

Jing-Zhang Transfer Commons: One Public Validation Chain

Transport, technology transfer, public understanding, and responsibility handoff share reversible, auditable, human-owned gates.

PROVISIONAL WORKING MAP / 临时工作图

01

TRANSPORT

Accessible end-to-end trips without requiring a phone

02

TECH TRANSFER

Research and prototypes enter compliant trials

03

PUBLIC MEANING

Plain-language capability, limits, and exit

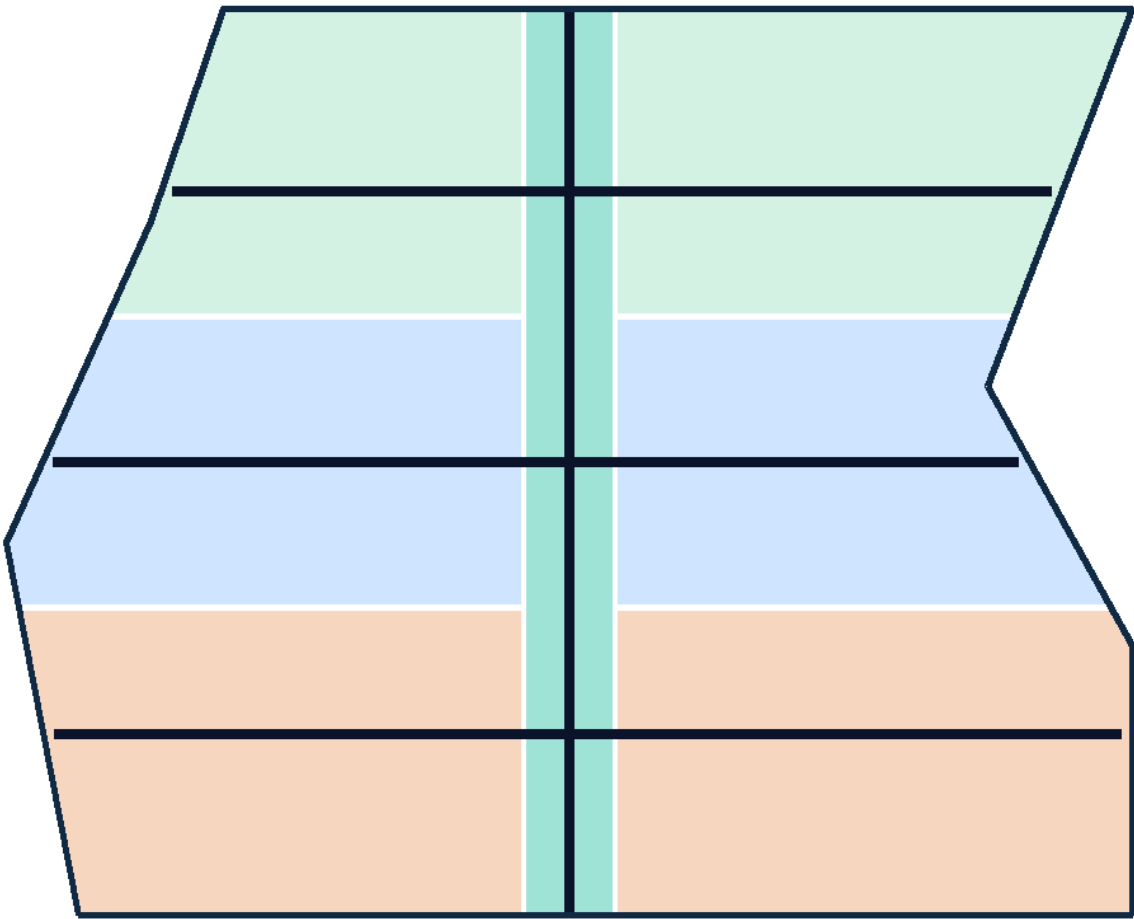

04

RESPONSIBILITY

Named review, appeal, and shutdown

Three Scales and Land-Use Structure

A public-validation green spine connects community service, outcome transfer, and R&D validation; all ratios remain draft variables.

