

FROM REGIONAL EXCHANGE TO THREE STATION PROTOTYPES

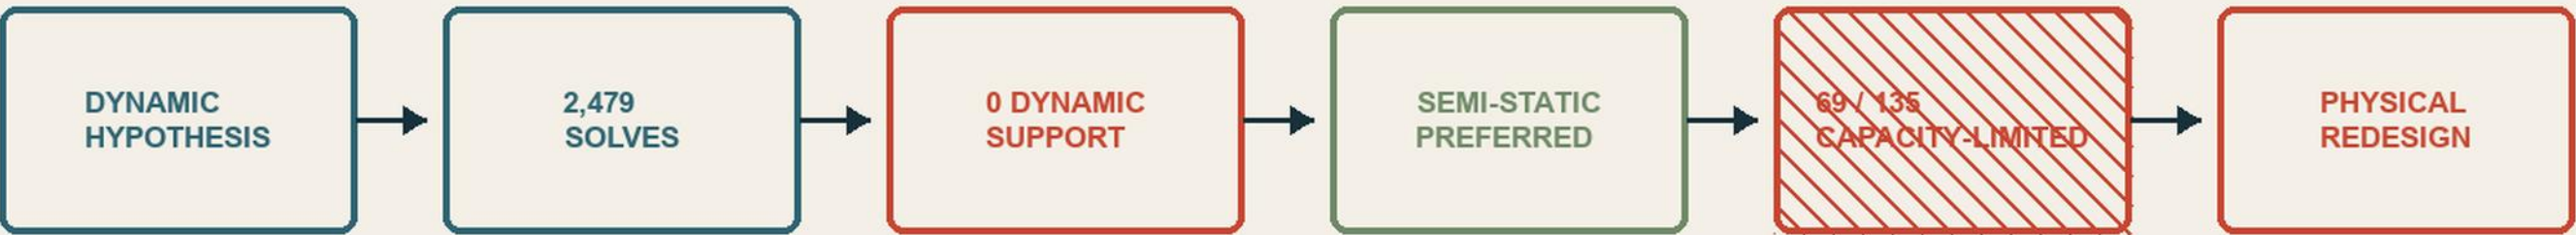

Three scales, five exchange interfaces, one rights-first operating contract

STREET-EDGE PROOF CASE: TESTED, FALSIFIED, REFRAMED

Synthetic / desk-proxy mechanism evidence only — not Wudaokou deployment evidence

We assumed the future city should change in real time. After testing, we changed the proposition.

ROBUSTNESS CHECKS

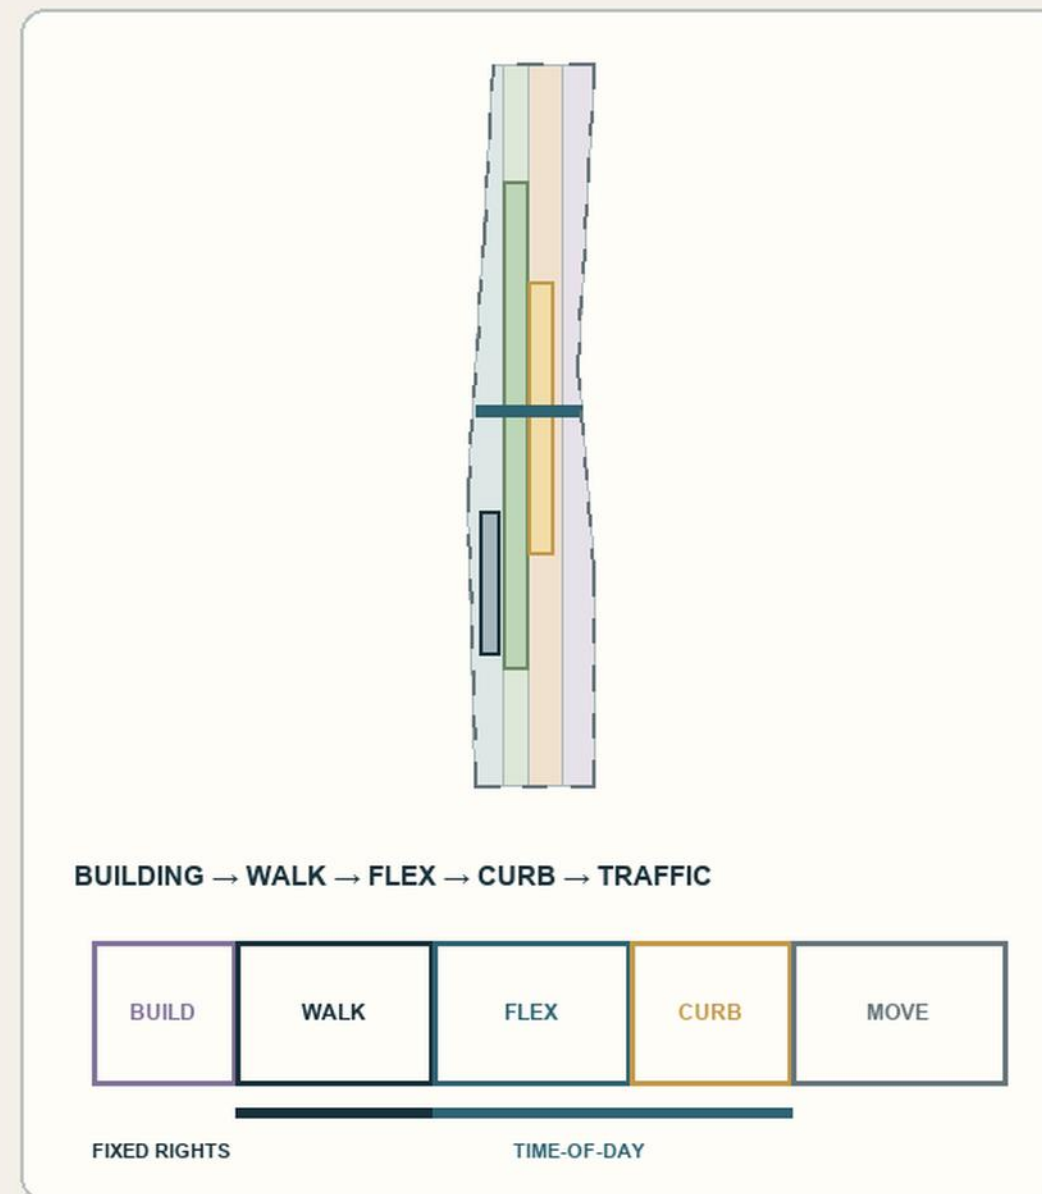

HARD RIGHTS VIOLATIONS = 0 · P4-FIELD = BLOCKED_PENDING_FIELD_DATA

MECHANISM CONCLUSION ≠ REAL-SITE DEPLOYMENT CONCLUSION

SIX STREET-EDGE TYPOLOGIES AS SPATIAL CONTRACTS

Every type declares a protected layer, operating state and physical-redesign trigger

