

# JING-ZHANG OPEN CHALLENGES

The city poses. The world co-solves. The public accepts.

One question ledger · one validation chain · one everyday care network · 12 scenario nodes

Status grammar: ? pose { } co-solve Δ test ○ accept ↻ iterate or exit

Provisional boundary · not statutory

All mechanisms proposed

#846 ≈ 412.5 m · #1029 ≈ 2.26 km

Step 1  
The city poses

Step 2  
Cross-institution co-solving

Step 3  
Controlled validation

Step 4  
Public acceptance

Step 5  
Review or exit

01

OVERVIEW MAP | Ledger, validation chain and care network

Three strip plates, north up; every dashed or hatched extent is provisional

JING-ZHANG OPEN CHALLENGES

PROVISIONAL · NOT STATUTORY

THE OPEN-CHALLENGE PROCEDURE

- ? Pose | open call, owner and baseline on record
- { } Co-solve | rights cleared, then global teams answer
- △ Test | staged expert review and controlled field trials
- Accept | public comparison, review and receipts
- ↻ Iterate or exit | open postmortem; failures may retire

THREE ZONES, TWO WINGS

- Zhongzhiyuan | solve + verify: safety and energy evidence for open models and embodied AI
- AI Origin Community | pose + team: question clinics, open research, talent routines
- Dazhongsi | review + adopt: product comparison, SME uptake, public acceptance
- Zhongguancun wing | match factors: IP, legal, compute, transfer services
- Xiaoyue River wing | low-risk trials: slow, revocable real-scenario tests

COMMUNITY REVIEW ON RECORD

#846 The provisional SITE does not touch the OSM-mapped railway heritage park; nearest distance about 412.5 m, and OSM is not the official boundary either. #1029 PROV-KEY-003 is not anchored to Dazhongsi Station, about 2.26 km away; this plate implies no station exits or quadrants.

SITE-001 and PROV-KEY-001...003 are provisional\_rough. Issue #846: provisional SITE sits about 412.5 m from the OSM-mapped heritage park; Issue #1029: PROV-KEY-003 lies about 2.26 km from Dazhongsi Station. Coordinates stay unchanged until official data replaces the whole set.

SITE-001 · PROV-KEY-001...003 · SCN-001...012 · ISSUE-846 / #1029  
JZ-OC FIG.01 · 2400x1600 · v2.0

Community reviews: #846 — provisional SITE is about 412.5 m from the OSM-mapped heritage park; #1029 — PROV-KEY-003 is about 2.26 km from Dazhongsi Station. Coordinates stay unchanged until official data replaces the package.

02

LAND USE | Statutory classes and concept units

21 units tile the provisional SITE; concept zones from shared cuts, not a regulatory plan

JING-ZHANG OPEN CHALLENGES

21 units · 12 classes · coverage 1.0 · gap 0 m<sup>2</sup> · overlap 0 m<sup>2</sup>

BUILDING PROTOTYPES | a method sample, not an inventory

Retain 8 Renovate 8 Infill 8

Footprints total 101,646 m<sup>2</sup>, 0.8906% of the provisional SITE. Storeys, heights and uses are unsurveyed; the 8-8-8 split compares an evaluation method only.

Demolition is not a design action here: it stays a candidate for statutory procedure, and this round names no parcel.

SITE-001 and PROV-KEY-001...003 are provisional\_rough. Issue #846: provisional SITE sits about 412.5 m from the OSM-mapped heritage park; Issue #1029: PROV-KEY-003 lies about 2.26 km from Dazhongsi Station. Coordinates stay unchanged until official data replaces the whole set.

⊙

↻

PROV-KEY-001

Zhongzhiyuan AI Acceleration Area

Solve + verify | evidence first

1.93 km<sup>2</sup> provisional rough extent · official\_boundary=false

High-risk tests stay in controlled indoor or enclosed venues; an accessible evidence gallery publishes methods, versions, failures and stop reasons.

SCENARIO NODES

T01 Open Model Examination Hall · T03 Building Energy Shadow Twin

Stop conditions: unclear data rights, unclosed attack risks, no energy baseline, or a test label sold as official certification.

Provisional index; the whole set is replaced once the official key-area polygon arrives.

