

JINGZHANG SELF-BUILT BELT — Overall Concept & Spatial Structure

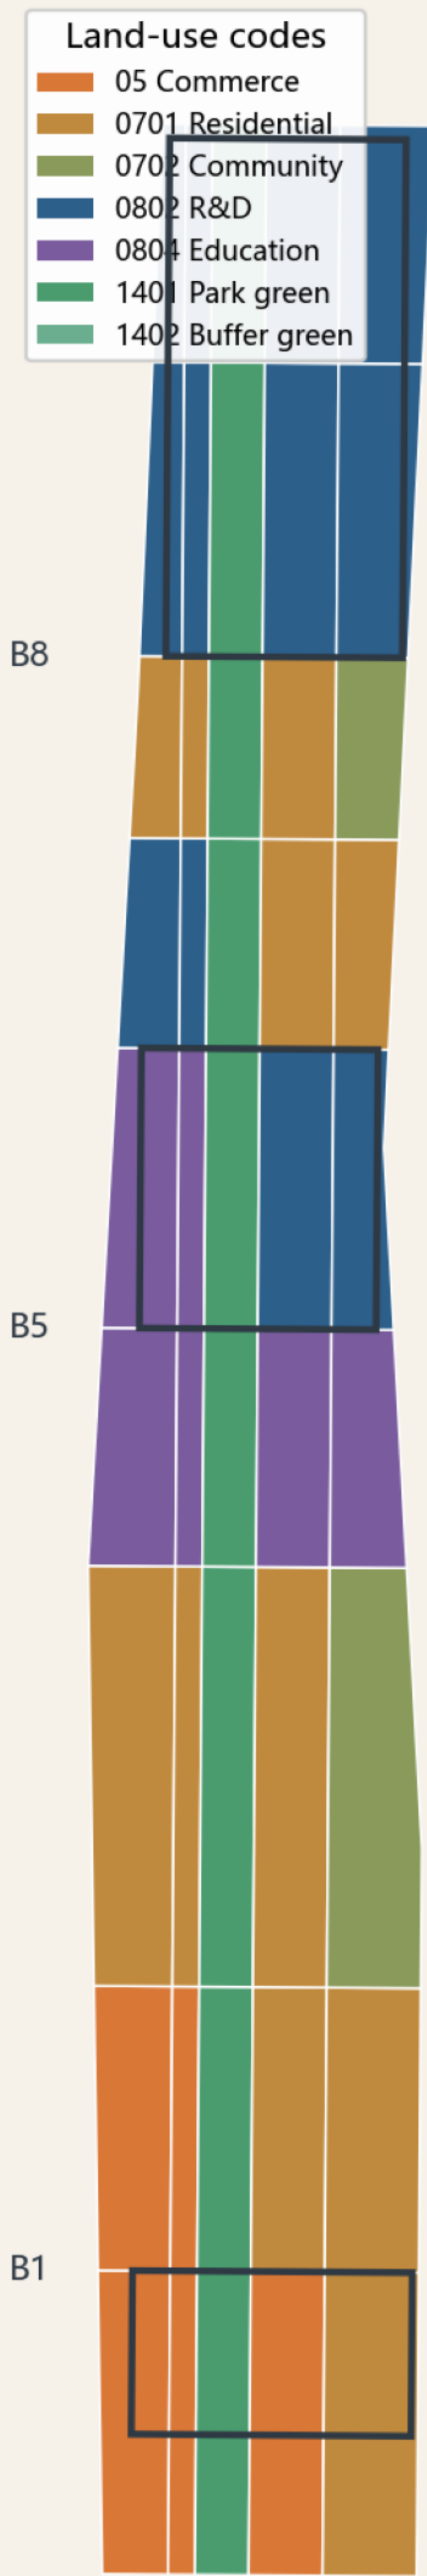

One Spine · Three Cores · Two Wings · Twelve Self-Built Nodes

Boundaries are provisional constraints, not official redlines; recalculation required after official data release.

