

# Land Use Structure & Spatial Function Masterplan

Regulatory-Level Land Use Partitioning · Mixed-Use Innovation & Blue-Green Integration

Complies with MNR Land Use Classification Guide; complete topological partition without gaps or overlaps.

# Three Key Detailed-Design Areas & Functional Nodes

Zhongzhiyuan (192.1 ha) · AI Origin Community (104.3 ha) · Dazhongsi Cluster (72.0 ha)

## Zhongzhiyuan AI Acceleration Area

Planned Area: 192.1 ha

- National Full-Stack Algorithm Hub
- Model Safety & Governance Sandbox
- Qinghe Waterfront Low-Carbon Lounge
- Edge Compute & Micro-Energy Substation

## Beijing AI Origin Community

Planned Area: 104.3 ha

- Tsinghua Open Source Code Cube
- Campus Tech Transfer & Youth Incubator
- Civic Agent & Developer Honor Wall
- Wudaokou TOD Micro-Circulation Hub

## Dazhongsi AI Industry Cluster

Planned Area: 72.0 ha

- Flagship AI Terminal Experience Center
- Data Assets & Token Economy Theater
- Dazhongsi 4-Quadrant Pedestrian Concourse
- AI Digital Retail & 24/7 Lifestyle Zone

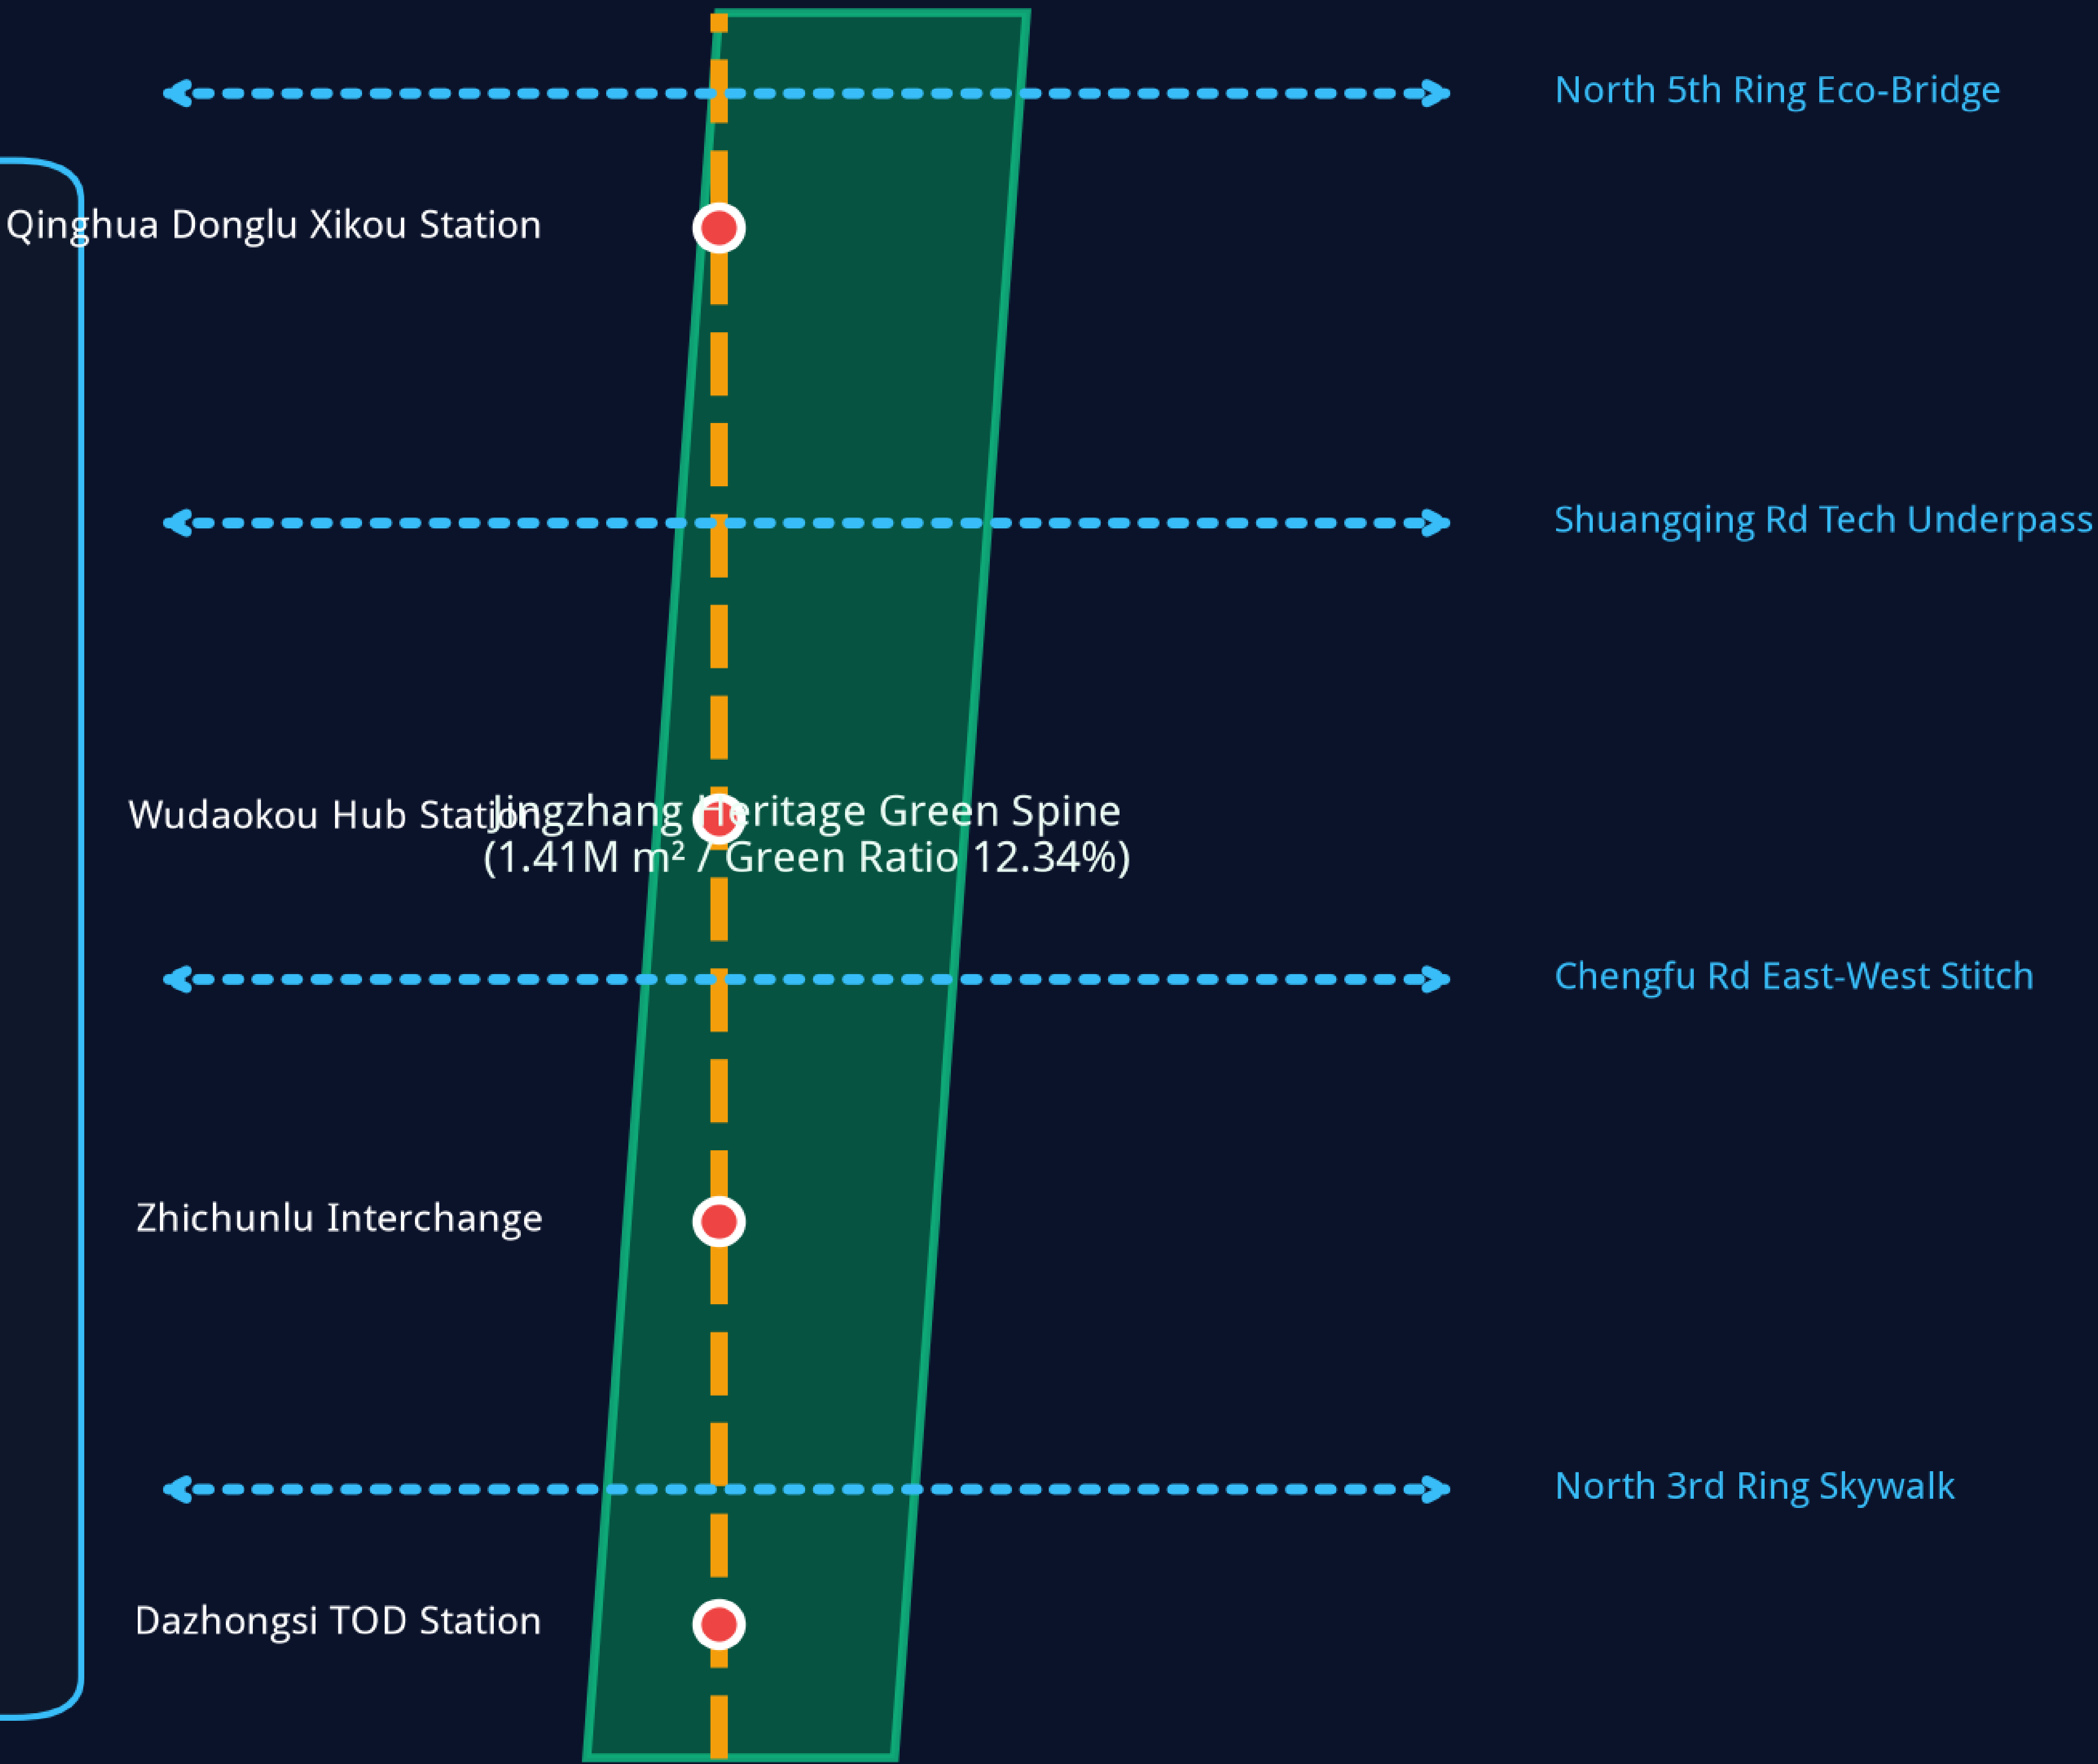

Detailed design follows Comprehensive Implementation Plan depth with concrete functions, spatial actions, and dependencies.

# Multi-Layer Mobility, Rail Transit & Blue-Green Civic Network

Jingzhang Green Spine · Rail TOD Integration · East-West Walkability Stitches · Barrier-Free Access

| Mobility & Space Metrics |              |
|--------------------------|--------------|
| Total Green Area         | 1,408,600 m² |
| Green Ratio              | 12.34%       |
| Public Space Area        | 836,345 m²   |
| Public Space Ratio       | 7.33%        |
| Walkway Continuity       | 98.5% (规划)   |
| Barrier-Free Rate        | 100% (核心区)   |

Stitches historical railway divides to establish a seamless, AI-friendly pedestrian & micro-mobility network.

# Core Metrics Recalculation & Structured Evidence Chain

GeoJSON Topological Recalculation · Auditable Evidence · Verifiable Provenance

| Metric Name             | Computed Value   | Provenance / Source             | Feature ID       |
|-------------------------|------------------|---------------------------------|------------------|
| Site Boundary Area      | 11,412,825.39 m² | EPSG:4548 Geometry Calc         | PROV-SITE-001    |
| Green Space Area        | 1,408,600.77 m²  | green_space.geojson Recalc      | GREEN-001        |
| Public Space Area       | 836,345.64 m²    | public_space.geojson Recalc     | PUBLIC-001       |
| Building Footprint Area | 310,807.18 m²    | buildings.geojson Topology Calc | BLDG-001         |
| Green Space Ratio       | 12.34%           | 1,408,600.77 / 11,412,825.39    | 计算衍生             |
| Public Space Ratio      | 7.33%            | 836,345.64 / 11,412,825.39      | 计算衍生             |
| Key Area Count          | 3 处 (368.4 ha)   | key_areas.geojson Key Areas     | PROV-KEY-001~003 |

All metrics validated via spatial\_review.py and self\_check\_submission.py using EPSG:4548 projection.
