

Autonomous Intelligence Belt

Autonomous Intelligence Belt

Centennial Jing-Zhang AI Innovation Belt urban design - open co-creation proposal

1909 self-reliant construction - 2026 autonomous intelligence

Zhongzhiyuan Autonomy Core - Origin Community Origin - Dazhongsi Confluence

Zhongguancun Tech-Services Wing - Xiaoyue River Scenario-Empowerment Wing

jiebaosystem x Claude (Sonnet) - concept proposal (not an approved plan)

All spatial recommendations are open co-creation proposals; provisional boundaries are for generation and display only

Design Basis & Three-Level Scope

Evidence chain: sources - geometry - metrics - matrices - proposal - delivery

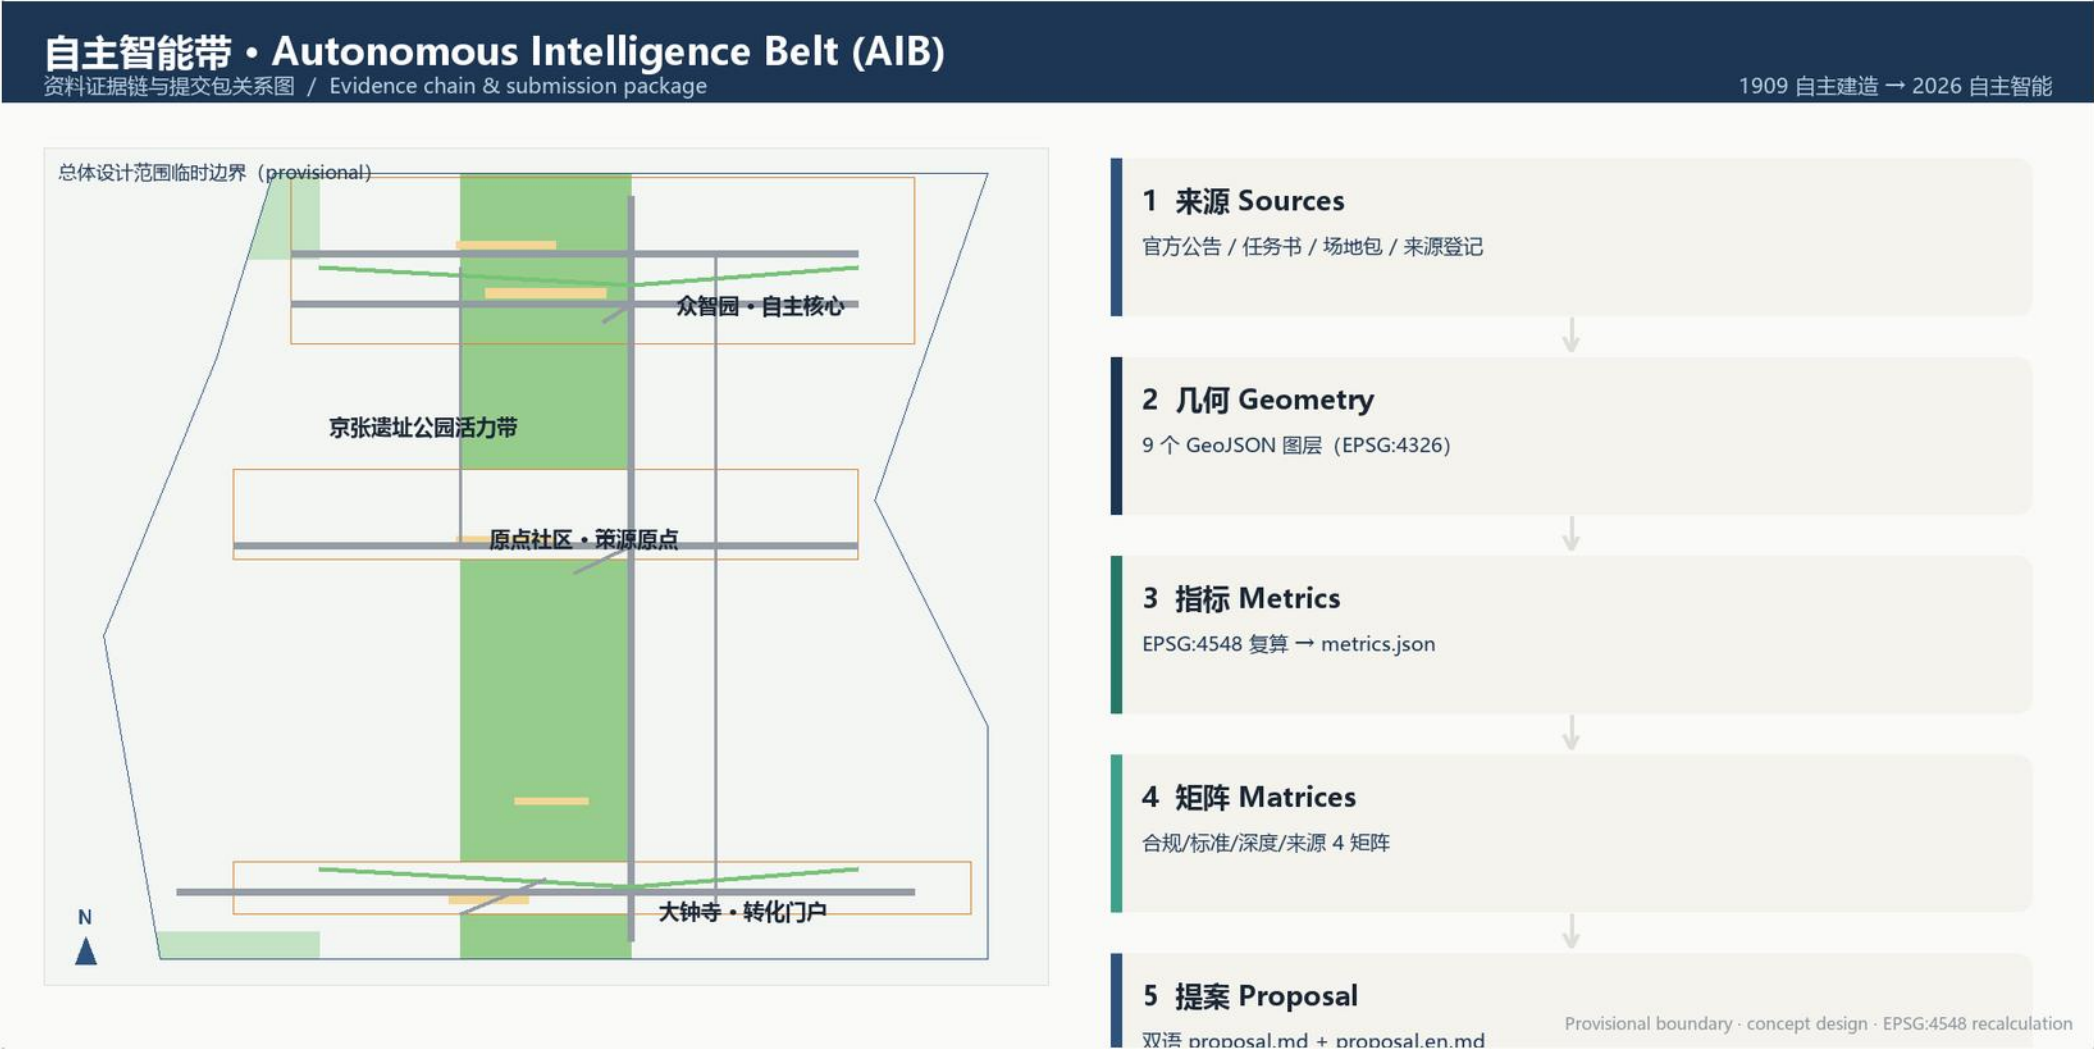

Fig.1 Evidence chain and submission package

Three-level scope

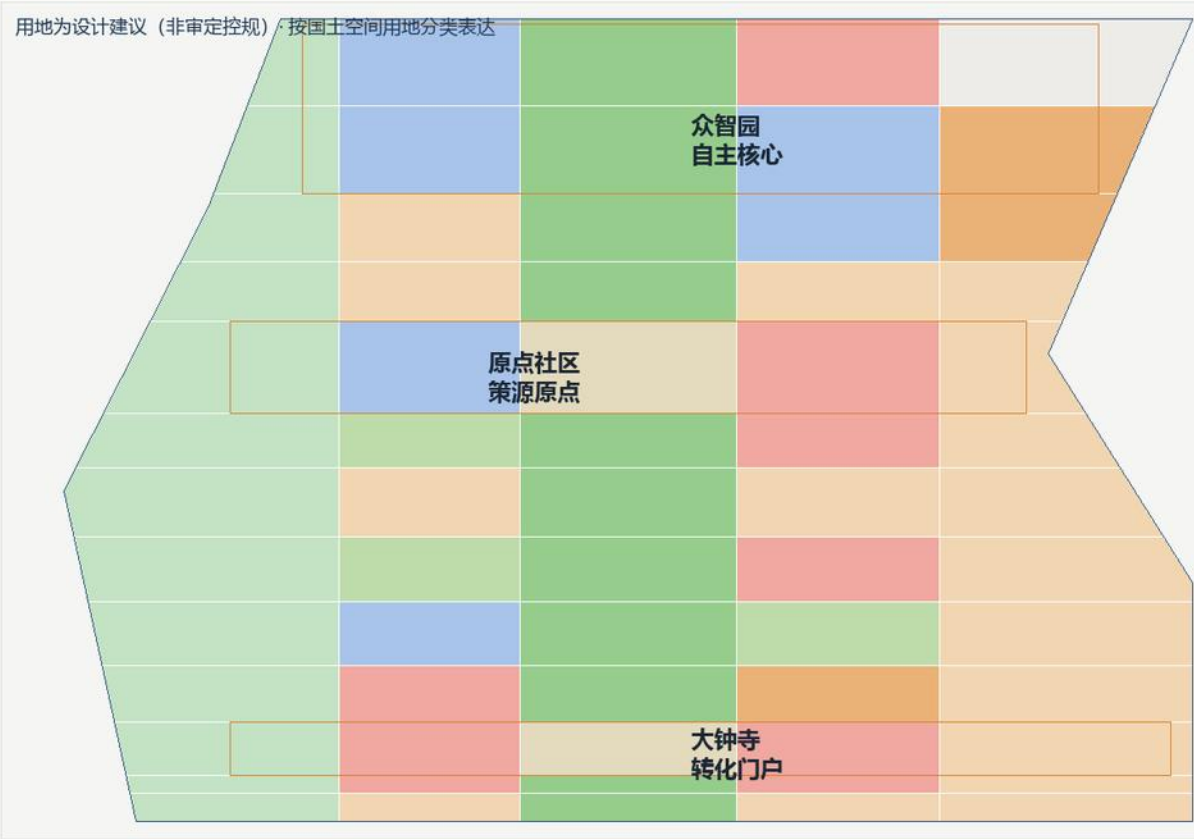

- Coordination scope (~43.6 km2): AI industry ecology, future urban form, regional coordination
- Overall design scope (~11.4 km2): urban renewal, land use, transport & municipal, character; urban design at regulatory-plan depth
- Key-area scope (368.4 ha): three areas at regulatory comprehensive implementation-plan depth
- The three scopes are delivered level by level through one autonomy loop: core - origin - confluence - feedback
- Areas, ratios and layer counts are recomputed in EPSG:4548; all 23 mandatory tasks have evidence

Overall Concept, Naming & Land-Use Structure

One belt, three cores, two wings, double loops - heritage-park vitality spine

三层范围与空间工作框架

一带三核两翼·京张遗址公园活力带为脊柱 / Land-use structure (design proposal)

三层范围 → 三级落实

同一套「自主回路」逐级递进

统筹研究范围 • 43.6 km²

AI 产业生态、未来城市形态、区域协同
自主核心—策源原点—转化门户—两翼赋能

总体设计范围 • 11.4 km²

城市更新、用地、交通市政、风貌
控规深度的城市设计

重点区域范围 • 368.4 ha

三处片区规划综合实施方案深度
众智园 / 原点社区 / 大钟寺

用地图例（国土空间分类代码）

0701 城镇住宅	0702 社区服务
0802 科研	0803 文化
0804 教育	05 商业服务业
1401 公园绿地	1402 防护绿地
1403 广场	16 留白

