

JINGZHANG SIGNAL LINE · One line, three stations, two wings, twelve nodes

Source: generated geometry GeoJSON (recomputed EPSG:4548, output 4326) · conceptual, pending official data · generated 2026-08-11 v1.1

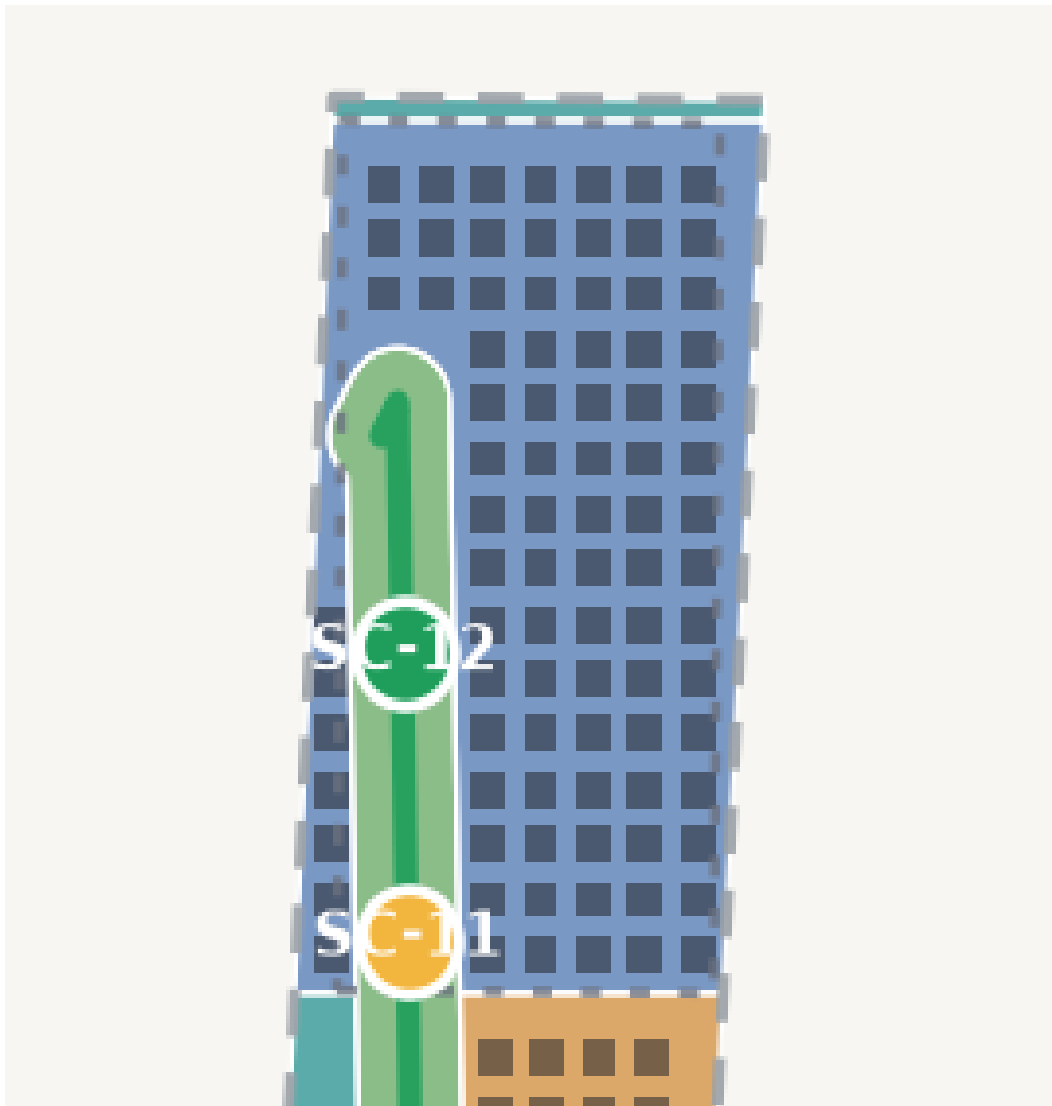

Land-use and spatial structure (conceptual, EPSG:4548)