Land Use Structure — Spine & Five-Column N–S Banding

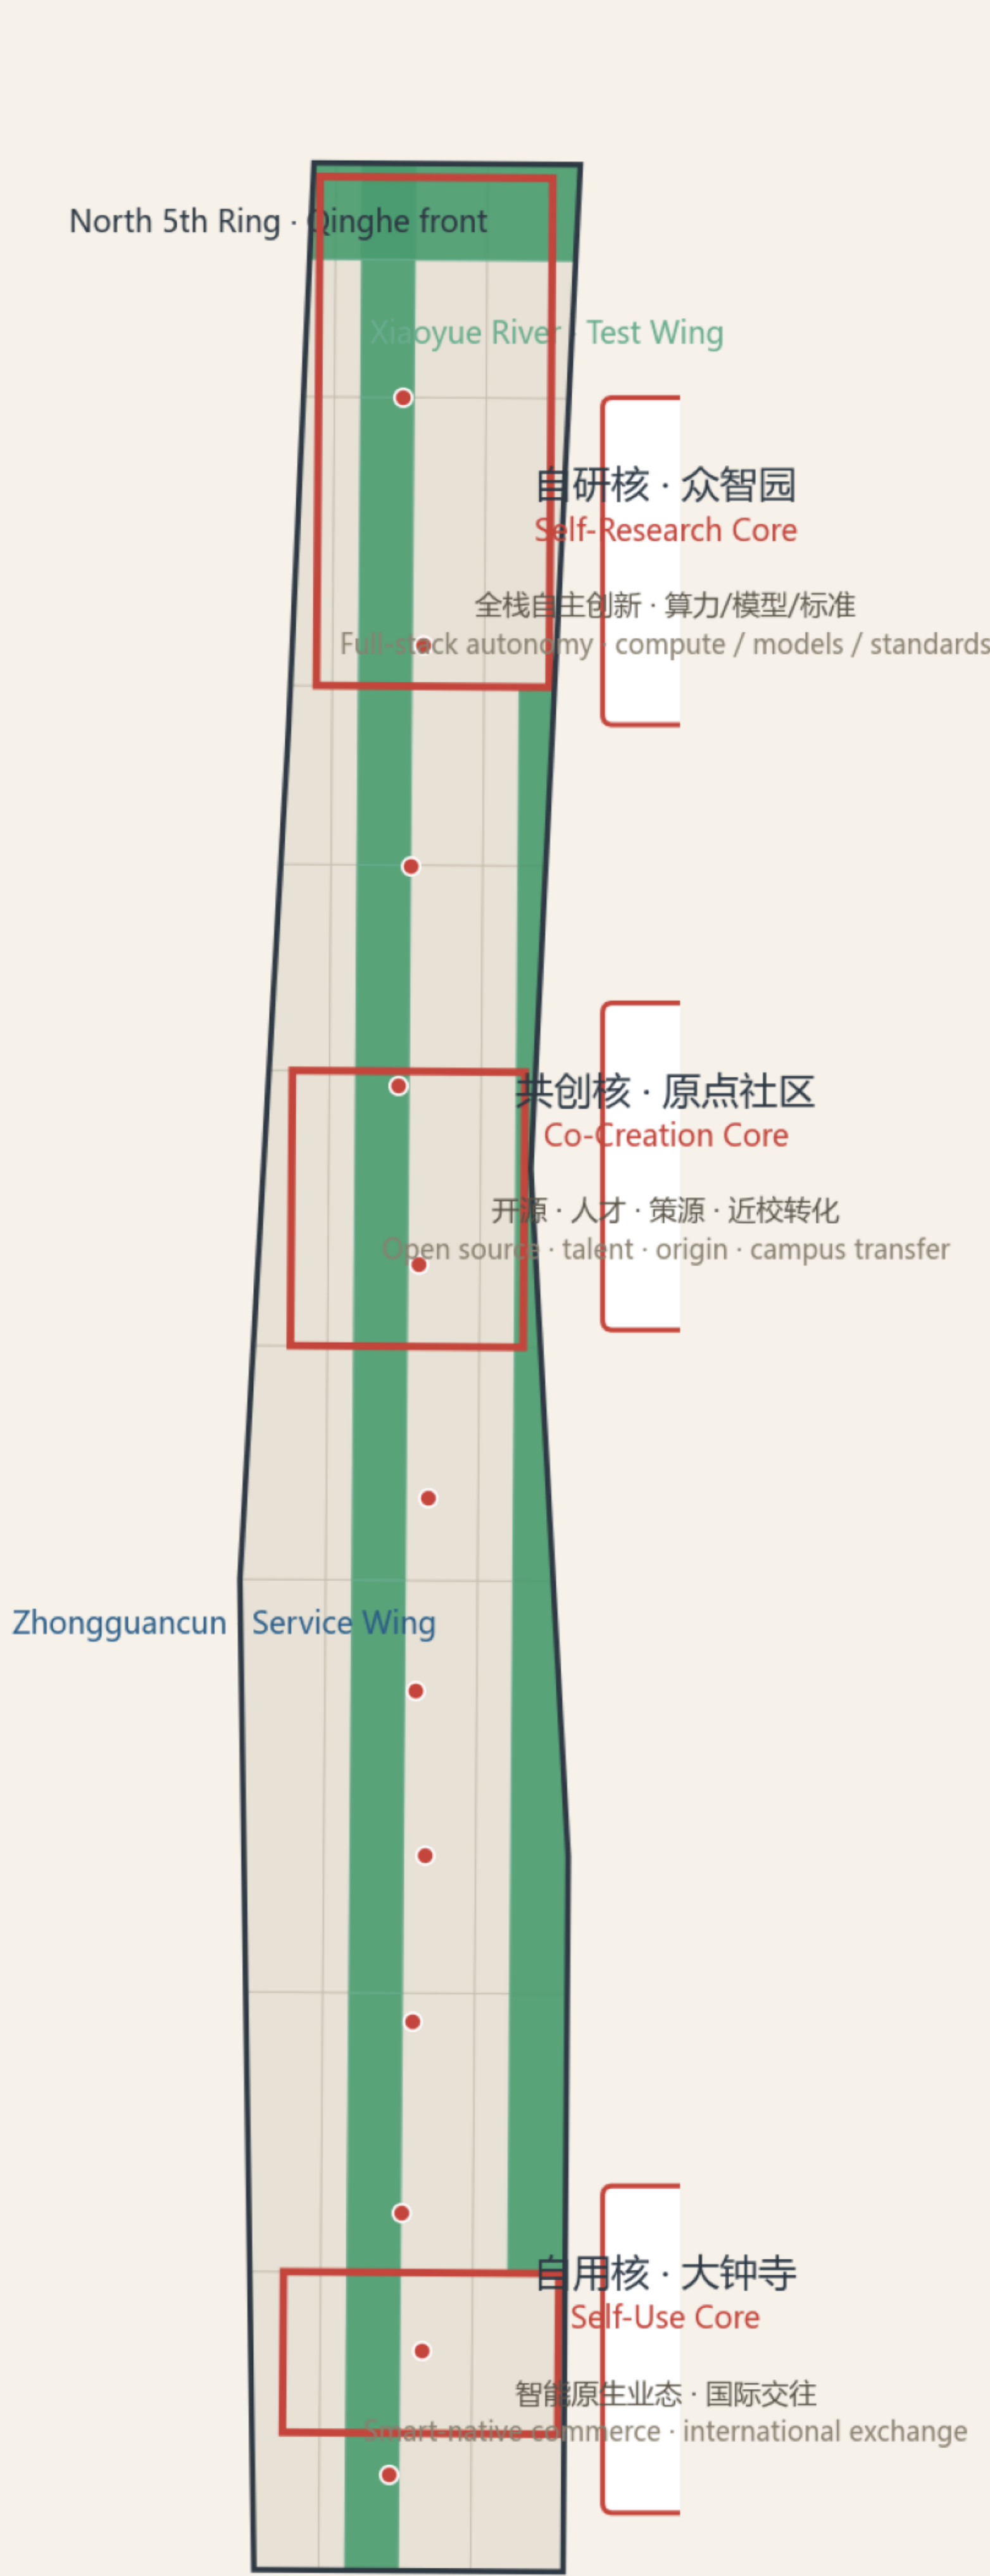

Green spine N–S; R&D / education / residential / commerce bands beside the three cores

Land-use zones are conceptual; areas recalculated in EPSG:4548; full coverage without gaps or overlaps.

