JZ COMMON PORTS

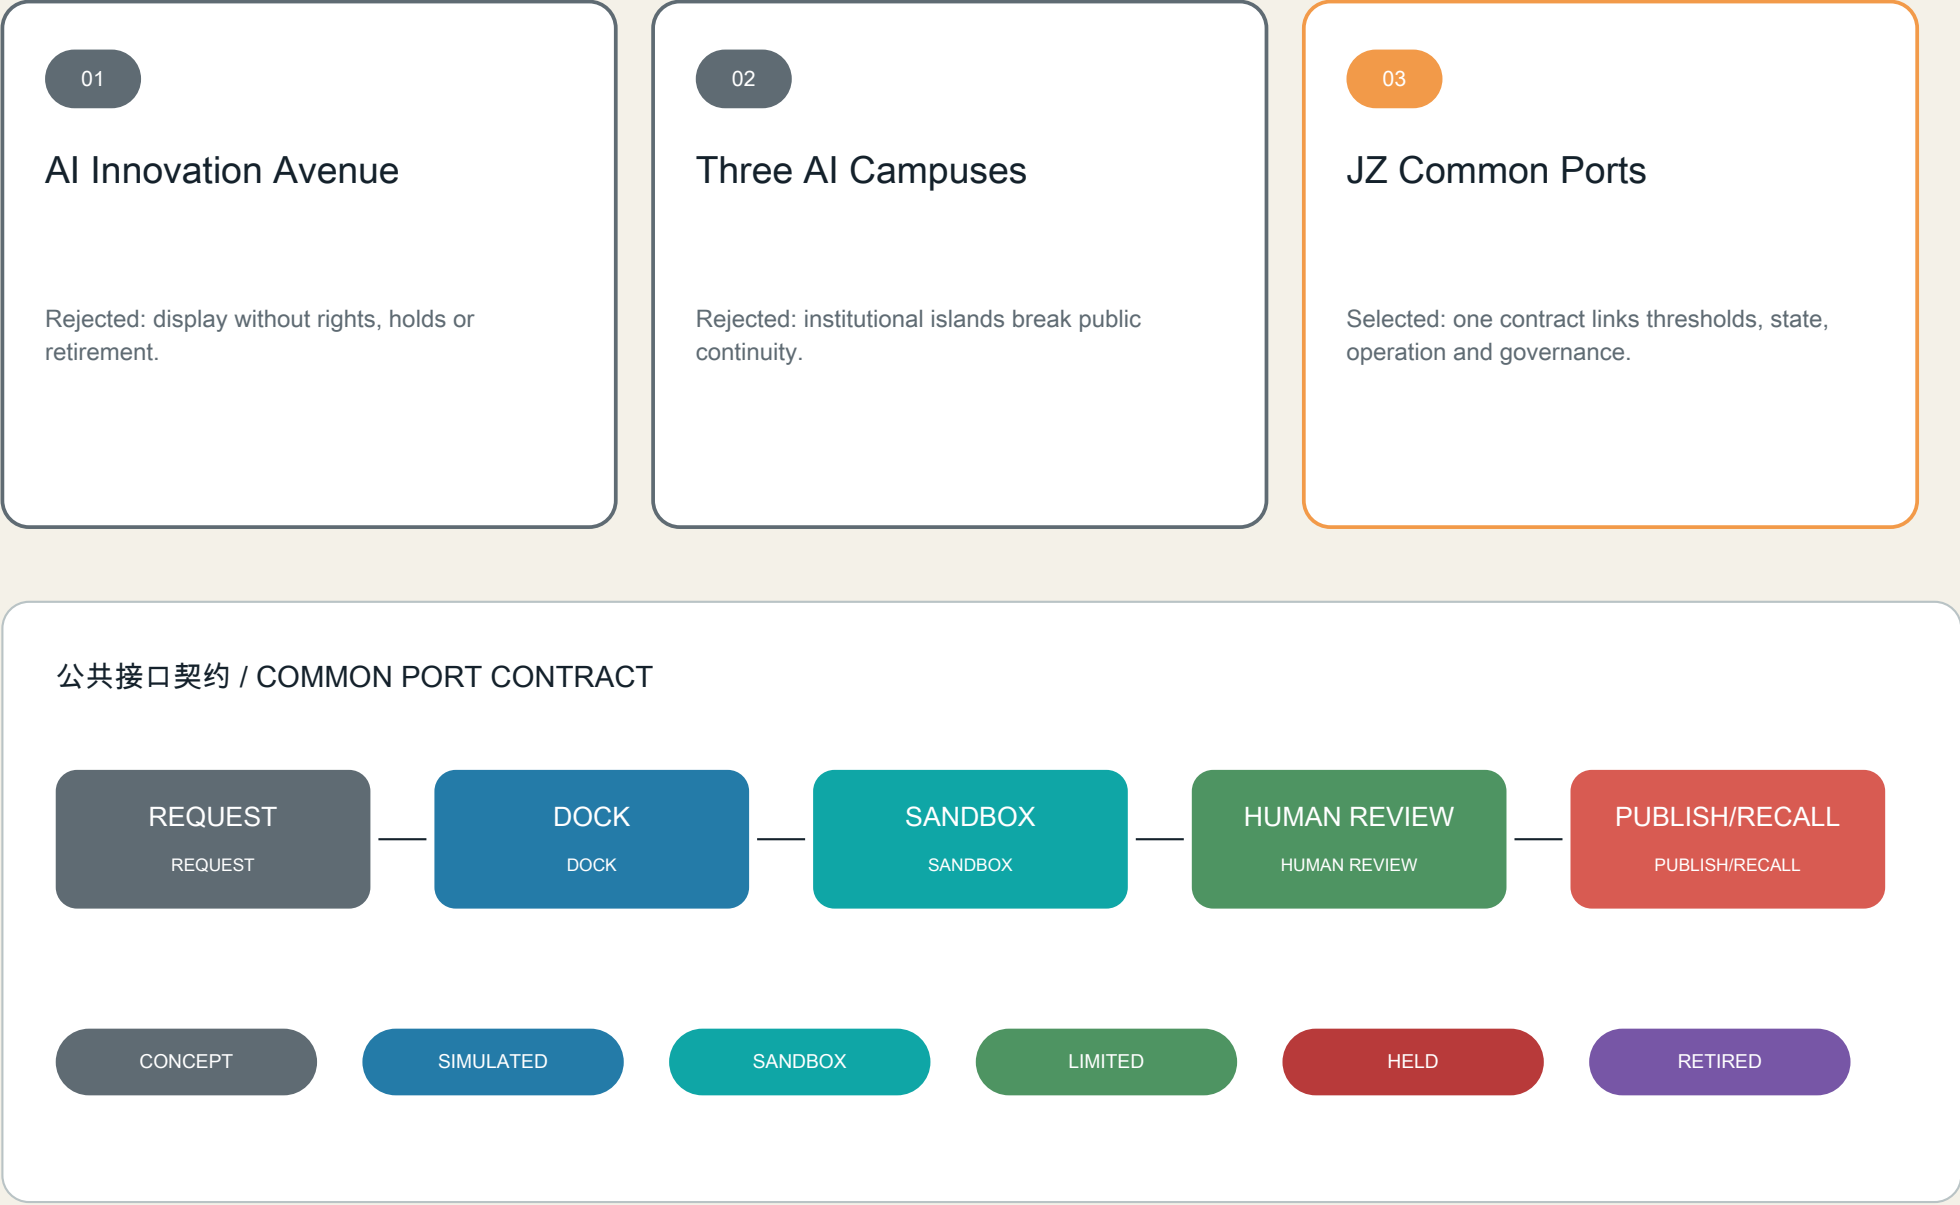

京张接口公地

验证港 / VALIDATION

开源港 / OPEN-SOURCE

生活港 / LIVING

Braces signify access and boundaries; the railway switch signifies choice and human final judgment; the void is the exit path.

Three Scope Levels: One Chain of Responsibility

43.6 km² regional exchange → 11.4 km² overall design → 368.4 ha key areas

{ JZ }
JZ COMMON PORTS
F01

THREE SCALES, ONE ACCOUNTABILITY CHAIN

43.6 km² exchange → about 11.4 km² overall design → 12 public interfaces in three key areas

43.6 km² COORDINATED RESEARCH	≈11.4 km² OVERALL DESIGN	≈368.4 ha THREE KEY AREAS	12 PUBLIC INTERFACES
---	--	--	---

OVERALL DESIGN DIAGRAM / NOT TO SCALE

REGIONAL SYNERGY: EXCHANGE INTERFACES, NOT COMMITMENTS

1 ONE CONTRACT
request—sandbox—human
review—publish/recall

2 TWO EQUAL PATHS
AI assistance alongside
human/paper service

3 THREE PUBLIC SEATS
one per port can red-card hold and
trigger appeal

□ BOUNDARY PRECISION NOTICE
All locations are normalized within repository provisional geometry. Official geometry triggers full regeneration; the organizer data gap does not block content scoring.

PROVISIONAL ROUGH CONSTRAINT · CONCEPT DESIGN · NOT AN APPROVED PLAN
SOURCE: official announcement + repository site package · accessed 2026-08-11

01 COORDINATED RESEARCH

Five exchange interfaces, six case mechanisms, eight-element loop; no false boundary.

02 OVERALL DESIGN

7 cells, 15 envelopes, 9 links, 5 green objects, 12 interfaces; fully recalculable.

