

01 Overview & Concept: Compiling the railway into an urban kernel

JINGZHANG OS · Centennial Jing-Zhang AI Innovation Belt · Provisional constraint · recalculate after official redline

JINGZHANG OS overall concept: the heritage park 9km public spine is the kernel;

three areas and two wings form core processes and buses; AI scenarios are installable modules.

Three scopes: coordinated 43.6 km2 -> overall 11.4 km2 -> key areas 368.4 ha.

Three belts: Heritage Culture / Urban AI Life Experience / AI Integration Innovation.

Five functions: full-stack innovation / world-class ecosystem / scenario empowerment / vibrant city / governance voice.

Naming: Training-Zhongzhiyuan / Open-Source-AI Origin / Deployment-Dazhongsi / two scenario buses.

Visual motif: compiled railway track (rail + circuit), signal-green / track-grey / open-source-yellow.

02 Overall structure: Kernel + bus + modules

JINGZHANG OS · Centennial Jing-Zhang AI Innovation Belt · Provisional constraint · recalculate after official redline

Land use: 19 polygons seamlessly cover the submitted boundary (EPSG:4548).
Green: heritage kernel / Qinghe corridor / Xiaoyuehe riverside park / ring-road green / station green.
Buildings: 7 conceptual footprints, compiled renewal (retain/renovate/build).
Mobility: rail + slow mobility first, kernel greenway and riverside cycleway.
Public space: test square / open-source square / roadshow square / heritage activity belt.
Phasing: v1.0 kernel & digital base / v2.0 wings & scenarios / v3.0 station-city south.

03 Key area detailed design

JINGZHANG OS · Centennial Jing-Zhang AI Innovation Belt · Provisional constraint · recalculate after official redline

Training-Zhongzhiyuan (192.1 ha): R&D centre + open testing lab + public test square.

Open-Source-AI Origin (104.3 ha): incubator + transfer office + open-source release square.

Deployment-Dazhongsi (72.0 ha): native-AI commercial complex + roadshow square + station-city 4-quadrant.

Loop: train -> open source -> test -> deploy.

3 pilgrimage landmarks: Kernel Origin / Open-Source Core / Deployment Gate.

JINGZHANG OS · Centennial Jing-Zhang AI Innovation Belt · Provisional constraint · recalculate after official redline

12 scenario cards (incl. 3 test-validation) / 5 personas / 3 pilgrimage landmarks.

Governance: data minimisation, public sources, explainability, human review, opt-out.

Annual events: JINGZHANG OS Developer Conference / quarterly open days / monthly release week.

Developer community runs on open-source repository logic; honours enter a permanent memorial system.

All spatial and operational proposals are conceptual and do not constitute government approval.
