

JZ Public Ledger: A Verifiable AI Urban Loop

Overall structure and three key areas

JZ Public Ledger: spatial overview

Three loops put industry, daily life and public audit on one urban ground

PROVISIONAL CONSTRAINT · schematic, not measured scale · intake/discussion only · recalculate when official polygons arrive

One ledger, three loops, two wings

Land-use bands are a design skeleton, not a development commitment

PROVISIONAL CONSTRAINT · schematic, not measured scale · intake/discussion only · recalculate when official polygons arrive

Three Spatial Prototypes: Evidence + Interpretation

Trust testing, knowledge transfer and daily delivery under one public ledger

Zhongzhiyuan · Trust Garden

3-5m route · 20%~35% blue-green ground · 30-90 day review

Interpretive scene

AI Origin · Transfer Street

50%~70% public frontage · 40-120m² module · 40%~60% cover

Interpretive scene

Dazhongsi · Delivery Commons

8-15m hall · conflict-free delivery · staffed fallback

Interpretive scene

Provisional boundary and generated interpretation: not to scale, not site photography or regulation; recalculate with official data

Three Public-Value Interfaces and Reviewable Targets

Trust testing · knowledge transfer · daily delivery

Zhongzhiyuan · Trust Garden

Accessible ground, rain gardens, lightweight audit deck and public review

AI Origin · Transfer Street

Open-source hall, adaptable shared floors, prototype modules and community service

Dazhongsi · Delivery Commons

Station-city hall, controlled handoff, blue-green street and staffed service

Lay the public ledger on the walkable ground

Heritage park, blue-green space, nodes and stations form a walkable audit route

PROVISIONAL CONSTRAINT · schematic, not measured scale · intake/discussion only · recalculate when official polygons arrive

Metrics · evidence · recalculation

Structured data is authoritative; drawings are the human-reading layer

Design area

11,412,825

sqm

GeoJSON → EPSG:4548 → metrics.json

Green ratio

0.181

ratio

Public-ledger rule: every spatial suggestion carries provenance, accountability, human review and exit conditions.

Unknown regulatory, ownership, road, heritage and engineering conditions are not presented as settled metrics.