03 KEY AREAS

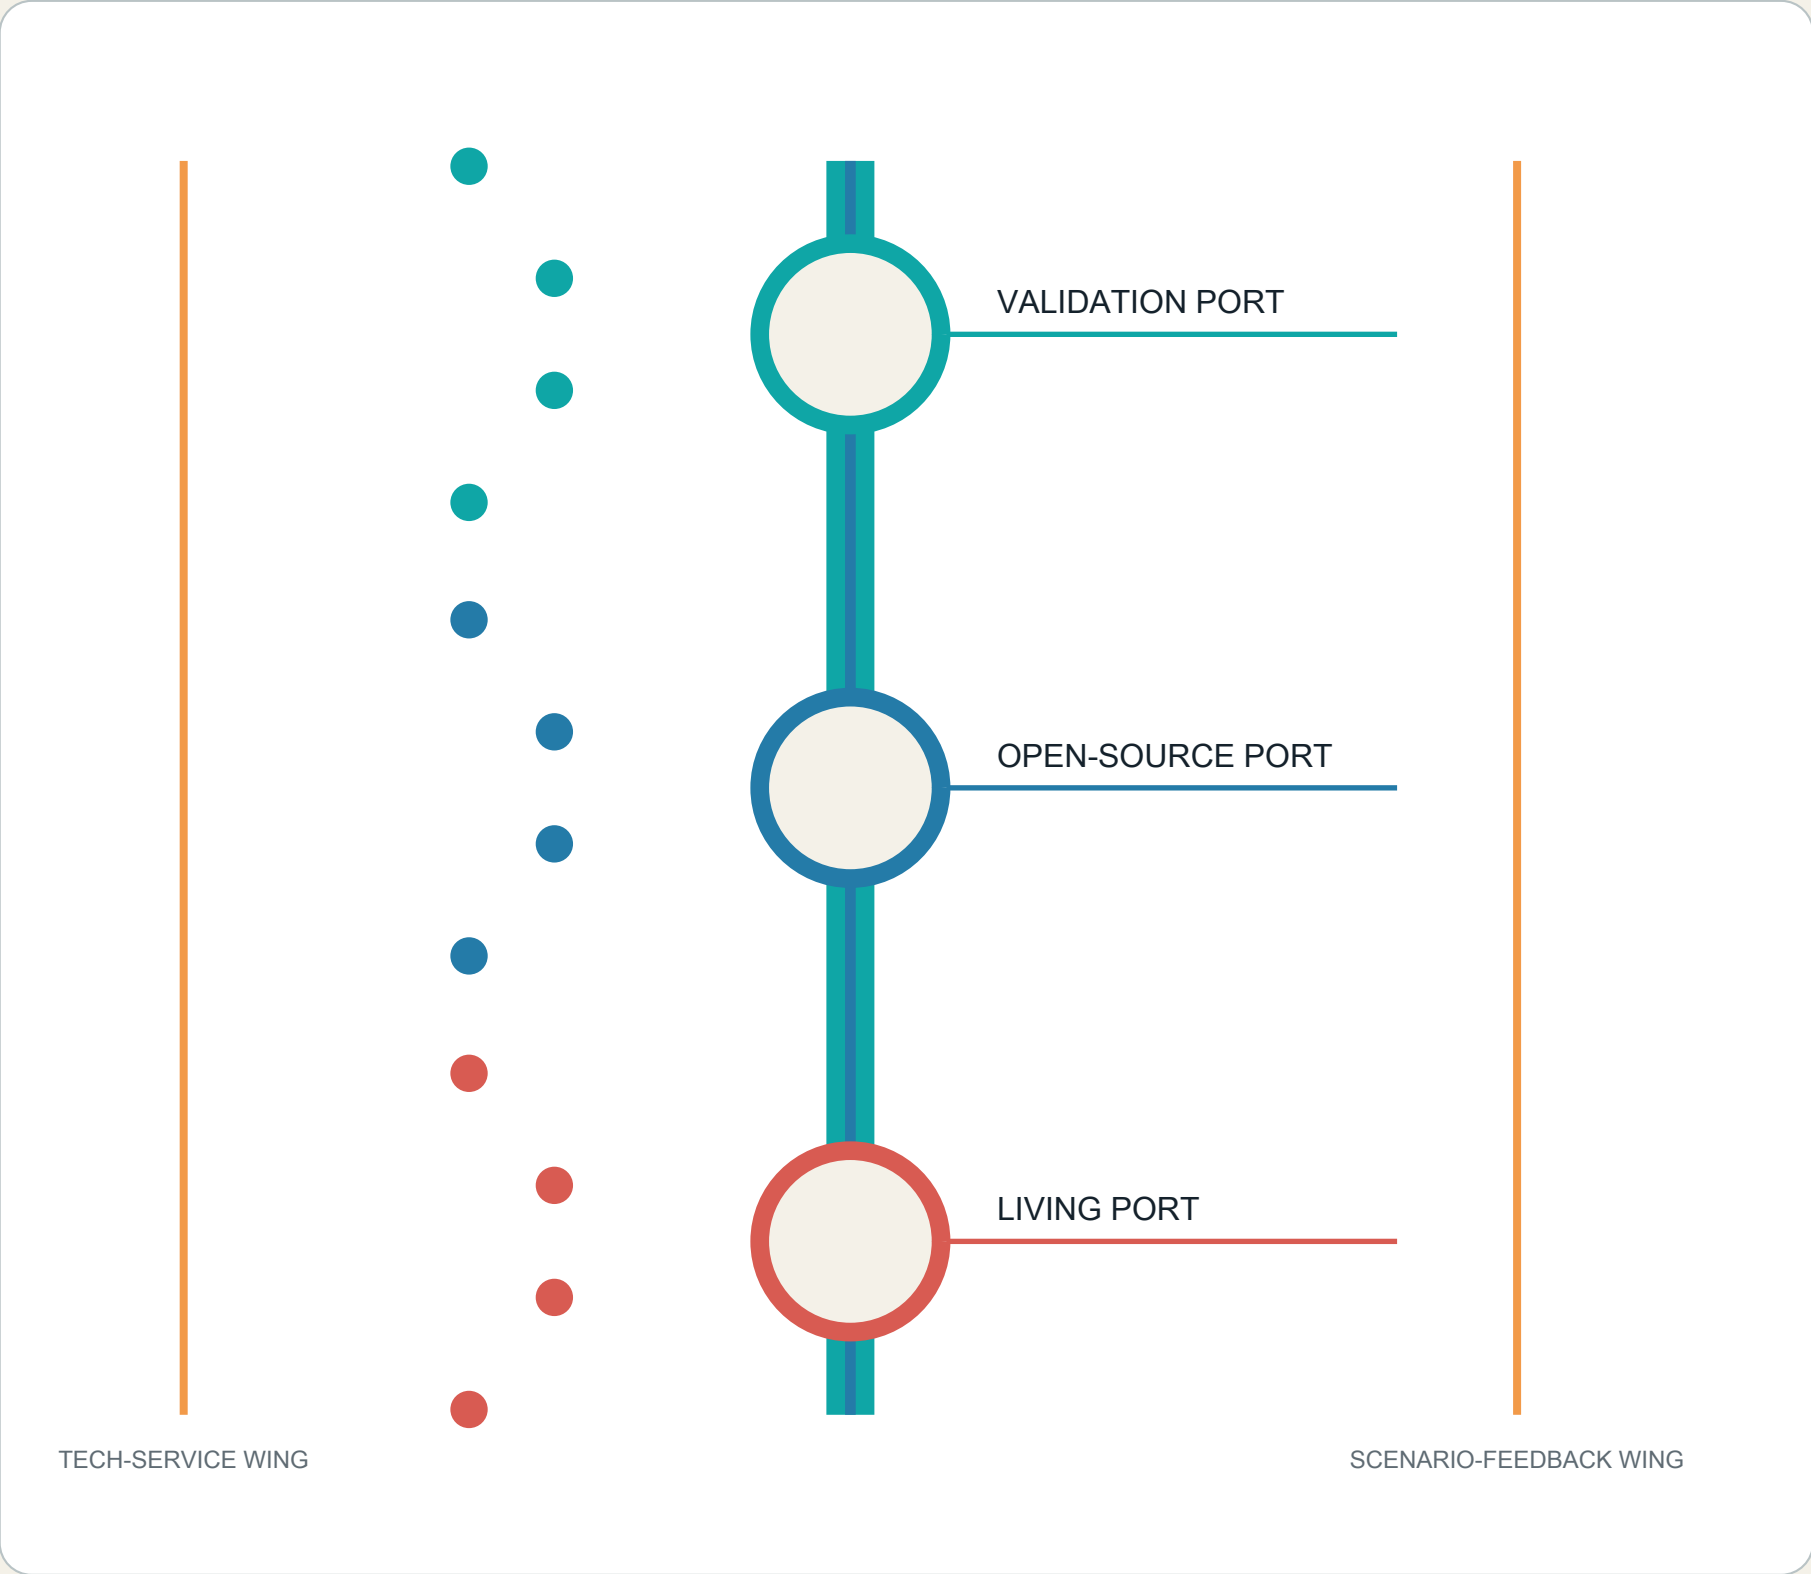

Each port has four interfaces, a 90-day flagship and a co-testing loop.