43.6 km²
COORDINATED NETWORK

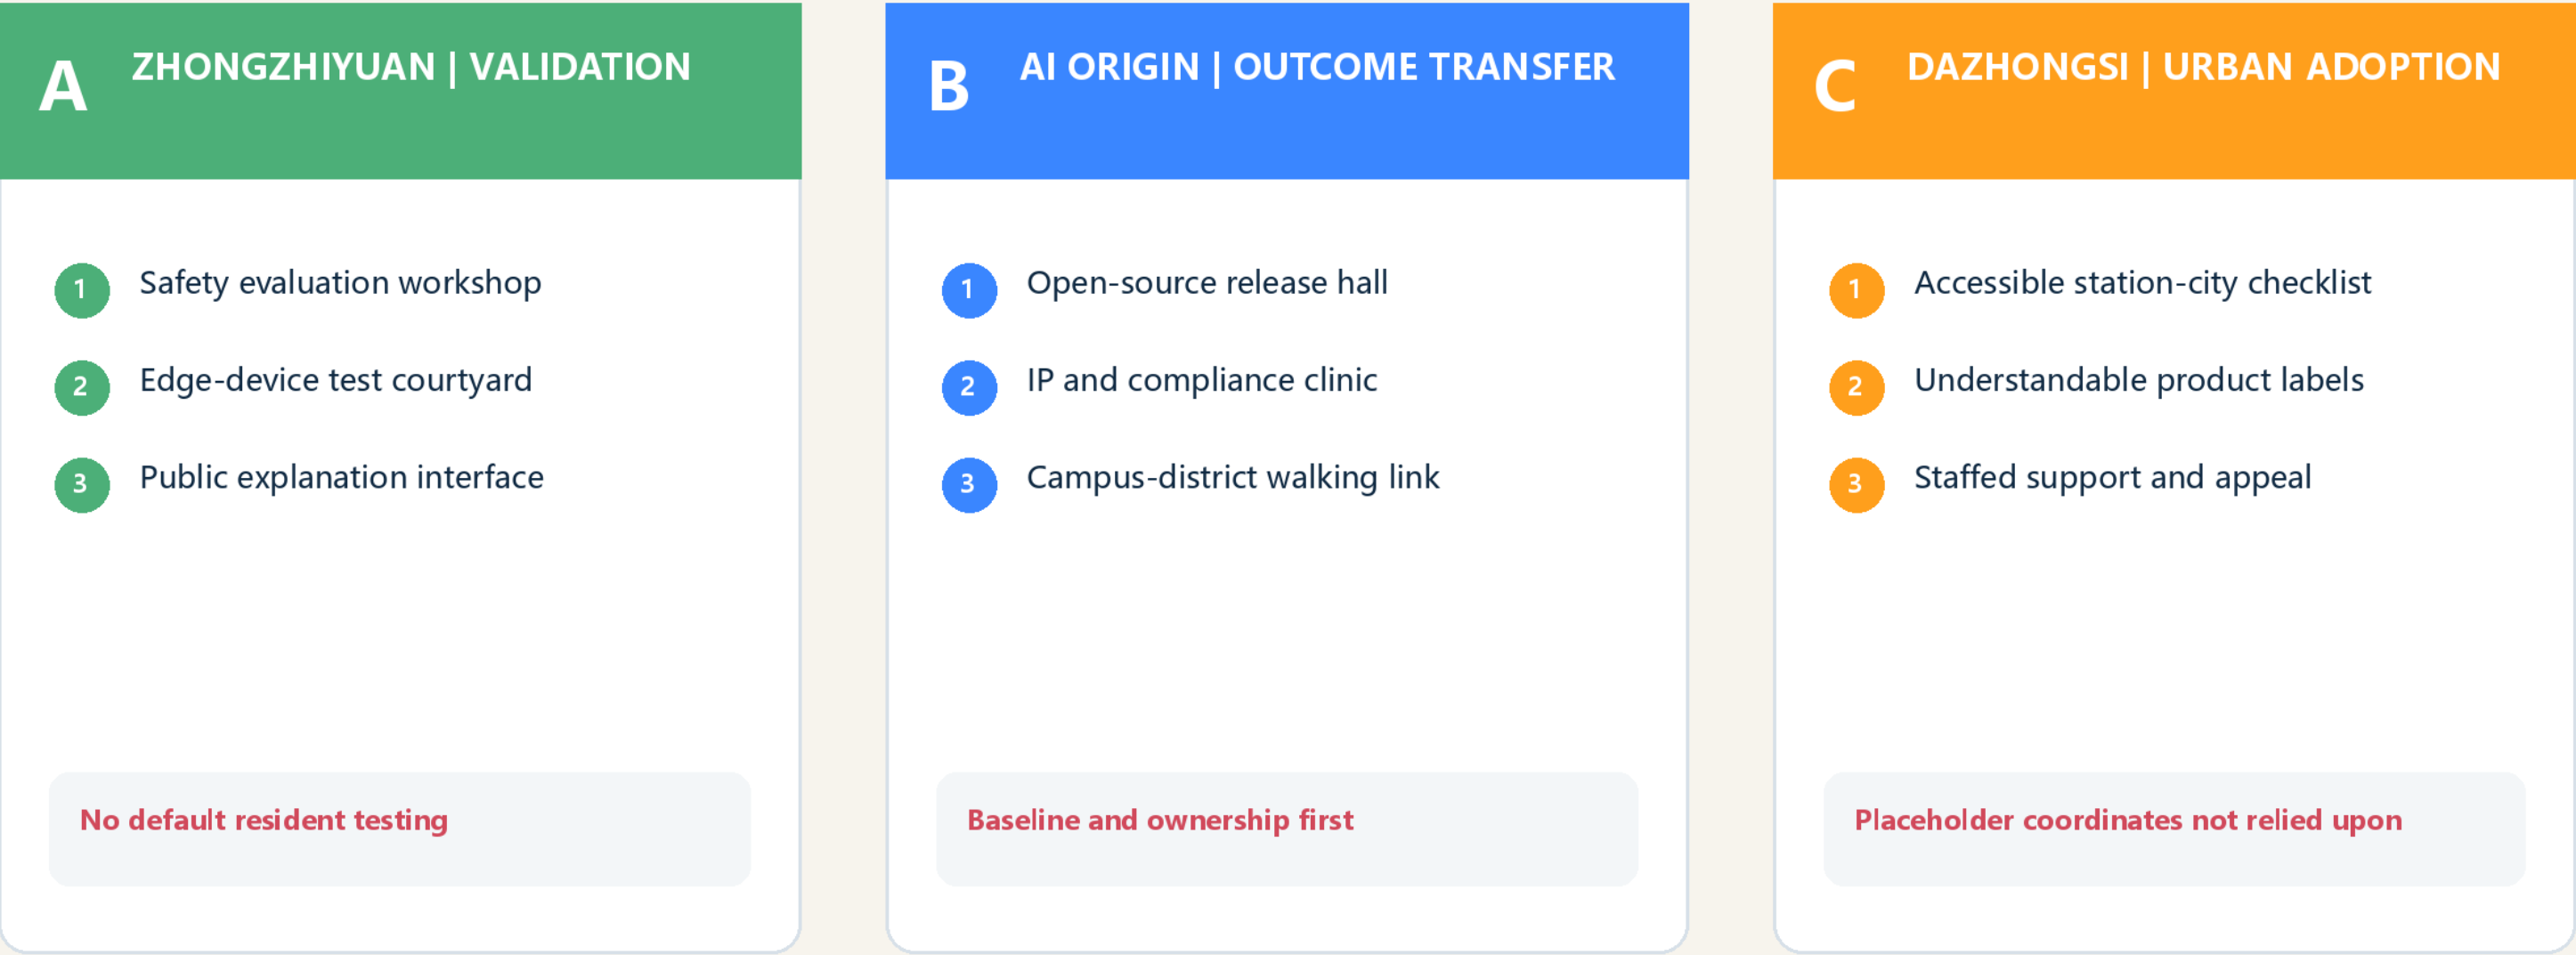

11.4 km²
OVERALL DESIGN

368.4 ha
THREE WORKSTREAMS

- Community services
- Outcome transfer
- AI R&D and validation
- Public validation green spine

