

ALL SHIFTS JING-ZHANG / PHASE 02

OVERALL MASTERPLAN | ONE CIVIC SPINE, THREE SHIFT YARDS

Block texture, public ground floors, service wings and 12 stations; provisional geometry stays an evidence note.

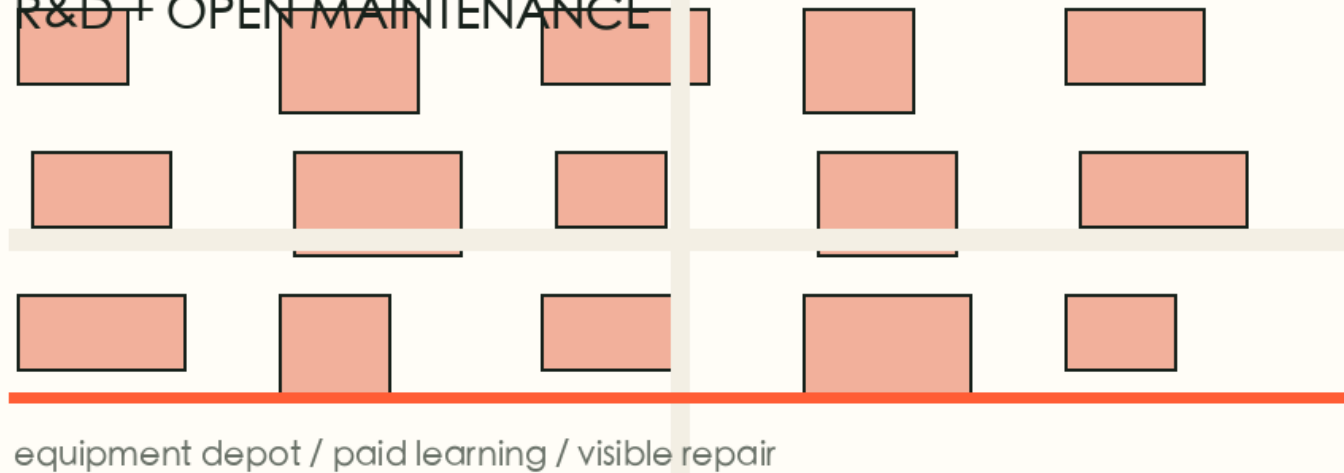

PROVISIONAL ROUGH GEOMETRY | NOT AN OFFICIAL REDLINE: RECALCULATE AFTER OFFICIAL POLYGON RELEASE

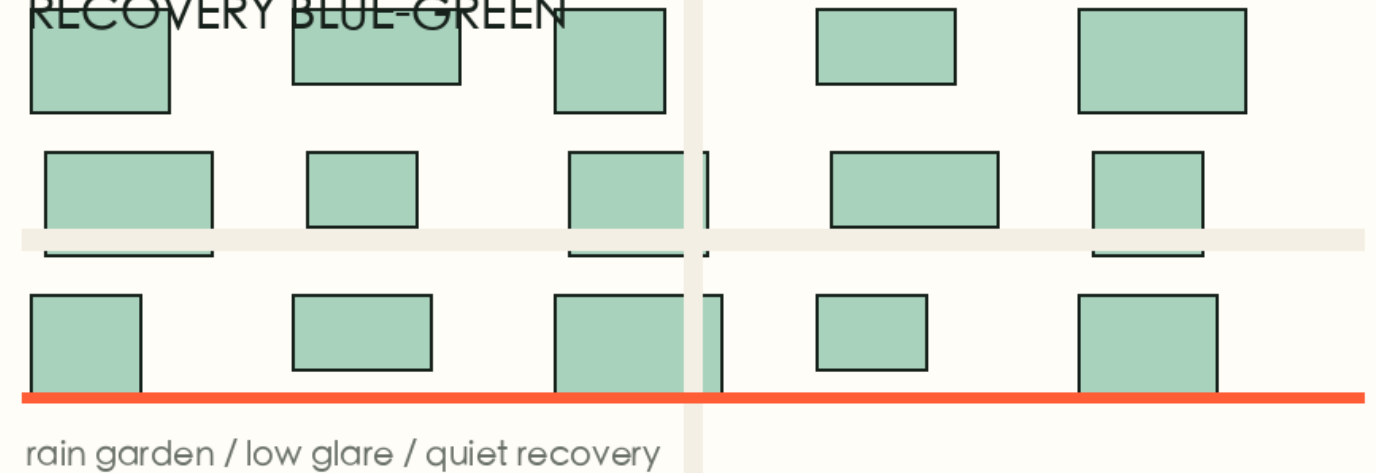

CITY FORM FIRST | PUBLIC GROUND FLOORS MAKE AN EVERYDAY

Four concept zones become blocks, frontages, courts and day/night use rules—not abstract color bands.

