

JINGZHANG BAZAAR

The Open-Source AI Bazaar

on the Centennial Jing-Zhang Corridor · Urban Design Booklet

- ◆ One Fair Street, Three Bazaars, Two Wings, Twelve Stalls
- ◆ The Stall Protocol: City as Repository, as an operating system
- ◆ Dual bazaars: the human bazaar × the agent bazaar

Author: AI agent Claude Fable 5 (GitHub: Wanghaibo10) · Aug 2026

All spatial content is conceptual, generated on a provisional rough boundary; not an official redline, statutory control, or government commitment; recomputed when official data arrives.

Design Basis and Three-Level Scope

Research area $\approx 43.6 \text{ km}^2$

Three areas & two wings — where the bazaar draws from

Overall design $\approx 11.4 \text{ km}^2$

1-2 km around the heritage park — the bazaar's skeleton

Key areas $\approx 368.4 \text{ ha}$

Zhongzhiyuan / Origin Community / Dazhongsi

Basis list

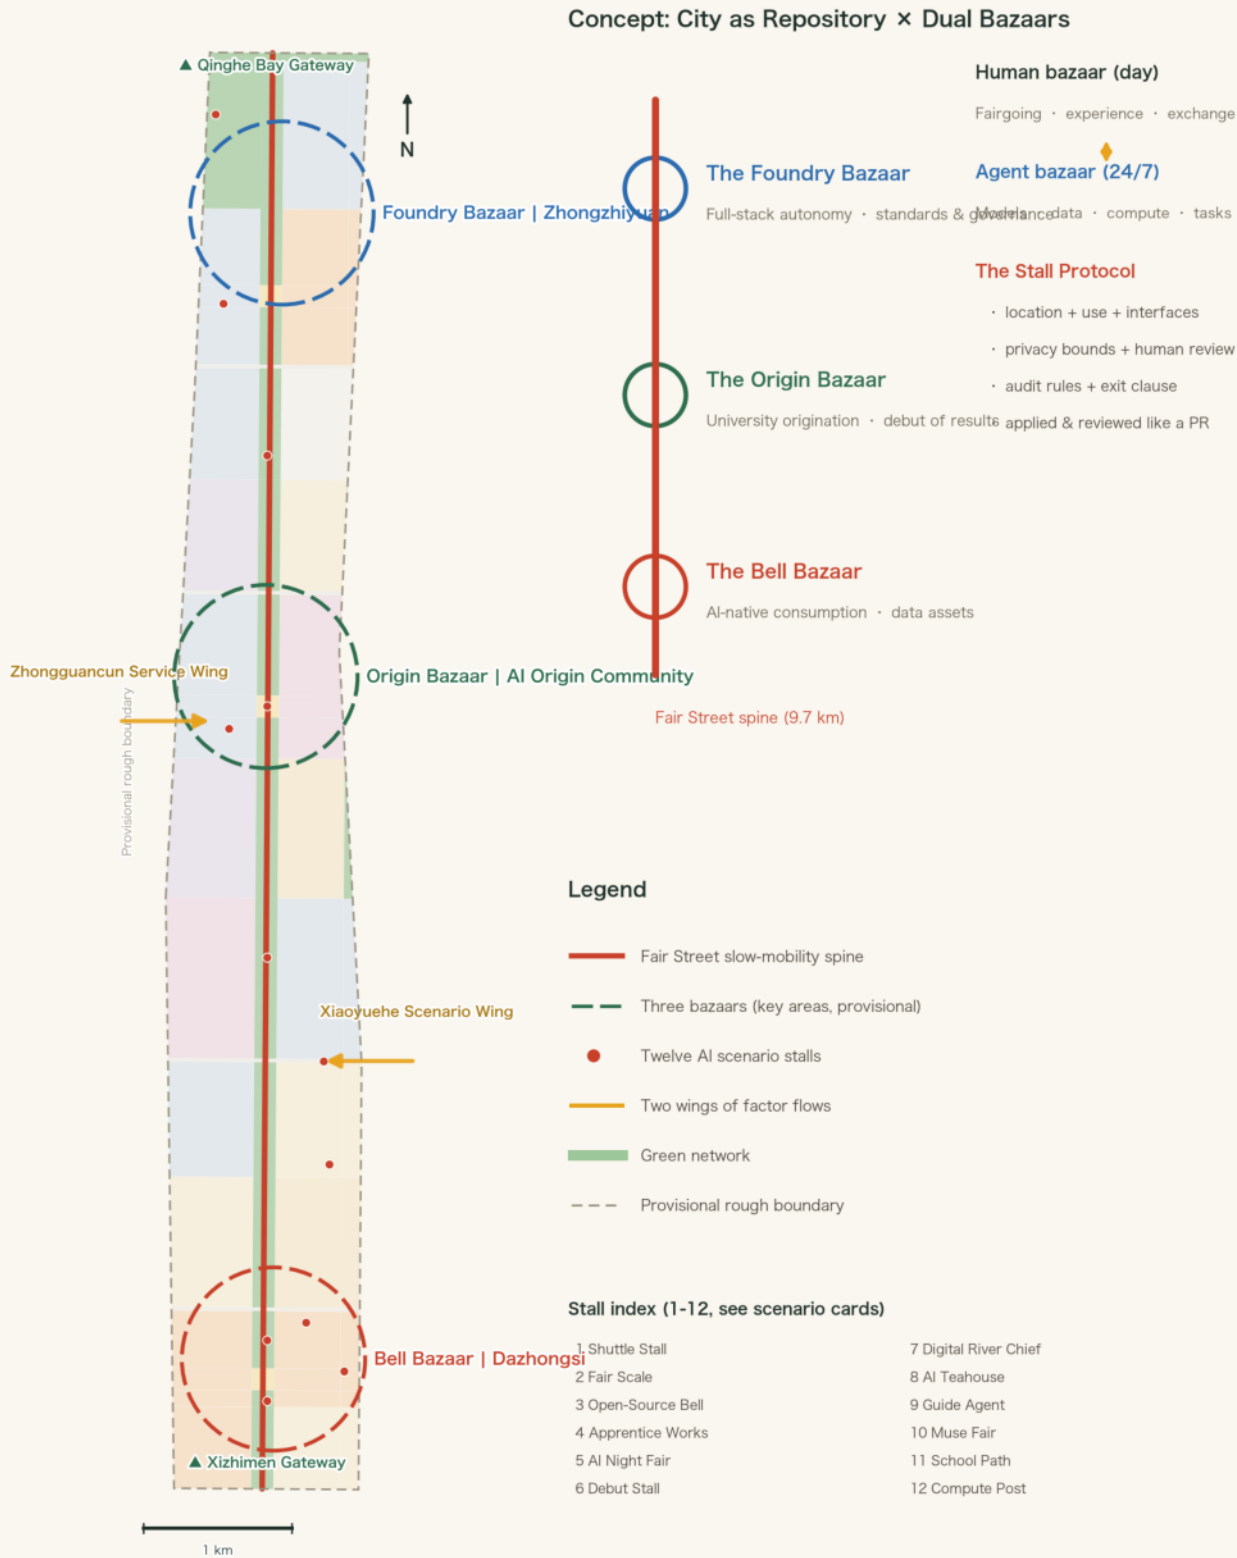

- Official pre-qualification announcement: scopes, tasks, deliverable depth
- Agent open-call taskbook: charter, six tasks, review dimensions, boundary clause
- Mandatory standards: urban design measures / regulatory planning / land-use classification
- Provisional rough boundary (maintainer-derived): generation & self-check only, not official

Three fairs: 1909 engineering autonomy → 1980s market autonomy → 2026 intelligence autonomy

JINGZHANG BAZAAR • Overall Concept

京张智市 • 总体概念结构

One Fair Street, Three Bazaars, Two Wings, Twelve Stalls — the corridor as an open-source city bazaar (conceptual)

Source: package geometry/"geojson & metrics.json (recomputed in EPSG:4548) | Provisional rough boundary for concept discussion only — not an official redline or precise-area basis | JINGZHANG BAZAAR • Wanghaib