04 BOUNDARY DISCIPLINE

Provisional polygons support generation/display only; official geometry triggers full regeneration.

Overall Structure: One Spine, Three Ports, Two Wings, Twelve Interfaces

Ordinary walking and human service always precede the AI experience

SPINE

heritage commons, accessible walk, continuous cycle

PORTS

testing responsibility, open contribution, daily life

WINGS

service supply and scenario feedback form a loop

INTERFACES

free threshold, human desk, public protocol, removable kit

Falsification: if non-AI parity, red-card hold, human review or official-data recalculation fails, the interface closes by default.

Land Use and Renewal: Seven Shared-Cut Cells

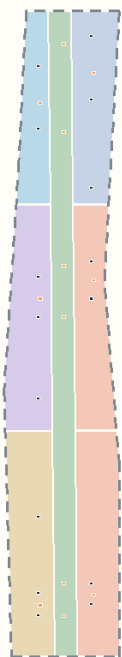

Complete provisional coverage without manufacturing statutory precision

{JZ} JZ COMMON PORTS

F02

SEVEN SHARED-CUT CELLS: COMPLETE, WITHOUT FALSE CONTROL PRECISION

Land-use topology + reversible envelopes + reuse-first tree + human-scale interface section

土地组织 / LAND ORGANIZATION

- 1401 park commons
- 0802 research
- 08 civic governance
- 0804 education
- 05 services
- 0701 living support

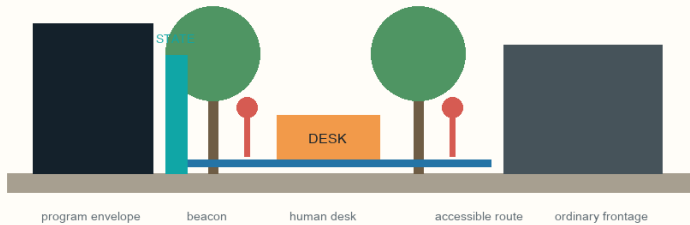

- 7 closed cells
- 100% provisional coverage
- 0 m² areal overlap
- 15 reversible envelopes

RETAIN / RENOVATE / DEMOLISH: EVIDENCE FIRST

- 01 survey + ownership + current use
- 02 structure + fire + heritage + civic value
- 03 retain first / low-impact reuse
- 04 demolition only after statutory alternatives

CURRENT STATE: ALL OBJECTS = SURVEY PENDING

人尺度接口剖面 / HUMAN-SCALE INTERFACE

CONCLUSION: THE SPATIAL MODEL IS RECALCULABLE; FAR, FLOOR AREA, HEIGHT, R/R/D AND ROAD REDLINES REMAIN UNKNOWN.

DATA → geometry/land_use.geojson + buildings.geojson · METRIC → land_use_coverage_ratio

PROVISIONAL ROUGH CONSTRAINT · CONCEPT DESIGN · NOT AN APPROVED PLAN

DESIGN DATA: 7 cells · 15 envelopes · provisional placement

01 RECALCULABLE

Seven cells cover the container with zero overlap; 15 envelopes carry programs only.

02 REUSE FIRST

Check ownership, structure, fire, heritage, current use and community value first.

03 PENDING CONTROLS

FAR, GFA, height, density, setback and intervention counts remain unknown.

04 HUMAN-SCALE INTERFACE

Ordinary route, human desk and quiet rest precede digital experience.

Building Strategy: Reuse First, Evidence Before Intervention

Fifteen objects are reversible program envelopes, not surveyed buildings or demolition decisions

15

program envelopes (about 1,502 m² each)