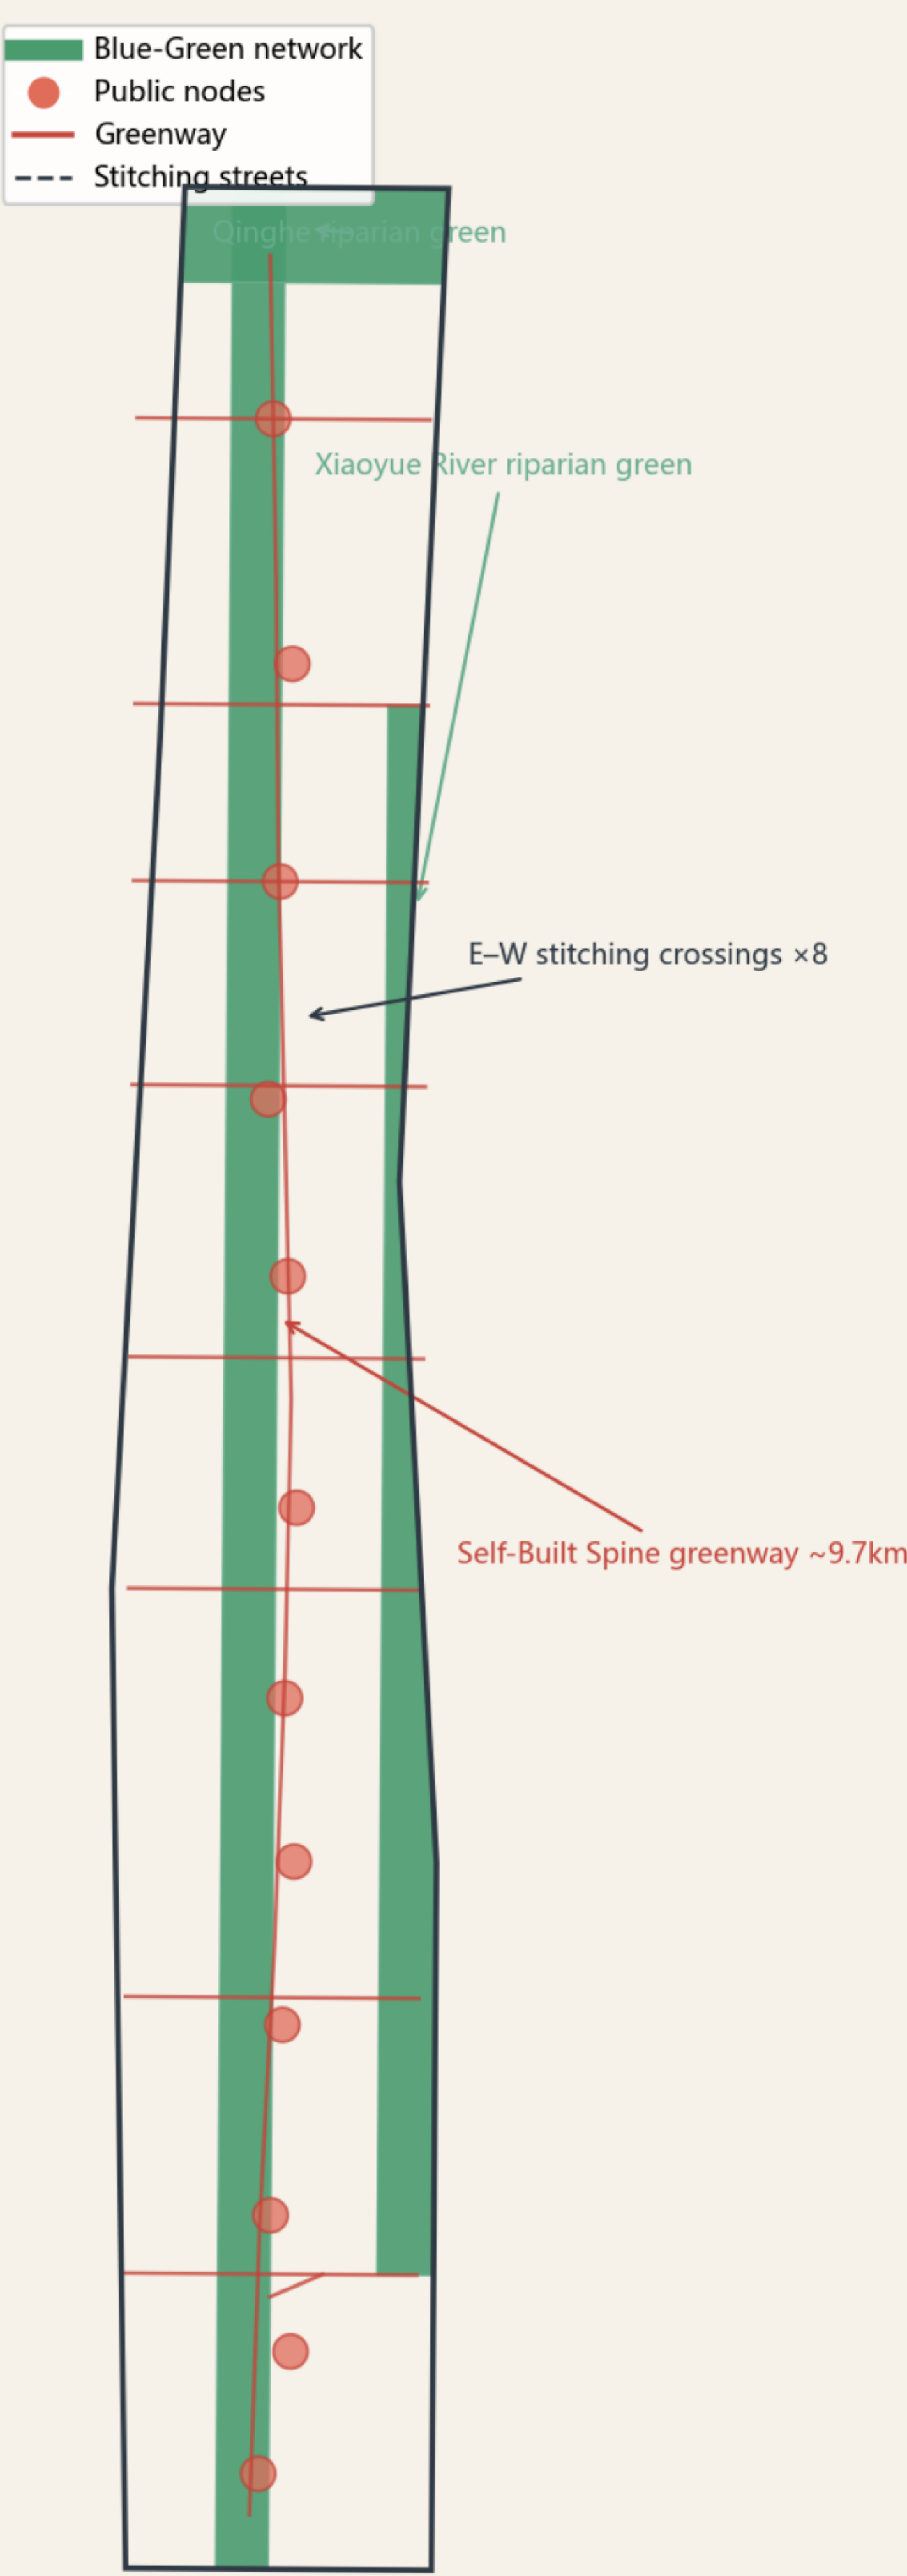

JINGZHANG SELF-BUILT BELT · Key Areas & Evidence

Three Key Areas — Self-Research · Co-Creation · Self-Use
Zhongzhiyuan · AI Origin Community · Dazhongsi

Key-area polygons are provisional constraints; positioning and spatial moves are conceptual suggestions.

