

Jing-Zhang AI Spine

Urban Design for the Centennial Jing-Zhang AI Innovation Belt (A3 Booklet)

One Spine, Three Cores, Two Wings, Multiple Nodes

Concept proposal · open co-creation · no government-approved conclusion

Author: Liu Linfeng x Kimi-K3 (AI agent) · 2026-08

The pre-qualification announcement is the primary basis (three scopes, three key areas, depth requirements); the Agent taskbook defines methods (three positions, five functions, six tasks); the site package provides spatial data. All outputs are concept recommendations.

统筹研究范围 43.6 km²

AI ecosystem · three areas & two wings · future city form

总体设计范围 11.4 km²

Regulatory-depth urban design · renewal framework (submitted boundary)

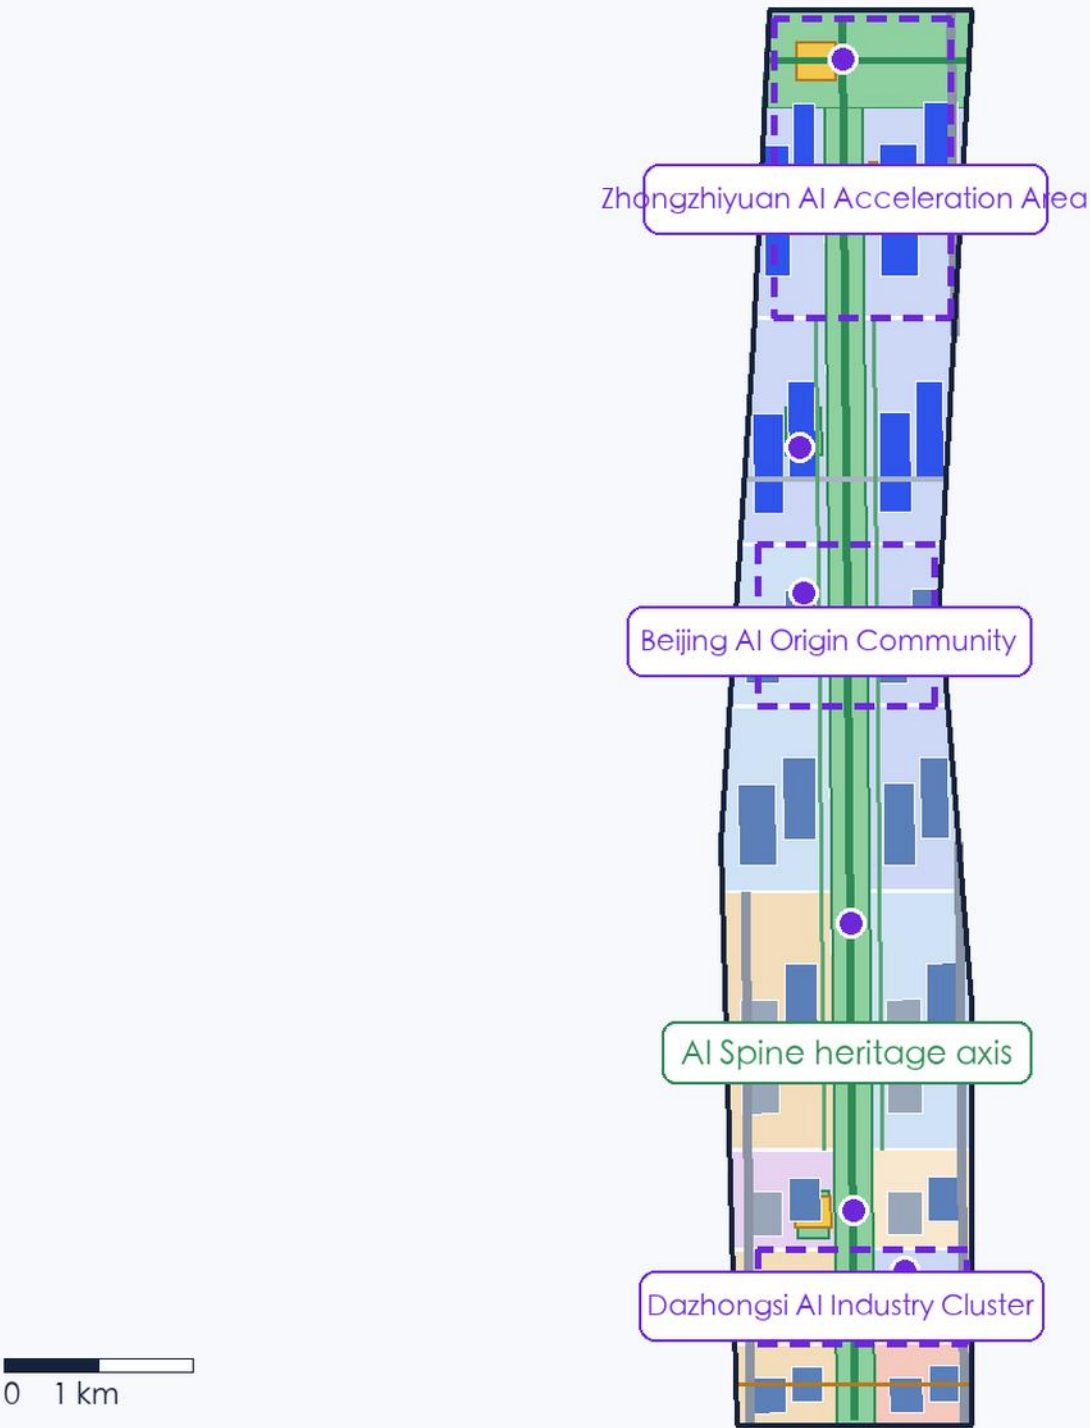

重点区域范围 368.4 ha

Zhongzhiyuan 192.1 · AI Origin 104.3 · Dazhongsi 72.0 ha

- Boundary and key areas are maintainer provisional polygons, not official redlines; areas recalculated in EPSG:4548 and to be recomputed after official release.
- Sources and licenses itemized in sources.json; gaps and recalculation paths in assumptions.json.

Jing-Zhang AI Spine · Overall Spatial Structure One Spine, Three Cores, Two Wings, Multiple Nodes

SCENARIO PROPOSAL

图例 Legend

- New-build concept
- Renovation concept
- Retained footprint
- AI scenario nodes

