

JINGZHANG HUMAN CONNECTION TESTBED

SOCIAL-OUTCOME ASSURANCE FOR COMPANION AI

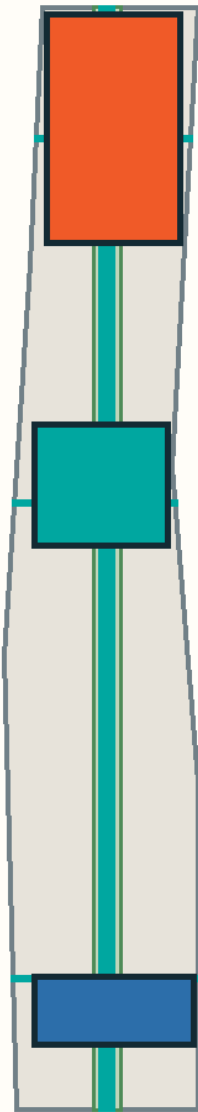

TEST HUMAN CONNECTION, NOT ENGAGEMENT.

11.41 km² | 12 scenarios | 5 industry tests | 8 persona checks

JINGZHANG HUMAN CONNECTION TESTBED | OVERVIEW

Before companion AI enters public life, prove that it does not replace human relationships.

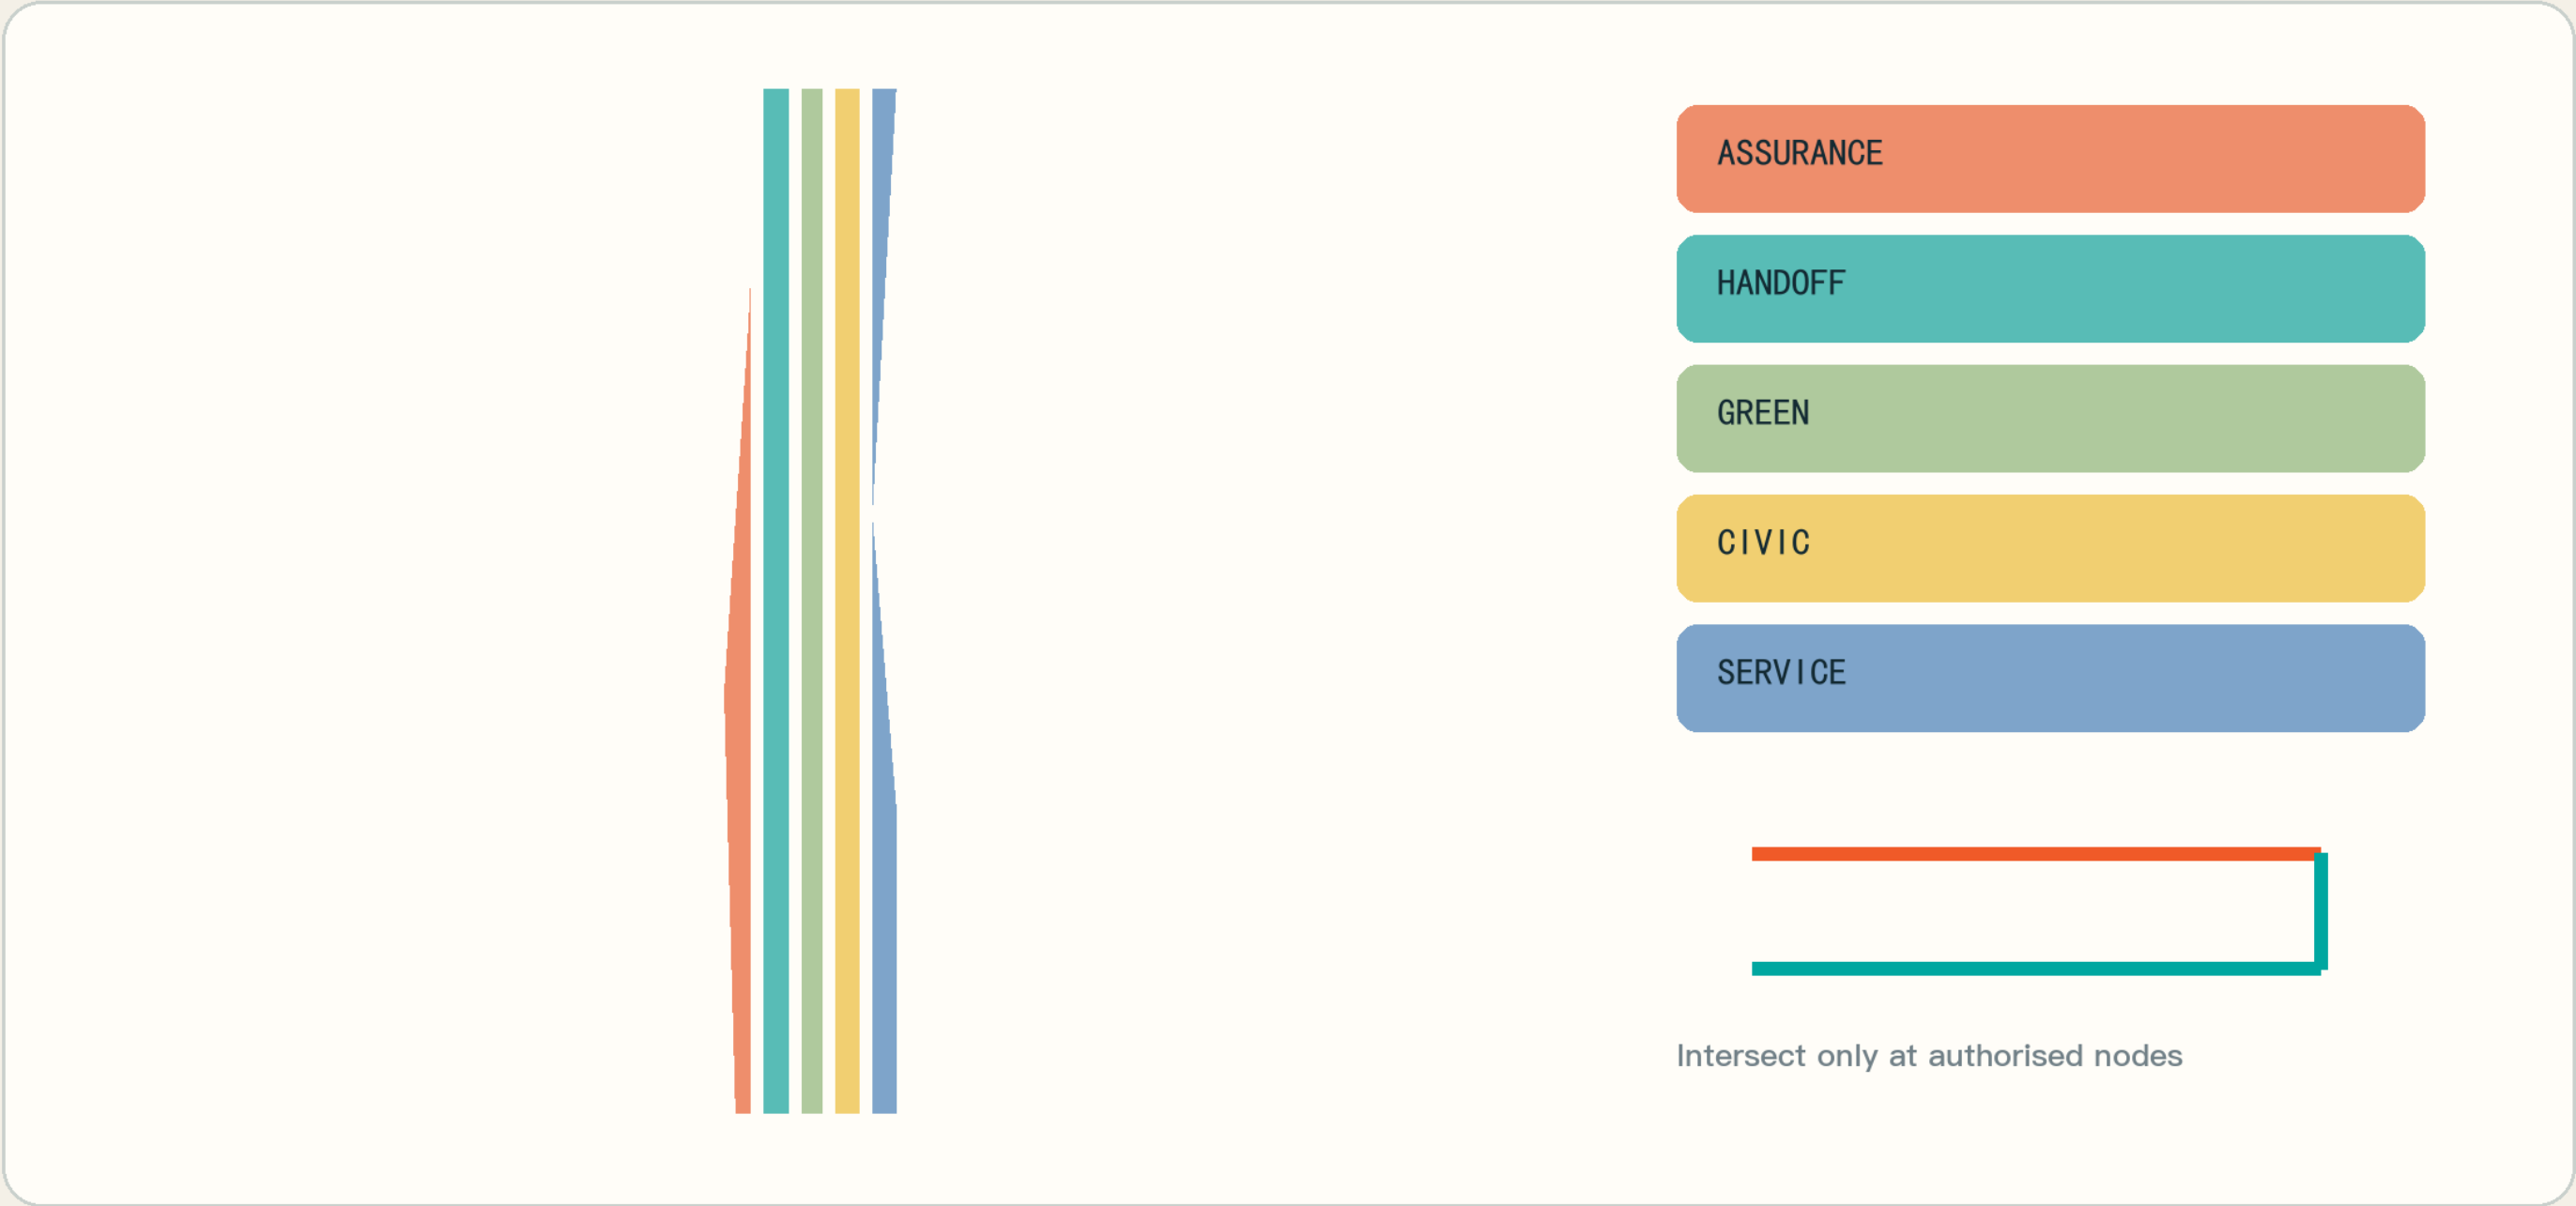

- 1 Human-first spine
- 2 Industry assurance + public life
- 3 Test • connect • disclose
- 4 Boundary • handoff • autonomy • substitution harm

HUMAN-FIRST SPINE | NON-AI CONTINUITY

Refusing AI never restricts movement, service, staying or participation.