TRANSIT

P transit + access

T STATIC / 2-3

— R queue / transfer

CAMPUS-COMMUNITY

P walk + residents

T 2-3 STATES

— R access / stability

INNOVATION / TEST

P walk + fire

T CONTROLLED WINDOW

— R clearing / fire

COMMERCIAL

P walk + access

T STATIC / 2

— R spillover

RESIDENTIAL

P resident stability

T STATIC FIRST

— R night conflict

PARK / PUBLIC

P green + drainage

T STATIC / EXCEPTION

— R green continuity

P = protected · T = time state · R = redesign trigger · CONCEPTUAL / NOT STATUTORY

— PROTECTED / FIXED

■ TIME-OF-DAY

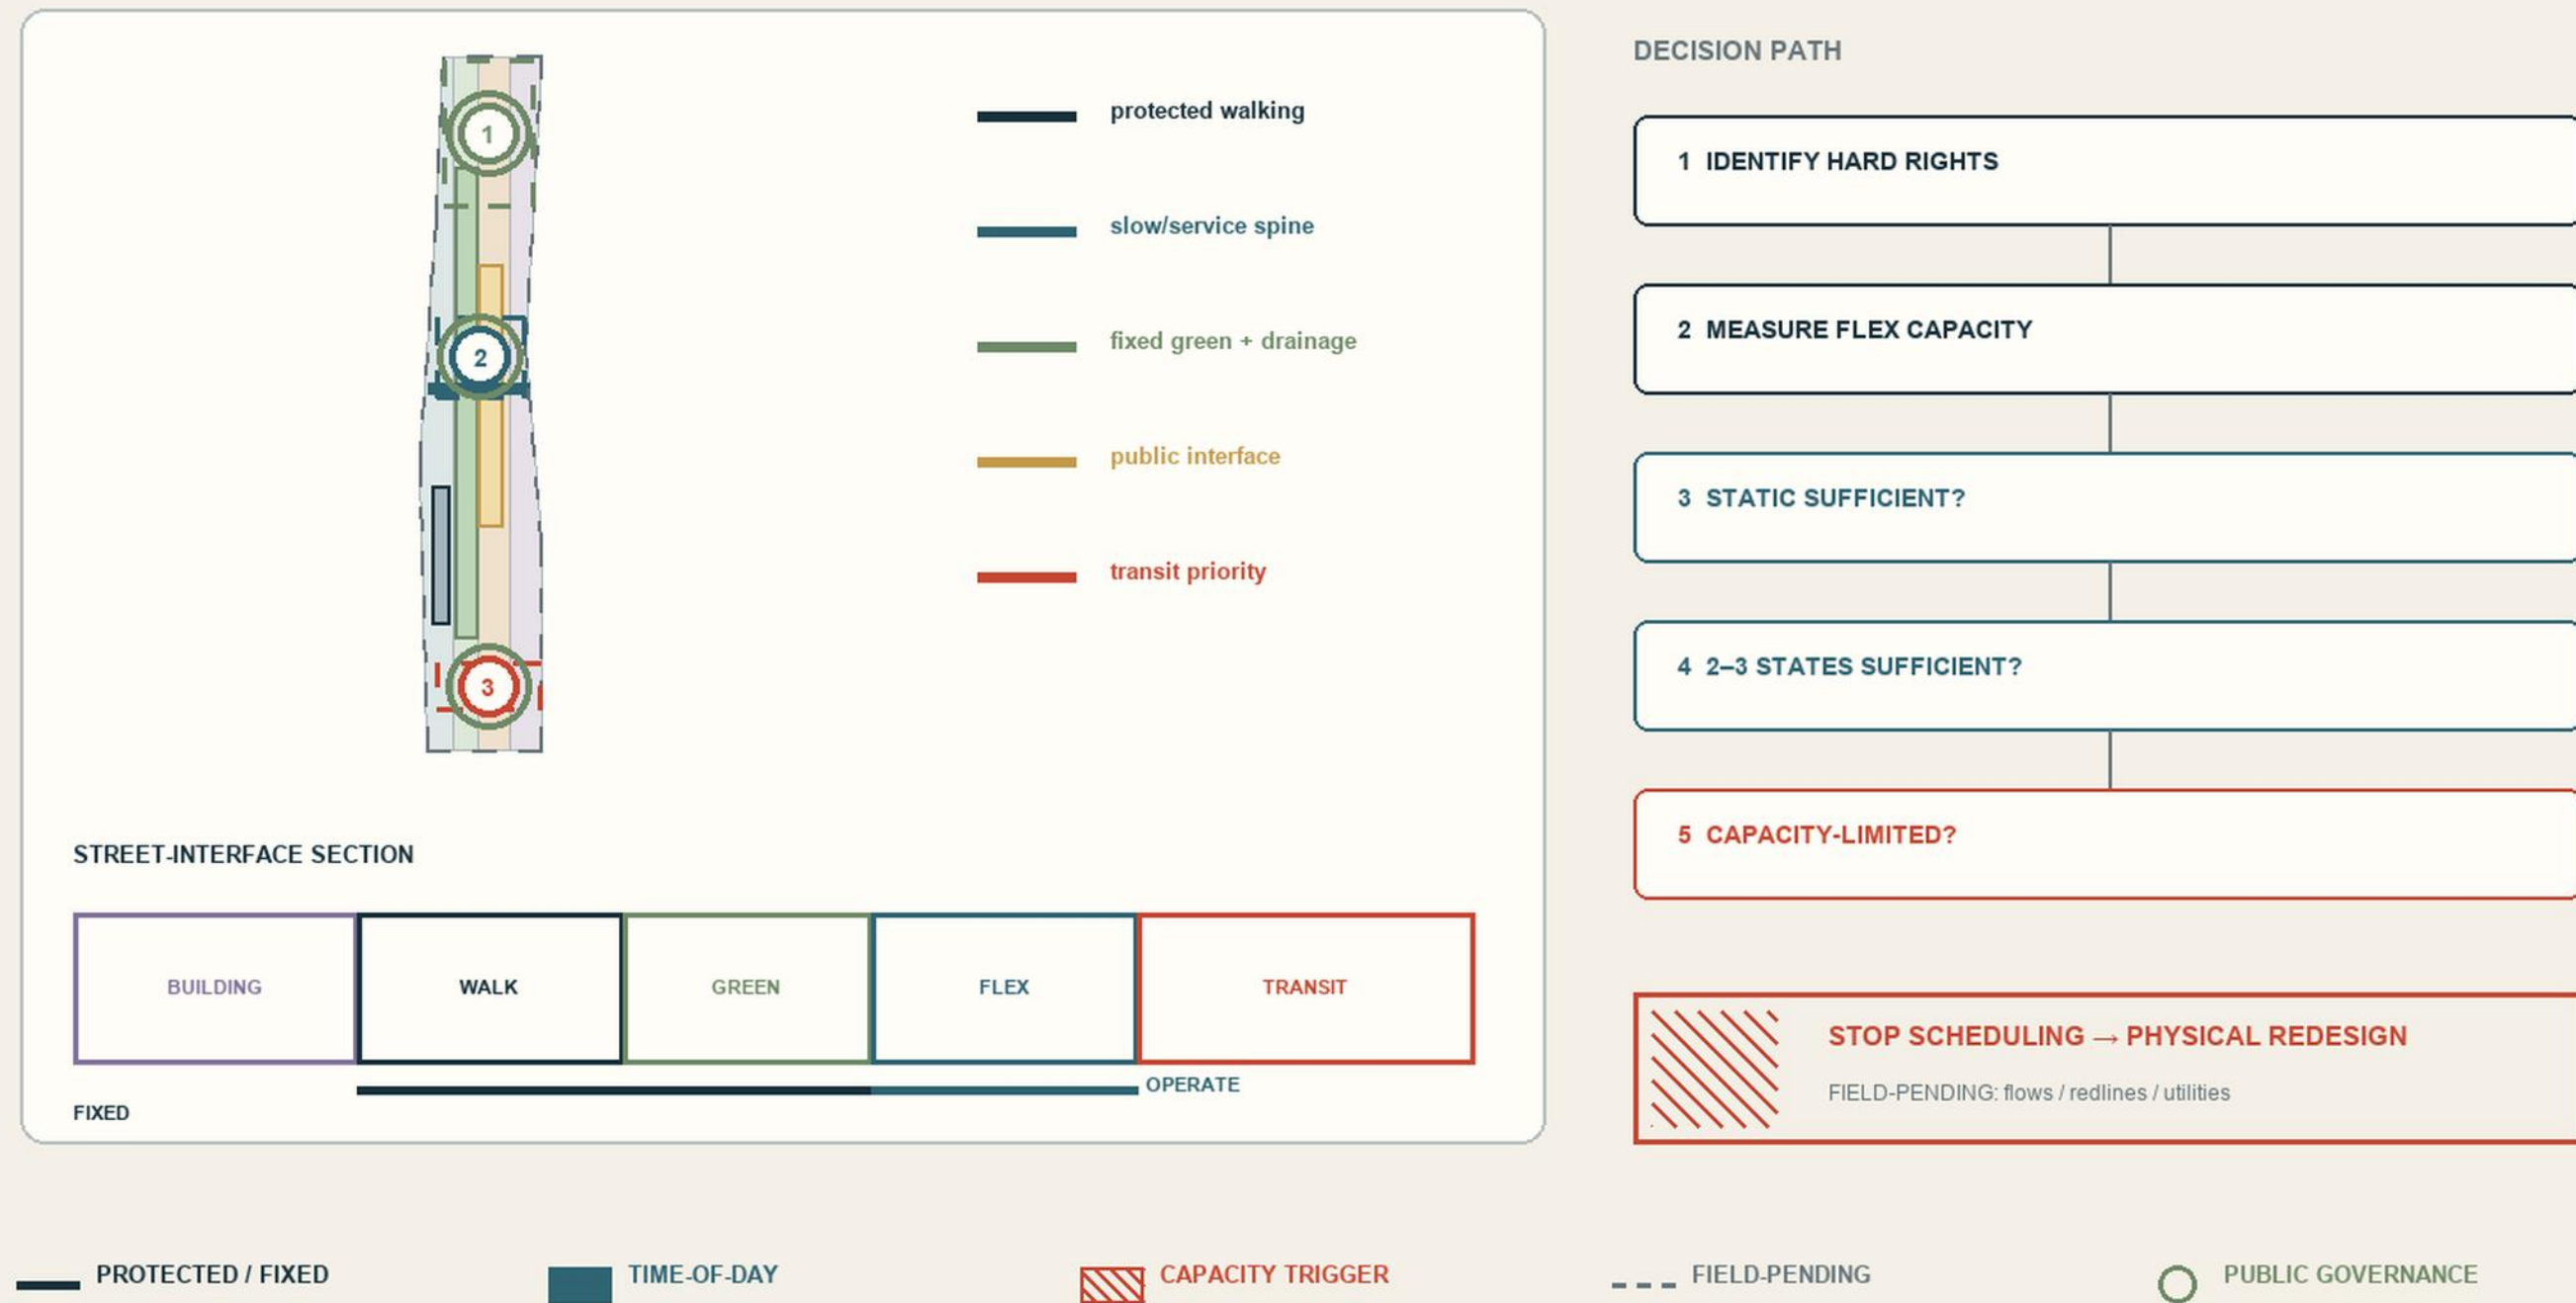

▨ CAPACITY TRIGGER

--- FIELD-PENDING

○ PUBLIC GOVERNANCE

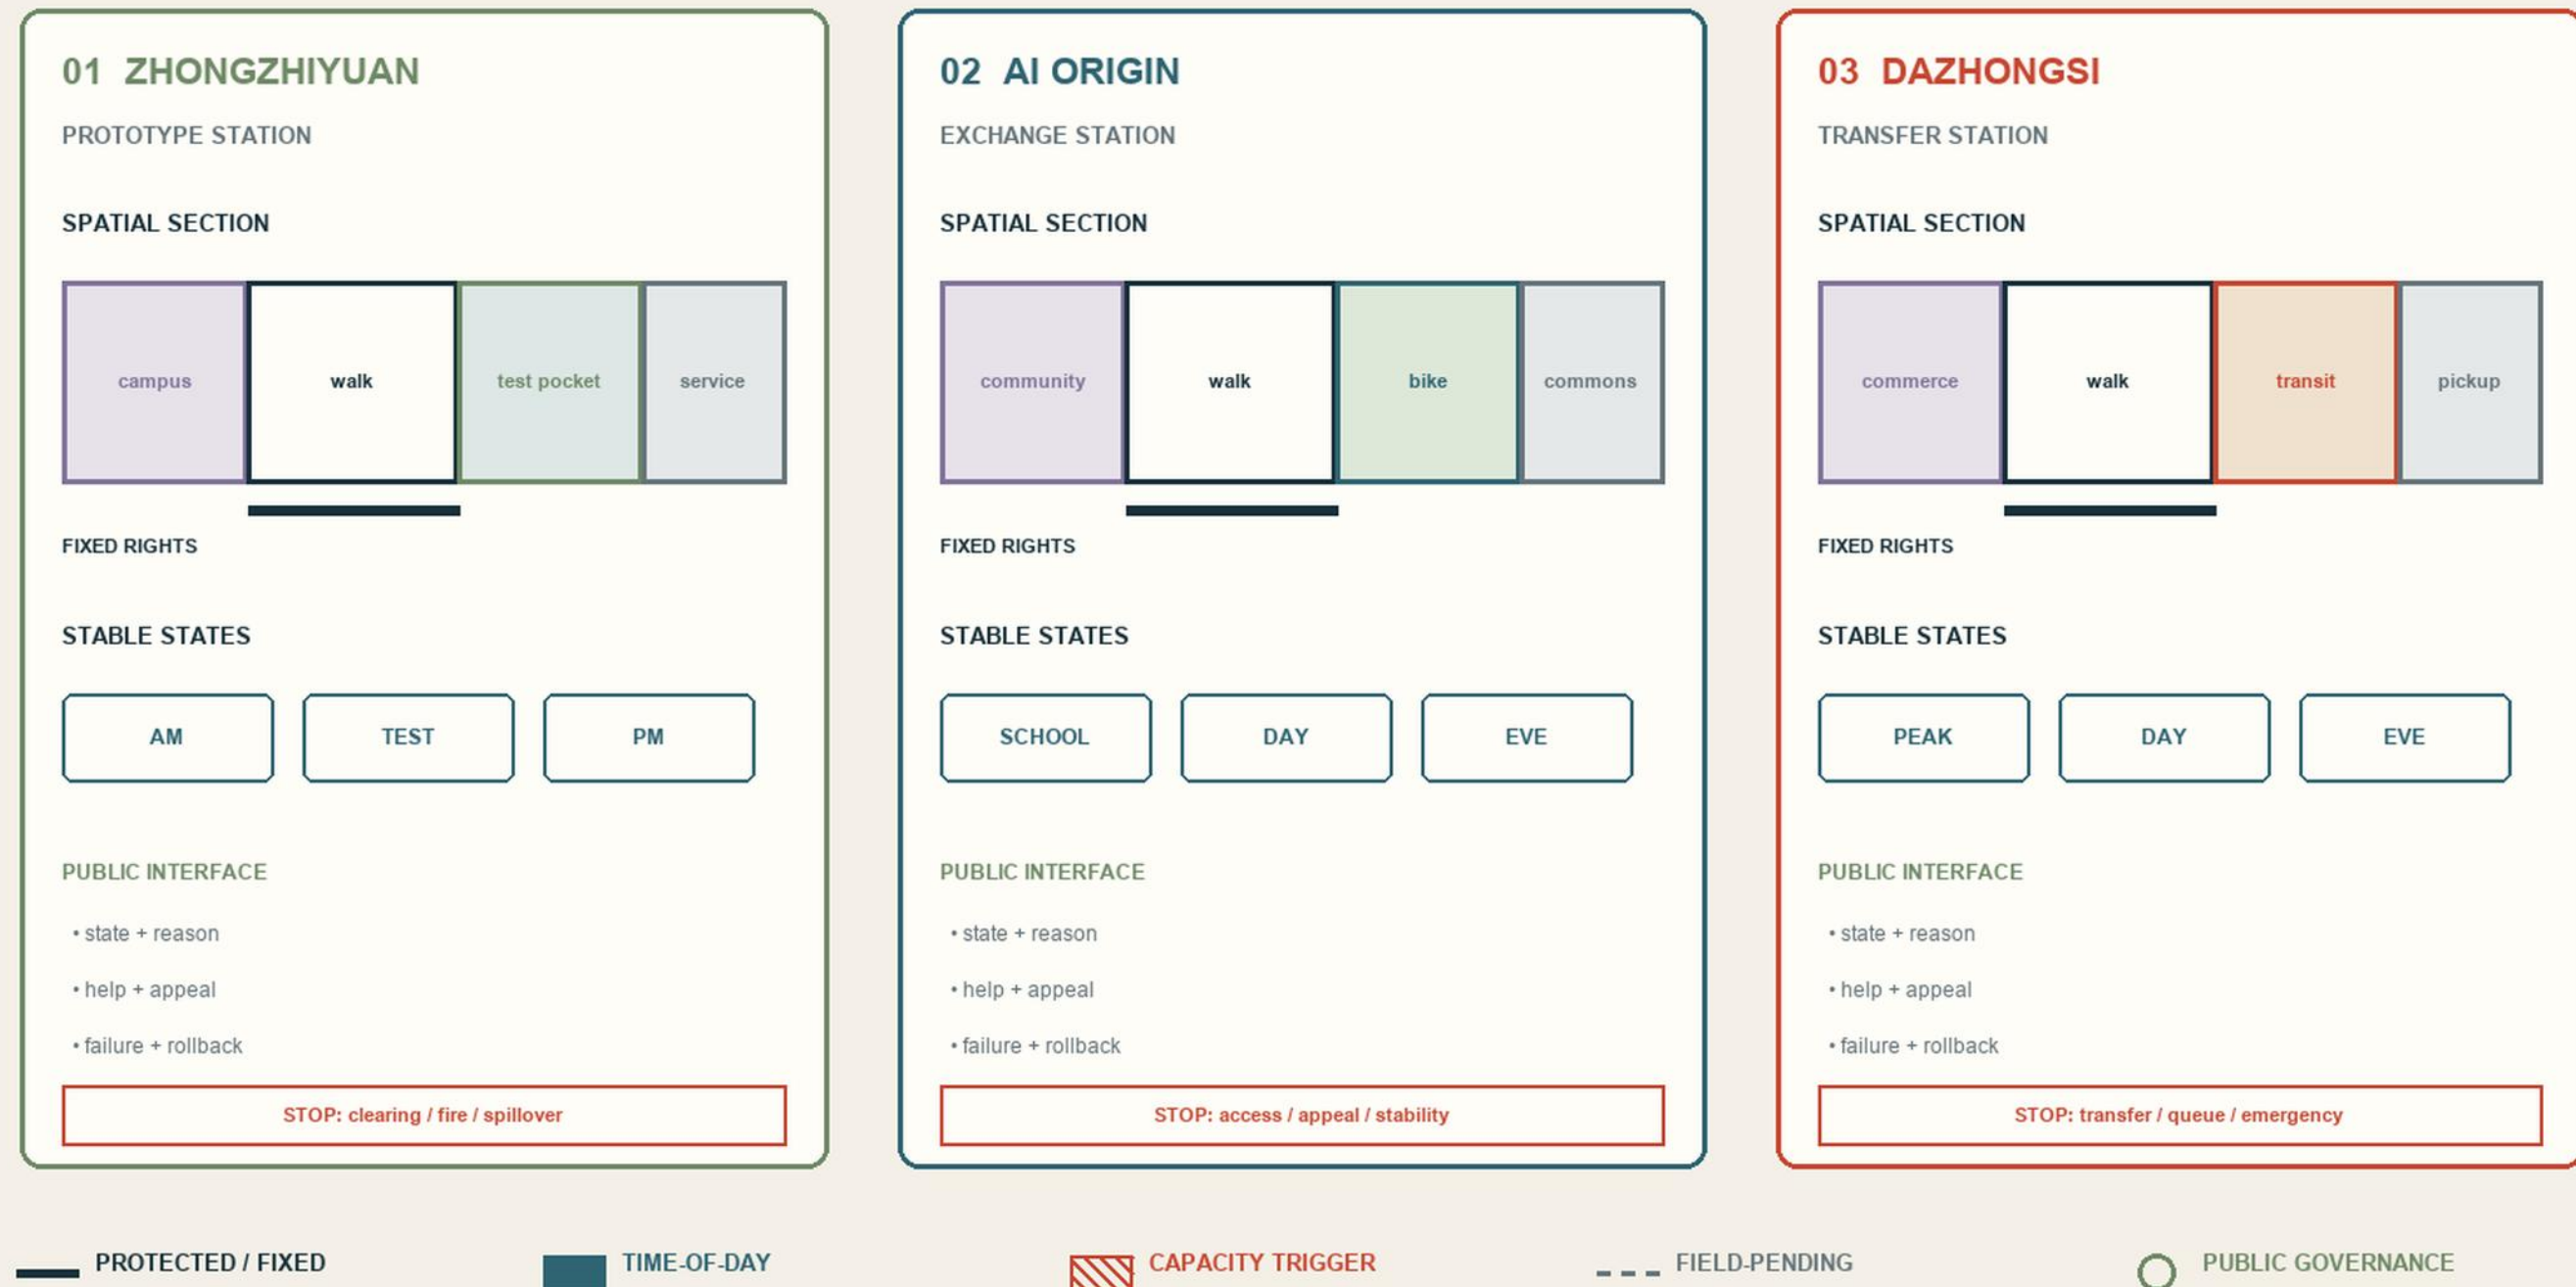

RIGHTS NETWORK, PUBLIC REALM AND THE CAPACITY EXIT

A cross-section and decision path show where operation ends and physical design begins

