

ONE AXIS · THREE CORES · TWO LOOPS

JZ-AI ORIGIN BELT

Conceptual Urban Design for the Centennial Jing-Zhang
AI Innovation Belt

The Jing-Zhang railway heritage becomes a civic intelligence axis linking
research, community and commerce - turning AI capability into visible,
participatory and enduring public life.

FORMAL-REVIEW-READY

AI-generated conceptual scene. It communicates atmosphere and use vision only; it is not evidence of existing conditions,
boundaries or engineering feasibility.

SPATIAL FRAMEWORK

FROM HISTORIC RAIL TO INTELLIGENT URBAN LIFE

The Jing-Zhang railway heritage becomes a civic intelligence axis linking research, community and commerce - turning AI capability into visible, participatory and enduring public life.

- 01

ZHONGZHIYUAN · FULL-STACK VALLEY

HERITAGE REUSE × R&D COLLABORATION × PUBLIC GREEN VALLEY
- 02

AI ORIGIN COMMUNITY · OPEN-SOURCE NEIGHBORHOOD

OPEN SOURCE × COMMUNITY SERVICES × YOUTH CO-CREATION
- 03

DAZHONGSI · INTELLIGENT COMMERCE HUB

TRANSIT GATEWAY × INTELLIGENT COMMERCE × CIVIC LIVING ROOM

1,141 ha

concept design area

25.3%

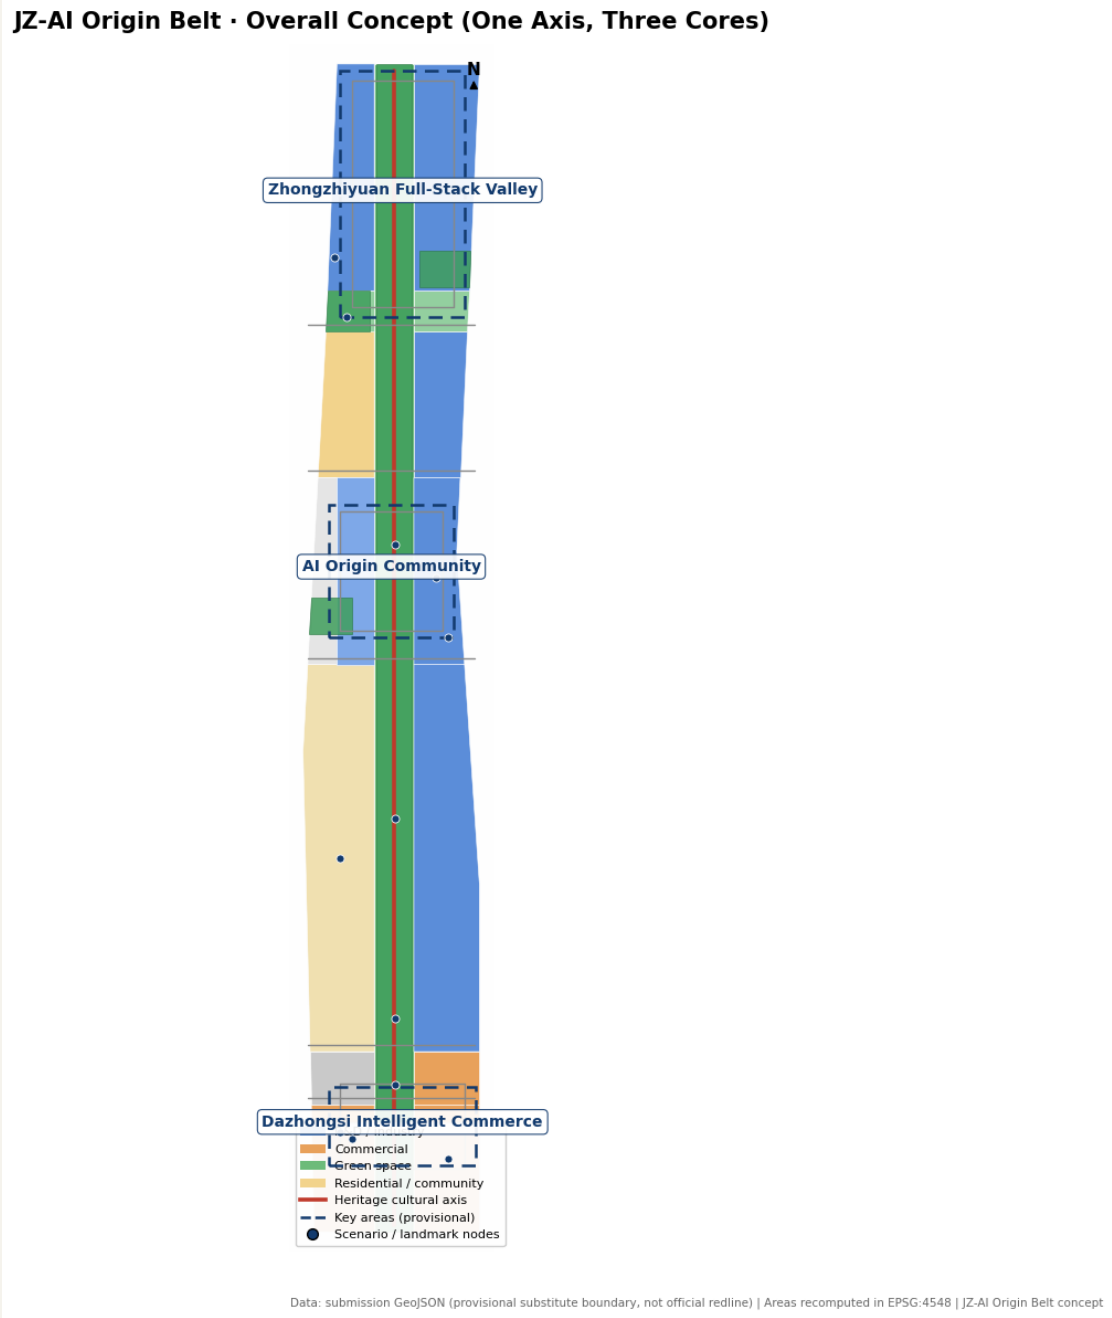

green-space ratio

28.1 km

concept slow-mobility network

13

scenario + landmark nodes

FROM VISION TO VERIFIABLE EVIDENCE

Land-Use Structure (16 seamless zones)

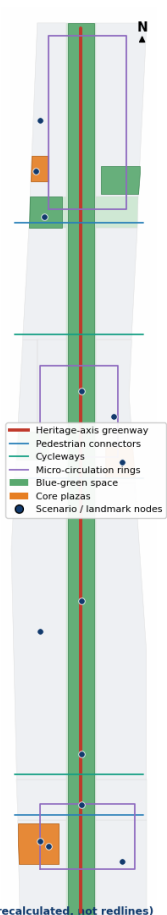

Recomputed areas (provisional boundary)