PROV-KEY-002

Beijing AI Origin Community

Pose + team | questions first

1.04 km<sup>2</sup> provisional rough extent · official\_boundary=false

A continuous ground-floor interface links offline question clinics, open-source collaboration, releases, IP advice and daily services, reusing existing space first.

SCENARIO NODES

S04 Source-Visible Research Assistant · S05 International Talent Human Referral Station

Stop conditions: data overreach, misleading service, persistent nuisance, or public interfaces squeezing daily life.

Provisional index; the whole set is replaced once the official key-area polygon arrives.

PROV-KEY-003

Southern Functional Prototype

Dazhongsi taskbook label; location unconfirmed

0.72 km<sup>2</sup> provisional rough extent · official\_boundary=false

Until the official area arrives, only a portable set is defined: disclosure-card market, human help desk and civic review forum. The current polygon is not read as the station area.

SCENARIO NODES

S09 AI Product Disclosure-Card Market · S10 Merchant Content and Translation Studio

Stop conditions: promotion posing as public certification, synthetic-content infringement, unanswered complaints, blocked passage.

Issue #1029: not anchored to Dazhongsi Station, about 2.26 km away; no station-exit or quadrant action.

SITE-001 and PROV-KEY-001...003 are provisional\_rough. Issue #846: provisional SITE sits about 412.5 m from the OSM-mapped heritage park; Issue #1029: PROV-KEY-003 lies about 2.26 km from Dazhongsi Station. Coordinates stay unchanged until official data replaces the whole set.

PROV-KEY-001...003 · provisional\_rough · ISSUE-846 / #1029  
JZ-OC FIG.03 · 2400×1600 · v2.0

Zhongzhiyuan | Evidence first

High-risk tests stay in controlled venues; the evidence gallery publishes methods, versions, failures and stop reasons.

AI Origin Community | Questions first

A continuous ground-floor interface links question clinics, open-source work, releases and daily services.

Southern Functional Prototype | Dazhongsi label, location unconfirmed

Only a portable set of disclosure-card market, human help desk and civic review forum is defined.

04

MOBILITY × BLUE-GREEN | Lateral stitching first

Concept centrelines describe everyday access, not road redlines; blue-green is a design envelope, not a statutory green line

JING-ZHANG OPEN CHALLENGES

PROVISIONAL · NOT STATUTORY

LEGEND | line style and texture both encode

- cross-corridor stitches (9)
- local longitudinal aids (4)
- shade + infiltration seams (6)
- care pocket rain gardens (3)
- local stormwater belt (1)

CROSS-CORRIDOR SHARE

70.4159%

10,572 m of cross-corridor out of 15,013 m of concept centrelines; the remaining 4,442 m are four local longitudinal aids.

LATERAL + NODE SHARE OF BLUE-GREEN

94.5054%

Six transverse seams and three pocket gardens total 1,081,586 m² of the 1,144,469 m² blue-green envelope; only one local stormwater belt runs lengthwise.

FIVE MINIMUM PROVISIONS FOR ACCESS

- continuous accessible paths
- physical wayfinding
- shade and rest points
- orderly cycle parking
- events and logistics time-separated

SITE-001 and PROV-KEY-001...003 are provisional\_rough. Issue #846: provisional SITE sits about 412.5 m from the OSM-mapped heritage park; Issue #1029: PROV-KEY-003 lies about 2.26 km from Dazhongsi Station. Coordinates stay unchanged until official data replaces the whole set.

### Sources (20)

Five task and spatial-base entries, four professional references, three AI and inclusion policies and eight background cases. Cases contribute mechanisms only; permitted and prohibited uses are in sources.json.

### Assumptions (12)

Provisional boundaries, tenure, regulation, transport, utilities, heritage, ecology and governance are registered in assumptions.json; statutory conclusions wait for official data and professional review.

### Project boundary

The provisional SITE and the three PROV-KEY polygons are all provisional\_rough with official\_boundary=false; low-contrast dashes mark informal boundaries, and coordinates stay unchanged until official data replaces the package.

### #846 / #1029 action items

#846: the provisional SITE is about 412.5 m from the OSM-mapped heritage park and the package is replaced once review and official data arrive; #1029: PROV-KEY-003 is about 2.26 km from Dazhongsi Station and keeps only its task label until the location is confirmed.

AI collaboration: OpenAI Codex handled sources, data and validation; Kimi K3 handled research, peer review and the bilingual visual front end; the GitHub submitter performs the final check.