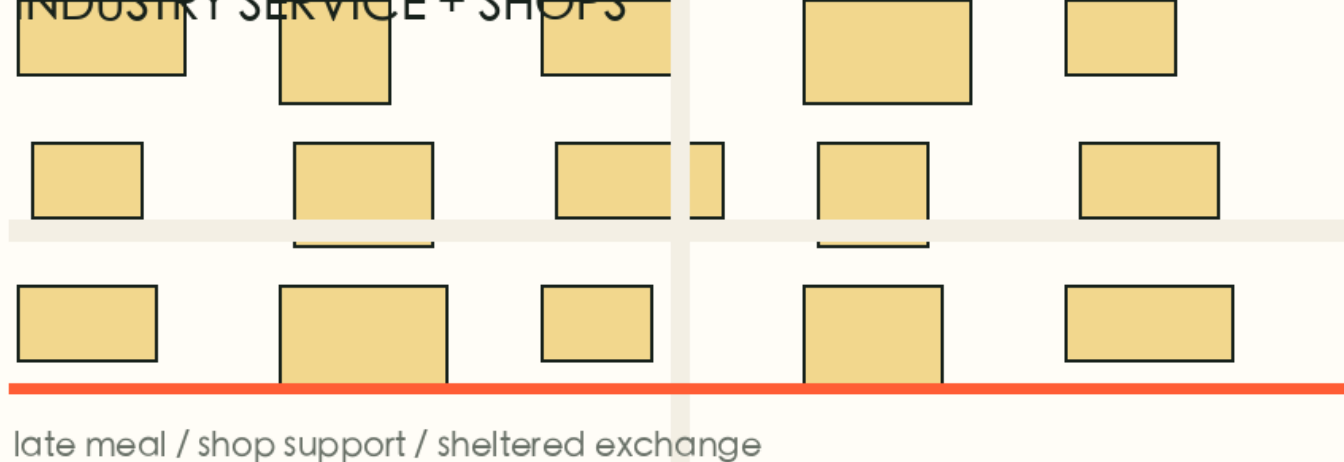

R&D + OPEN MAINTENANCE

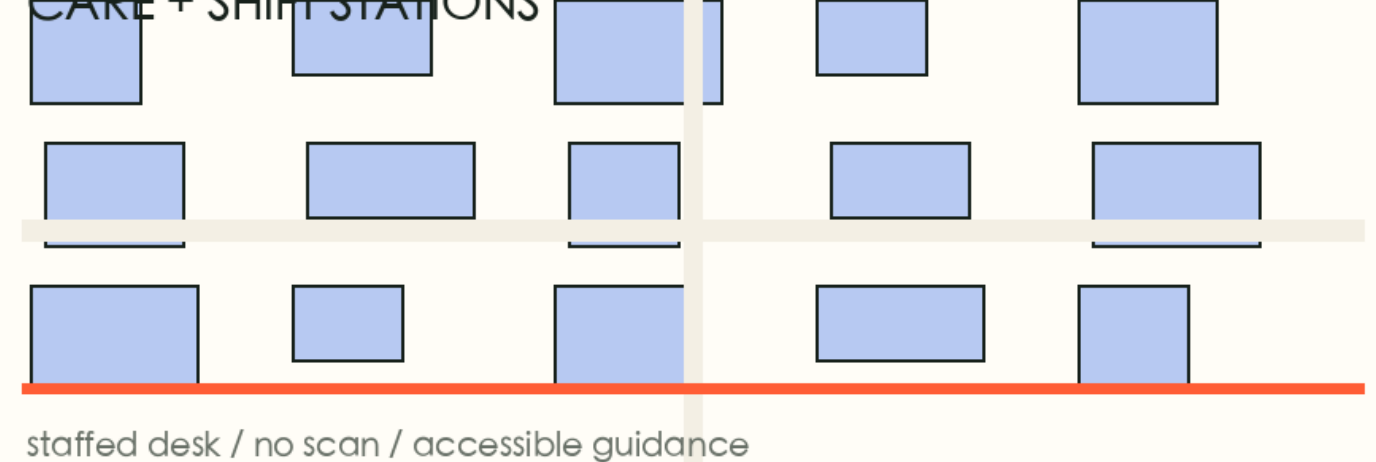

RECOVERY BLUE-GREEN

INDUSTRY SERVICE + SHOPS

CARE + SHIFT STATIONS

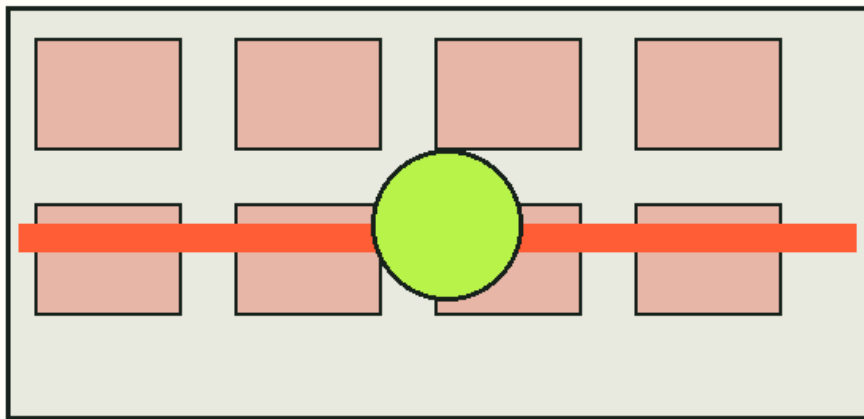

GROUND-FLOOR RULE 01 At least one staffed public entrance along the spine; prototype area bands await title, fire and site checks.

THREE SHIFT YARDS | PLAN + SECTION + GROUND FLOOR + G0-G4

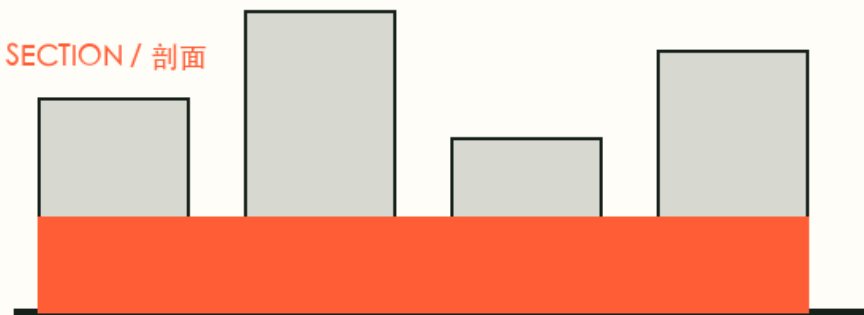

One ethic, three spatial roles: maintenance, handover and exchange.