THREE STATION PROTOTYPES: SECTION, STATE AND STOP CONDITION

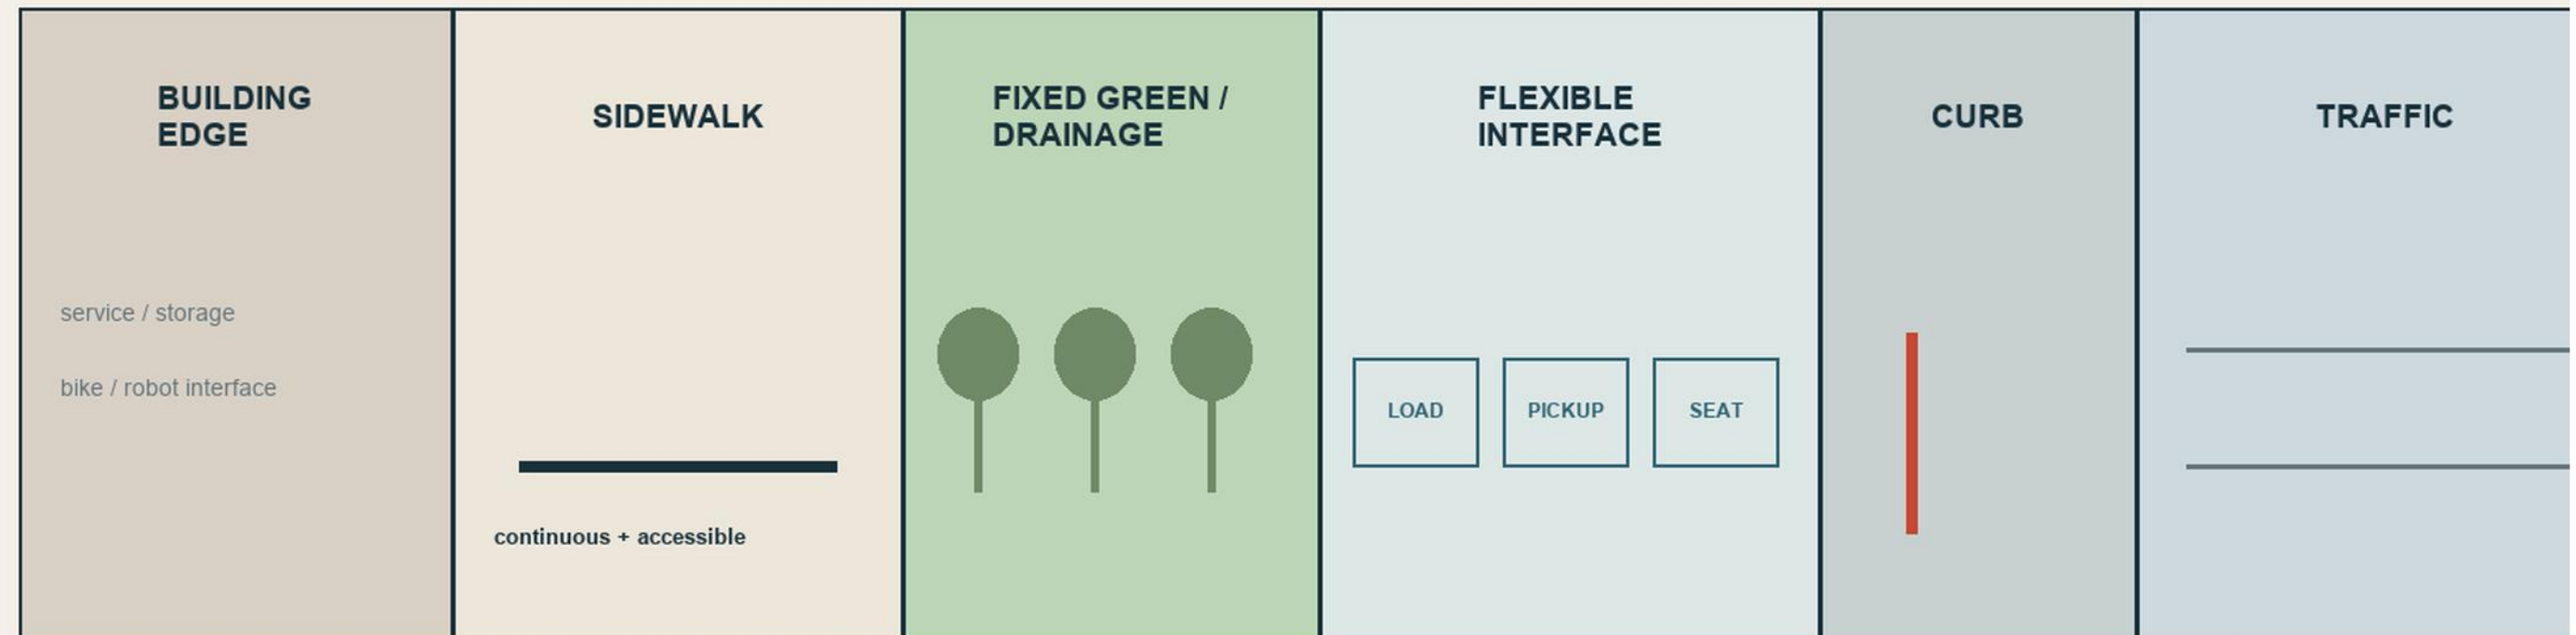

The prototypes differ by protected rights, ground-floor absorption and failure mode

