

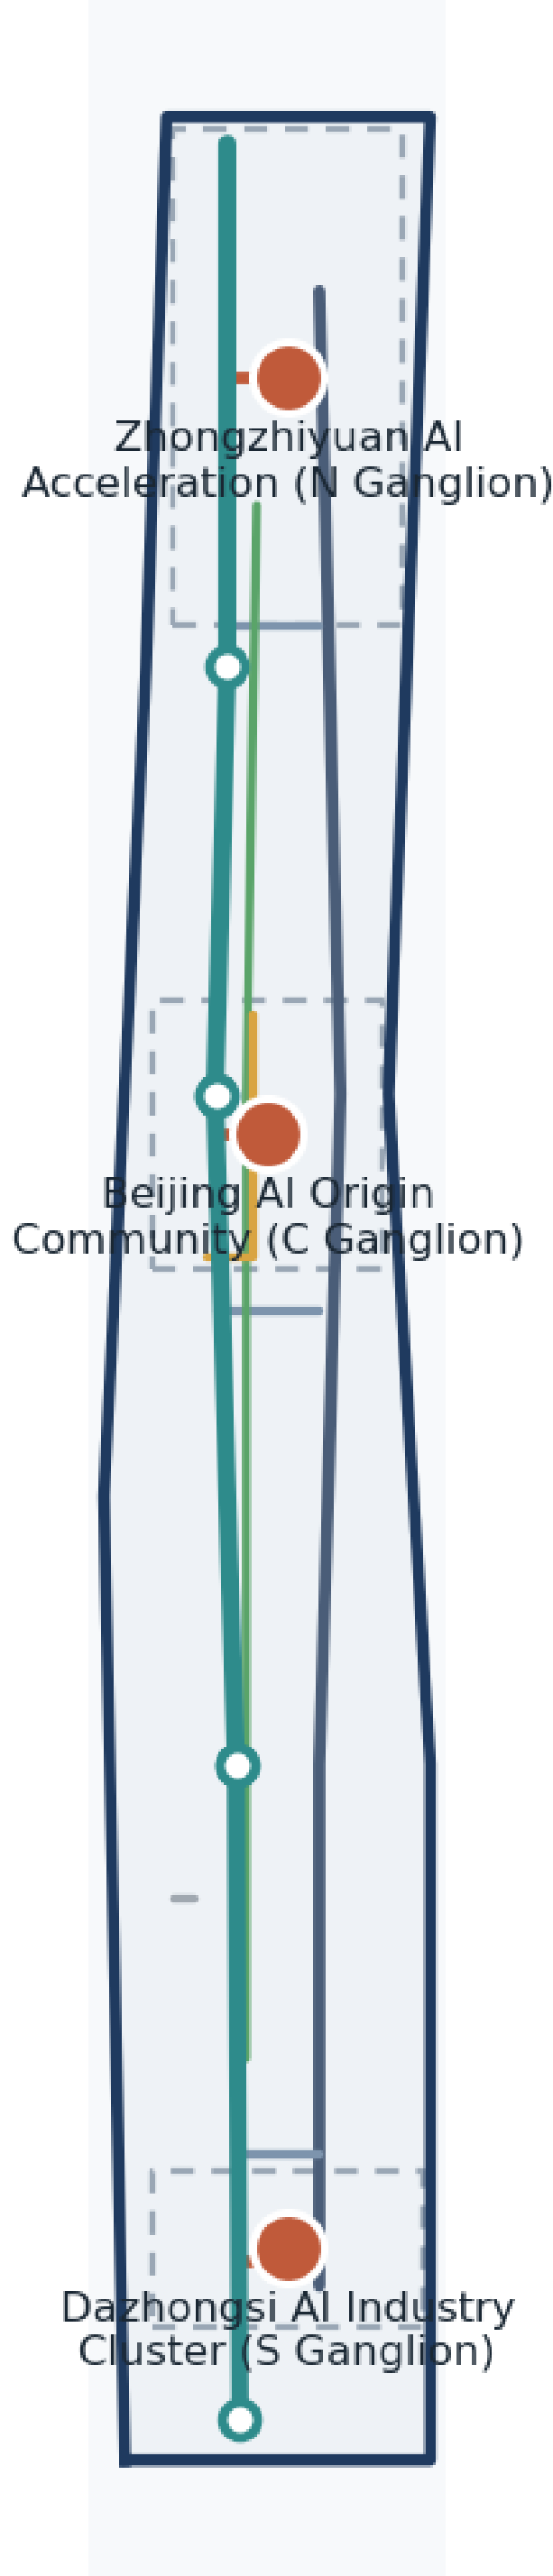

Fig.1 · Overview: NeuroRail Spatial Structure & Evidence Chain

Evidence chain & package relation

Core idea	Scenario-as-Infrastructure
Spatial metaphor	Spine → Ganglia → Synapse
Site area	site_area = 11,412,825 m² [metric]
Green ratio	green_ratio = 0.1234 [geometry]
Public-space ratio	public_space_ratio = 0.0733 [geometry]
Key areas	3 KEY_AREA (provisional)
Road network	11 design centerlines (spine/transit/secondary)
Tracks	AI Origin Community · Jing-Zhang heritage · c
Data principle	Data-minimized · auditable · human-in-the-loc

Source: submissions/.../geometry/*.geojson · metrics.json
State: package_state=ready_for_review (after self-check)

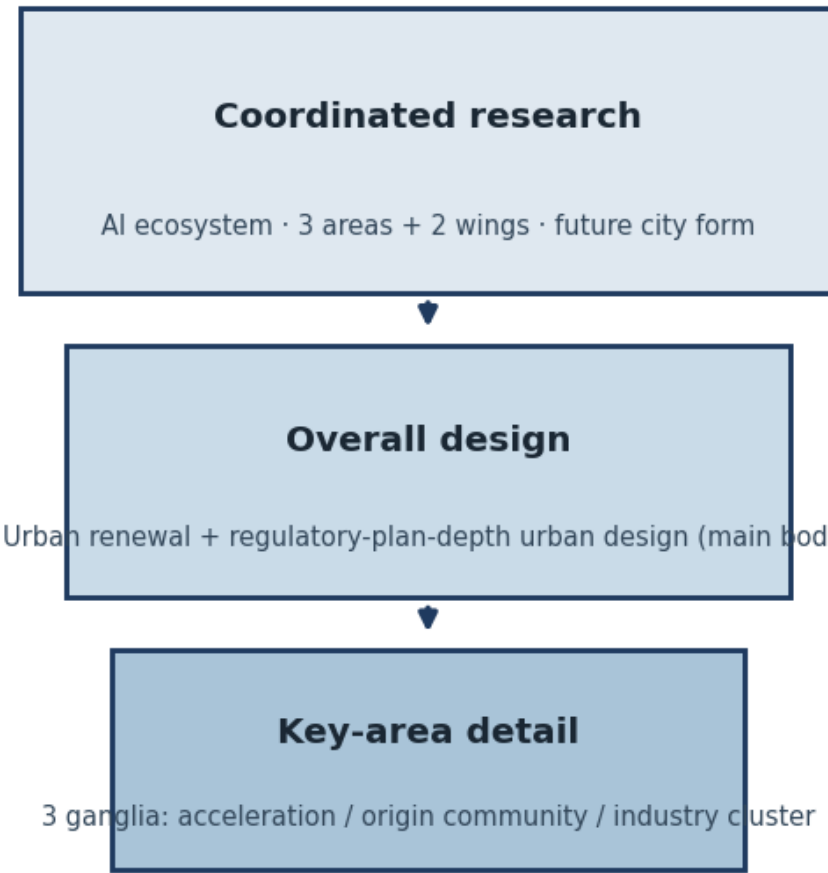

Boundaries are provisional_rough (organizer official redline not release, recalculate after official data).

Overall design boundary
Spine · heritage-park greenway
Transit connection
Two-wing secondary road
Key-area provisional boundary
AI Open Test Cell (OTC) node

Fig.2 · Three-Level Scope & Land-Use Structure

Coordinated research → overall design (regulatory-plan depth) → key-area detail

Three-level scope framework

Recalc basis: EPSG:4548 projection
land_use is a seamless full partition (no gaps/overlaps)

Dashed: phase-1 discussion extent (conceptual, not statutory phasing)

Boundaries are provisional_rough (organizer official redline not release, recalculate after official data).

