

JingZhang NewTrack — Concept Urban Design, Centennial Jing-Zhang AI Innovation Belt

Three Tracks, One Pulse · One Belt, Three Cores / Two Wings, Seven Axes · JZ-CHAIN-001 v0.2 Concept proposal (not approved conclusions) · boundaries are provisional rough extents · not deployed · not authorized · not operational

Mechanism Contract JZ-CHAIN-001: three-track evidence constraints (Heritage Track verifies sources/culture boundaries; Transit Track verifies spatial relations and engineering/ownership prerequisites; Data Track verifies data minimization, human review, appeal and exit) → one public-service chain (choose → use → stop → appeal → return to human → exit/restore) → four-state fallback (ordinary → optional assistance → stopped/human takeover → restored ordinary; restoration grants no deployment authorization) → three validation windows (JZ-V1 Zhongzhiyuan controlled industry validation; JZ-V2 Origin Community AIhuman equivalence public-service validation; JZ-V3 Dazhongsi restricted removable device validation; all concept_only). Mechanism states are concept-level design states, not approvals, deployments, on-site performance or government commitments.

01 Master Concept & Spatial Structure

03 Three Key Areas Detailed Design

JingZhang NewTrack — Three Key Areas: Detailed-Design Task Index
position + space + AI scenarios + risks

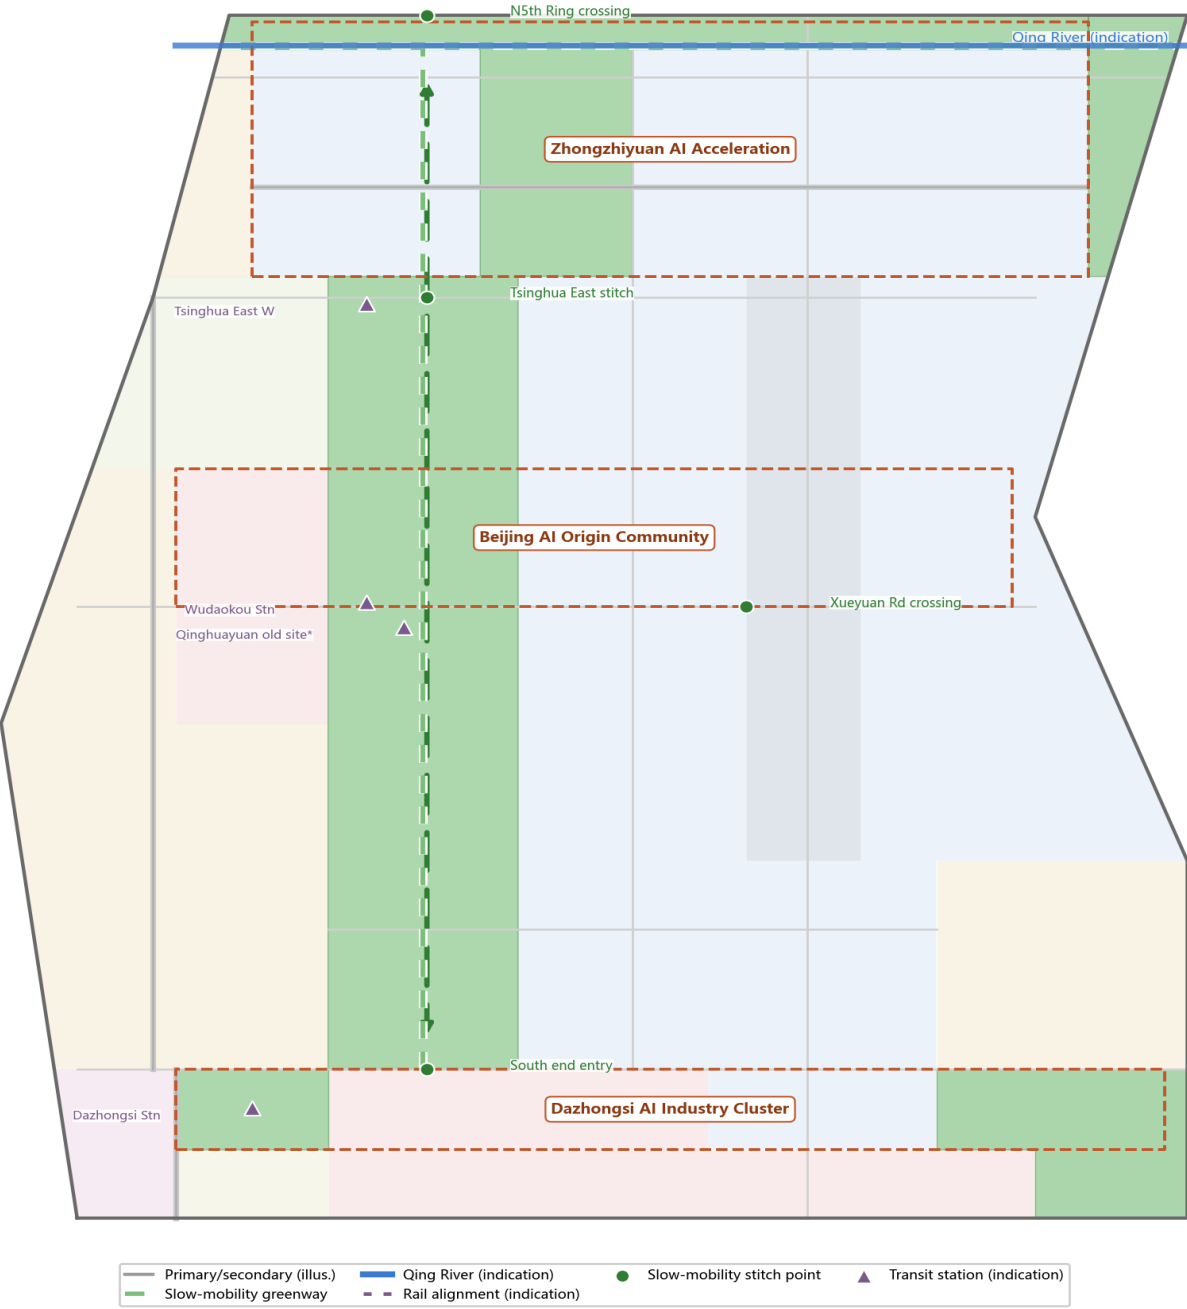

Boundary: provisional_constraint (official_boundary=false) · not an official redline or precise-area basis · areas recomputed in EPSG:4548