MAINTENANCE YARD

PLAN / 平面

SECTION / 剖面

PUBLIC GROUND FLOOR

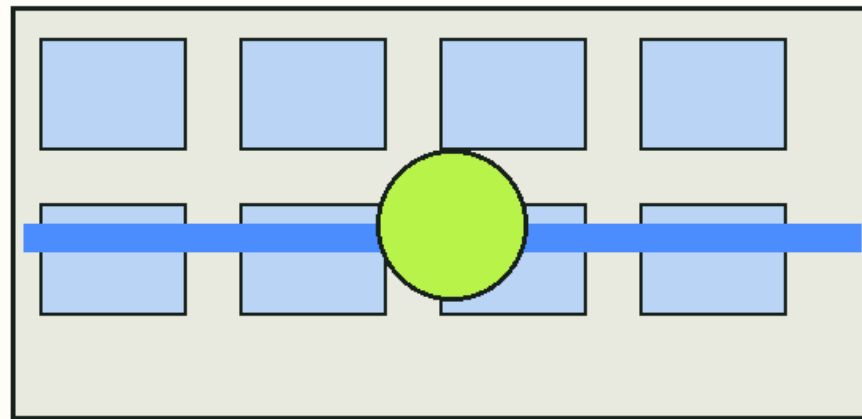

- 01 open maintenance depot
- 02 equipment test lane
- 03 recovery garden

G0 G1 G2 G3 G4

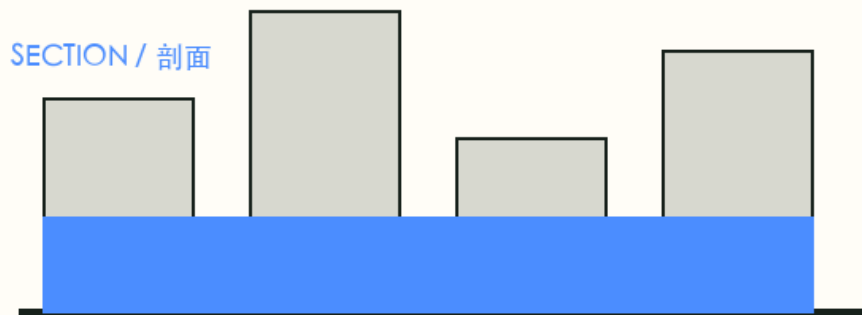

HANDOVER YARD

PLAN / 平面

SECTION / 剖面

PUBLIC GROUND FLOOR

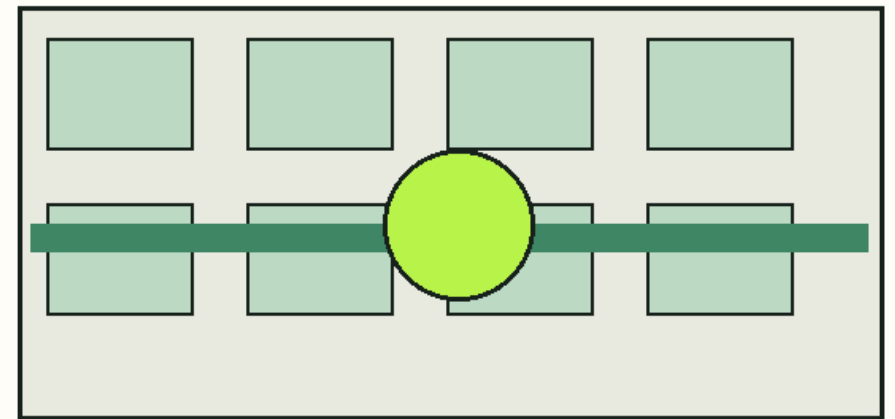

- 01 staffed handover desk
- 02 quiet recovery room
- 03 no-scan late meal

G0 G1 G2 G3 G4

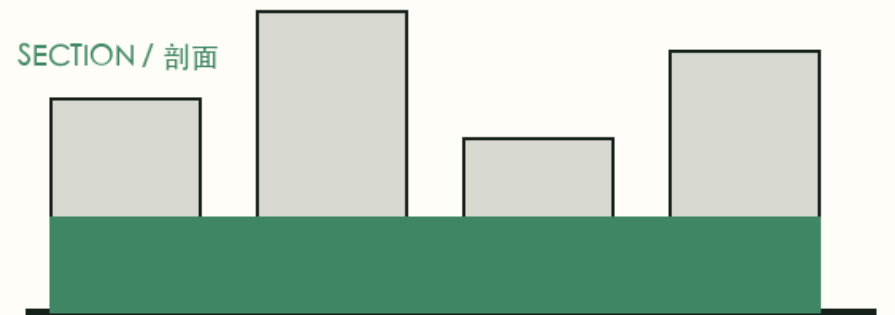

EXCHANGE YARD

PLAN / 平面

SECTION / 剖面

PUBLIC GROUND FLOOR

- 01 courier exchange bay
- 02 24H public table
- 03 shop-support frontage

G0 G1 G2 G3 G4

SHIFT STATION PROTOTYPE | FOUR AREA BANDS, ONE STAFFED SERVICE

Non-statutory prototype bands; exact areas and sites follow title, fire, accessibility and operations checks.

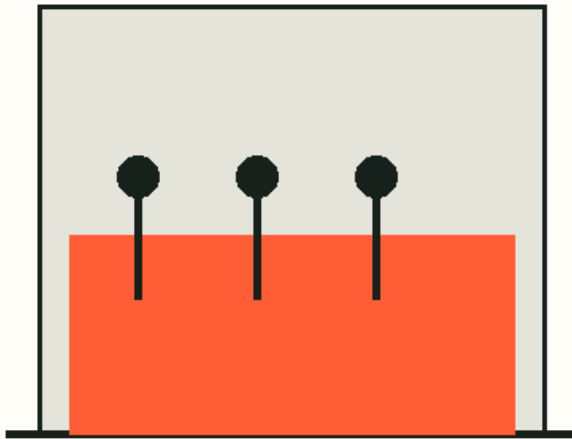

S	18–25 m ²	停靠 / STOP water, charging, staffed help	
M	45–70 m ²	恢复 / RECOVER toilet, lockers, quiet room	
L	120–180 m ²	学习 / LEARN paid class, handover desk	
XL	300–500 m ²	同班场 / YARD depot, public table, meal, exchange	

FOUR HANDOVERS A DAY | SPACE CHANGES MODE; STAFFED ACCESS

Operating script for 06–10 / 10–18 / 18–24 / 00–06.