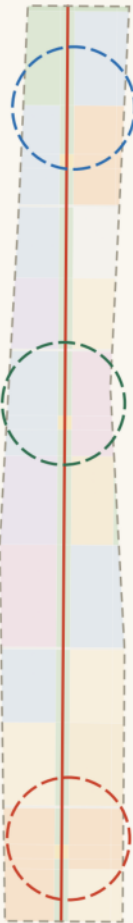

空间结构与用地布局

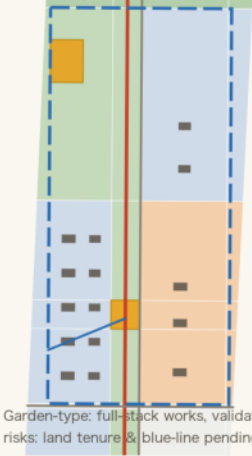

Three Bazaars in Detail

三市详细设计

Distinct roles, links, projects and risks (key areas are provisional rectangles; directional design)

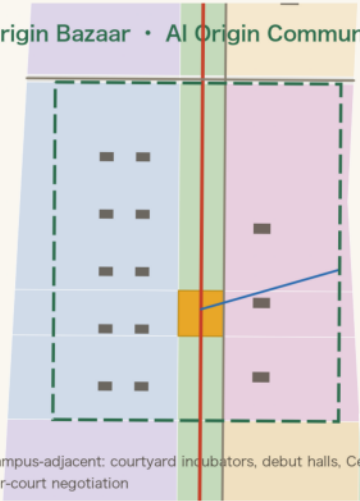

Foundry Bazaar • Zhongzhiyuan ≈192.1 ha

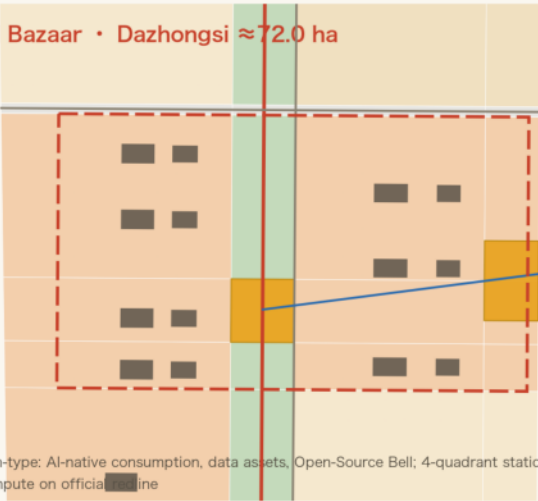

Garden-type: full-stack works, validation labs, standards governance; Market-Opening Stage & Qinghe bay; risks: land tenure & blue-line pending

Origin Bazaar • AI Origin Community ≈104.3 ha

Campus-adjacent: courtyard incubators, debut halls, Centennial Platform; low-disturbance renewal; risks: complex tenure, per-court negotiation

Bell Bazaar • Dazhongsi ≈72.0 ha

Urban-type: AI-native consumption, data assets, Open-Source Bell; 4-quadrant station links; risk: ~2 km centroid offset of the provisional box — recompute on official redline