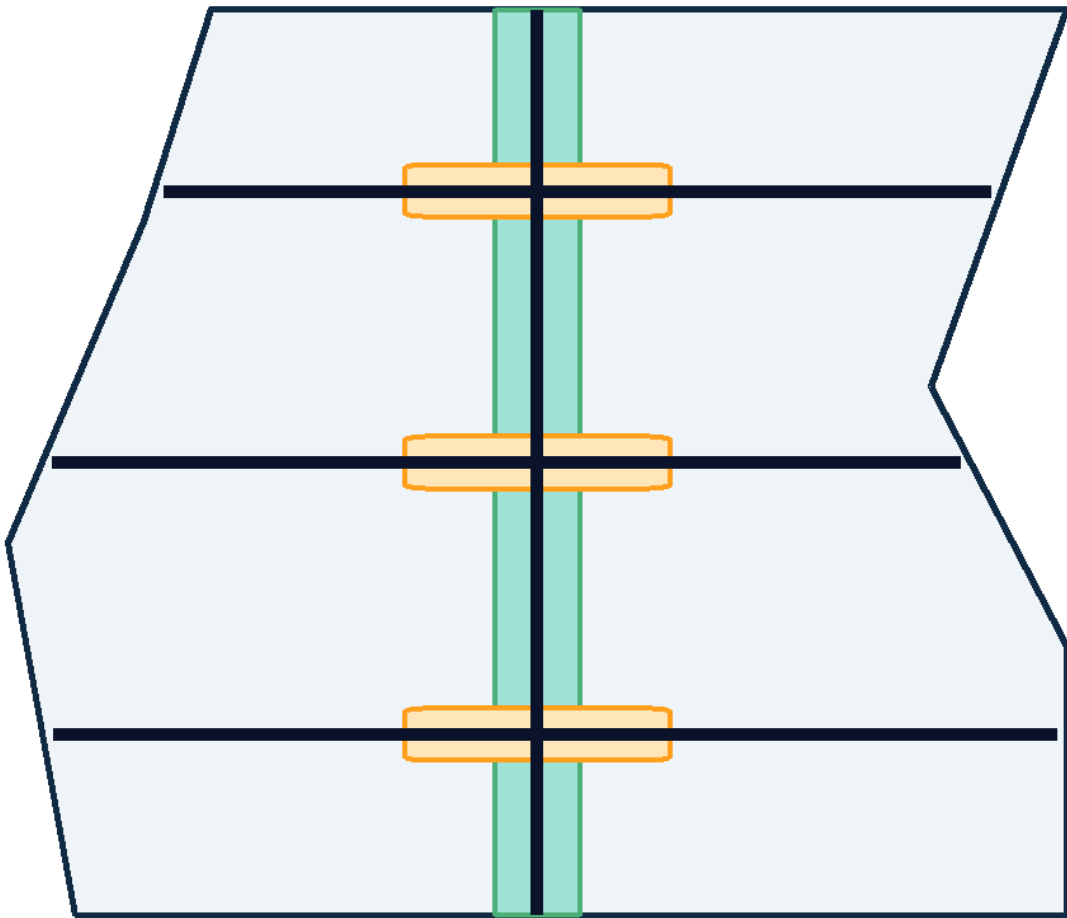

Three Key Areas: Validate, Transfer, Adopt

The districts are not interchangeable campuses; each carries a different stage of responsibility.

Mobility, Blue-Green Public Space, and AI Scenarios

Repair complete walking and interchange journeys first; add AI only as an optional, understandable, stoppable layer.

- | | |
|--------------------------------|----------------------------------|
| S01 Walking-gap diagnosis | S06 Edge-device test court |
| S02 Accessible trip rehearsal | S07 Public-space maintenance |
| S03 Open-source release | S08 Community AI clinic |
| S04 Enterprise-service copilot | S09 Understandable product label |
| S05 Safety-governance sandbox | S10 Event-safety review |

BEFORE: DISCLOSE | DURING: HUMAN OWNER | AFTER: PUBLISH FAILURES AND EXIT

Core Metrics, Evidence Chain, and Five Gates

Success is accessible space, minimal data, clear responsibility, correctable errors, and reviewable outcomes.

FIVE GATES

- 1 SPACE: official boundary and professional constraints
- 2 PUBLIC VALUE: accessible, non-AI, basic service
- 3 DATA: minimum, duration, deletion
- 4 RESPONSIBILITY: named owner, appeal, shutdown
- 5 OUTCOME: continuity, correction, public understanding

EVIDENCE CHAIN

- 公开依据 / Public source
- 显式假设 / Explicit assumption
- GeoJSON设计层 / Design layer
- 指标复算 / Recomputed metric
- 人工与专业复核 / Human review