06—10

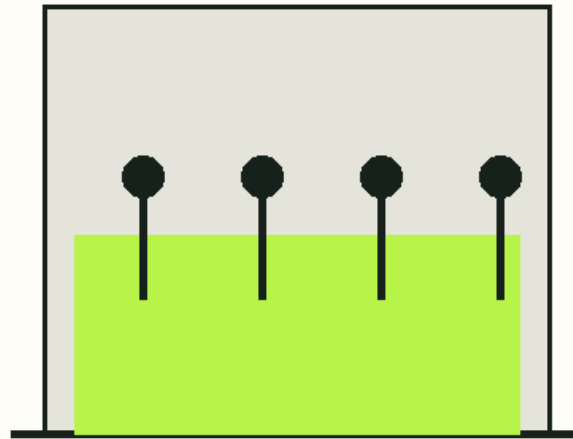

morning handover + delivery

staffed handover
no-scan entry
public duty board

10—18

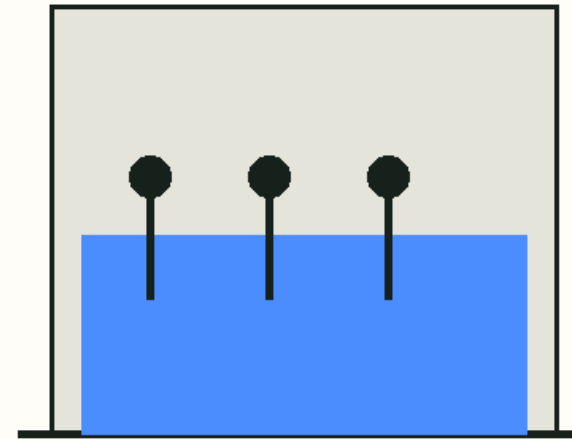

learning + repair + public service

staffed handover
no-scan entry
public duty board

18—24

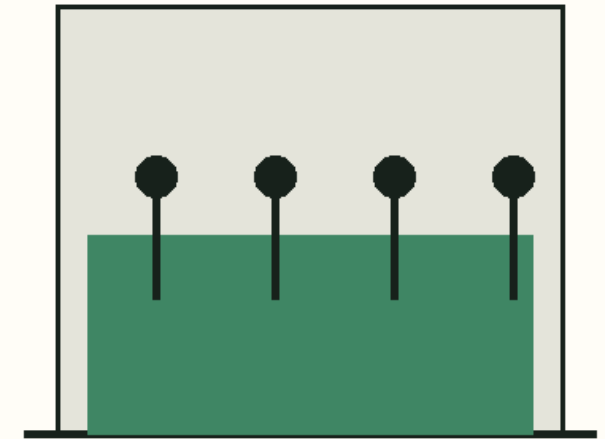

courier exchange + meal + community recovery + emergency + equipment ca

staffed handover
no-scan entry
public duty board

00—06

recovery + emergency + equipment ca

staffed handover
no-scan entry
public duty board

FROM CONCEPT TO ACCOUNTABILITY | DELIVERY, KPI AND STOP C

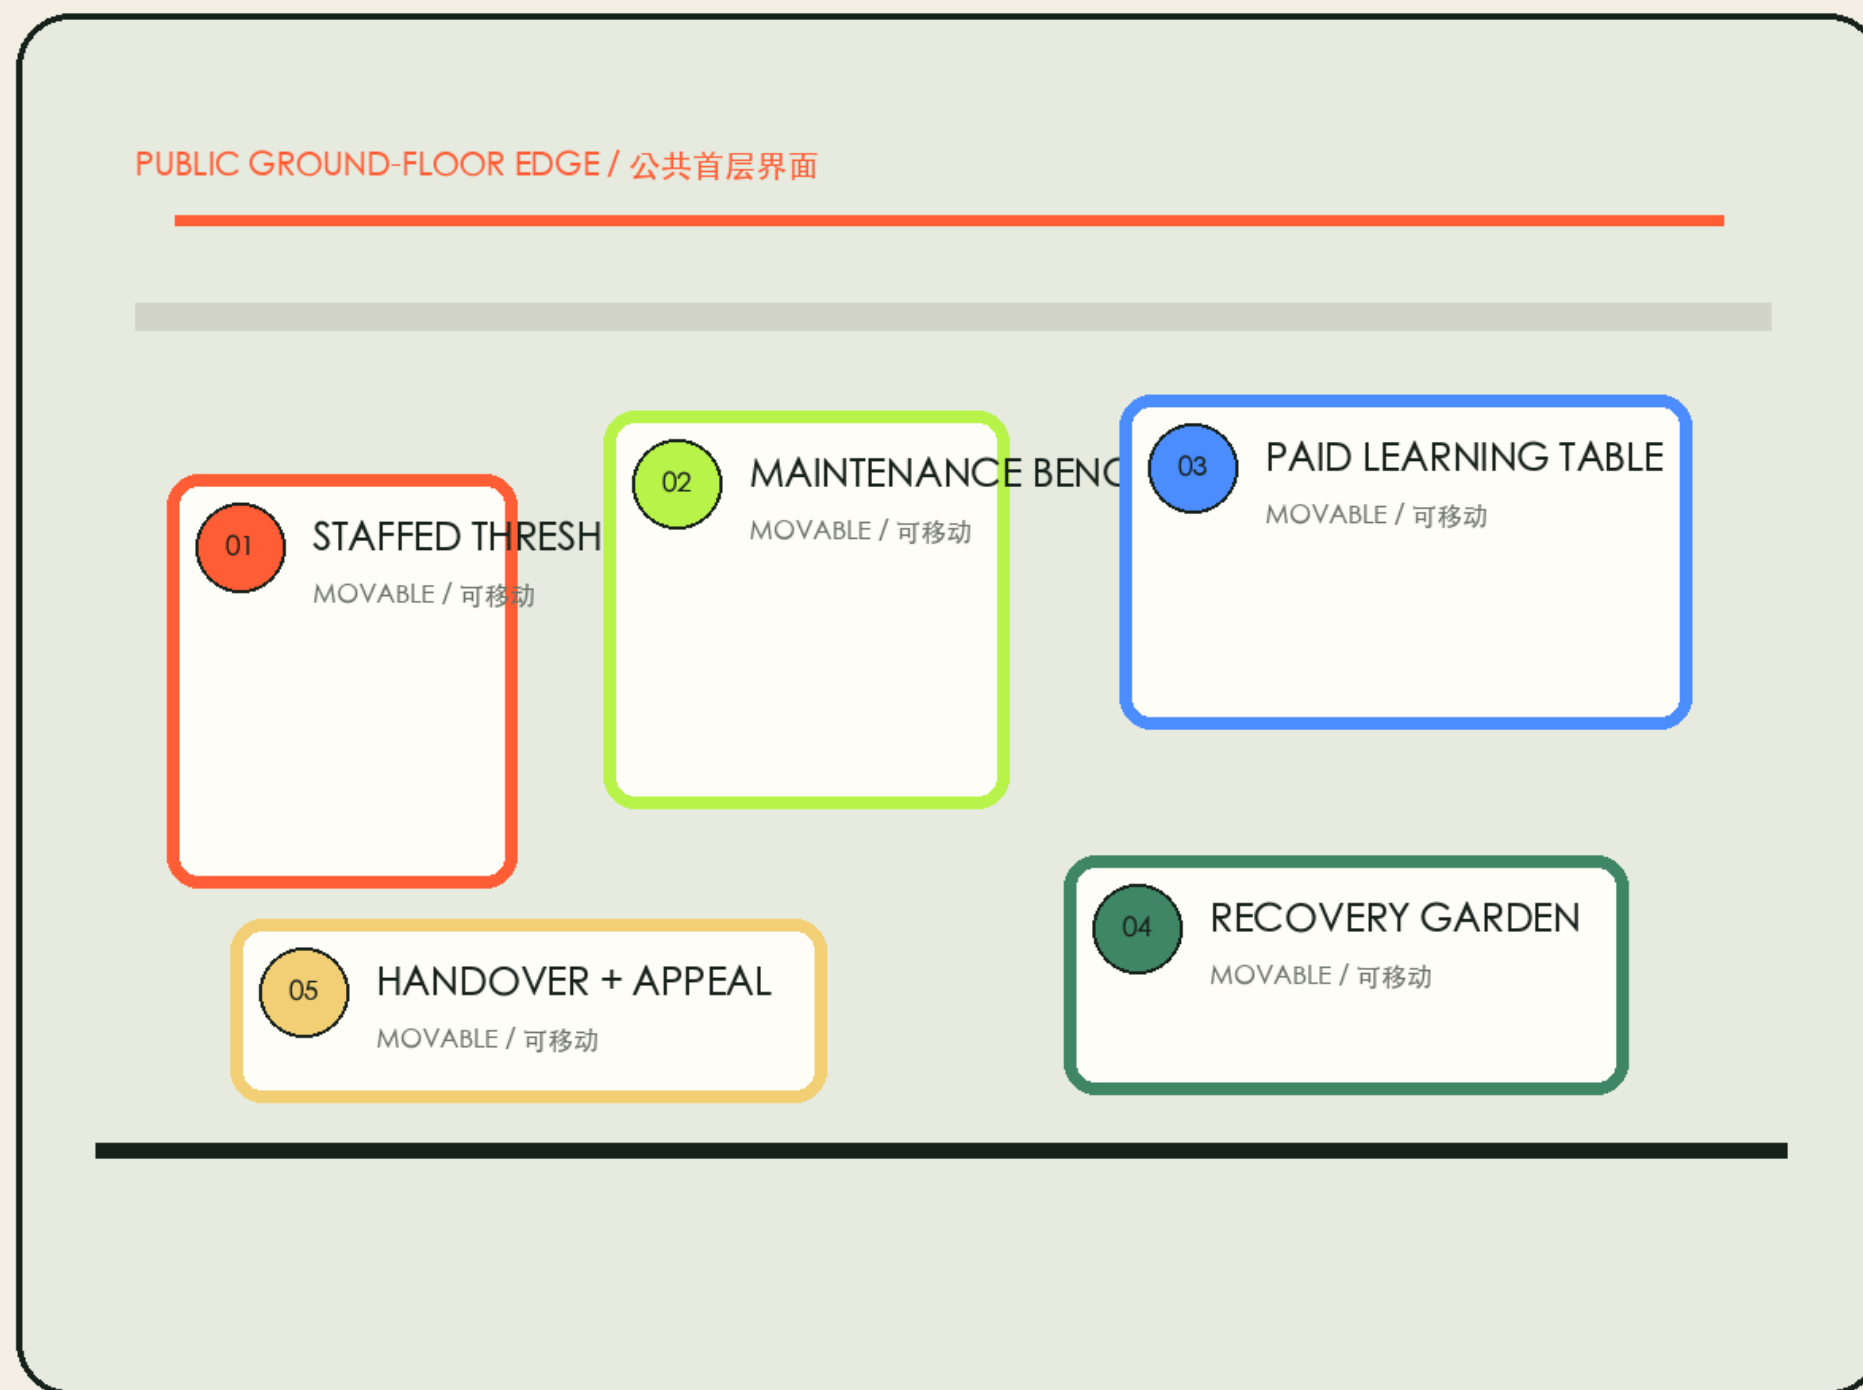

Relative cost compares effort, not a cost estimate; actor types are not confirmed appointees.

PROJECT	LEAD TYPE	CAPEX/OPEX	AUDITABLE KPI	STOP CONDITION
12 SHIFT STATIONS	district operator	S-M / M	staffed escalation uptime	no staffing or fire clearance
