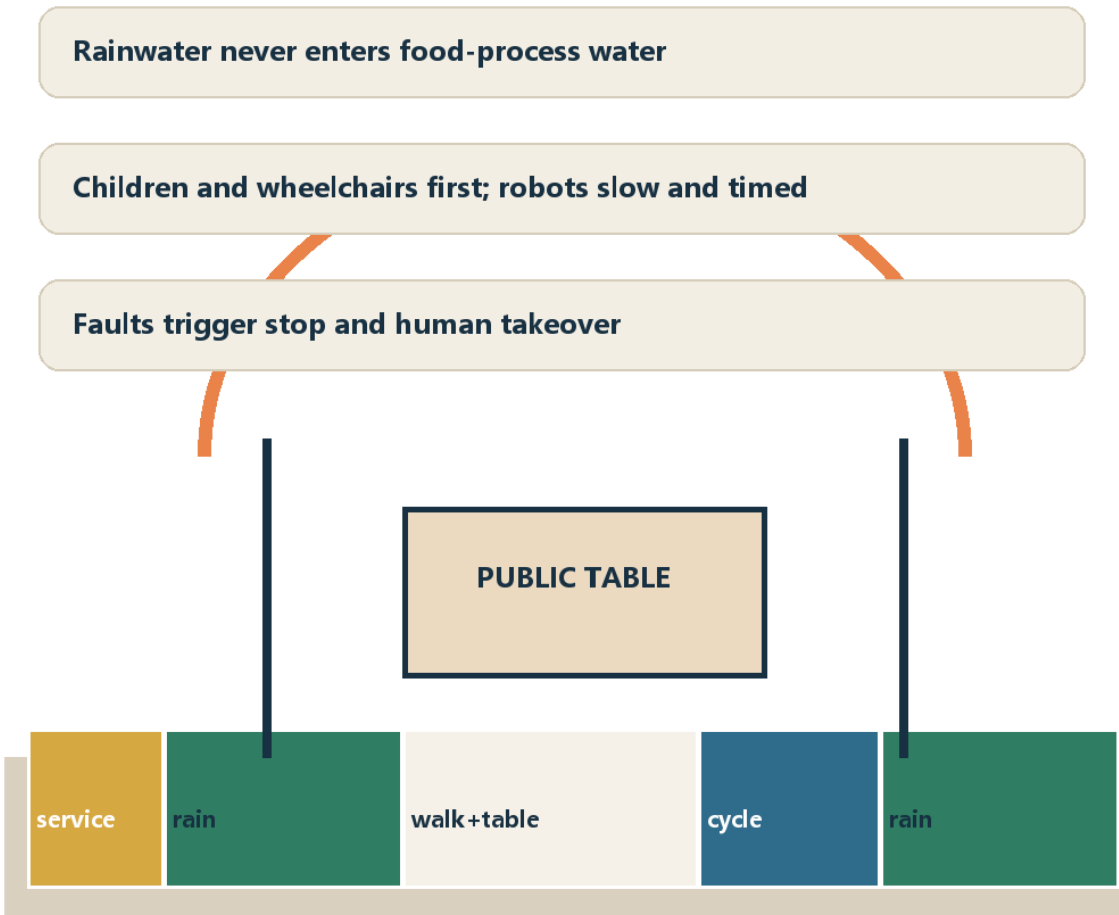

EN

Tables, accessibility, cycling, rain gardens and timed clean/dirty logistics work without conflict