22,536 m²

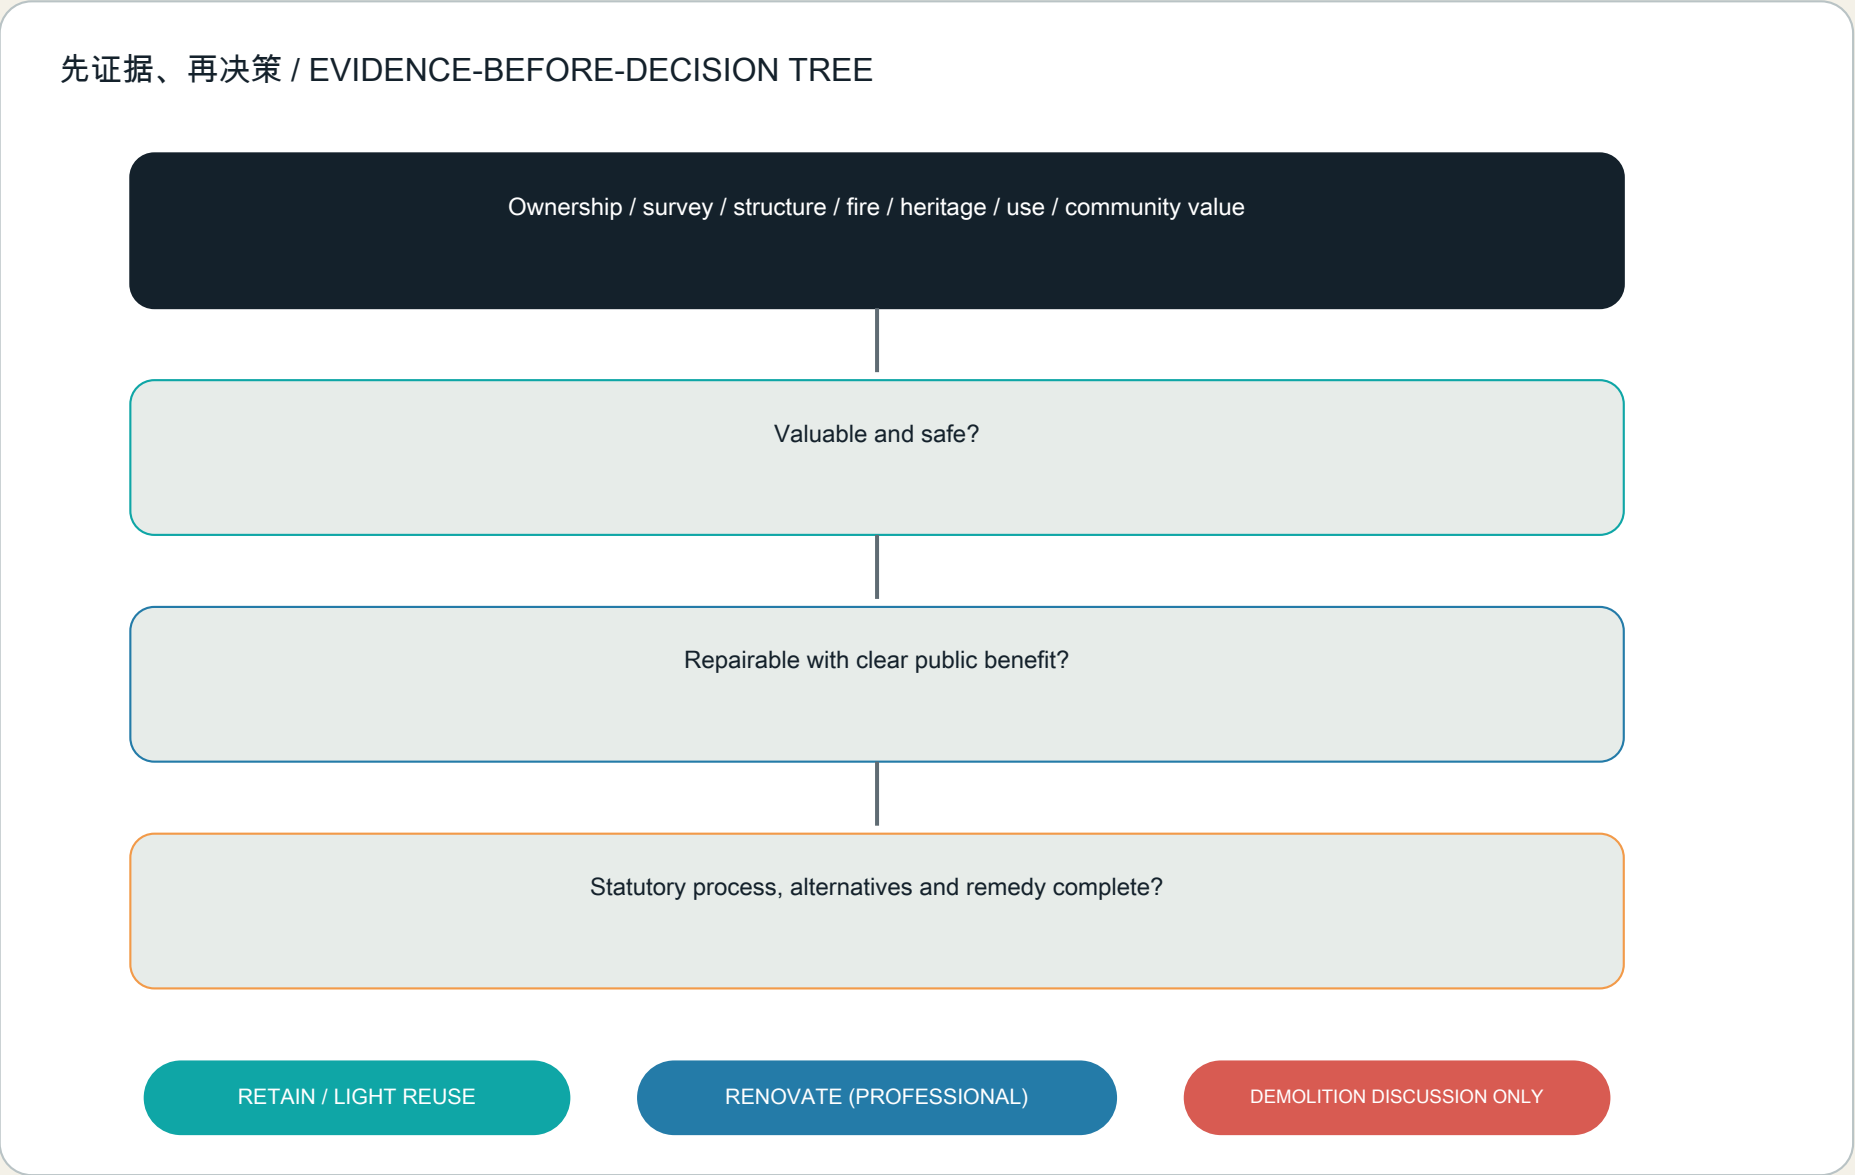

machine footprint total

0

retain/renovate/demolish conclusions

UNKNOWN

FAR / GFA / HEIGHT

三层可撤组件 / THREE REMOVABLE LAYERS

The diagram illustrates three removable layers of a building's program envelope, each with a colored box and associated functions:

- BASE** (green): access, shade, seating, light, human help
- INTERFACE** (blue): status beacon, paper protocol, tactile info, contribution
- EVENT** (purple): time-limited display and sandbox; expiry review

Gate 0: every object remains survey-pending until official geometry, ownership, building survey, heritage, fire and structure evidence arrives.