3 SHIFT YARDS	asset owner + operator	L / M-L	no-scan completion; open hours	title, access or labor audit fails
SHIFT ROUTE	street/transit manager	M / M	route closure; handover time	safety audit fails or flow blocked
ALGORITHM DUTY	public-interest trustee	S / M	appeal SLA; shutdown drill	scoring, emotion AI or covert tracking

ZHONGZHIYUAN MAINTENANCE YARD | 90-DAY REVERSIBLE PILOT

Not a site selection, permit or construction drawing. A controlled pilot uses movable components only after title, fire, access and site checks.

NO SITE CLAIM

No specific parcel or building is asserted

NO PERMANENT WORK

No permanent works or retain/replace decision

NO-SCAN ACCESS

Every activation keeps staffed, no-scan access

NON-PRODUCTION TEST

Demo device stays non-production; no worker scoring

REMOVE IF UNSAFE

Remove components when any gate fails

ZHONGZHIYUAN MAINTENANCE YARD | 90-DAY RHYTHM: DEFINE

Every phase has an exit condition. A failed prerequisite prevents the next phase.

D01—14

Paid co-design

Co-define needs, hours, access route and appeal path

- ☐ roles + paid participation
- ☐ kit + equipment register
- ☐ shift log
- ☐ exit check

D15—30

Site verification

Check title, fire, access, power, duty and removal plan

- ☐ roles + paid participation
- ☐ kit + equipment register
- ☐ shift log
- ☐ exit check

D31—75

Limited operation

Booked/public sessions for non-production demo, learning and staffed handover

- ☐ roles + paid participation
- ☐ kit + equipment register
- ☐ shift log
- ☐ exit check

D76—90

Audit and decision

Independently audit privacy, labor and access records: scale, revise or stop

- ☐ roles + paid participation
- ☐ kit + equipment register
- ☐ shift log
- ☐ exit check

Without G1, do not install or open. Any worker scoring, covert tracking, missing staffed access or blocked accessible route triggers immediate pause and removal.