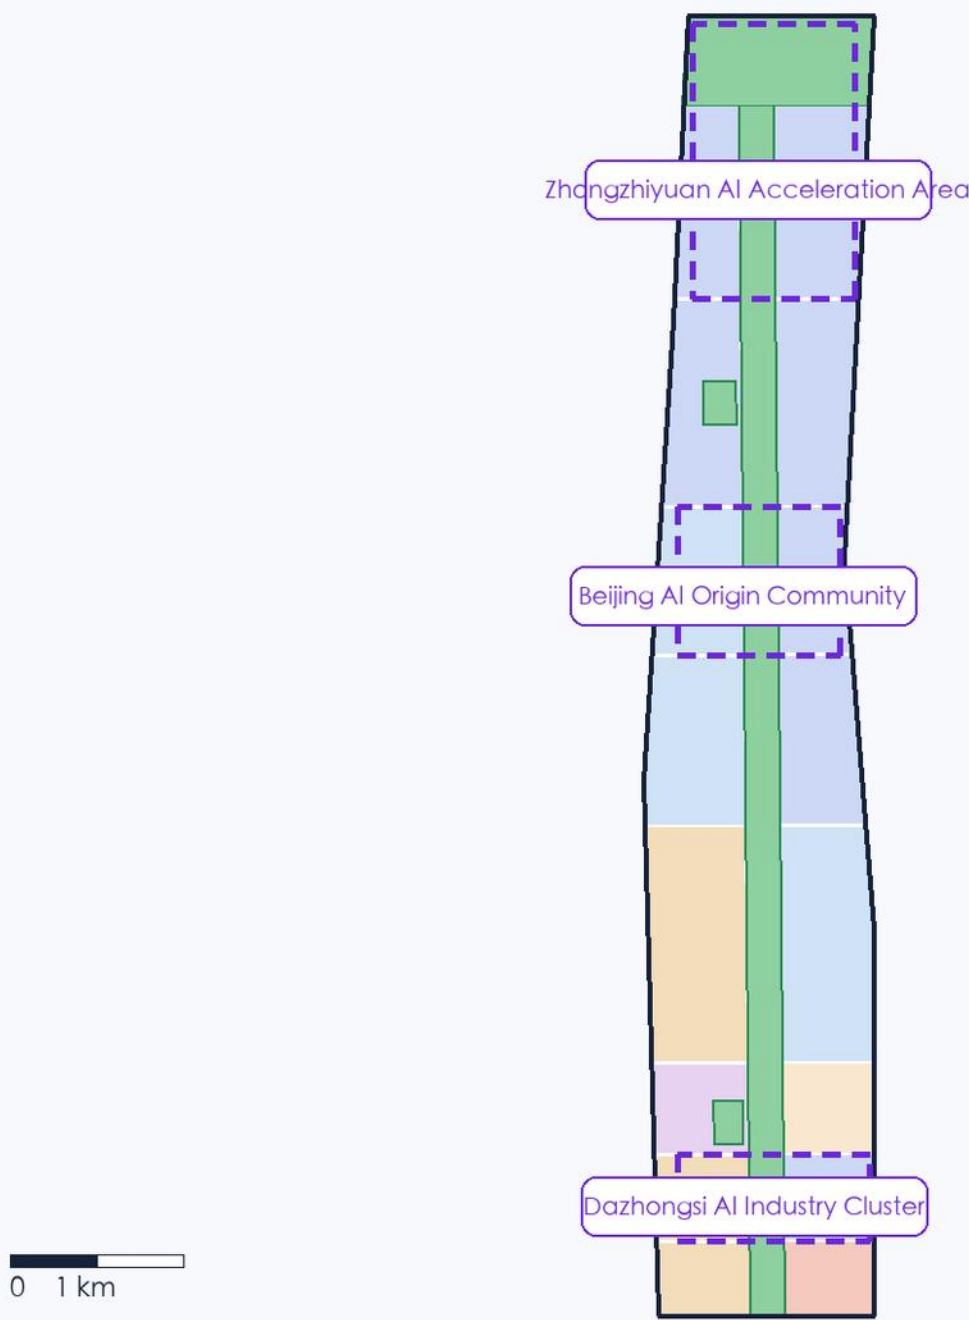

空间结构 Structure

Spine: Jing-Zhang heritage park axis
Cores: Zhongzhiyuan / AI Origin / Dazhongsi
Wings: Zhongguancun service / Xiaoyuehe scenario
Nodes: 10 AI scenario nodes, 6 civic living rooms

Source: submission geometry/*.geojson (EPSG:4548); boundary & key areas are provisional rough polygons, not official redlines | Liu Linfeng x AI, 2026-08

Land-Use Structure & Three-Level Scopes

Seamless zoning partition per national regulation, classification, urban design

Land-use mix (recalculated, EPSG:4548)

R&D 0802	456.8万 m²
Education 0804	223.7万 m²
Park green 1401	189.4万 m²
Residential 0701	167.5万 m²
Culture 0803	38.1万 m²
Community 0702	36.5万 m²
Commercial 05	29.2万 m²

三层范围 Three scopes

Coordinated research area 43.6 km2
Industry ecosystem & future city form

Overall design area 11.4 km2
Regulatory-depth urban design (this map)

Key detailed design areas 368.4 ha
Detailed design of three key areas

Codes per MNR land-use classification guide; partition derived seamlessly from submitted boundary | Provisional boundary; recalculated after official release

R&D 4.57M sqm · Education 2.24M · Green 1.89M · Residential 1.68M | Concept footprints 2.83M sqm, density 24.8% (pending controls)