Source: generated geometry GeoJSON (recomputed EPSG:4548, output 4326) · conceptual, pending official data · generated 2026-08-11 v1.1

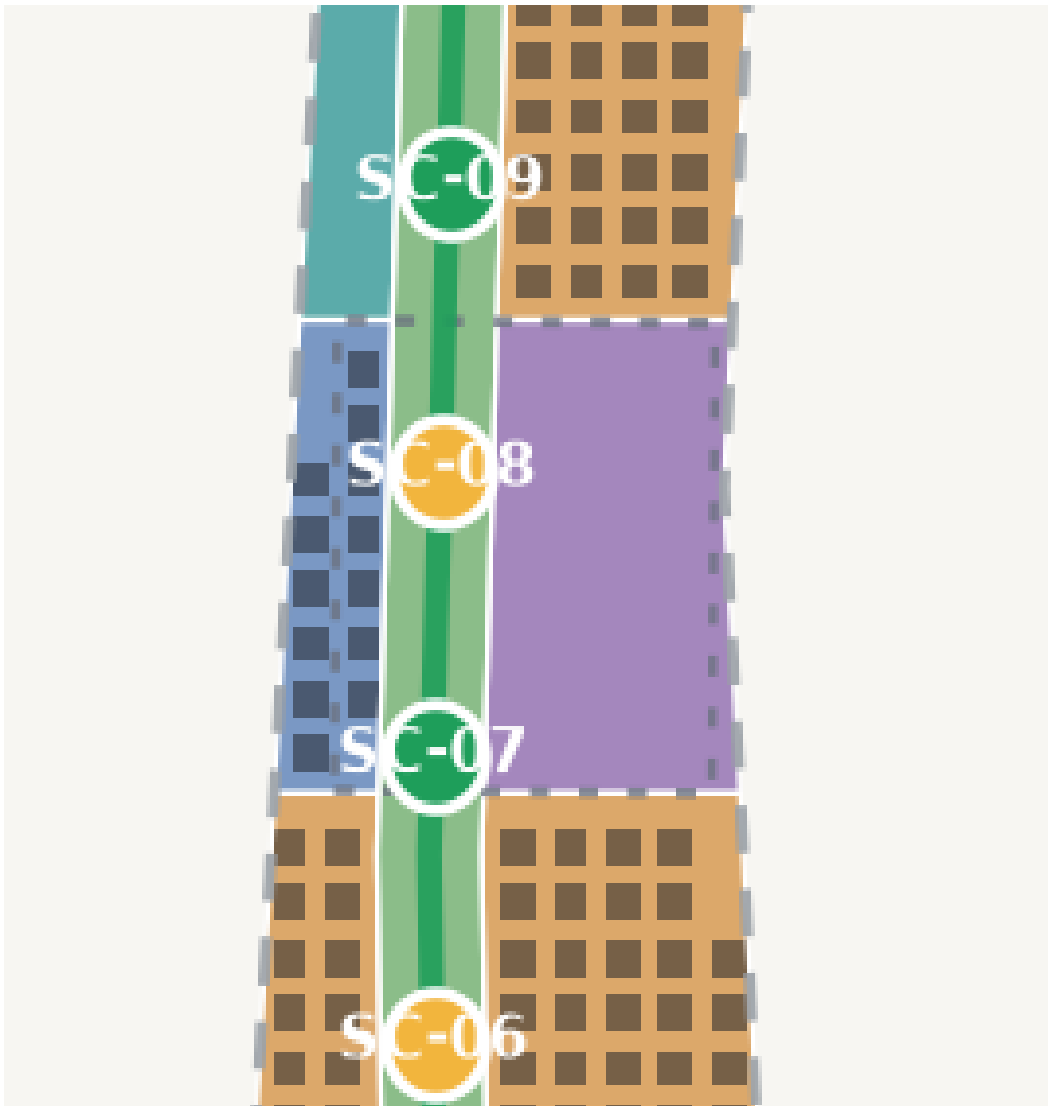

Detailed design of the three key areas (conceptual)