注：用地/比例可由 GeoJSON 在 EPSG:4548 复算

Land-use parcels are design proposals; official regulatory plan pending

Fig.2 Three-level scope and land-use structure (design proposal)

Naming & logo

- Primary name: Autonomous Intelligence Belt (AIB / Zi-Zhi-Belt), A = Autonomy + AI
- Zhongzhiyuan Autonomy Core / Origin Community Origin / Dazhongsi Confluence / Zhongguancun Tech-Services Wing / Xiaoyue River Scenario-Empowerment
- Logo: the 'zig-zag' track and circuit loop share a form; two crossing lines make the letter A in Jing-Zhang steel blue + intelligence teal
- Land use is a design proposal (not an approved regulatory plan), expressed in national land-use codes, seamless and non-overlapping

Three capability levels of the autonomy loop, at comprehensive implementation-plan depth

- Zhongzhiyuan: compute, land and municipal conditions pending; test grounds must be compatible with ecological safety
- Origin Community: campus boundary, ownership, ground-floor uses pending; campus-adjacent slow mobility must follow campus rules
- Dazhongsi: station retrofit and municipal sequencing depend on official conditions; pitch and display require rights clearance
- All polygons are provisional; conclusions are directional design only

Mobility, Green & Public-Space Composite System

Zig-zag double loop + spine greenway - transit-station integration

交通慢行与蓝绿公共空间复合系统

人字形双环 + 脊柱绿道 · 轨道站点一体化 · 慢行断点缝合

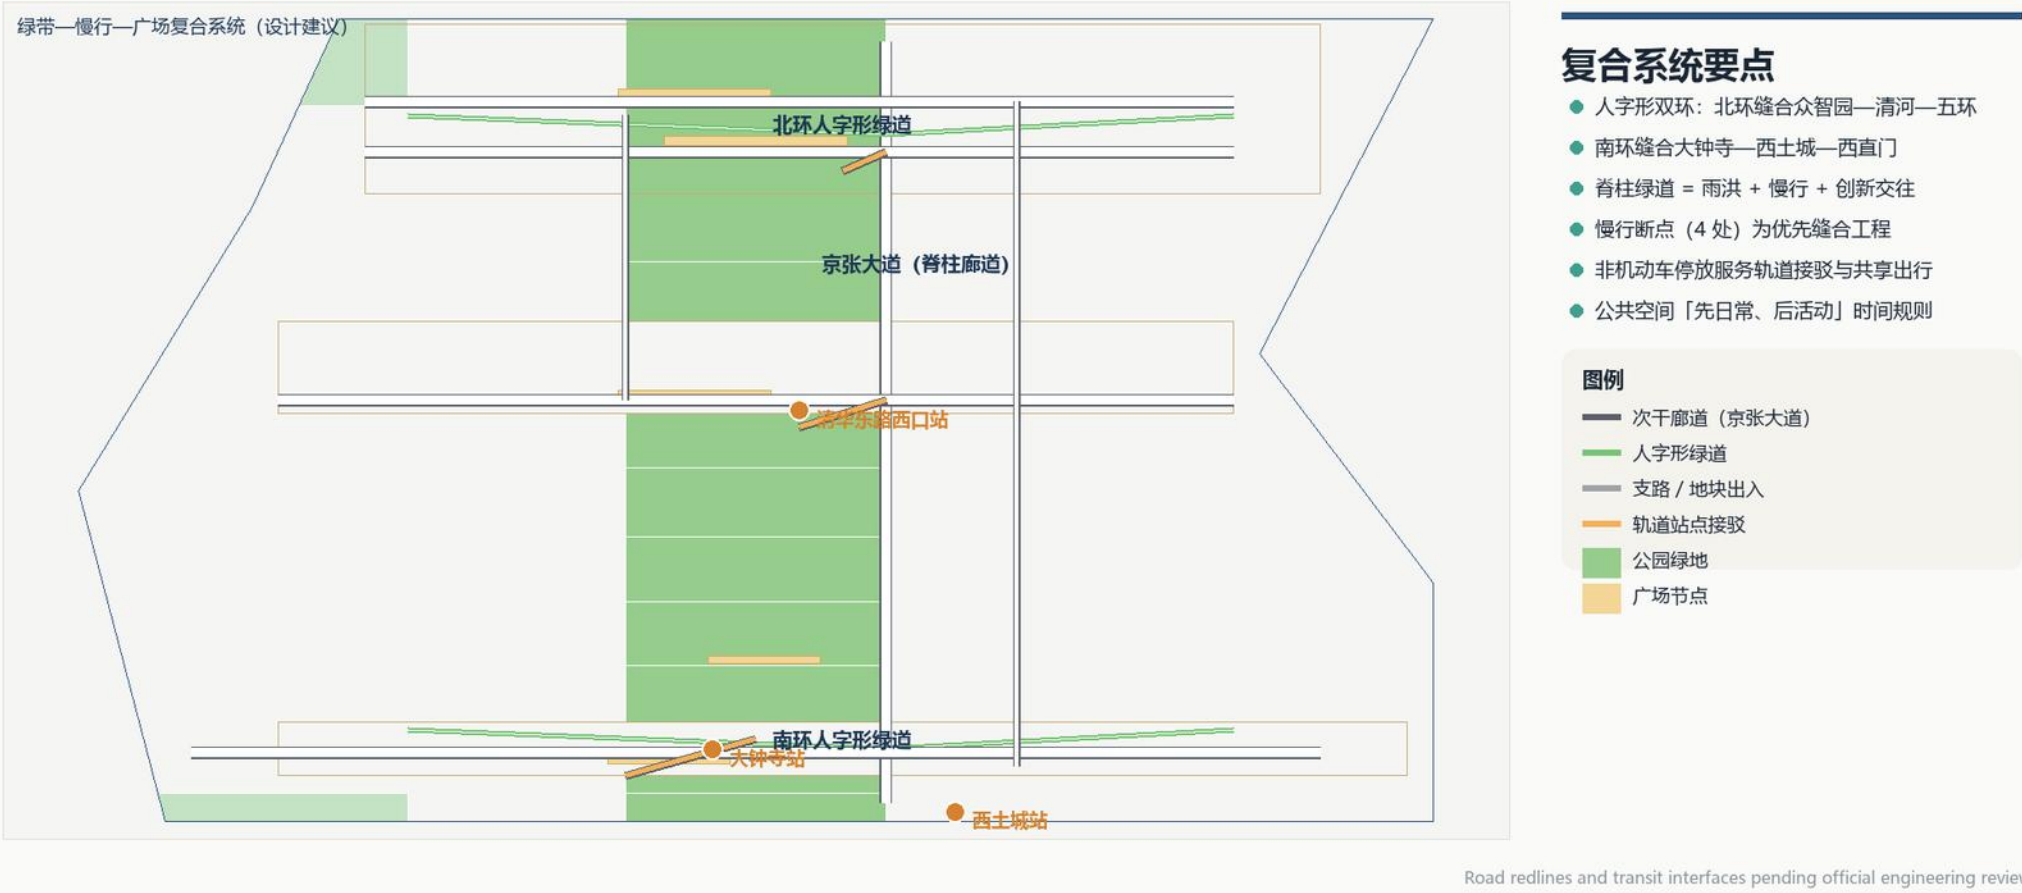

Fig.4 Mobility - blue-green - public-space composite system

System essentials

- Jing-Zhang Ave is the spine corridor; the north loop stitches Zhongzhiyuan-Qinghe-5th Ring and the south loop stitches Dazhongsi-Xitucheng-Xizhimen
- Transit-station integration covers Dazhongsi, Tsinghua East Rd West and Xitucheng stations
- Four slow-mobility gaps are priority stitching works; cycle parking serves transit interchange and shared mobility
- Public space: 'daily first, events second'; road redlines and transit interfaces lack engineering conditions and await professional review

AI Scenarios & Talent Personas

13 scenario cards (4 industry test) - 6 user personas

Industry test-and-validation scenarios (SC-01/02/03/09)

- SC-01 Open LLM evaluation ground (Zhongzhiyuan) - SC-02 Edge-AI & embodied-intelligence test street (by Qinghe)
- SC-03 Data-element compliance sandbox (Dazhongsi) - SC-09 AI traffic-coordination pilot (south segment)
- All use rights-cleared/synthetic data with human review, stop and substitution mechanisms