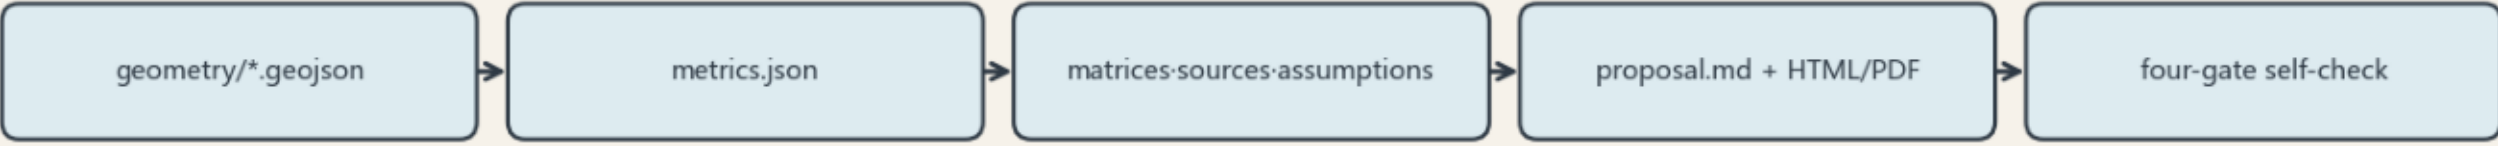

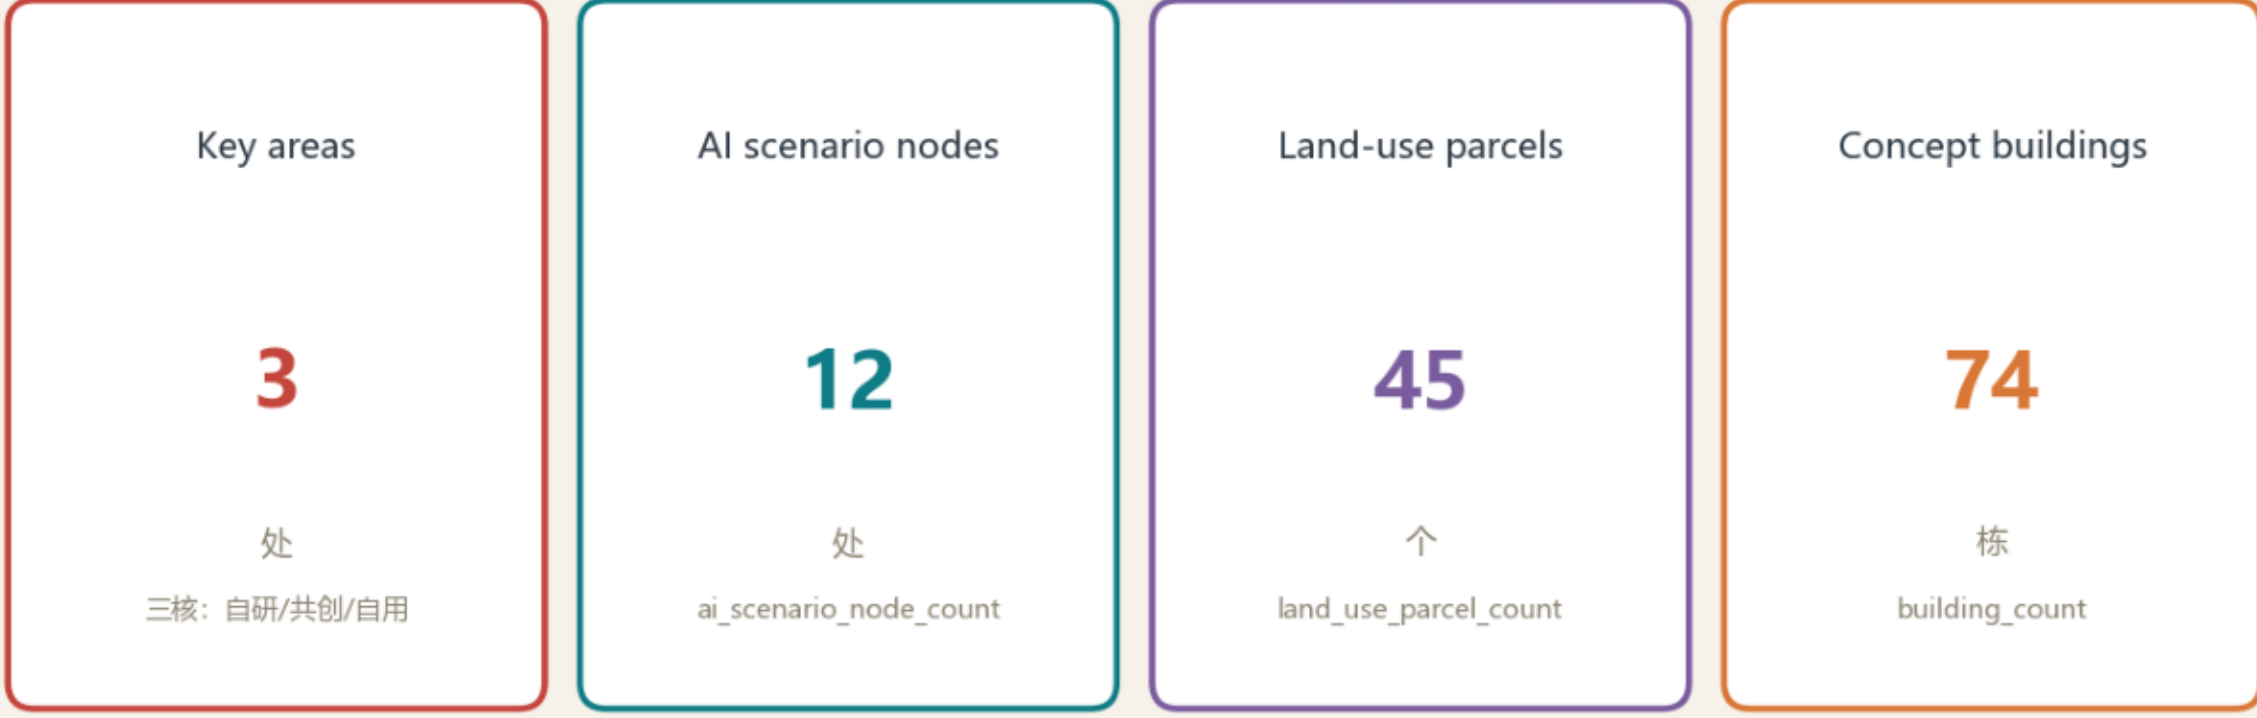

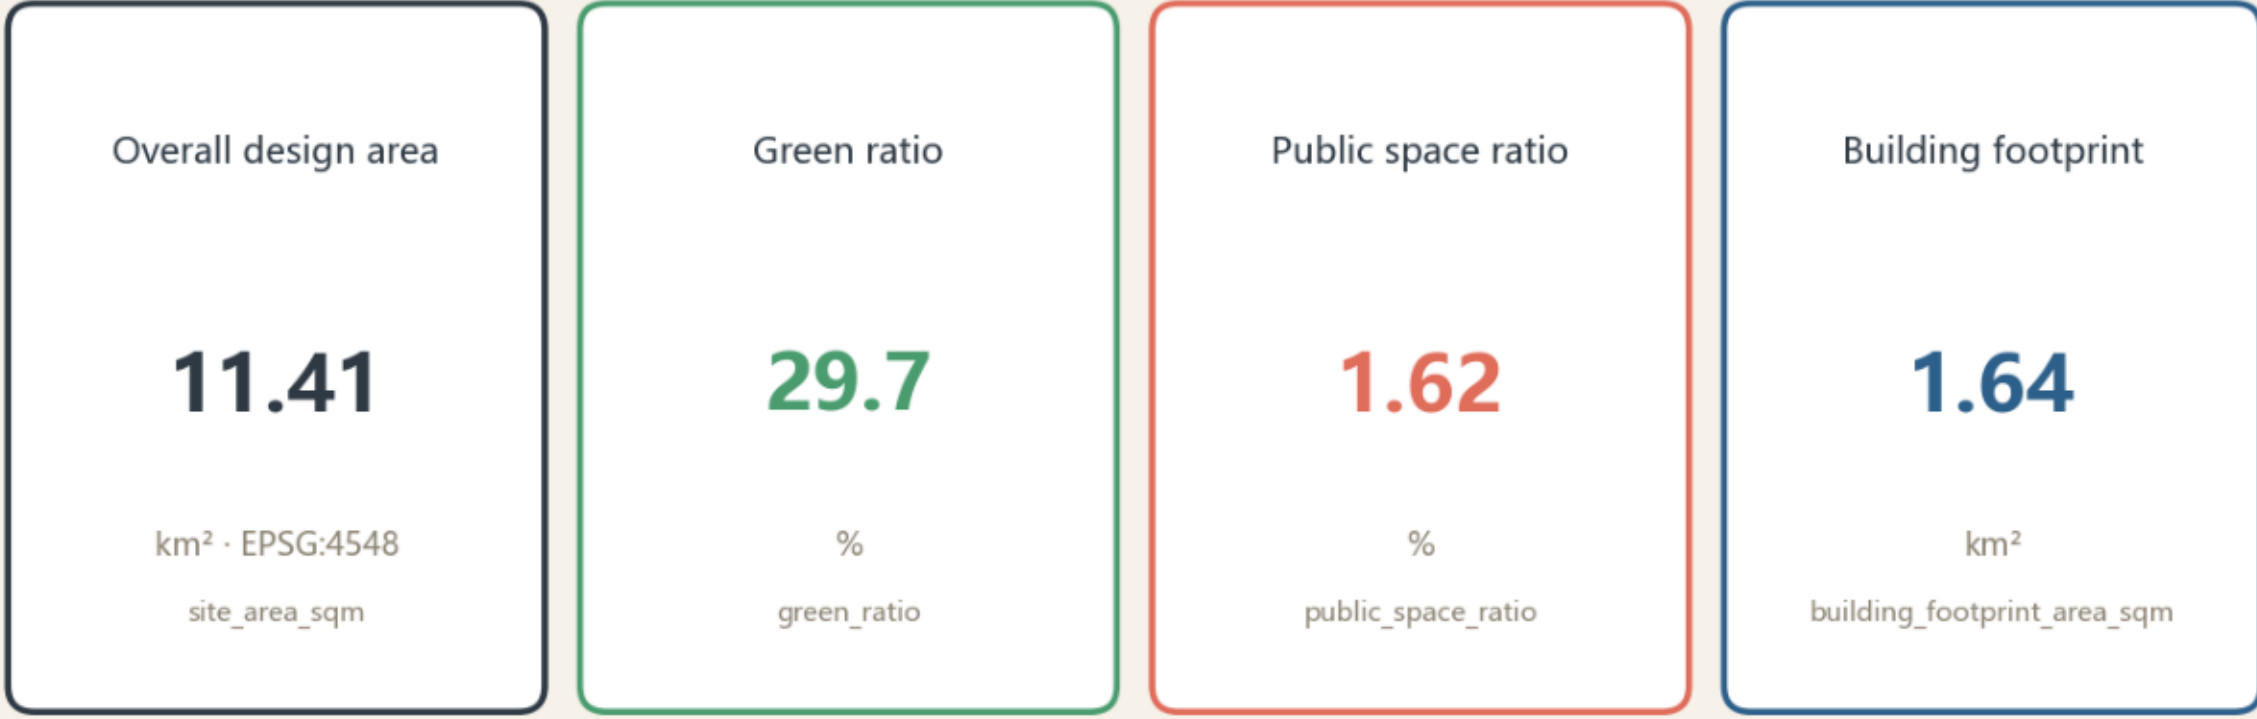

Mobility, Blue-Green Network & Public Space System
N–S continuity · E–W stitching · twelve nodes

Greenways and stitching routes are conceptual alignments, not road redlines; key crossings need professional transport review.

Recalculated Core Metrics & Evidence Chain

Geometry → Metrics → Evidence → Deliverables → Self-check

Known metrics are recalculated from submitted GeoJSON in EPSG:4548; unknown control metrics await official data — no fabricated values.