Zhongzhiyuan · Interlocking Center

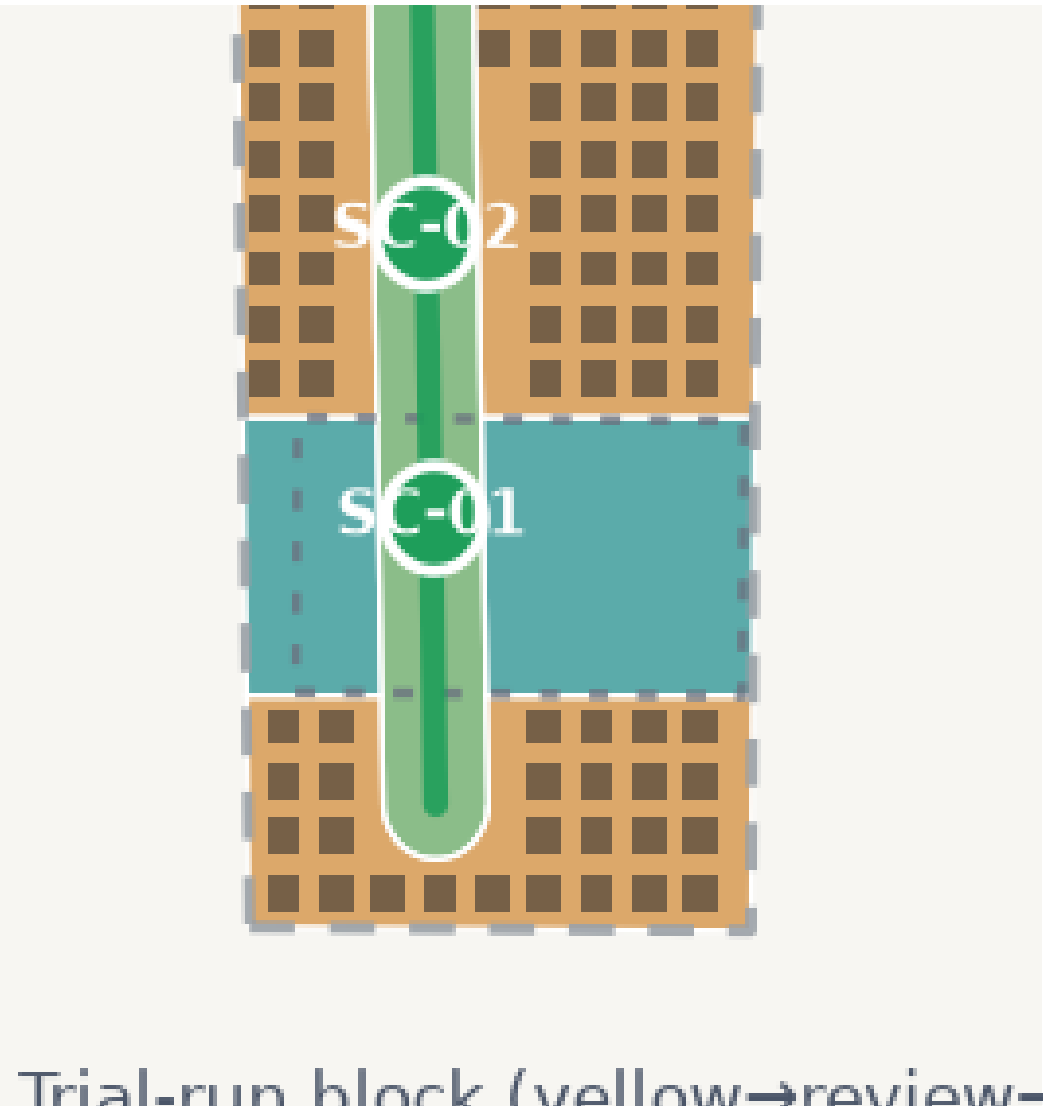

Central verification ground & interlocking sandboxes / R&D clusters / Interlocking Hall (manual origin platform)

AI Origin · Signal Box

Original Platform Signal Tower (pilgrimage landmark) / public test ground / campus slow-mobility zone