GROUND FLOOR TO CURB: FIXED SPACE BEFORE OPERATIONAL STATES

Capacity-limited conditions move demand off-curb or trigger physical redesign

PHYSICAL INFRASTRUCTURE — DOES NOT DISAPPEAR BETWEEN STATES

— PROTECTED / FIXED

■ TIME-OF-DAY

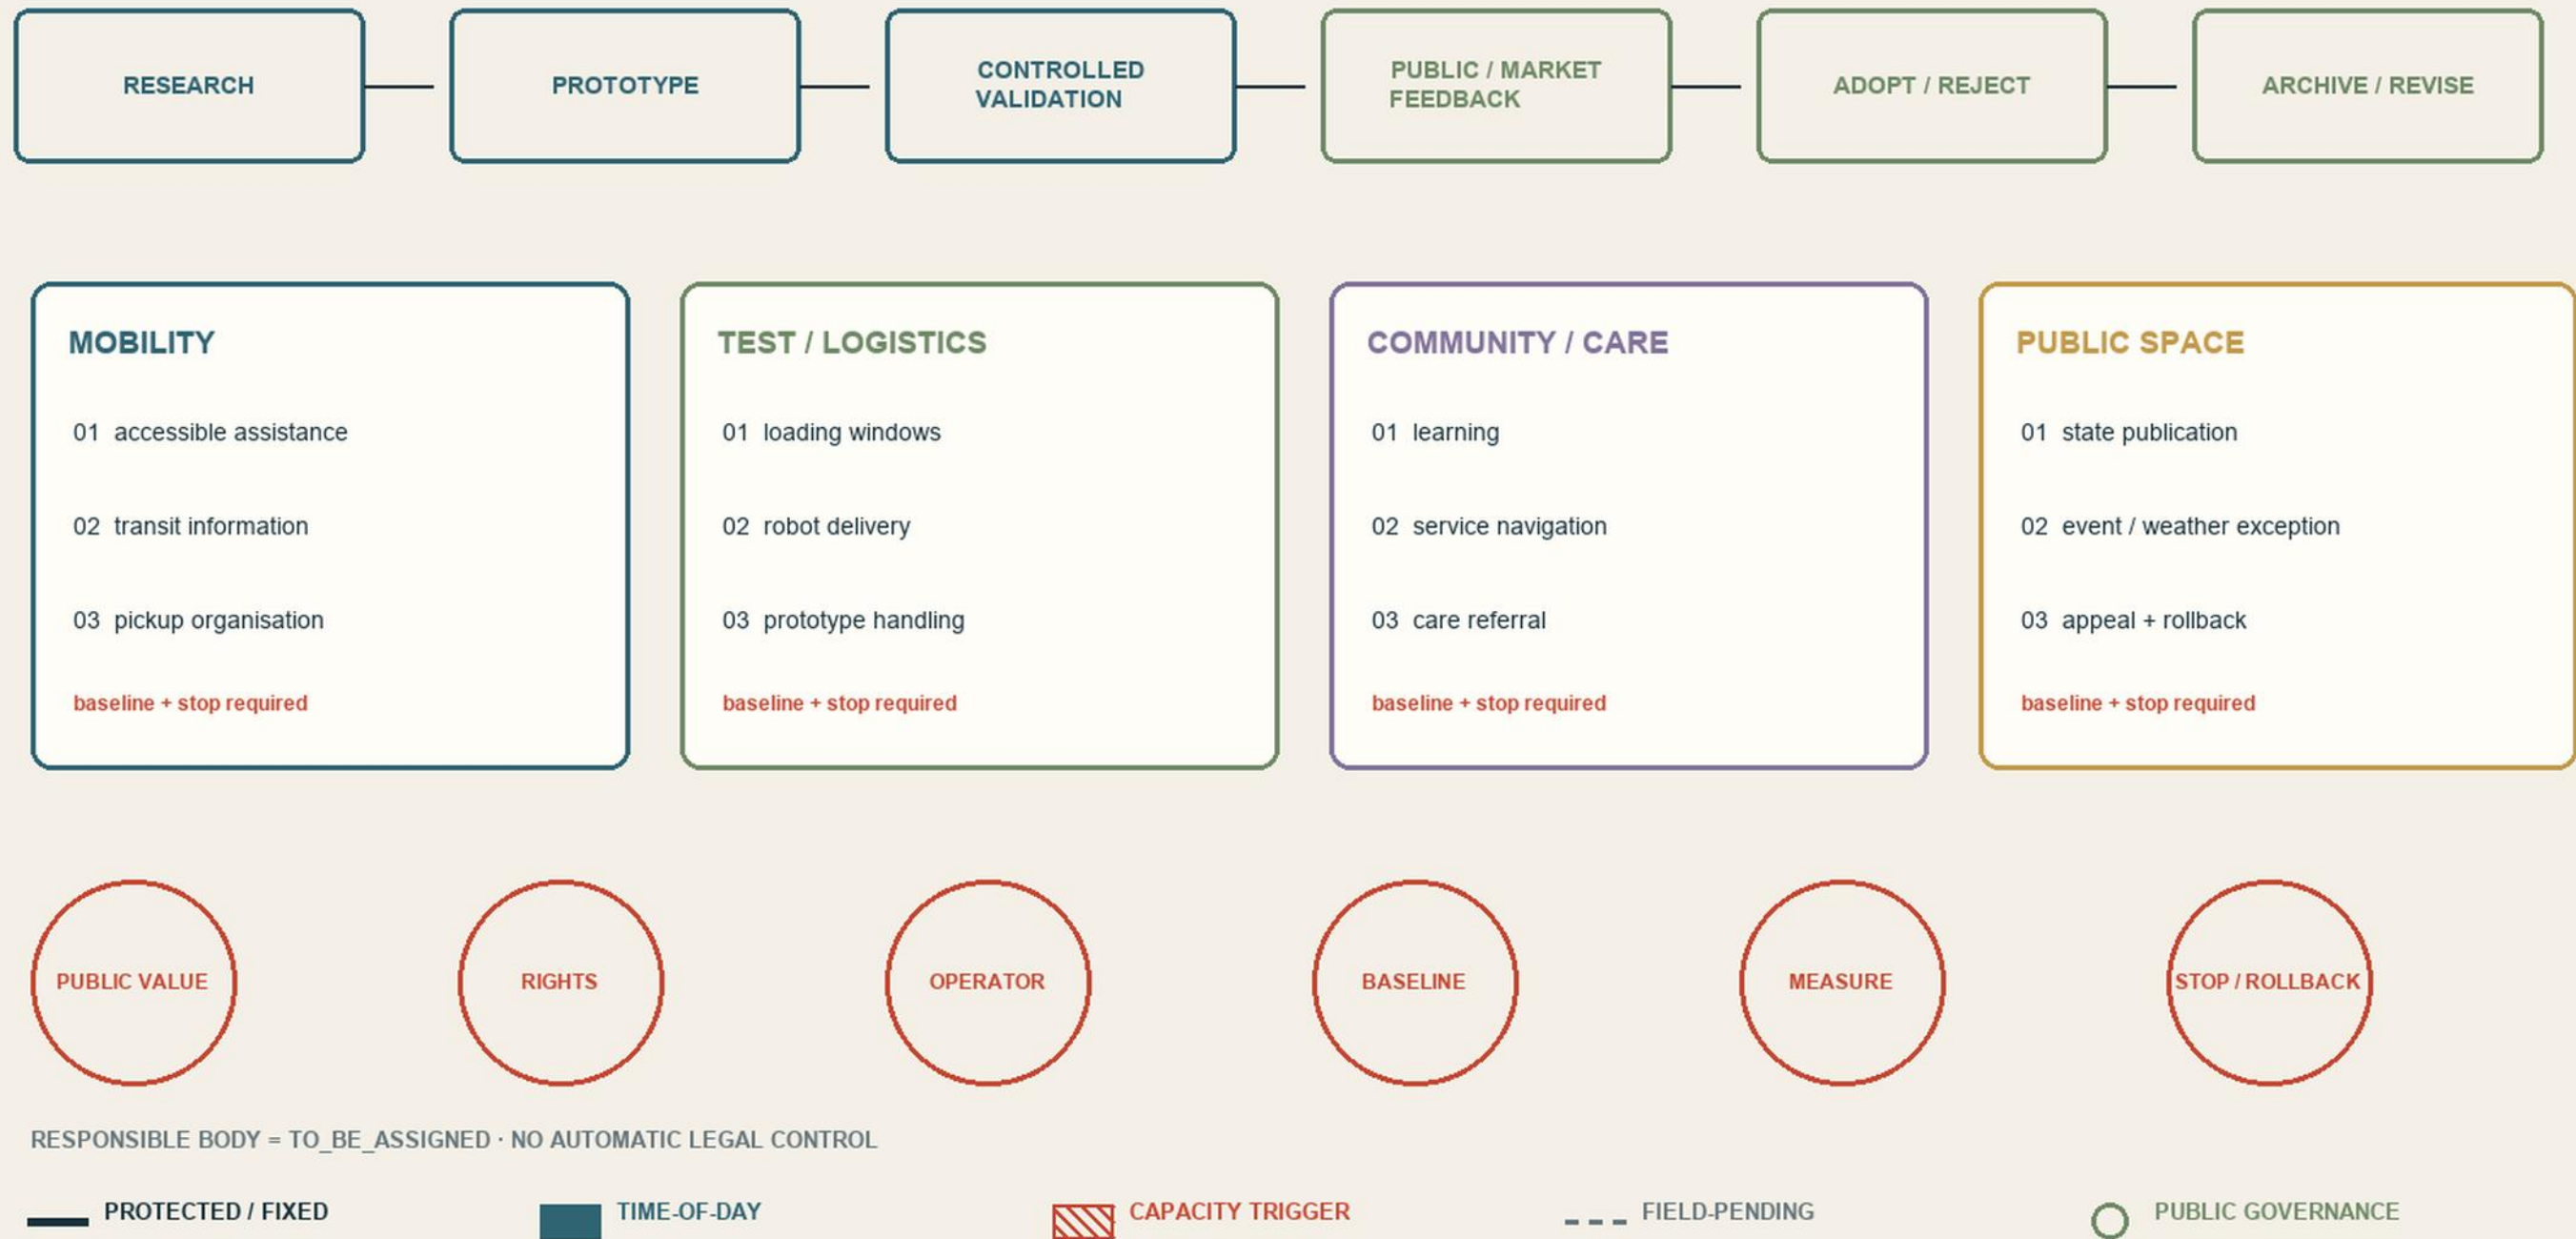

▨ CAPACITY TRIGGER

--- FIELD-PENDING

○ PUBLIC GOVERNANCE

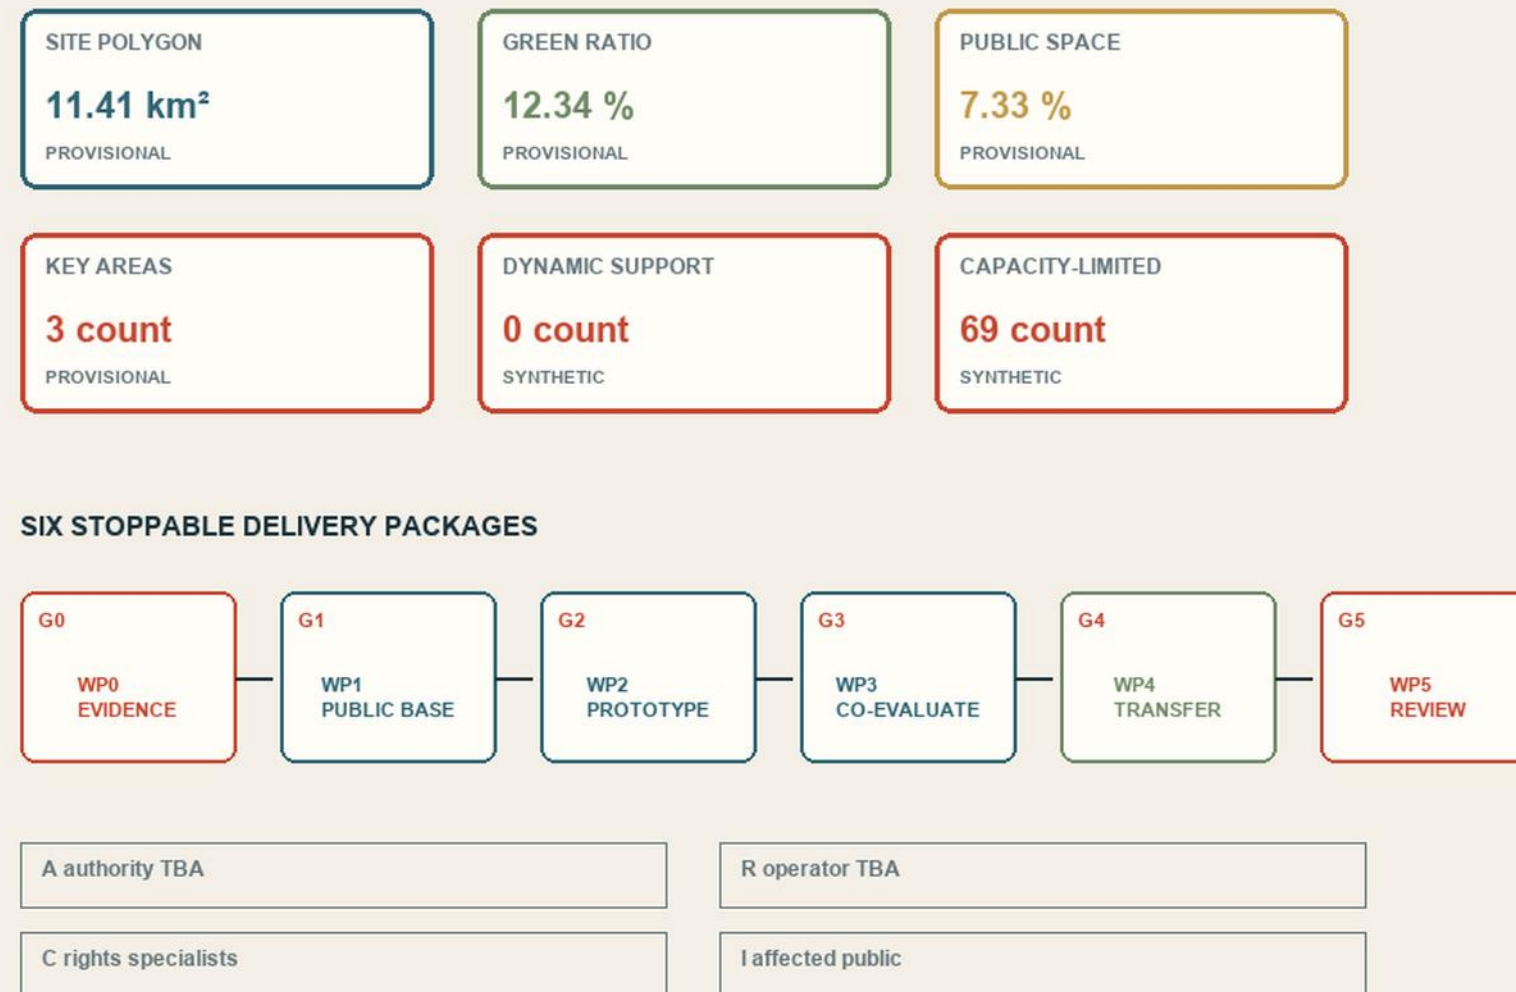

AI+ SCENARIOS, INNOVATION LIFECYCLE AND PUBLIC AUTHORITY

AI interprets and explains; deterministic tools compare; humans authorise and stop

EVIDENCE-TO-DELIVERY GATES AND REVIEW BOUNDARY

Six stoppable work packages convert the concept into an accountable test path

BUDGET = UNKNOWN · AUTHORIZATION REQUIRED · REJECTION IS A VALID RESULT

EVIDENCE BOUNDARY

AVAILABLE

- ☐ public task documents
- ☐ provisional geometry
- ☐ synthetic mechanism result
- ☐ deterministic package checks

UNKNOWN / FIELD-PENDING

- field visit
- resident interviews
- stakeholder consultation
- verified curb rules
- legal flexible capacity
- official redlines / ownership

PASS = integrity only

NOT = approval or site validity
