

ONE SPINE · THREE STATIONS · FOUR GATES

G0 **Research evidence**
owner / expiry / residual / exit

G1 **Controlled test**
owner / expiry / residual / exit

G2 **Public trial**
owner / expiry / residual / exit

G3 **Accountable operation**
owner / expiry / residual / exit

ARC LENGTH = EVIDENCE STAGE (90 / 180 / 270 / 360 deg)

PROVISIONAL: official_boundary=false; not a redline, station anchor or approval

4 GATES

Align research, space, publics and responsibility. Urban AI innovation is the legible path through explanation, test, takeover and exit.

G0 RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible · bounded · stoppable

G2 PUBLIC TRIAL

opt-in · exit · human alternative

G3 ACCOUNTABLE OPERATION

residuals published · demotion allowed

The overall and key areas use central provisional geometry. It supports content review and recalculation, not statutory redlines, station anchoring or engineering position. The PROV-KEY-003 anchor remains unresolved.

G0 RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible · bounded · stoppable

G2 PUBLIC TRIAL

opt-in · exit · human alternative

G3 ACCOUNTABLE OPERATION

residuals published · demotion allowed

AN ECOSYSTEM IS NOT A COMPANY LIST

7 CASES

Seven official-source cases point to spatial mix, credible tests, shared service, community participation and long operation. Jing-Zhang turns them into a Prototype–Translation–Adoption chain.

01 MIT Kendall Square: anchor institution, mixed use and public realm

02 Singapore one-north: estate testbed and car-lite green links

03 Paris STATION F: rail freight heritage and shared startup services

04 Universite Paris-Saclay: multi-institution research and innovation ecosystem

05 Knowledge Quarter London: curated proximity across culture, research and community

06 Toronto MaRS: research translation, venture support and technology adoption

07 Helsinki Maria 01: reversible pilots and community-led adaptive reuse

GO RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible • bounded • stoppable

G2 PUBLIC TRIAL

opt-in • exit • human alternative

G3 ACCOUNTABLE OPERATION

residuals published • demotion allowed

THREE PHASE-TRANSFER STATIONS

Zhongzhiyuan carries prototypes and safety; AI Origin translates for publics; Dazhongsi handles adoption, takeover and retirement. These are programme checklists, not parcel commitments.

G0 RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible • bounded • stoppable

G2 PUBLIC TRIAL

opt-in • exit • human alternative

G3 ACCOUNTABLE OPERATION

residuals published • demotion allowed

TWELVE SCENARIO CARDS

12 / 3

Three industry tests are followed by access, comfort, maintenance, legal, health, language, culture, learning and public return. Each names human responsibility, exit and a non-AI alternative.

- 01

- 12

Public Return Ledger

ACCESS, BLUE-GREEN, TAKEOVER

01 Continuous surface

manual audit first

02 Wheelchair + crossing

navigation cannot replace repair

03 Shade + rest

usable offline

04 Human service

every model can be taken over

Vermilion = human override and stop points, never decoration

Repair continuous surfaces, crossings, shade and rest before intelligent navigation. Public space remains usable in rain, power loss and network loss.

G0 RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible • bounded • stoppable

G2 PUBLIC TRIAL

opt-in • exit • human alternative

G3 ACCOUNTABLE OPERATION

residuals published • demotion allowed

PHASE BY EVIDENCE MATURITY

10 PROJECTS

Phase 0 builds baselines; Phase 1 tests reversibly; Phase 2 renews after professional confirmation; Phase 3 operates accountably. Ten projects name dependencies and fallback.

-
- | | | | |
|----|--|----|--|
| 01 | P01 Official boundary and baseline package | 02 | P02 Four-Gate Evidence Card standard |
| 03 | P03 Phase Spine access audit | 04 | P04 Phase Zero Hall light prototype |
| 05 | P05 Open Aperture Garden trial | 06 | P06 Three industry tests |
| 07 | P07 Public service trial group | 08 | P08 Last-Mile Console |
| 09 | P09 Centennial Phase Markers | 10 | P10 Formal regulatory and implementation development |

THREE-LEVEL RESIDUAL READING

G0 RESEARCH EVIDENCE

owner / expiry / residual / exit

G1 CONTROLLED TEST

reversible • bounded • stoppable

G2 PUBLIC TRIAL

opt-in • exit • human alternative

G3 ACCOUNTABLE OPERATION

residuals published • demotion allowed

PACKAGE COMPLETE IS NOT PROFESSIONAL ELIGIBILITY

FAIL CLOSED

ready_for_review covers the package, bilingual outputs and machine gates; content review may proceed. Official SITE_BOUNDARY / KEY_AREA-dependent professional scoring remains blocked. Merge is not award, implementation or endorsement.

-
- | | | | |
|----|---|----|--|
| 01 | Package structure, bilingual outputs and machine gates complete | 02 | Content review may proceed |
| 03 | official_boundary=false; all spatial values await official-geometry recalculation | 04 | PROV-KEY-003 Dazhongsi anchor unresolved |
| 05 | Statutory FAR, height, density and redlines remain unknown | 06 | Utility, compute, fire and heat-rejection capacity unknown |
| 07 | Existing buildings and retain-renovate-demolish decisions open | 08 | Official-geometry-dependent professional scoring stays blocked |
| 09 | A merge is not an award, an implementation or an endorsement | 10 | Everything is re-anchored and recalculated once official polygons arrive |