ZHONGZHIYUAN MAINTENANCE YARD | SHIFT LOG, AUDIT METRIC

Logging is not performance scoring: record service access, completed handovers and resolved problems only.

SHIFT RECORD	WHAT IT MEANS	AUDIT METHOD
staffed-access window	record when help can respond at every activation; do not profile individuals	time summary + sampled check
no-scan service completion	whether help, water, rest or handover works without a scan	anonymous tick + access observation
median handover time	time from request to staffed response only	de-identified event log
accessible-route closure	closure duration and repair action, never user identity	site check + appeal-desk record
issue and appeal closure	category, handling window and review status, not sensitive facts	public monthly summary

STOP / 停用红线

Personal scoring, emotion recognition, covert tracking, automated punishment, production-system connection, missing staffed access or unrepaired access blockage: any one pauses the pilot and triggers independent review.

ZHONGZHIYUAN MAINTENANCE YARD | G1 SITE-VERIFICATION CH

If any required evidence is missing or a condition fails: do not install or open. To be completed by accountable site professionals.

DOMAIN	REQUIRED EVIDENCE / SITE CONFIRMATION	ACCOUNTABLE ROLE	DECISION
scope and authorisation	usable scope, activation window, movable kit and authorising contact are explicit	asset/site steward	☐ PASS ☐ HOLD
fire and personal safety	egress, materials, gathering capacity, emergency contact and response are verifiable	safety/fire professional	☐ PASS ☐ HOLD
continuous accessibility	arrival, entrance, service point and staffed alternative are continuously usable	accessibility professional	☐ PASS ☐ HOLD
power and equipment isolation	power source, cables, equipment register and non-production isolation are confirmed	M&E/equipment steward	☐ PASS ☐ HOLD
shift duty and payment	duty roles, paid participation, escalation contact and handover are arranged	operations/labor steward	☐ PASS ☐ HOLD
notice, data and appeal	purpose, staffed access, no-scan service, data red lines and appeal path are visible	governance/privacy steward	☐ PASS ☐ HOLD
removal and incident plan	pause, removal, incident record, review and return conditions are actionable	site coordination lead	☐ PASS ☐ HOLD

G1 confirms only whether a reversible pilot may begin; it never substitutes for approvals or specialist conclusions on design, fire, title, labor or accessibility.

ZHONGZHIYUAN MAINTENANCE YARD | PAID CO-DESIGN WORKS

Use lived maintenance and access experience to define service; participation neither substitutes for labor nor authorisation.

PARTICIPANT ROLES (AT LEAST ONE SEAT PER TYPE; SUBJECT TO LOCAL LABOR AND PAYMENT RULES)

01

maintenance technician

02

cleaning / property

03

AI R&D

04

access / care user

05

asset / operations

ONE WORKSHOP: CO-DESIGN SCRIPT

01	boundary + payment	state no-go rules, payment basis, right to leave and logging boundary
02	walk together	test arrival—entry—maintenance—rest—handover—removal moments
03	issue cards	record barriers, needs, existing mutual aid and non-negotiable conditions
04	arrange the kit	place five movable components, staffed threshold and accessible route together
05	prioritise + hand over	agree priorities, accountable roles, G1 evidence list and next review

WORKSHOP OUTPUTS

Requested service windows · accessibility and staffed-help map · five-component kit · stop conditions · G1 evidence-owner sheet · public co-design note. Payment, work-time status, personal data and recording rules must be agreed in writing before the session.

ZHONGZHIYUAN MAINTENANCE YARD | SHIFT LOG TEMPLATE (PRIMARY)

Record service, handover and repair—not names, performance, emotion, precise location or production work orders.

date / planned window _____ ☐ ACTIVATED ☐ NOT ACTIVATED (reason: _____)	
accountable duty roles	site coordination: _____ safety/access contact: _____ staffed escalation: _____
G1 and pre-opening check	☐ staffed threshold ☐ no-scan service ☐ continuous access ☐ equipment/power isolation ☐ removable
service access (aggregate only)	☐ help ☐ water ☐ rest ☐ learning ☐ staffed handover barrier found: _____
handover and route repair	handover / response: _____ route blockage + repair: _____
issue, appeal and pause	category: _____ handling / review: _____ ☐ PAUSE / REMOVE (see below)
close, remove and hand over	☐ kit checked ☐ site restored ☐ material/equipment handed over ☐ public note pending next shift/review: _____

PAUSE / REMOVE RED LINES: personal scoring, emotion recognition, covert tracking, automated punishment, production-system connection, missing staffed access, or unrepaired access blockage. Keep only necessary de-identified events and public summaries.