NETWORK

TYPICAL SECTION

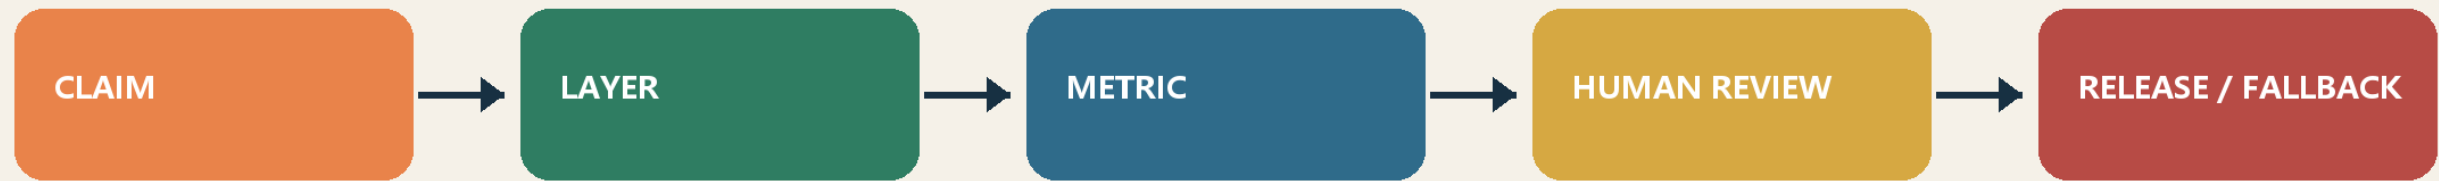

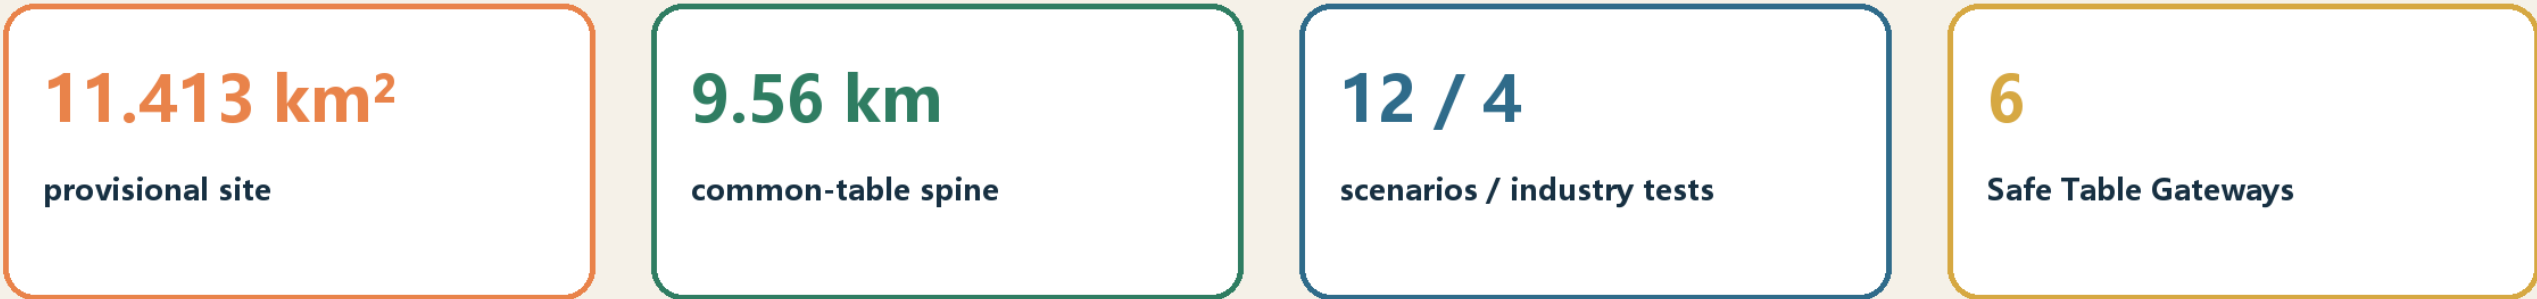

recomputable, reversible and human-operable

## EVERY CLAIM HAS A RECOMPUTATION PATH

EN

Spatial metrics recompute from GeoJSON; statutory controls stay unknown; every AI scenario has human release

**UNKNOWN = FAR / building height / road redlines / ownership / utility capacity / heritage boundaries**

Provisional geometry supports content review and concept recomputation; it proves neither official boundaries, statutory controls nor implementation eligibility.