Data: submission GeoJSON (provisional substitute boundary, not official redline) | Areas recomputed in EPSG:4548 | JZAI Origin Belt concept

Slow Mobility × Blue-Green Public Space System

Conceptual slow network = 28.1 km (recalculated, not redlines)

Data: submission GeoJSON (provisional substitute boundary, not official redline) | Areas recomputed in EPSG:4548 | JZAI Origin Belt concept

Core Metric Recalculation & Evidence Chain (EPSG:4548)

11,412,825 m²

Site area (provisional)

Evidence: geometry/site_boundary.geojson

1,383,040 m²

Building footprints (concept)

Evidence: geometry/buildings.geojson

25.3%

Green ratio (recalc.)

Evidence: geometry/green_space.geojson

2.8%

Public-space ratio (recalc.)

Evidence: geometry/public_space.geojson

28.1 km

Conceptual slow network

Evidence: geometry/roads.geojson

13

Scenario & landmark nodes

Evidence: geometry/public_space.geojson

Pipeline: GeoJSON layers → EPSG:4548 projection → area/length aggregation → metrics.json (status/formula/confidence fully registered)

Data: submission GeoJSON (provisional substitute boundary, not official redline) | Areas recomputed in EPSG:4548 | JZAI Origin Belt concept

Deterministic · Spatial · Visual · Professional evidence: ALL PASS

Key areas and site boundary use organizer-registered provisional geometry; recalculate after official polygons are released.