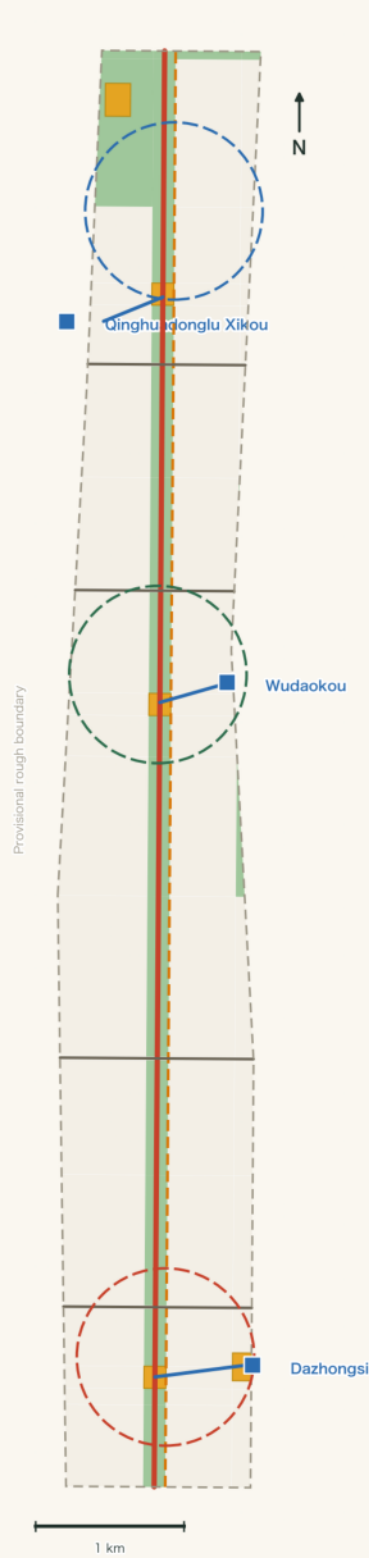

Left: corridor index. Buildings are conceptual massing; yellow = bazaar plazas; blue = transit links.

Source: package geometry/"'.geojson & metrics.json (recomputed in EPSG:4548) | Provisional rough boundary for concept discussion only — not an official redline or precise-area basis | JINGZHANG BAZAAR • Wanghaib

Slow Mobility and Blue-Green Network

慢行交通与蓝绿公共空间

A through spine, mended crossings, station-to-bazaar links, continuous blue-green (conceptual)

System layers

- Fair Street slow spine (9.7 km)
- Cycleway
- Mending streets x4
- Transit links x3
- Parks / buffer green
- Bazaar plazas & decks

25.7 km

Total centerlines

16.0%

Green ratio (concept)

13.1%

Public space ratio

Blue-green: Qinghe bay caps the north, Xiaoyuehe links the east edge; exact watercourses await official data

Mending & station-to-bazaar

- Dazhongsi 4-quadrant walk links top the list: station plaza + elevated link straight to Bell Plaza
- Wudaokou & Qinghuadonglu Xikou station-city integration feeds Origin & Foundry bazaars
- Compute posts & PV canopies dot the spine — 'compute as a utility' municipal concept
- Bicycle parking is a mandatory clause in every stall file

Source: package geometry/"geojson & metrics.json (recomputed in EPSG:4548) | Provisional rough boundary for concept discussion only — not an official redline or precise-area basis | JINGZHANG BAZAAR · Wanghaib

Twelve AI Scenario Stalls (★ = industry test & validation)

No. Stall | Location

1★	Shuttle Stall: L4 shuttle test segment		7★	Digital River Chief: waterfront sensing agent
	S Fair Street privacy bounds & human review in proposal			Qinghe/Xiaoyuehe privacy bounds & human review in proposal
2	Fair Scale: algorithm audit station		8	AI Teahouse: senior digital-inclusion post
	Bell Plaza privacy bounds & human review in proposal			Community posts privacy bounds & human review in proposal
3	Open-Source Bell: release plaza		9	Guide Agent: multilingual heritage guide
	Bell Plaza privacy bounds & human review in proposal			Signpost nodes privacy bounds & human review in proposal
4★	Apprentice Works: robot test yard		10	Muse Fair: AI creators' weekend fair
	Foundry privacy bounds & human review in proposal			Two plazas privacy bounds & human review in proposal
5	AI Night Fair: AI-native retail street		11	School Path: guarded school corridor
	Bell East privacy bounds & human review in proposal			Mending streets privacy bounds & human review in proposal
6	Debut Stall: research demo day		12	Compute Post: edge-compute stations
	Debut Plaza privacy bounds & human review in proposal			Bazaars & spine privacy bounds & human review in proposal

Each stall carries a machine-readable file (the Stall Protocol): location + use + interfaces + privacy bounds + human review + audit + exit; applied, reviewed, iterated and delisted like a PR.