Other scenario cards (SC-04/05/06/07/08/10/11/12/13)

- Open-source release hall - result-commercialisation post - talent parlour - AI-agent display street - international pitch parlour
- Jing-Zhang AI slow-mobility guide - public-safety drills - living-service model street - Qinghe low-carbon smart waterfront

Six user personas

- LLM/chip researchers -> Zhongzhiyuan core R&D and test clusters
- Open-source developers & independent creators -> Origin release hall and public code wall
- Startups & serial founders -> Zhongzhiyuan shared test ground and Origin incubator
- AI-agent firms / investors / international visitors -> Dazhongsi international pitch parlour
- Residents & families -> Jing-Zhang heritage-park vitality spine and community services
- University students & returning talent -> Origin result-commercialisation street and talent housing

AI data boundaries

- Purpose-bound and minimal input; outputs show data date, confidence and responsible party
- No personal behaviour tracking, no unauthorised profiling, no resident credit scoring

Metrics, Implementation & Phasing

Every known metric is recomputable from submitted geometry in EPSG:4548

核心指标复算与证据链

每个 known 指标均可由提交几何在 EPSG:4548 复算 / Metric recomputation & evidence

指标 metric	含义	复算值	说明	来源文件	置信度
site_area_sqm	总体设计范围面积	11,412,825.4 m²	≈ 11.41 km²	site_boundary.geojson	high
green_space_area_sqm	绿色空间面积	2,212,765.7 m²		green_space.geojson	medium
green_ratio	绿地比例	19.39 %		green_space / site	medium
public_space_area_sqm	公共空间面积	69,608.0 m²	广场节点口径	public_space.geojson	medium
public_space_ratio	公共空间比例	0.61 %	线性空间未另计	public_space / site	medium
building_footprint_area_sqm	建筑基底面积	101,324.4 m²	设计载体口径	buildings.geojson	medium
key_area_area_total_sqm	重点区面积合计	3,692,893.0 m²	与公告 368.4ha 差 <3%	key_areas.geojson	medium

待确认管控指标 (unknown)

容积率 / 建筑高度 / 建筑密度 / 退线 / 道路红线 / 总建筑面积 —— 缺官方控规，统一标注 unknown 并给出补数路径

复算链路

模型有误差 / 数据有误差 / 指标有误差 / 指标有误差 / 指标有误差 / 指标有误差

All areas recomputed from submitted geometry in EPSG:4548

Fig.5 Core metric recalculation and evidence chain

Renewal projects (6) and phasing

- JZ-01 Heritage-park gap stitching - JZ-02 Qinghe innovation interface - JZ-03 Campus-adjacent commercialisation street
- JZ-04 Dazhongsi four-quadrant walkability - JZ-05 AI public services & edge-compute nodes - JZ-06 Global AI week public route
- PHASE-001 Near-term pilot (south) - PHASE-002 Mid-term renewal (middle) - PHASE-003 Long-term upgrade (north)
- Projects lacking ownership, funding, delivery body or approval path are recorded as implementation risks, not delivery commitments

Risks, Copyright & Compliance

Six gates are executed before submission

Four risk classes

- Data & boundary: official boundaries/plans/ownership/redlines/municipal works are not public; the package is recomputed when official polygons arrive
- Copyright & privacy: landmarks, signage, logo, fonts, images, people and corporate marks must be rights-cleared
- False precision: FAR, height, keep/renovate/demolish, redlines and engineering feasibility stay pending without official conditions
- Operations: annual events, attraction, funding, policy and operation arrangements are concept suggestions, not government commitments

Compliance & gates

- Bilingual equivalence: proposal.md (zh) + proposal.en.md (en); A3/A0/HTML/text-bearing figures are substantively equivalent
- Six gates: sources reachable - geometry valid - metrics consistent - matrix closed - bilingual equivalent - rights cleared
- HTML is offline static with no remote scripts/fonts/tiles/forms/iframes/APIs and no reviewer tracking
- This proposal claims no official approval, ratified plan, final ownership or guaranteed implementation