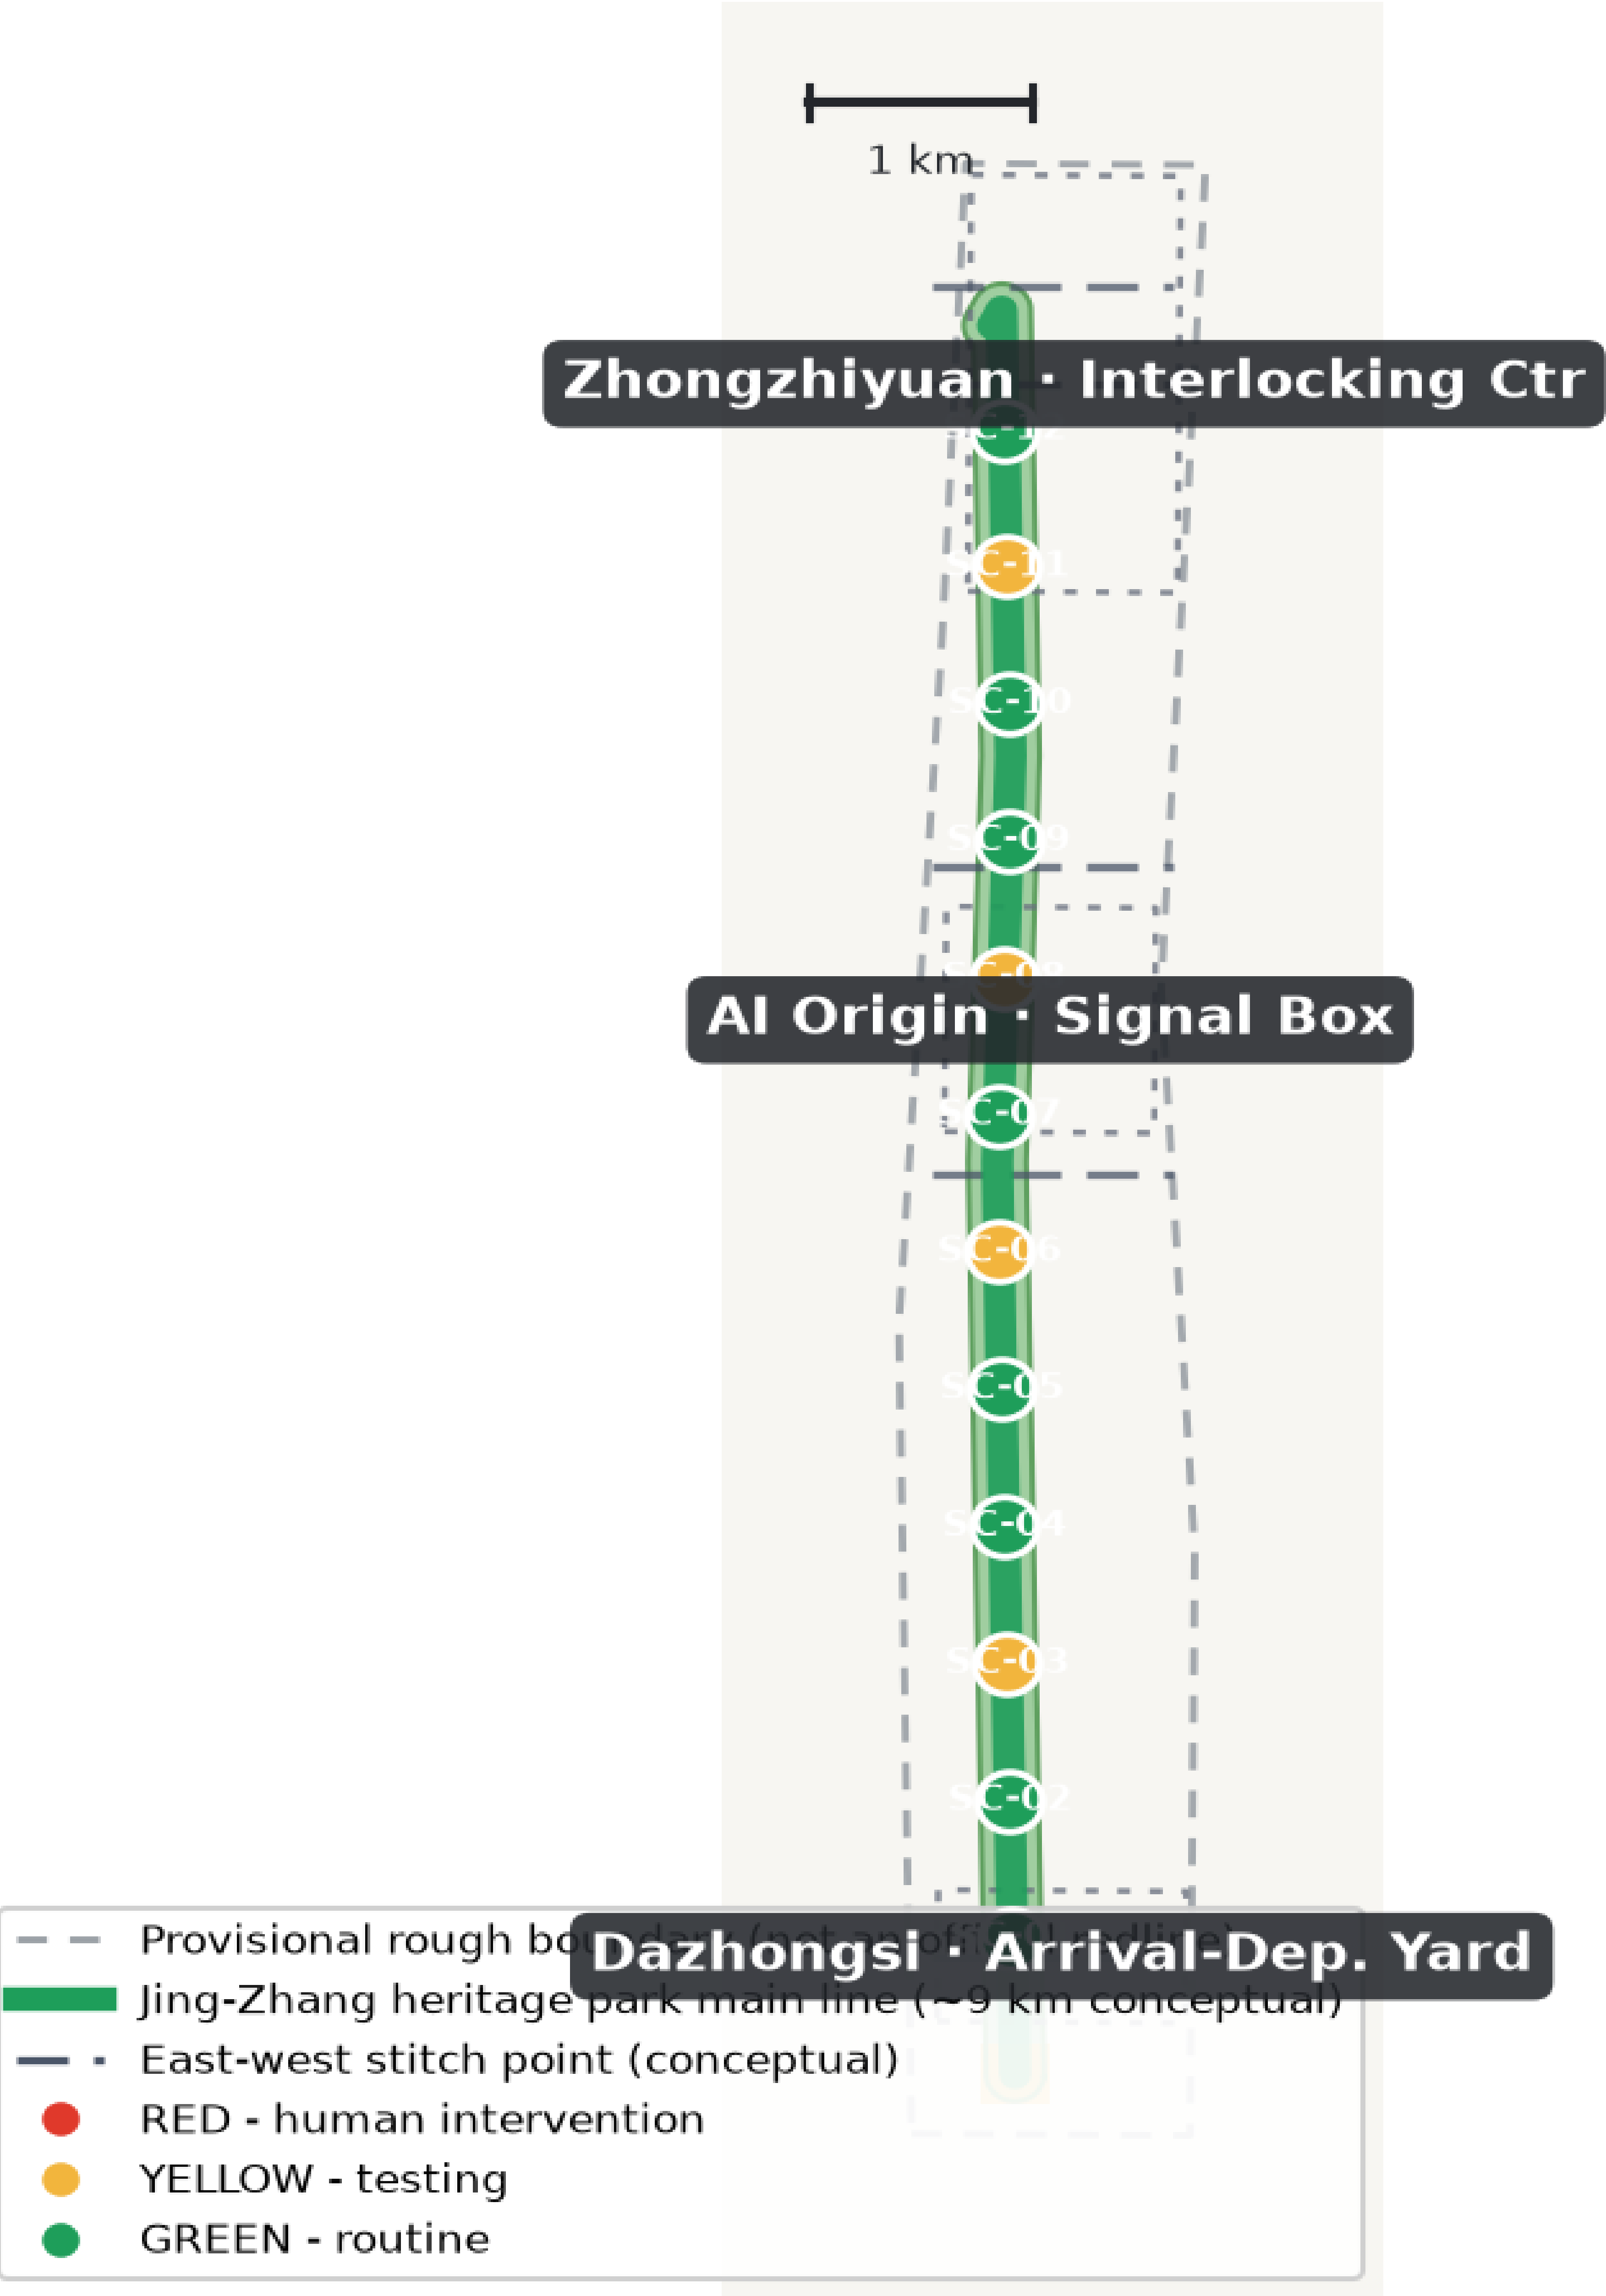

Dazhongsi · Arrival-Departure Yard

Trial-run block (yellow→review→green/offline) / Arrival
city/STO linkage

Source: generated geometry GeoJSON (recomputed EPSG:4548, output 4326) · conceptual, pending official data

Slow mobility · rail connection · blue-green network (conceptual)

Metrics evidence · recalculation and self-check (EPSG:4548)

Overall design area known 11.41 km²	Green ratio known 20.3%	Public space ratio known 0.8%
Key areas known 3 areas / 368.4 ha	Scenario cards known 12 (3 test/validation)	Pilgrimage landmarks known 3

Geometry GeoJSON