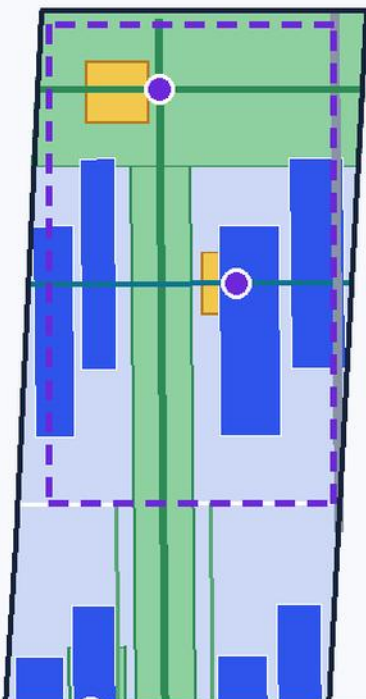

Three Key Areas: Detailed Design Index

Zhongzhiyuan / AI Origin Community / Dazhongsi

Comprehensive-implementation depth

Zhongzhiyuan AI Acceleration Area

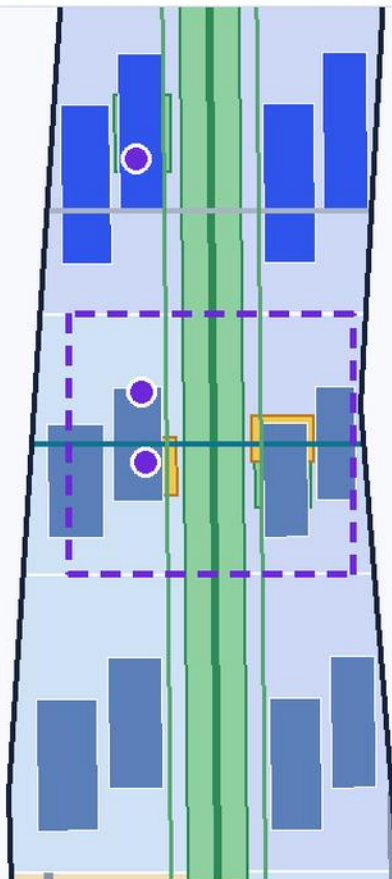

~192.1 ha (announced) · provisional polygon

- Garden-style full-stack innovation district
- National platform, standards & safety showcase
- Qinghe cultural frontage, low-carbon exchange
- 5th Ring Rd integration: access upgrade direction

Beijing AI Origin Community

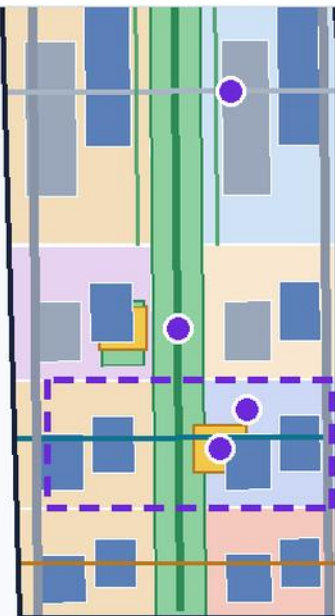

~104.3 ha (announced) · provisional polygon

- Campus-adjacent tech-transfer & talent community
- Open-source, launch events, talent services
- Slow-mobility stitching of campus-park-blocks
- Wudaokou / Qinghua East Rd West station TOD