Transport and Public Services: Nine Conceptual Links

Accessible spine, cycleway, three cross-stitches, three port loops and a wing link

F04

JZ COMMON PORTS

ORDINARY ACCESS BEFORE AI EXPERIENCE

9 conceptual links + 3 continuous green reaches + 12 public interfaces; redlines, station access and capacity remain pending

NETWORK LEGEND

- walk/greenway
- cycleway
- blue-green commons
- public interface
- service link

9

links

3

port loops

17.21%

design green allocation

12

human-usable interfaces

UNKNOWN

redlines / entrances / parking

ACCESSIBILITY IS NOT A BUTTON

- 1 ARRIVE step-free ordinary route
- 2 IDENTIFY text + shape + tactile
- 3 REST shade, seating and quiet
- 4 ASK human, phone and paper
- 5 RESPOND red card and appeal
- 6 LEAVE no penalty for refusal

现场验证门 / FIELD EVIDENCE GATE

- co-inspection with children, older and disabled users
- AI routing uses inspected route status only
- refusal adds no distance, fee or waiting penalty
- bridges, entrances, redlines and 5/10/15-minute bands await data

PROVISIONAL ROUGH CONSTRAINT · CONCEPT DESIGN · NOT AN APPROVED PLAN

DATA: roads + green_space + public_space · NO ENGINEERING ALIGNMENT CLAIM

01 PUBLIC FIRST

Ordinary walking and human service precede AI routing.

02 ALIGNMENT DISCIPLINE

Machine length is not road mileage, a redline or engineering alignment.