Research 0802
Commercial 05
Park Green 1401
Culture/Sports 0702

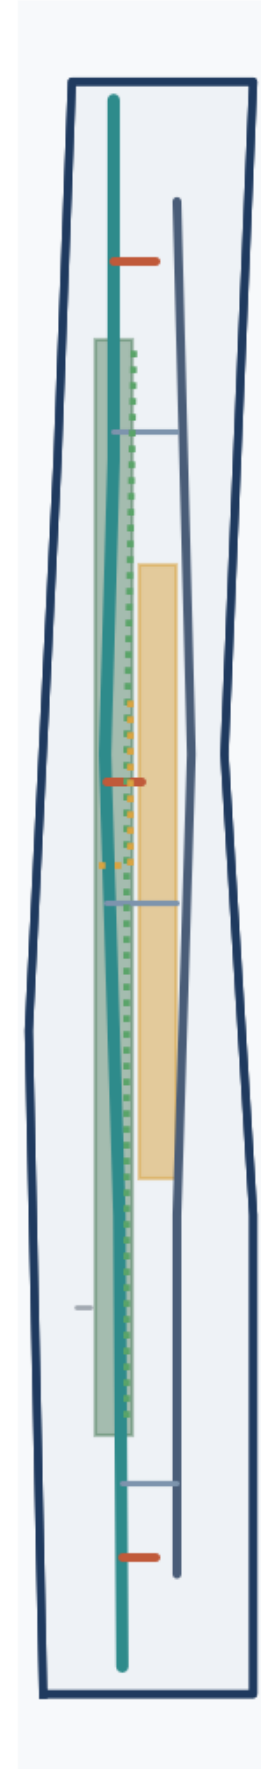

Fig.4 · Walkable Transport & Blue-Green Public-Space Composite

Heritage-park vitality belt · slow-mobility spine · transit connection · public interface

Composite-system key readings

Slow-mobility spine	1 spine · N-S through 3 ganglia
Transit connection	3 transit_connection spurs
Green ratio	0.1234 (12.34%)
Public-space ratio	0.0733 (7.33%)
Synapse connectors	3 E-W branch connectors
Pedestrian gallery	Synapse-gallery contribution wall

Note: ratios recalculated by geometry projection (EPSG:4548), not copied from narrative; roads are design-centerline concepts.

Boundaries are provisional_rough (organizer official redline not release, recalculate after official data).

Slow-mobility spine (greenway)
Transit connection
Secondary service road
Connector branch
Pedestrian
Blue-green space (GREEN_SPACE)
Public interface (PUBLIC_SPACE)

