

Jing-Zhang Public Ground

One accessible spine · eight east-west seams · six public rooms · three validation courts

1 / ACCESS

Continuous step-free ground

2 / LEGIBILITY

Purpose, data and operator visible

3 / FALLBACK

Human service remains available

PROVISIONAL

Repository provisional geometry; not an official redline

Three translations: technology → product → daily life

Zhongzhiyuan validates; AI Origin translates; Dazhongsi enables public adoption

Validation Court

Reversible testing and standards co-creation

Translation Yard

Interface between research, open source and civic needs

Adoption Hall

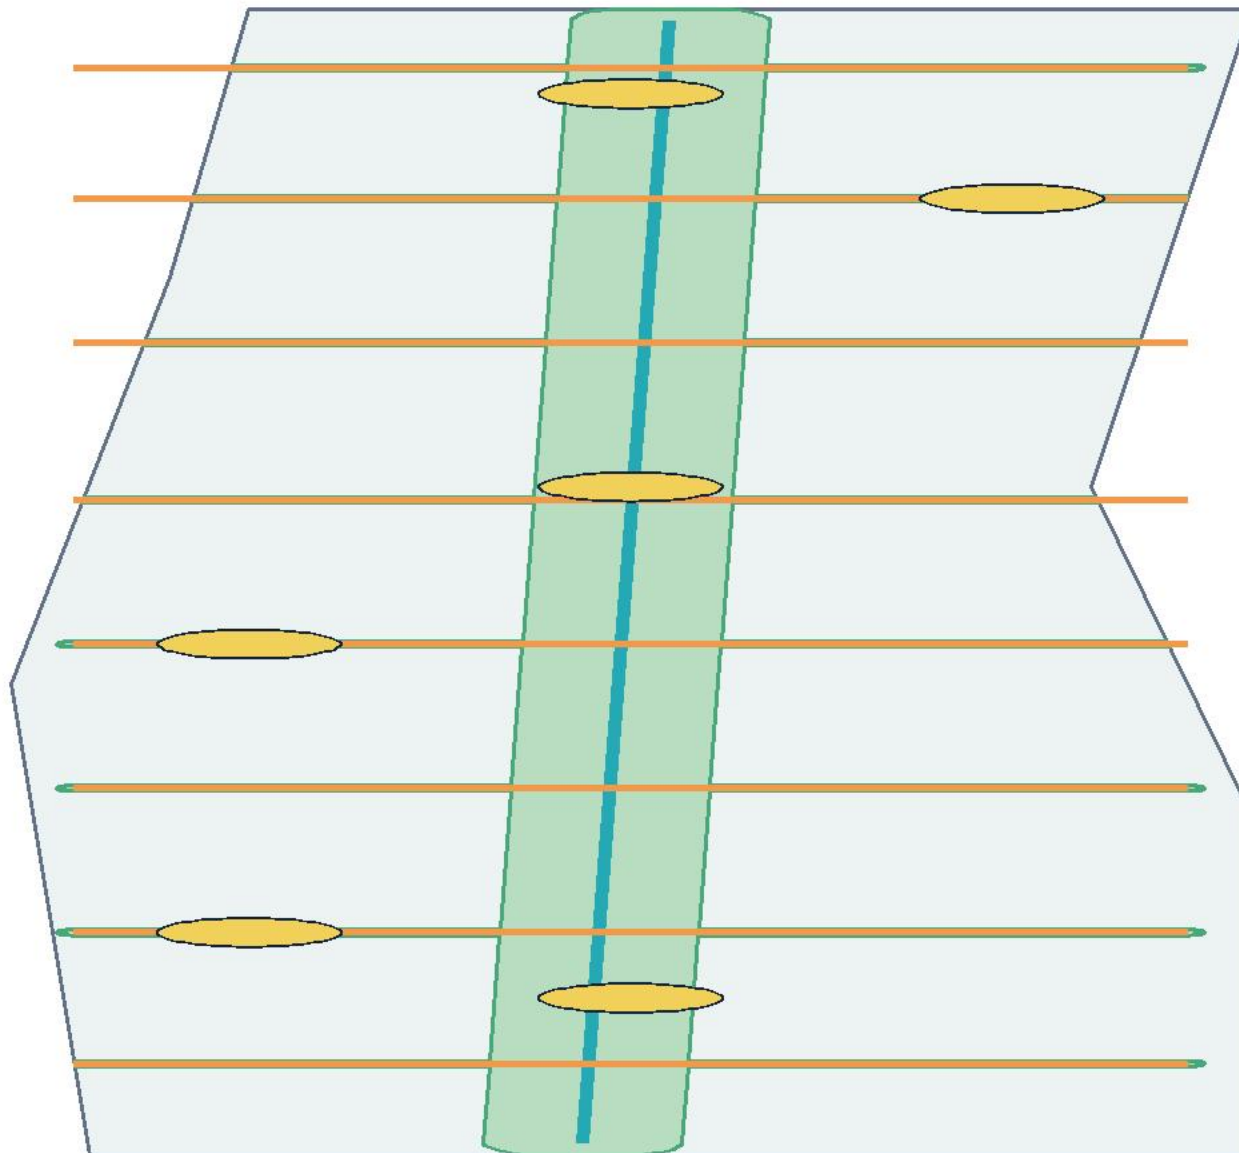

Public-facing adoption of agents, devices and services

STATUS

All three polygons are provisional constraints

Accessible ground + low-intrusion sensing

Walking, cycling, blue-green space, human fallback and AI scenarios share an opt-out spatial protocol

WALK + CYCLE

Continuous, step-free, repairable

BLUE-GREEN

Shade, rainwater and social space

LOW INTRUSION

No facial recognition required

HUMAN FALLBACK

Visible assistance and non-digital route

A recomputable evidence chain

Known quantities come from submitted geometry; regulatory, ownership, utility and engineering controls remain pending

11.41 km²