03 CAPACITY GATE

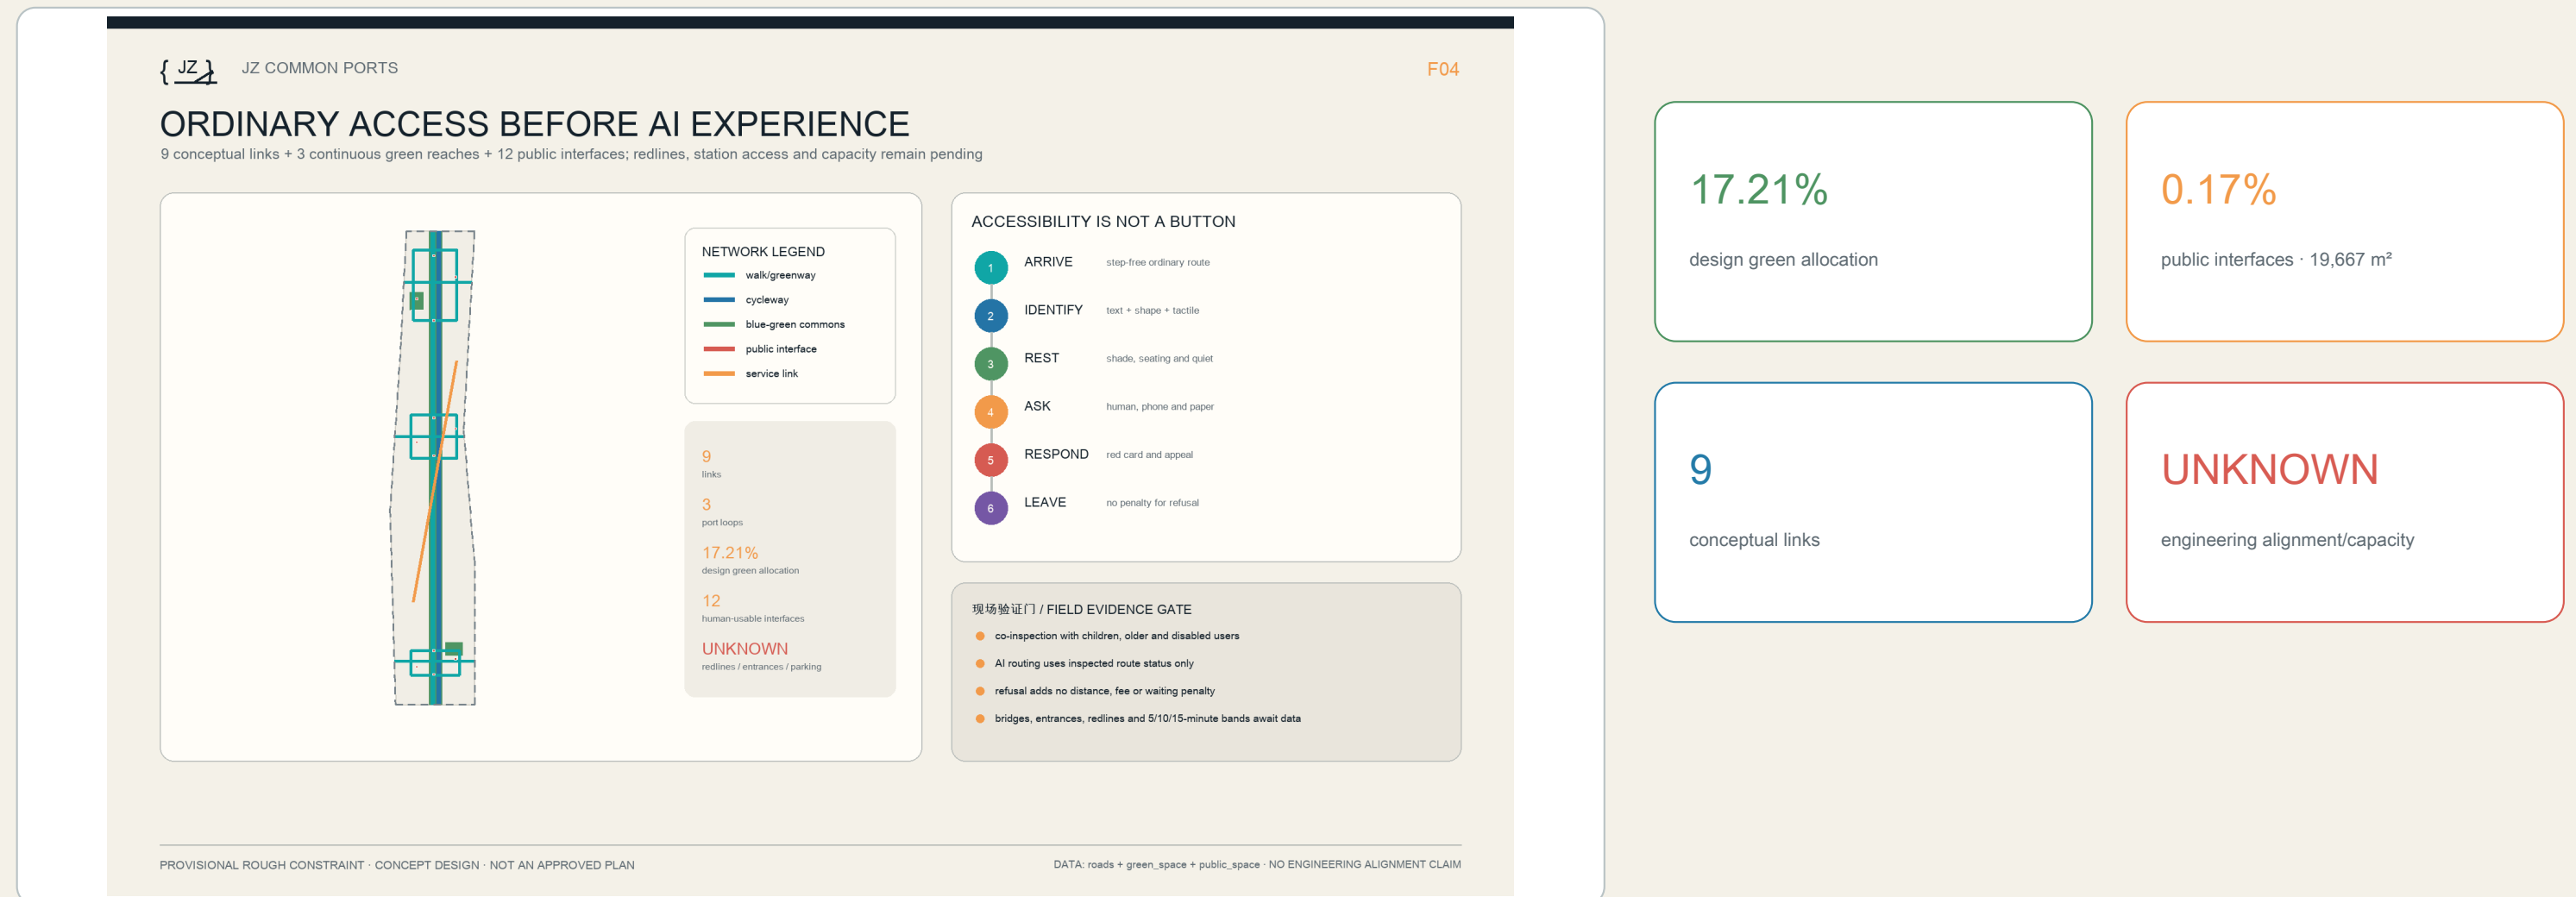

Permanent equipment requires power, heat, noise, fire, cybersecurity and maintenance checks.

04 PROFESSIONAL SURVEY

Station access, bridges, junctions, parking, rail and utility capacity remain pending.

Blue-Green Public Space and the Accessible Journey

Walking, blue-green space, human help and exit paths form one ordinary-use network