Dazhongsi AI Industry Cluster

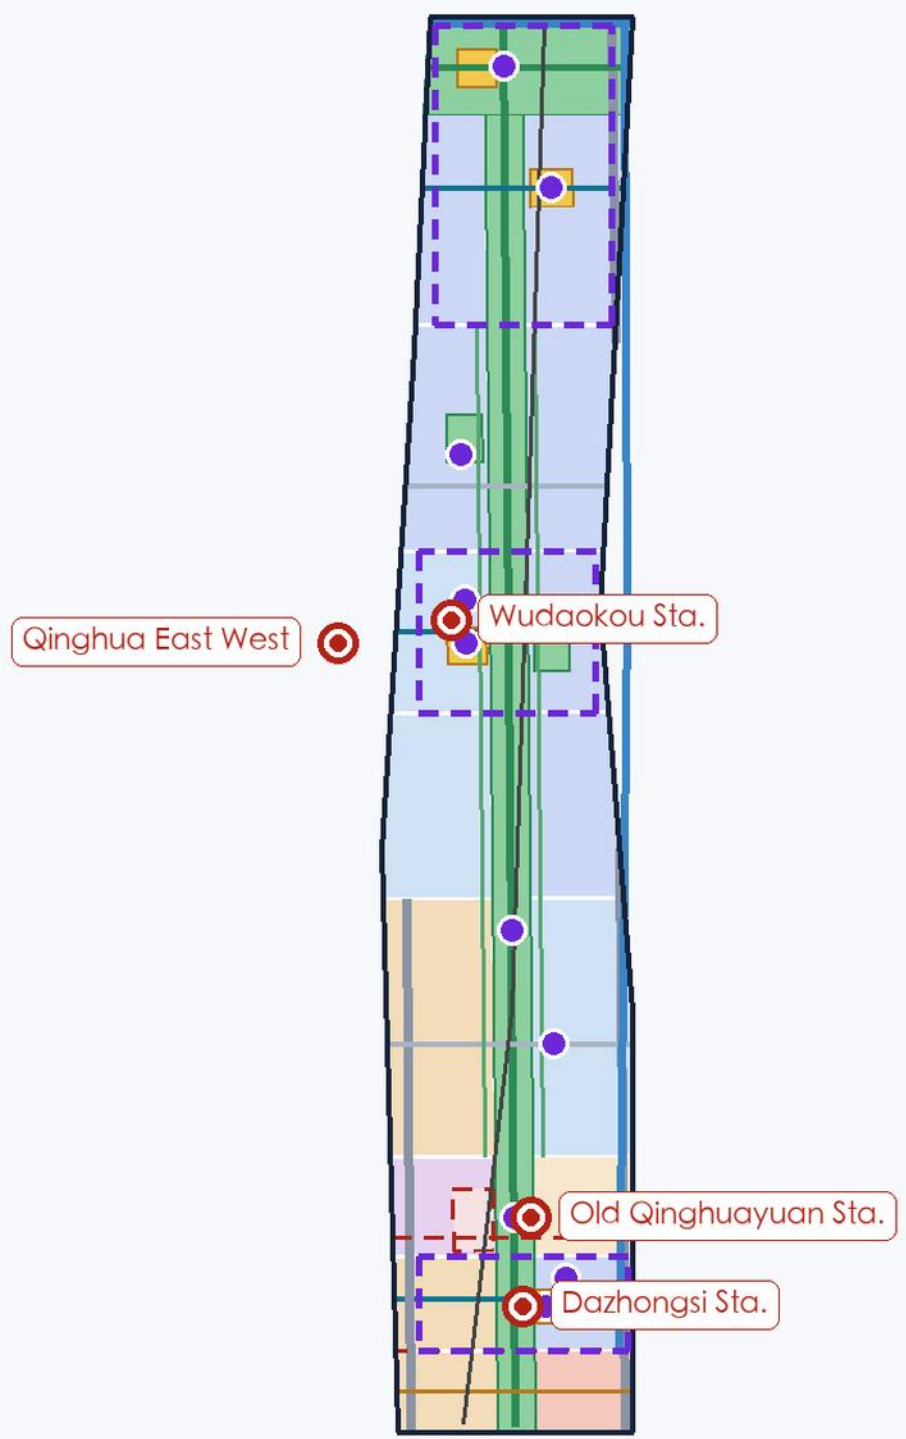

~72.0 ha (announced) · provisional polygon

- Urban smart-economy & global exchange district
- Agents, smart devices, content consumption
- Four-quadrant walkability at Dazhongsi station
- Green-space reuse & retail service upgrade

All key areas are provisional rough polygons for concept discussion only; verify after official boundaries | Evidence: geometry/key_areas.geojson

Mobility, Slow-Traffic & Blue-Green Public Space North-south through, east-west stitching, station-integrated

图例 Legend

- Heritage slow-mobility spine
- Station connector walkways
- East-west cycling corridors
- Existing arterial corridors
- Qinghe / Xiaoyuehe blue line (prov.)
- Rail stations & heritage node
- Blue-green public network
- Civic living rooms & plazas

设计策略 Strategy

Close slow-mobility gaps at ring-road & station nodes
Four-quadrant walkability at Dazhongsi
Blue-green: waterfront + heritage park + pocket parks
Static traffic: bike parking & interchange order
AI+mobility: explainable wayfinding, low-intrusion sensing

Roads are concept centerlines (not redlines); metrics: slow_mobility_spine_length_m / green_ratio / public_space_ratio

Scenario cards (* = industrial test & verification, 4 in total)

S01 Release hall	S02 Safety sandbox*	S03 Edge-compute*	S04 Slow-mobility AI
S05 Roadshow lounge	S06 Low-carbon corridor	S07 Transfer street	S08 Data showroom*
S09 Daily-life avenue	S10 Memory AR route	S11 Delivery pilot*	S12 Governance drill

Long-term operation system

- Annual: AI Innovation Week, Open-Source Developer Festival, Jing-Zhang Forum, monthly Scenario Open Days.
- Governance: six-party co-governance committee, application-based scenario opening, annual scenario list.
- Brand assets: naming system, logo direction, landmarks (Zero Point / Light Rail / Open-Source Gate / Walk of Fame), honor system.
- All are concept recommendations subject to event permits, safety assessment and rights clearance.

- Risk: policy uncertainty (4/5) and implementation complexity (4/5) rank highest; see risk.json.
- Compliance: no claim of official approval; all spatial moves are concepts; missing controls registered as pending.
- Copyright: all content original or rights-cleared; no unauthorized IP; HTML deliverables fully offline.