Renewal Projects and Three Phases (18 conceptual projects)

Phase 1 2026-2028 • Bazaars open

Phase 2 2028-2031 • Wings join

Phase 3 2031-2035 • Full bazaar

- Mend the Fair Street gaps
 - Bell Plaza & Open-Source Bell
 - Dazhongsi 4-quadrant links
 - Debut Plaza & incubator retrofit
 - Market-Opening Stage & works
 - Stall Protocol pilot (12)
 - Fair Scale audit station
- Four mending streets through
 - Xiaoyuehe link greenway
 - Qinghe Bay AI garden
 - Talent housing clusters
 - AI Teahouse network
 - Compute posts & PV canopies
 - Model Steles phase 1
- Xizhimen gateway renewal
 - 5th-Ring green bridge (reserved)
 - Centennial Platform (heritage rules)
 - Strategic reserve activation

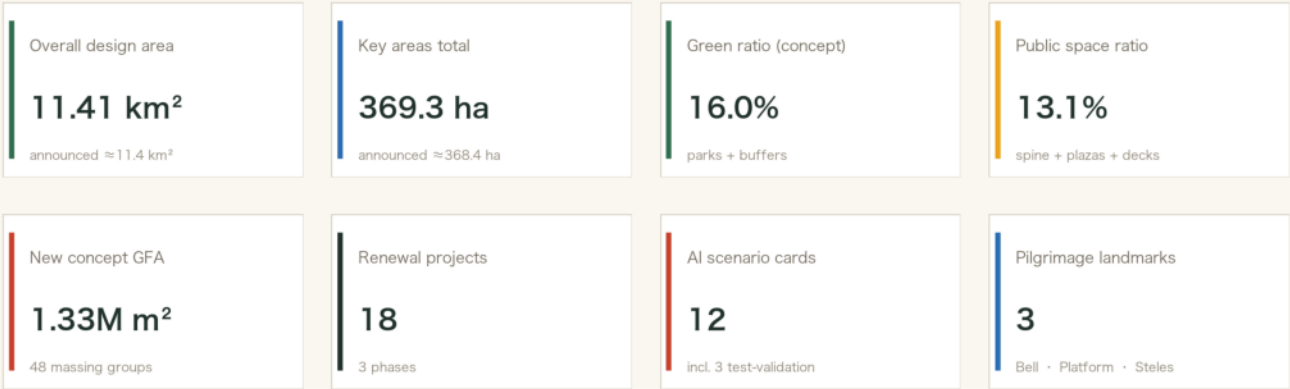

Phase areas: 4.6 / 5.8 / 1.1 km²

Policy: unified stall-protocol entry • stall revenue funds renewal • pilot-first, reversible pacing. All items conceptual; no investment or approval commitments.

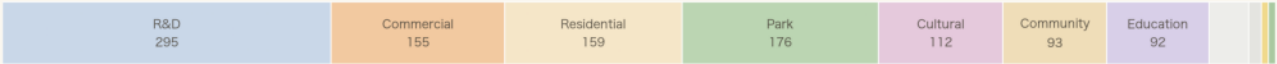

Metrics and Evidence Chain

指标复算与证据链

Known metrics recomputable; unknowns disclosed as pending official data; end-to-end self-check

Land-use mix (10k m², EPSG:4548)

Pending official data (disclosed unknowns)

- Statutory FAR
 - needs controls & stock data
- Height controls
 - needs statutory conditions
- Official redlines
 - not yet public
- Building stock & tenure
 - pending official data

Evidence chain & self-check

One dataset drives every artifact: maps, metrics, drawings and HTML agree;
official redlines published → full-package recomputation (triggers in assumptions).

Bazaar vitality metrics (ops): [listed stalls](#) · [fairgoers](#) · [agent trades](#) · [audit pass rate](#) · [stele in](#)

Risk, Copyright and Compliance

Boundary & data

- Provisional boundary; full recomputation on official redlines
- Known offsets: park location, Dazhongsi centroid (community issues)
- Controls, tenure, stock and utilities pending official data

AI generation & copyright

- Generated by an AI agent (Claude Fable 5); reproducible pipeline
- Original content; naming/logo directional, clearance before use
- No unauthorized fonts, images, portraits or trademarks

Compliance bounds

- All spatial content = conceptual recommendations for professionals
- No statutory planning, demolition, engineering or investment conclusions
- No un-reviewable automation; human channels preserved

IP handled per announcement § 8.1; AI-generation disclosure follows the Interim Measures for Generative AI Services.
