

Design statements

- Heritage park as the public main axis: R&D ~40%, green ~22.8%, public space ~2.6% (concept recalculation within provisional boundary).
- Three cores: Zhongzhiyuan = full-stack & governance; AI Origin = transfer & talent; Dazhongsi = smart economy & exchange.
- All spatial conclusions are concepts; recalculate and deepen after official boundary and controls.

Three Key Areas: Detailed Design Index

Zhongzhiyuan / AI Origin Community / Dazhongsi (provisional implementation depth)

Zhongzhiyuan AI Acceleration Area

~192.1 ha (announced) - provisional polygon

Garden-style full-stack innovation district

National platform, standards & safety showcase

Qinghe cultural heritage, low-carbon exchange

5th Ring Rd integration; access upgrade direction

Beijing AI Origin Community

~104.3 ha (announced) - provisional polygon

Campus-adjacent tech-transfer & talent community

Open-source, launch events, talent services

Slow-mobility stitching of campus park blocks

Wudaokou / Qinghua East Rd West station 100

Dazhongsi AI Industry Cluster

~72.0 ha (announced) - provisional polygon

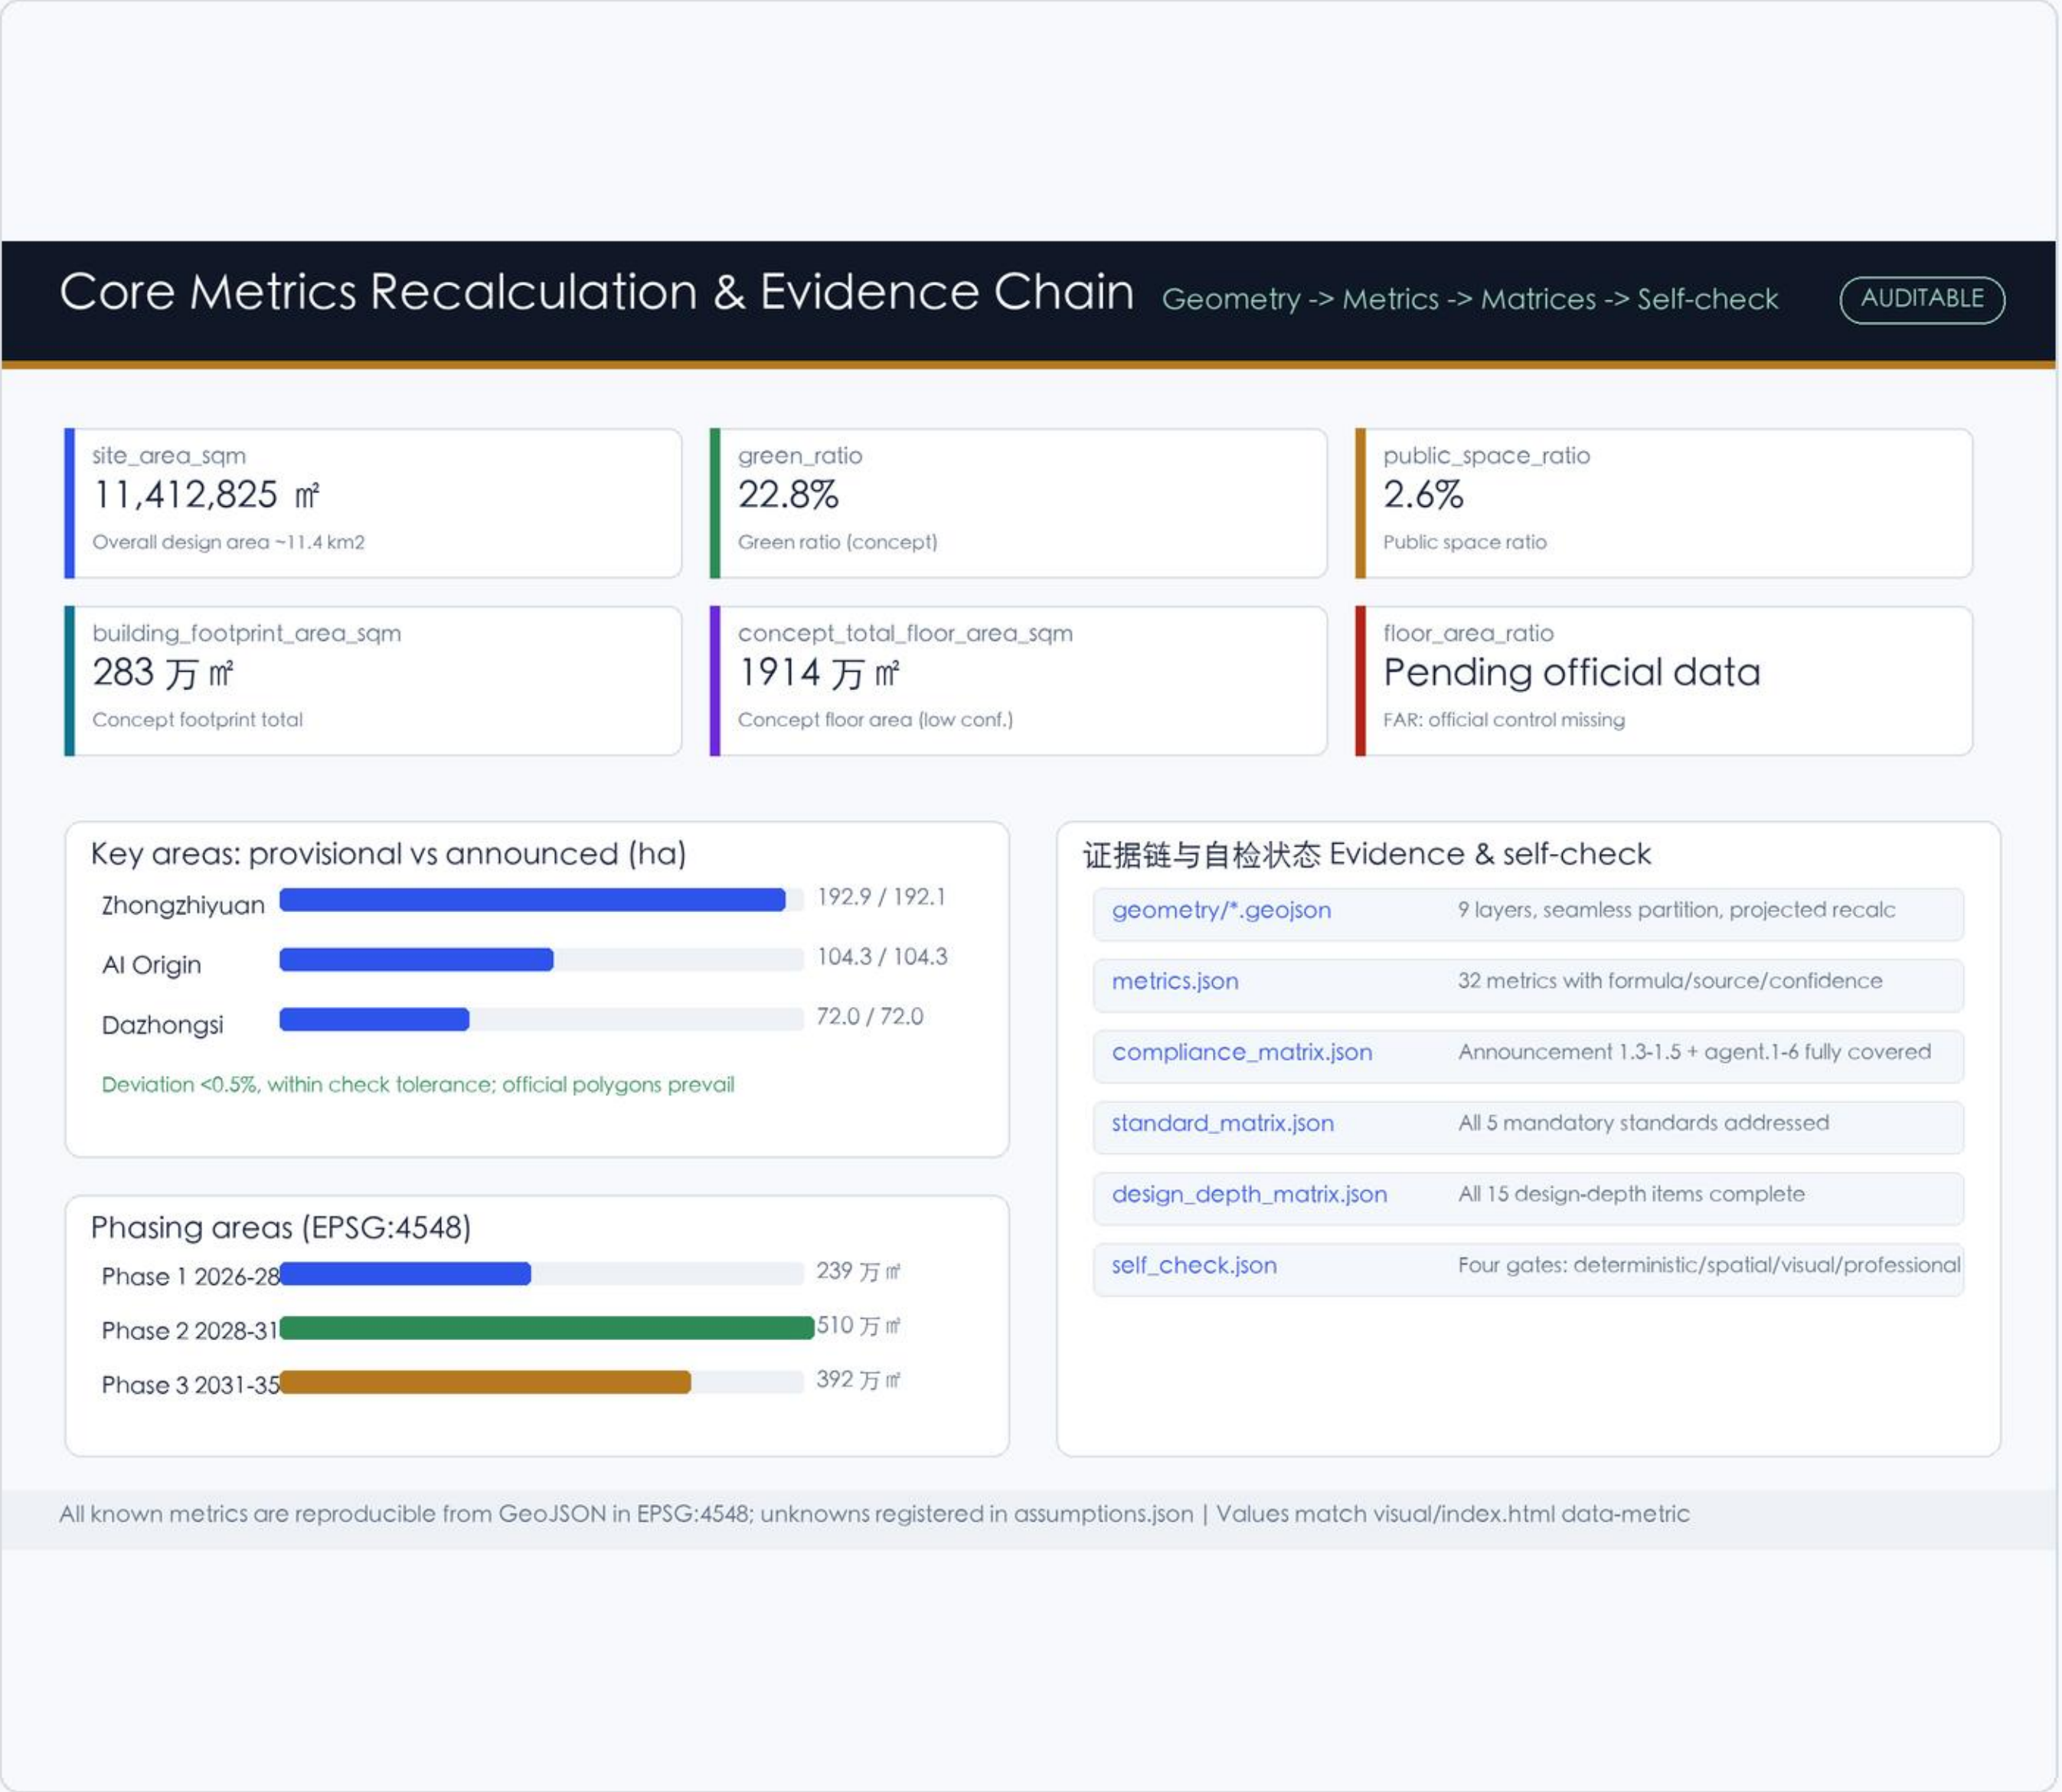

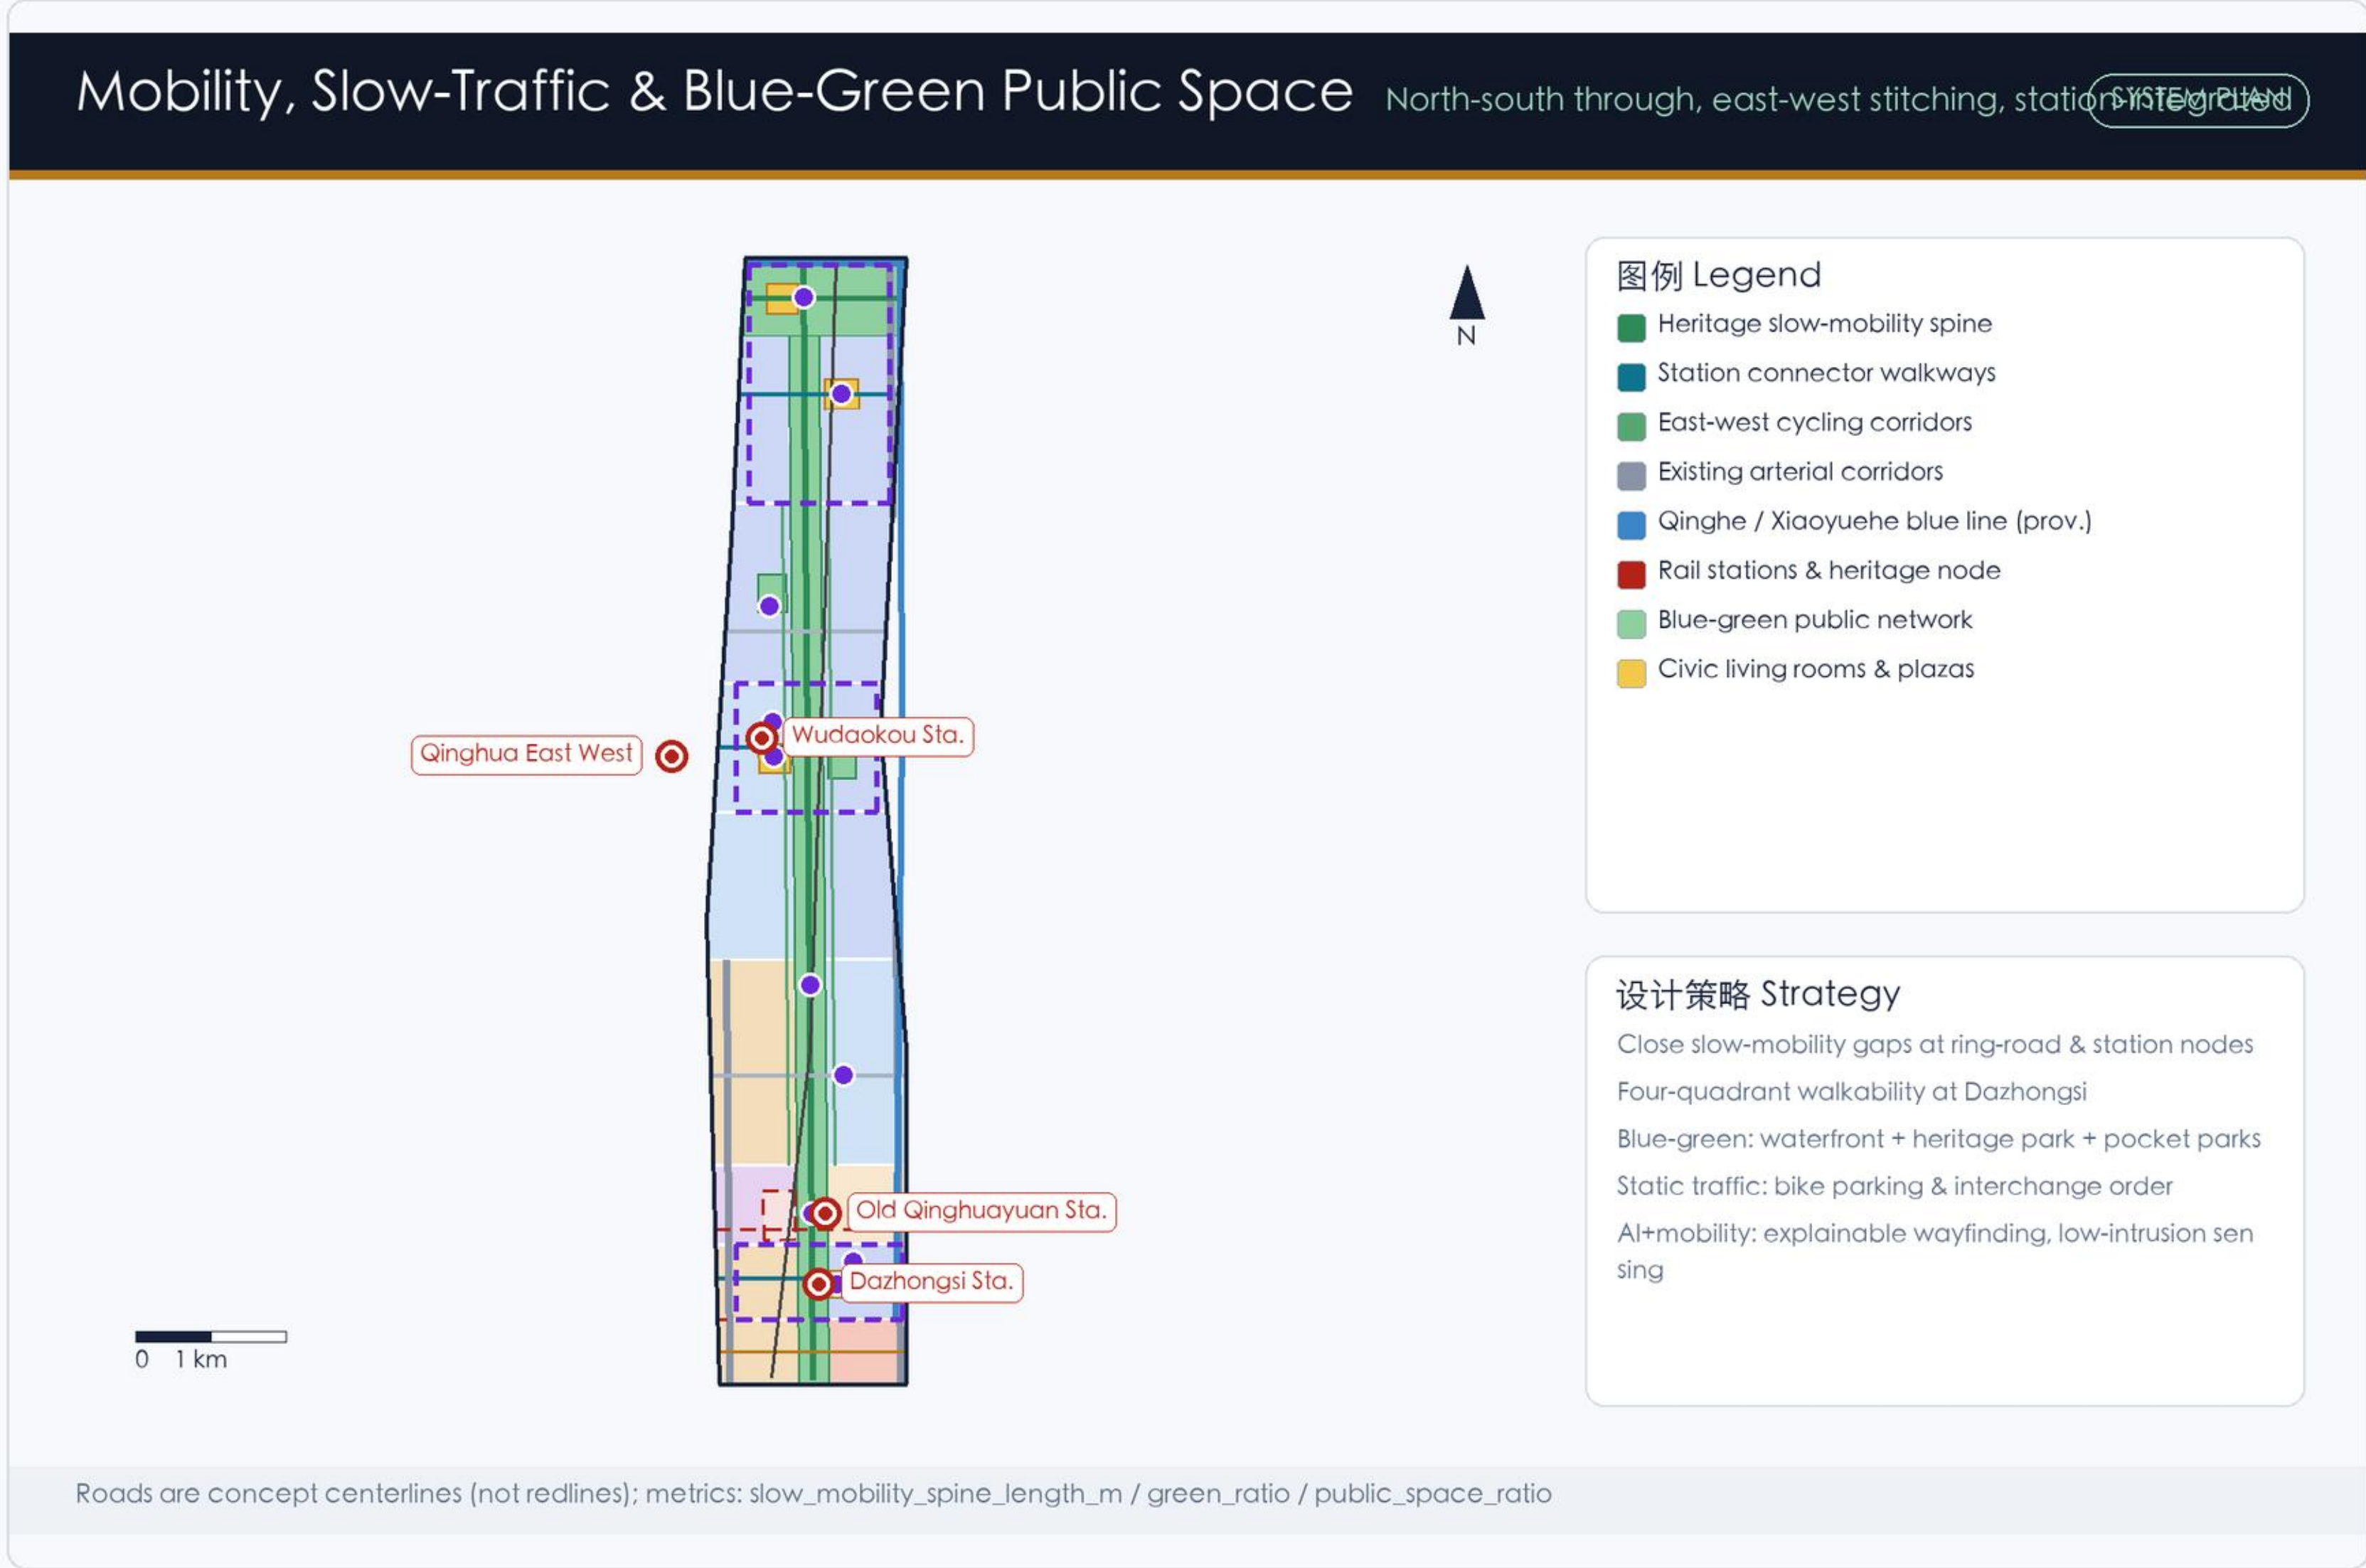

Urban smart-economy & global exchange district

Agents, smart devices, content consumption

Four-quadrant walkability at Dazhongsi station

Green-space reuse & retail service upgrade

All key areas are provisional rough polygons for concept discussion only; verify after official boundaries | Evidence: geometry/key_areas.geojson

Implementation pathway

- Phase 1 (2026-28): slow-mobility gap closing, station memory plaza, Dazhongsi four-quadrant concept (~2.39M sqm).
- Phase 2 (2028-31): transfer street & release hall, interchange upgrade, edge-compute pilot (~5.10M sqm).
- Phase 3 (2031-35): Qinghe frontage & waterfront living room, rolling Global AI Week route (~3.92M sqm).
- Operations: week/festival/forum/monthly + six-party committee + application-based opening (all concepts).