Fig.3 · Three Key Areas (Ganglia): Index & Design Tasks

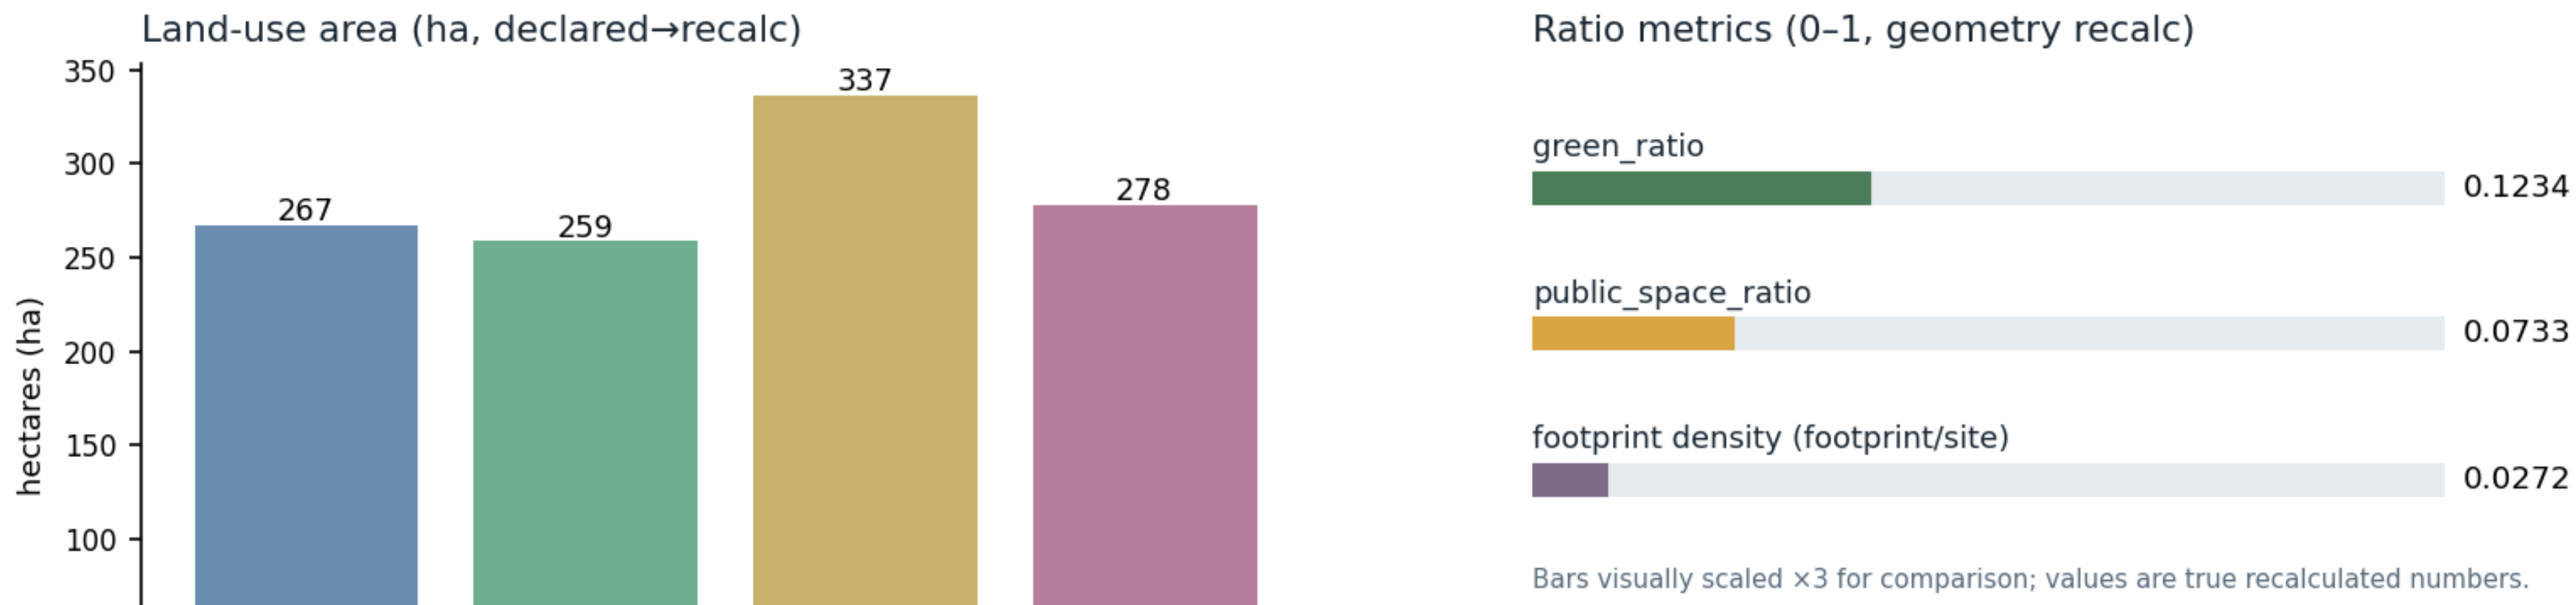

Provisional boundaries for directional design only, not precise redline

aries are provisional_rough (organizer official redline not released); not for precise redline / statutory area — recalculate after official data.

Fig.5 · Core-Metric Recalculation & Evidence Chain

Each metric tagged status / formula / source, recalculable from geometry; unknowns explicitly marked

Metric evidence table (status · formula · source)

Metric	Status	Value	Formula	Source
site_area_sqm	known	11,412,825.386 m²	polygon_area(site_boundary)	site_boundary.geojson
building_footprint_area_sqm	known	310,807.184 m²	sum polygon_area(buildings)	buildings.geojson
green_ratio	known	0.123423	green_area / site_area	green_space.geojson
public_space_ratio	known	0.073281	public_area / site_area	public_space.geojson
key_area_count	known	3	count(KEY_AREA)	key_areas.geojson
floor_area_ratio	unknown	— (regulatory FAR not released)	total_floor / site_area	pending official regulatory plan