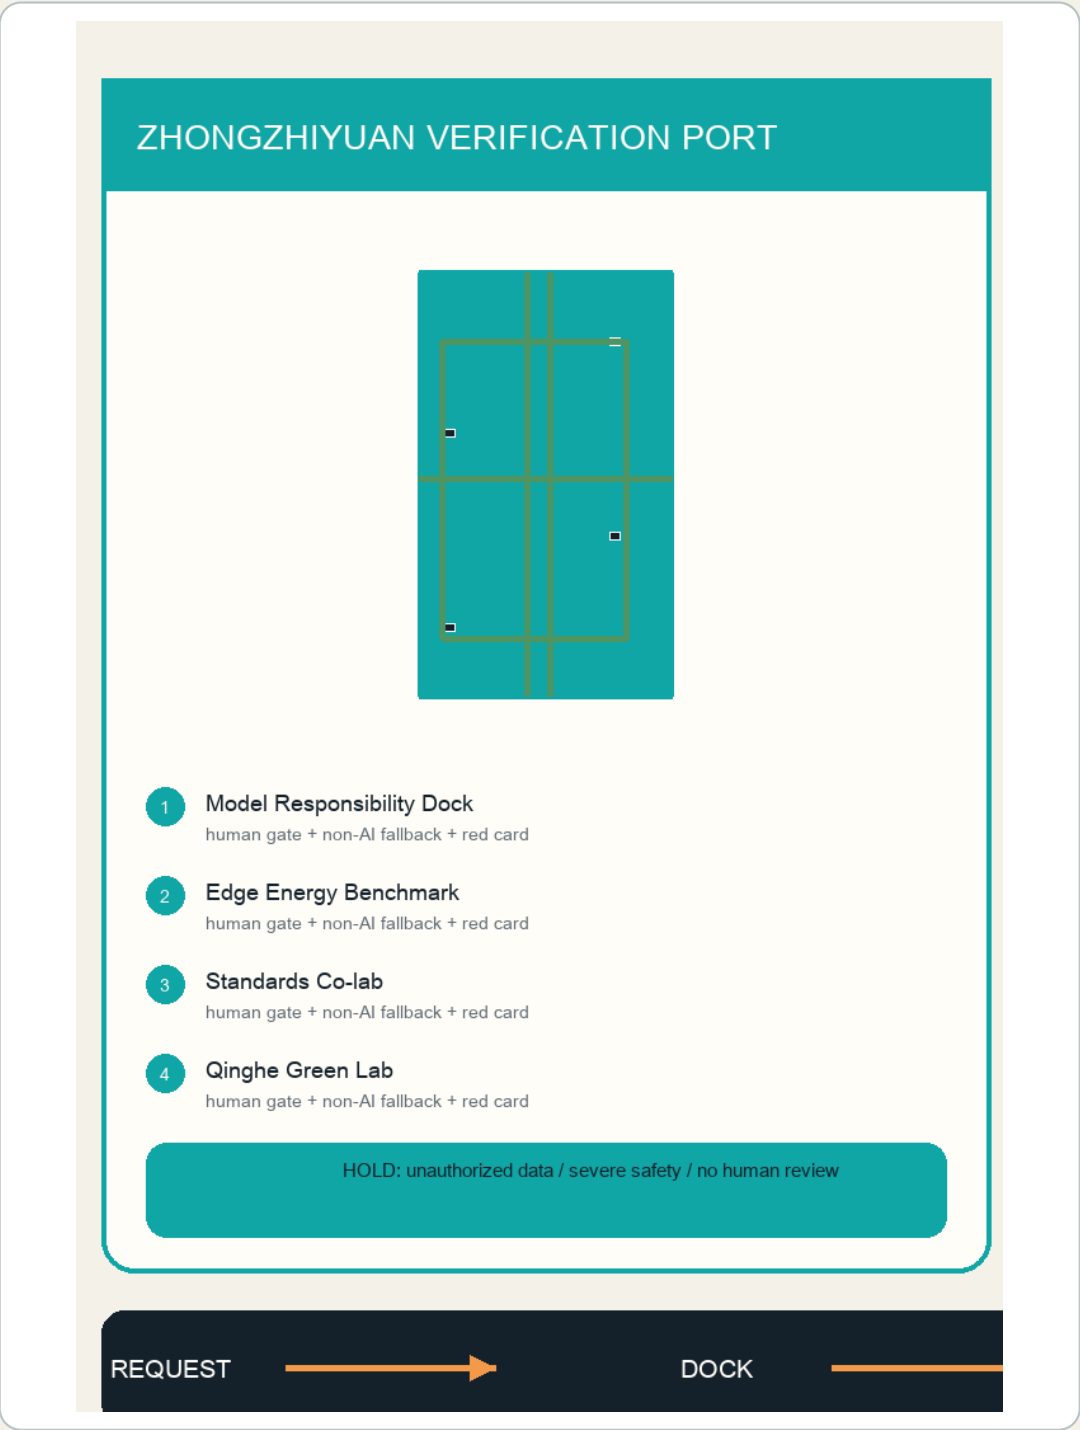

无障碍旅程 / ACCESSIBLE JOURNEY

Acceptance: phone-free wayfinding · continuous step-free route · seated reach · quiet rest · human/paper channels · no distance, fee or delay penalty for refusing AI.

SC-01 MODEL RESPONSIBILITY DOCK

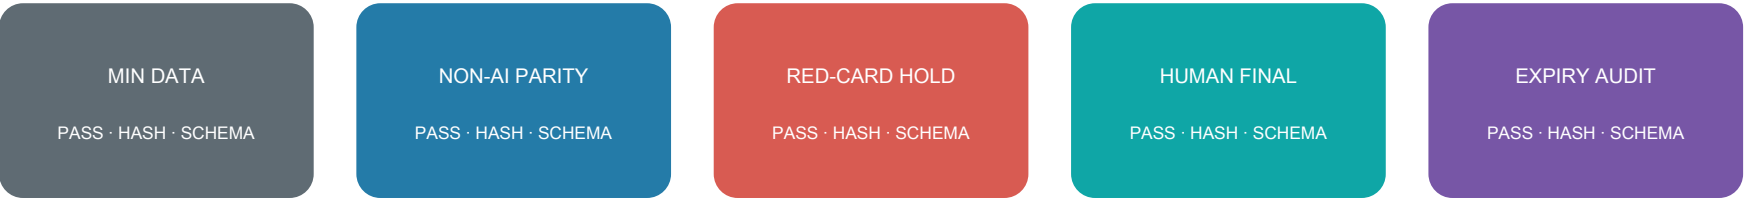

Deterministic synthetic fixtures prove internal consistency—not field performance

治理流程 / GOVERNANCE FLOW

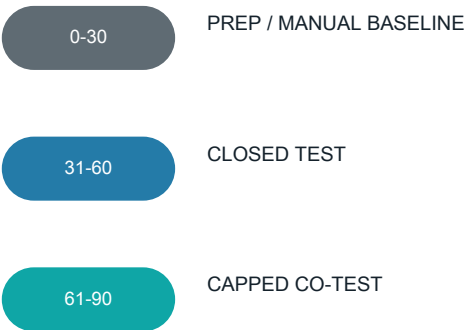

Default closed: if permission, accountability, human capacity, non-AI parity or the audit chain is missing, the interface does not open.

五项可复跑夹具 / FIVE REPLAYABLE FIXTURES

Offline: node visual/assets/replay-protocols.js --check — 5 tasks and 10 primary/counterfactual assertions per port; schema, hash, derived-control, energy or audit drift fails.

90 日上限 / 90-DAY CAP

- Affected-group steward has a red card
- Refusing AI never affects ordinary service
- A responsible qualified person makes the final decision

SC-05 OPEN-SOURCE RELEASE HALL

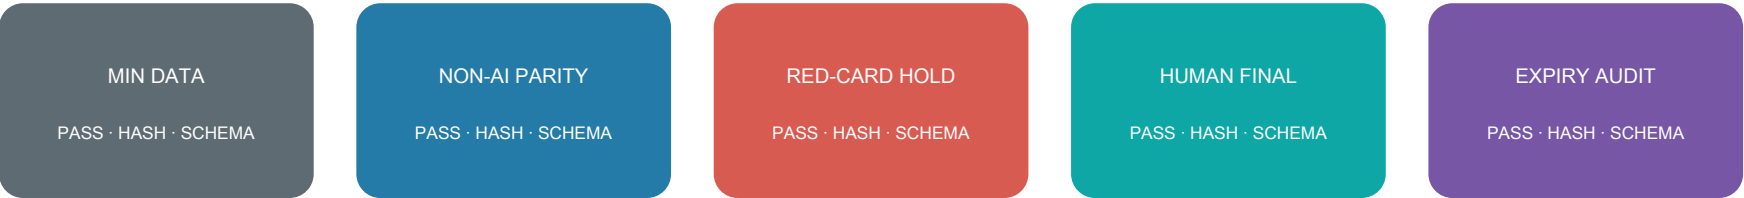

Deterministic synthetic fixtures prove internal consistency—not field performance

治理流程 / GOVERNANCE FLOW