01 Paper wayfinding

02 Staffed help

03 Accessible route

04 Screen-light activity

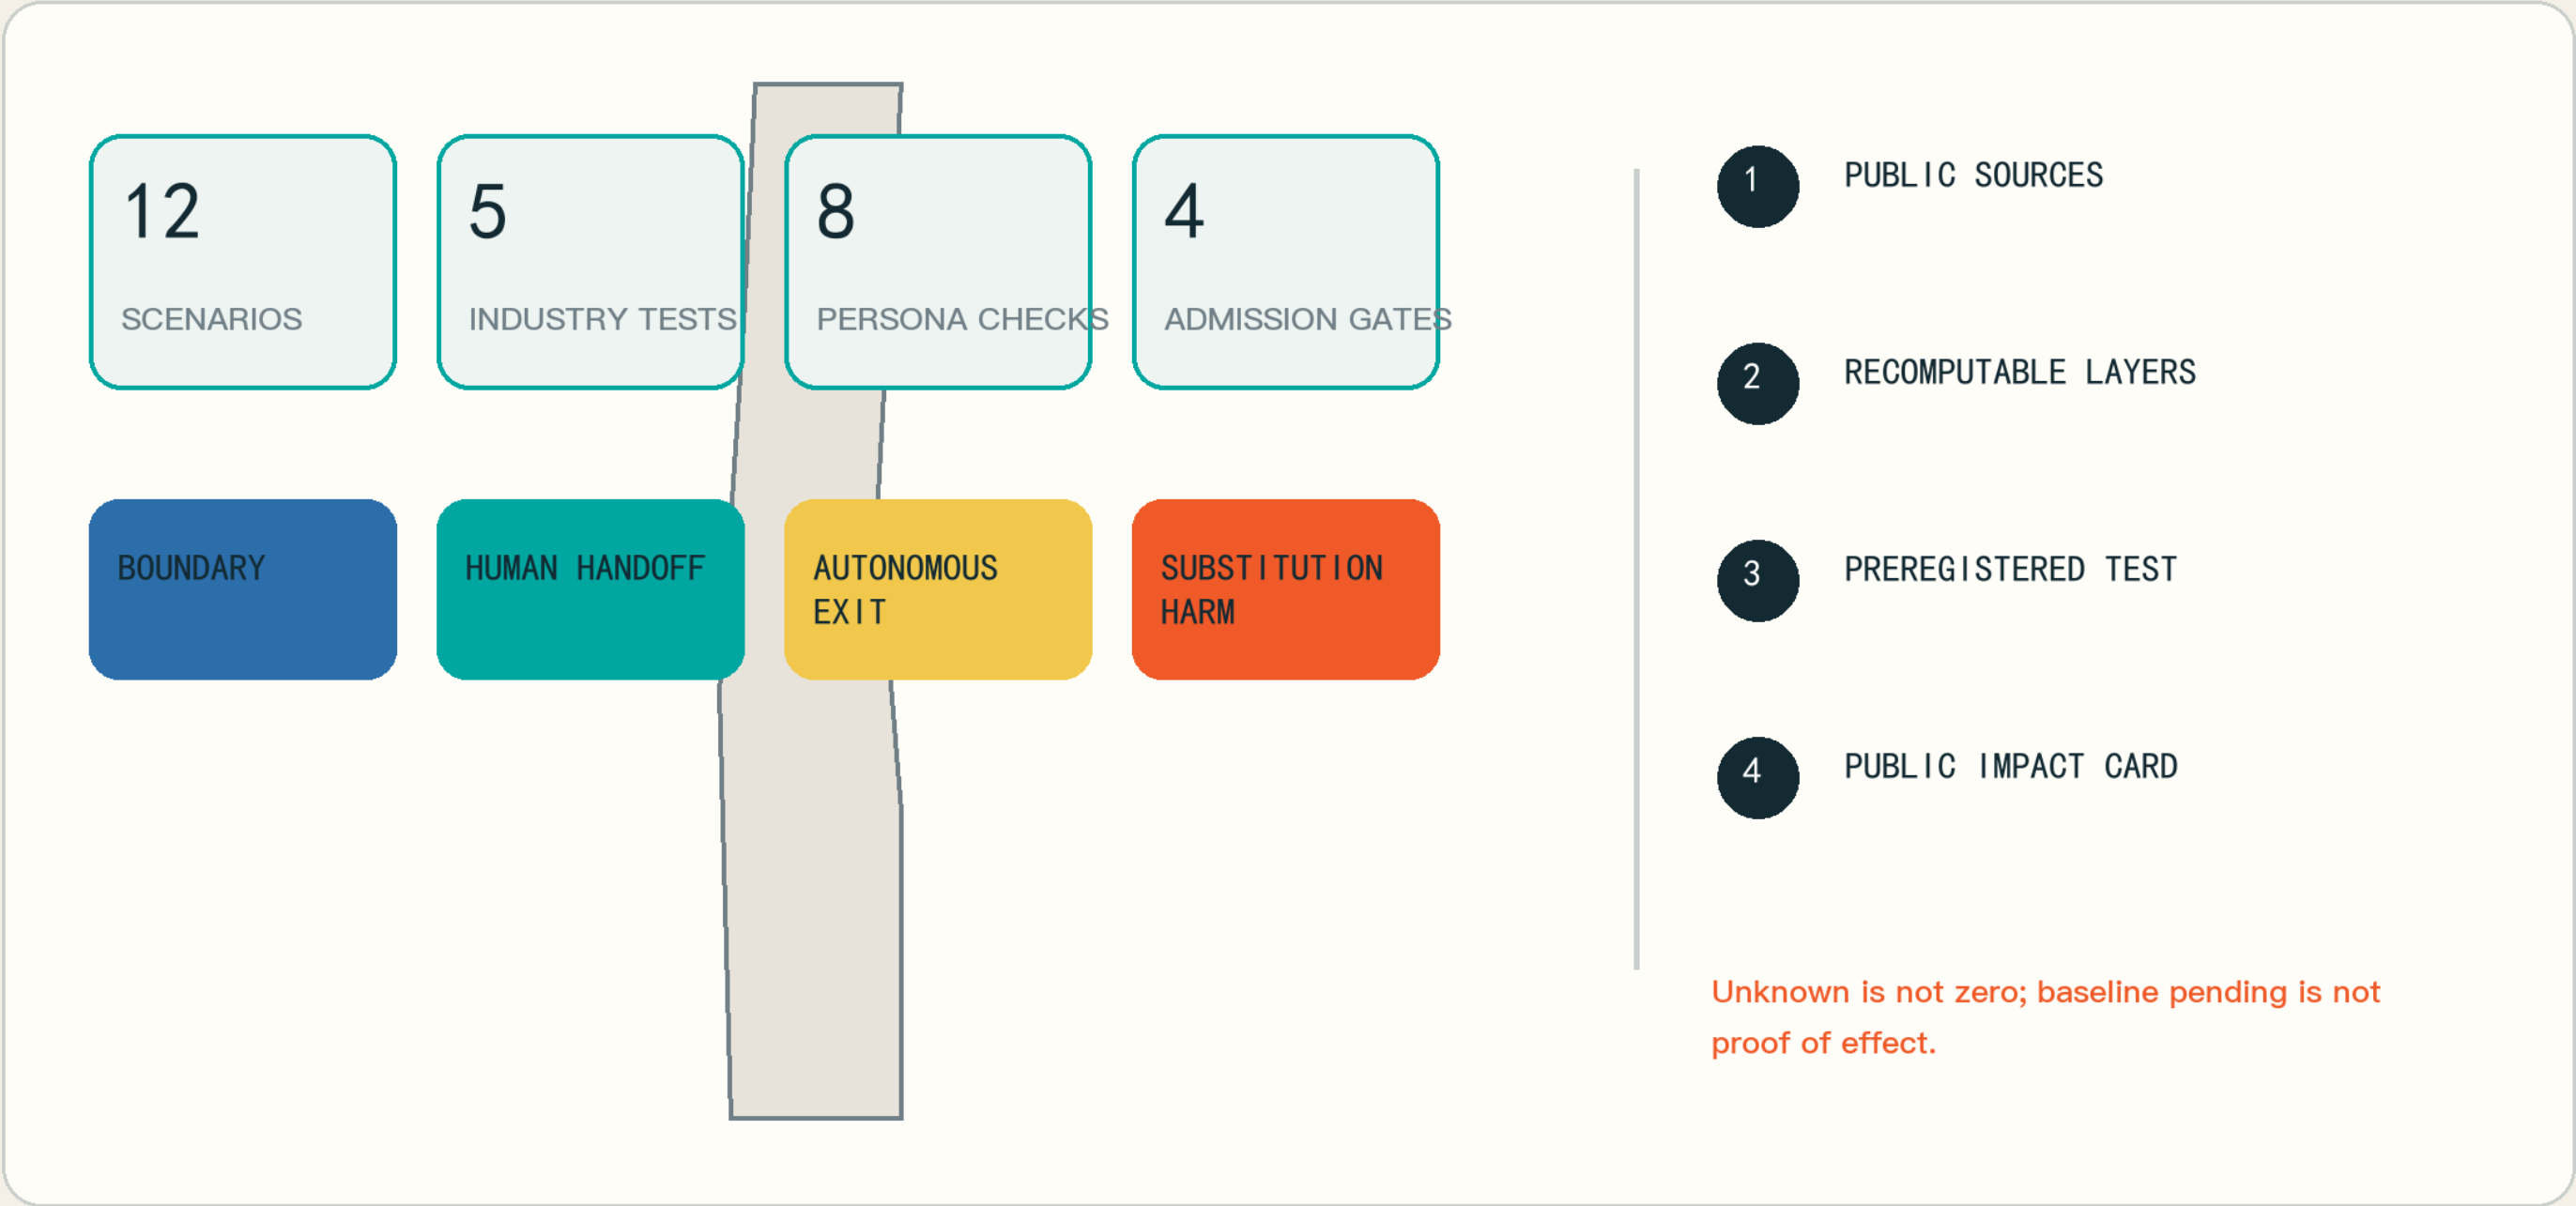

The city still works when AI fails
or is refused.

THREE EVIDENCE-GATED PHASES

DAYS 0-90: BOUNDARY AND EXIT

Controlled indoor tests, test accounts and four-gate protocol; no vulnerable-group recruitment.

MONTHS 4-12: LIMITED HUMAN HANDOFF

Open Human Zero at small scale after venue, ethics, data and service approvals.

AFTER EVIDENCE: TRANSPARENT TRIAL AND SCALE

Serious substitution harm pauses the trial; early results never become district claims.

EVIDENCE, RISK AND RIGHTS BOUNDARIES

VERIFIABLE SOURCES ONLY

Global evidence is not local prevalence; provisional geometry is never an official boundary.

UNKNOWN IS NOT ZERO

Local baseline, handoff, exit and harm–event values await authorised research.

THE RIGHT TO NO AI

Refusing AI never limits movement, service, activity or complaint; traditional service remains.

ZERO TOLERANCE FOR SEVERE EVENTS

Manipulation, blocked exit or delayed human help immediately stops the trial and activates human recovery.
