

JZ / CIVIC FAILSAFE

Jing-Zhang Civic Failsafe: a public spine that stays on

Three validation commons · twelve scenario nodes · provisional extent de-emphasized

DESIGN JUDGMENT

An AI city must operate, explain itself, accept human handoff, and exit safely.

SPATIAL MOVE

A heritage-park public spine links three validation commons and twelve scenario nodes.

GOVERNANCE CONTRACT

Non-digital fallback, minimum data, human review, reversible installation, recovery.

EVIDENCE LIMIT

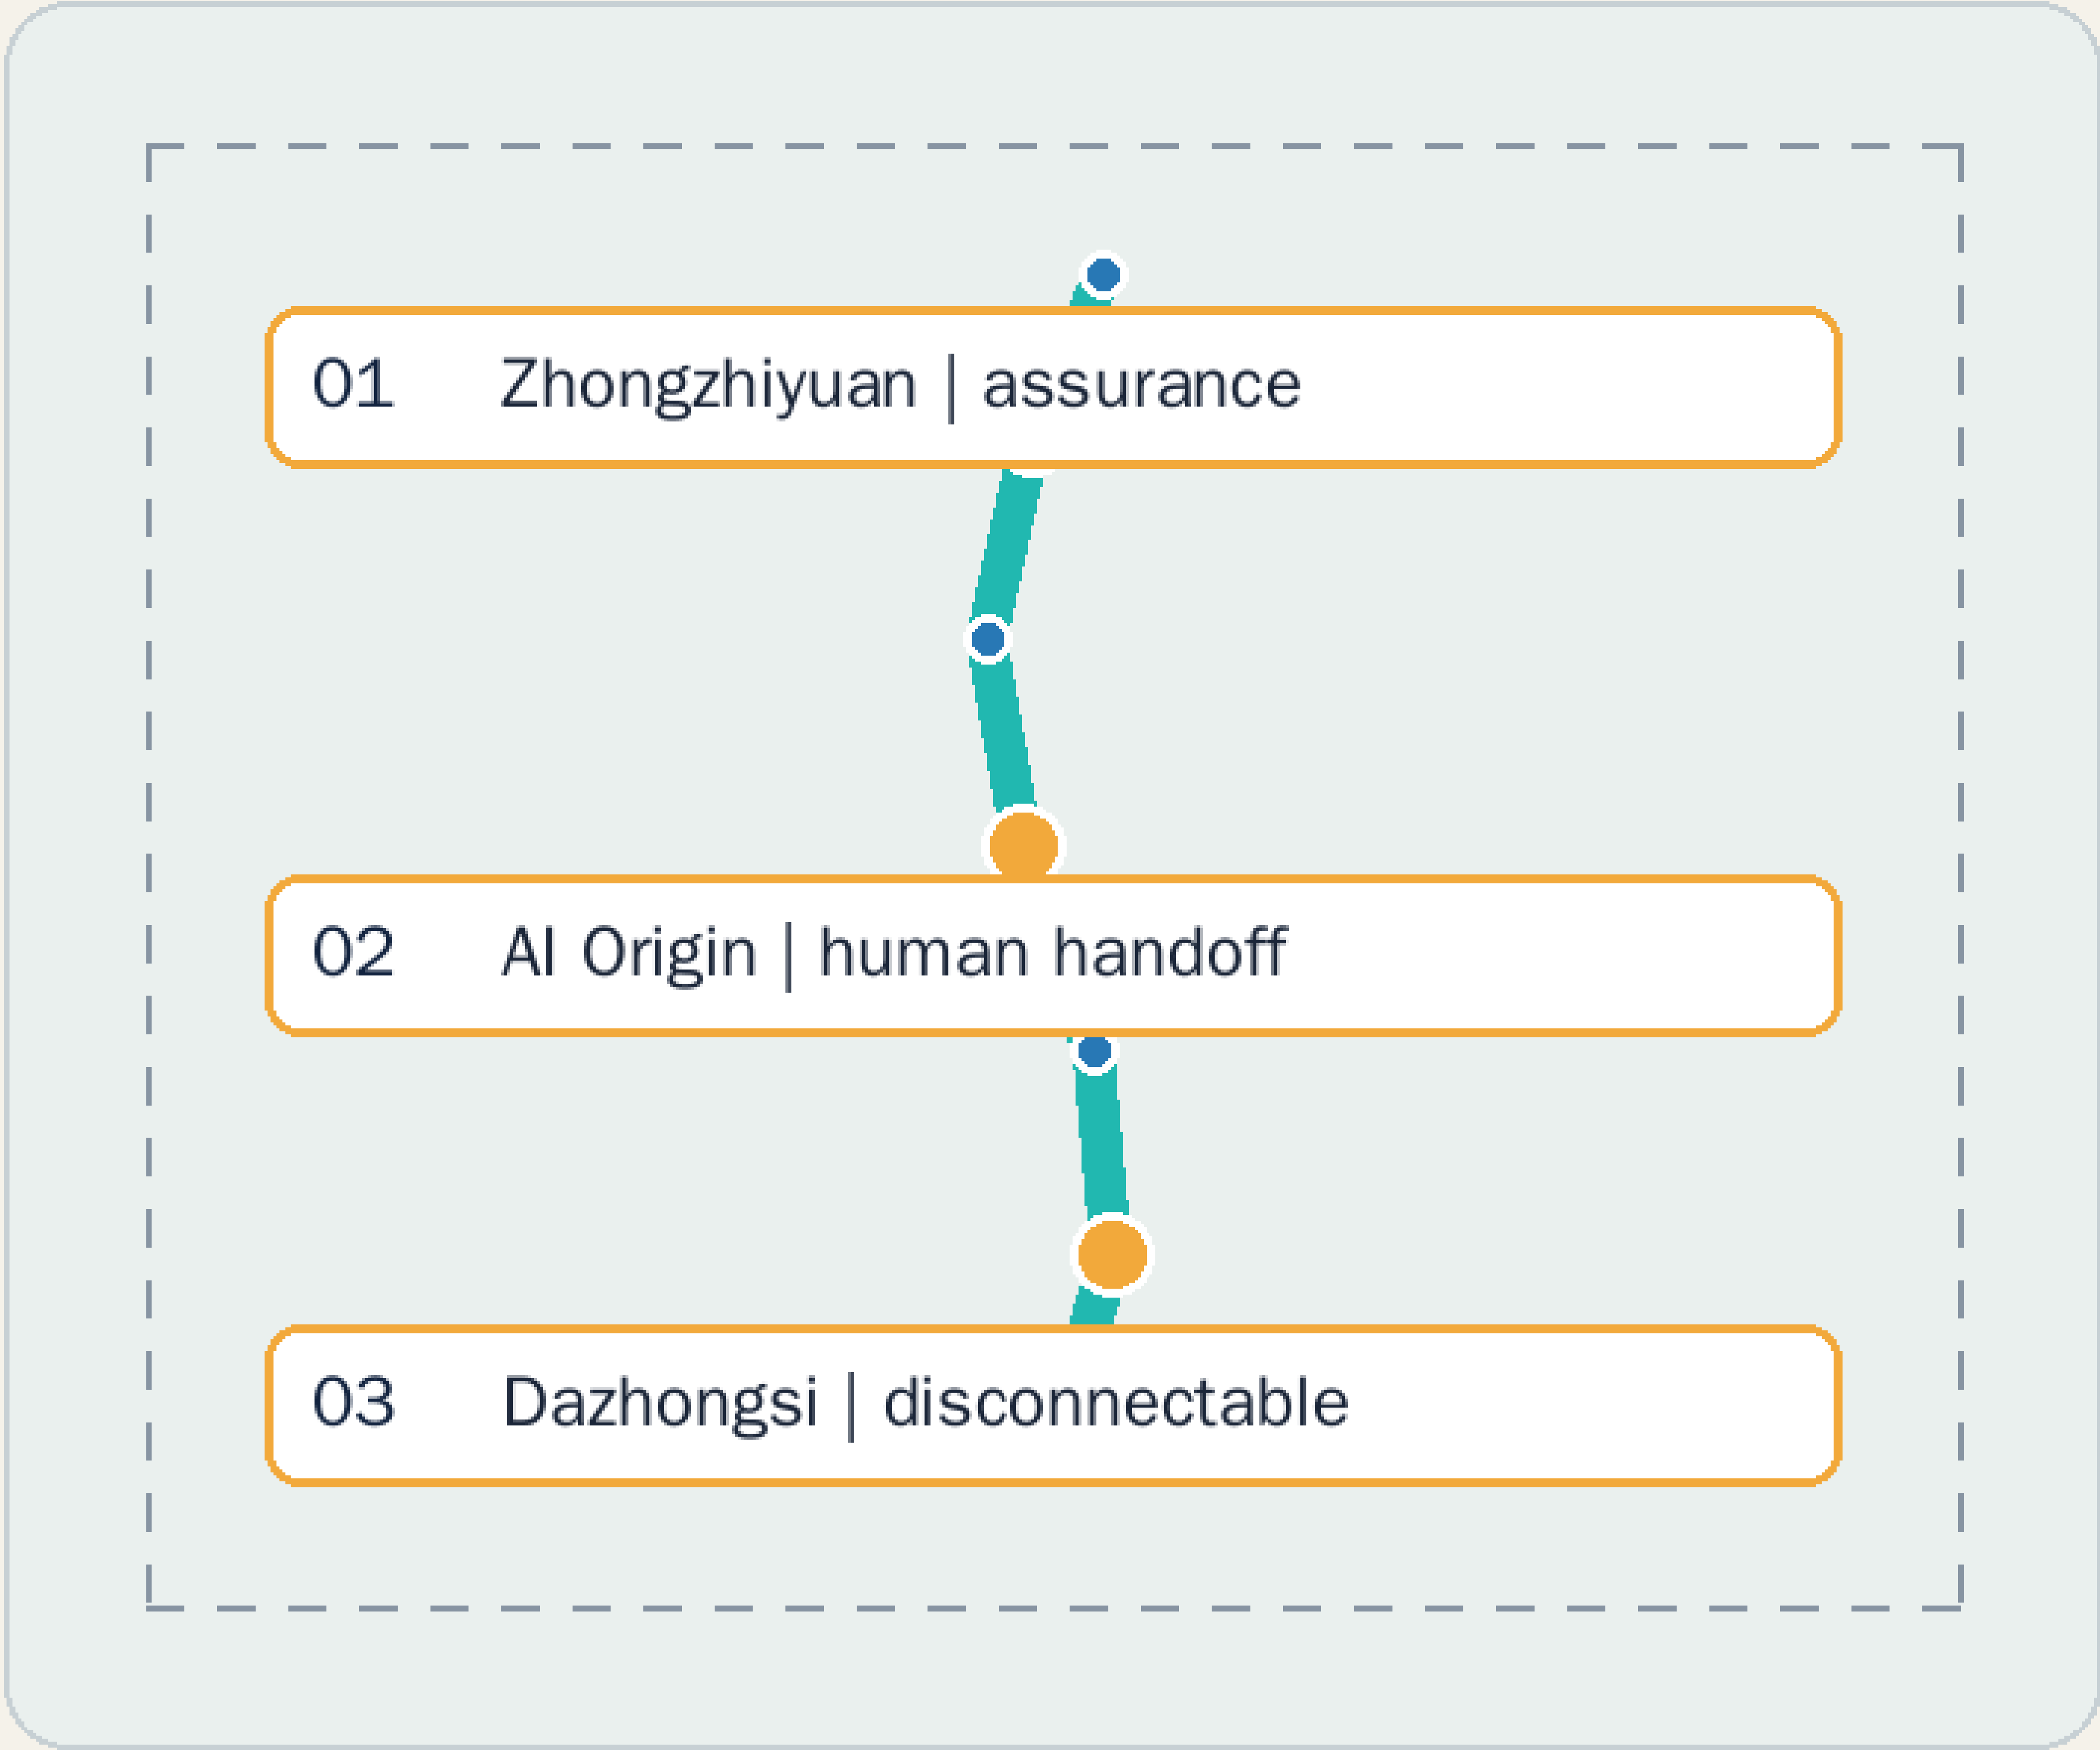

Provisional polygons support generation and intake only; recompute after official data.

* Provisional-boundary calculation; not an official redline or statutory indicator

JZ / CIVIC FAILSAFE

Three key areas: verify—handoff—exit

Zhongzhiyuan assurance · AI Origin handoff · Dazhongsi disconnectable devices

DESIGN JUDGMENT

An AI city must operate, explain itself, accept human handoff, and exit safely.

SPATIAL MOVE

A heritage-park public spine links three validation commons and twelve scenario nodes.

GOVERNANCE CONTRACT

Non-digital fallback, minimum data, human review, reversible installation, recovery.

EVIDENCE LIMIT

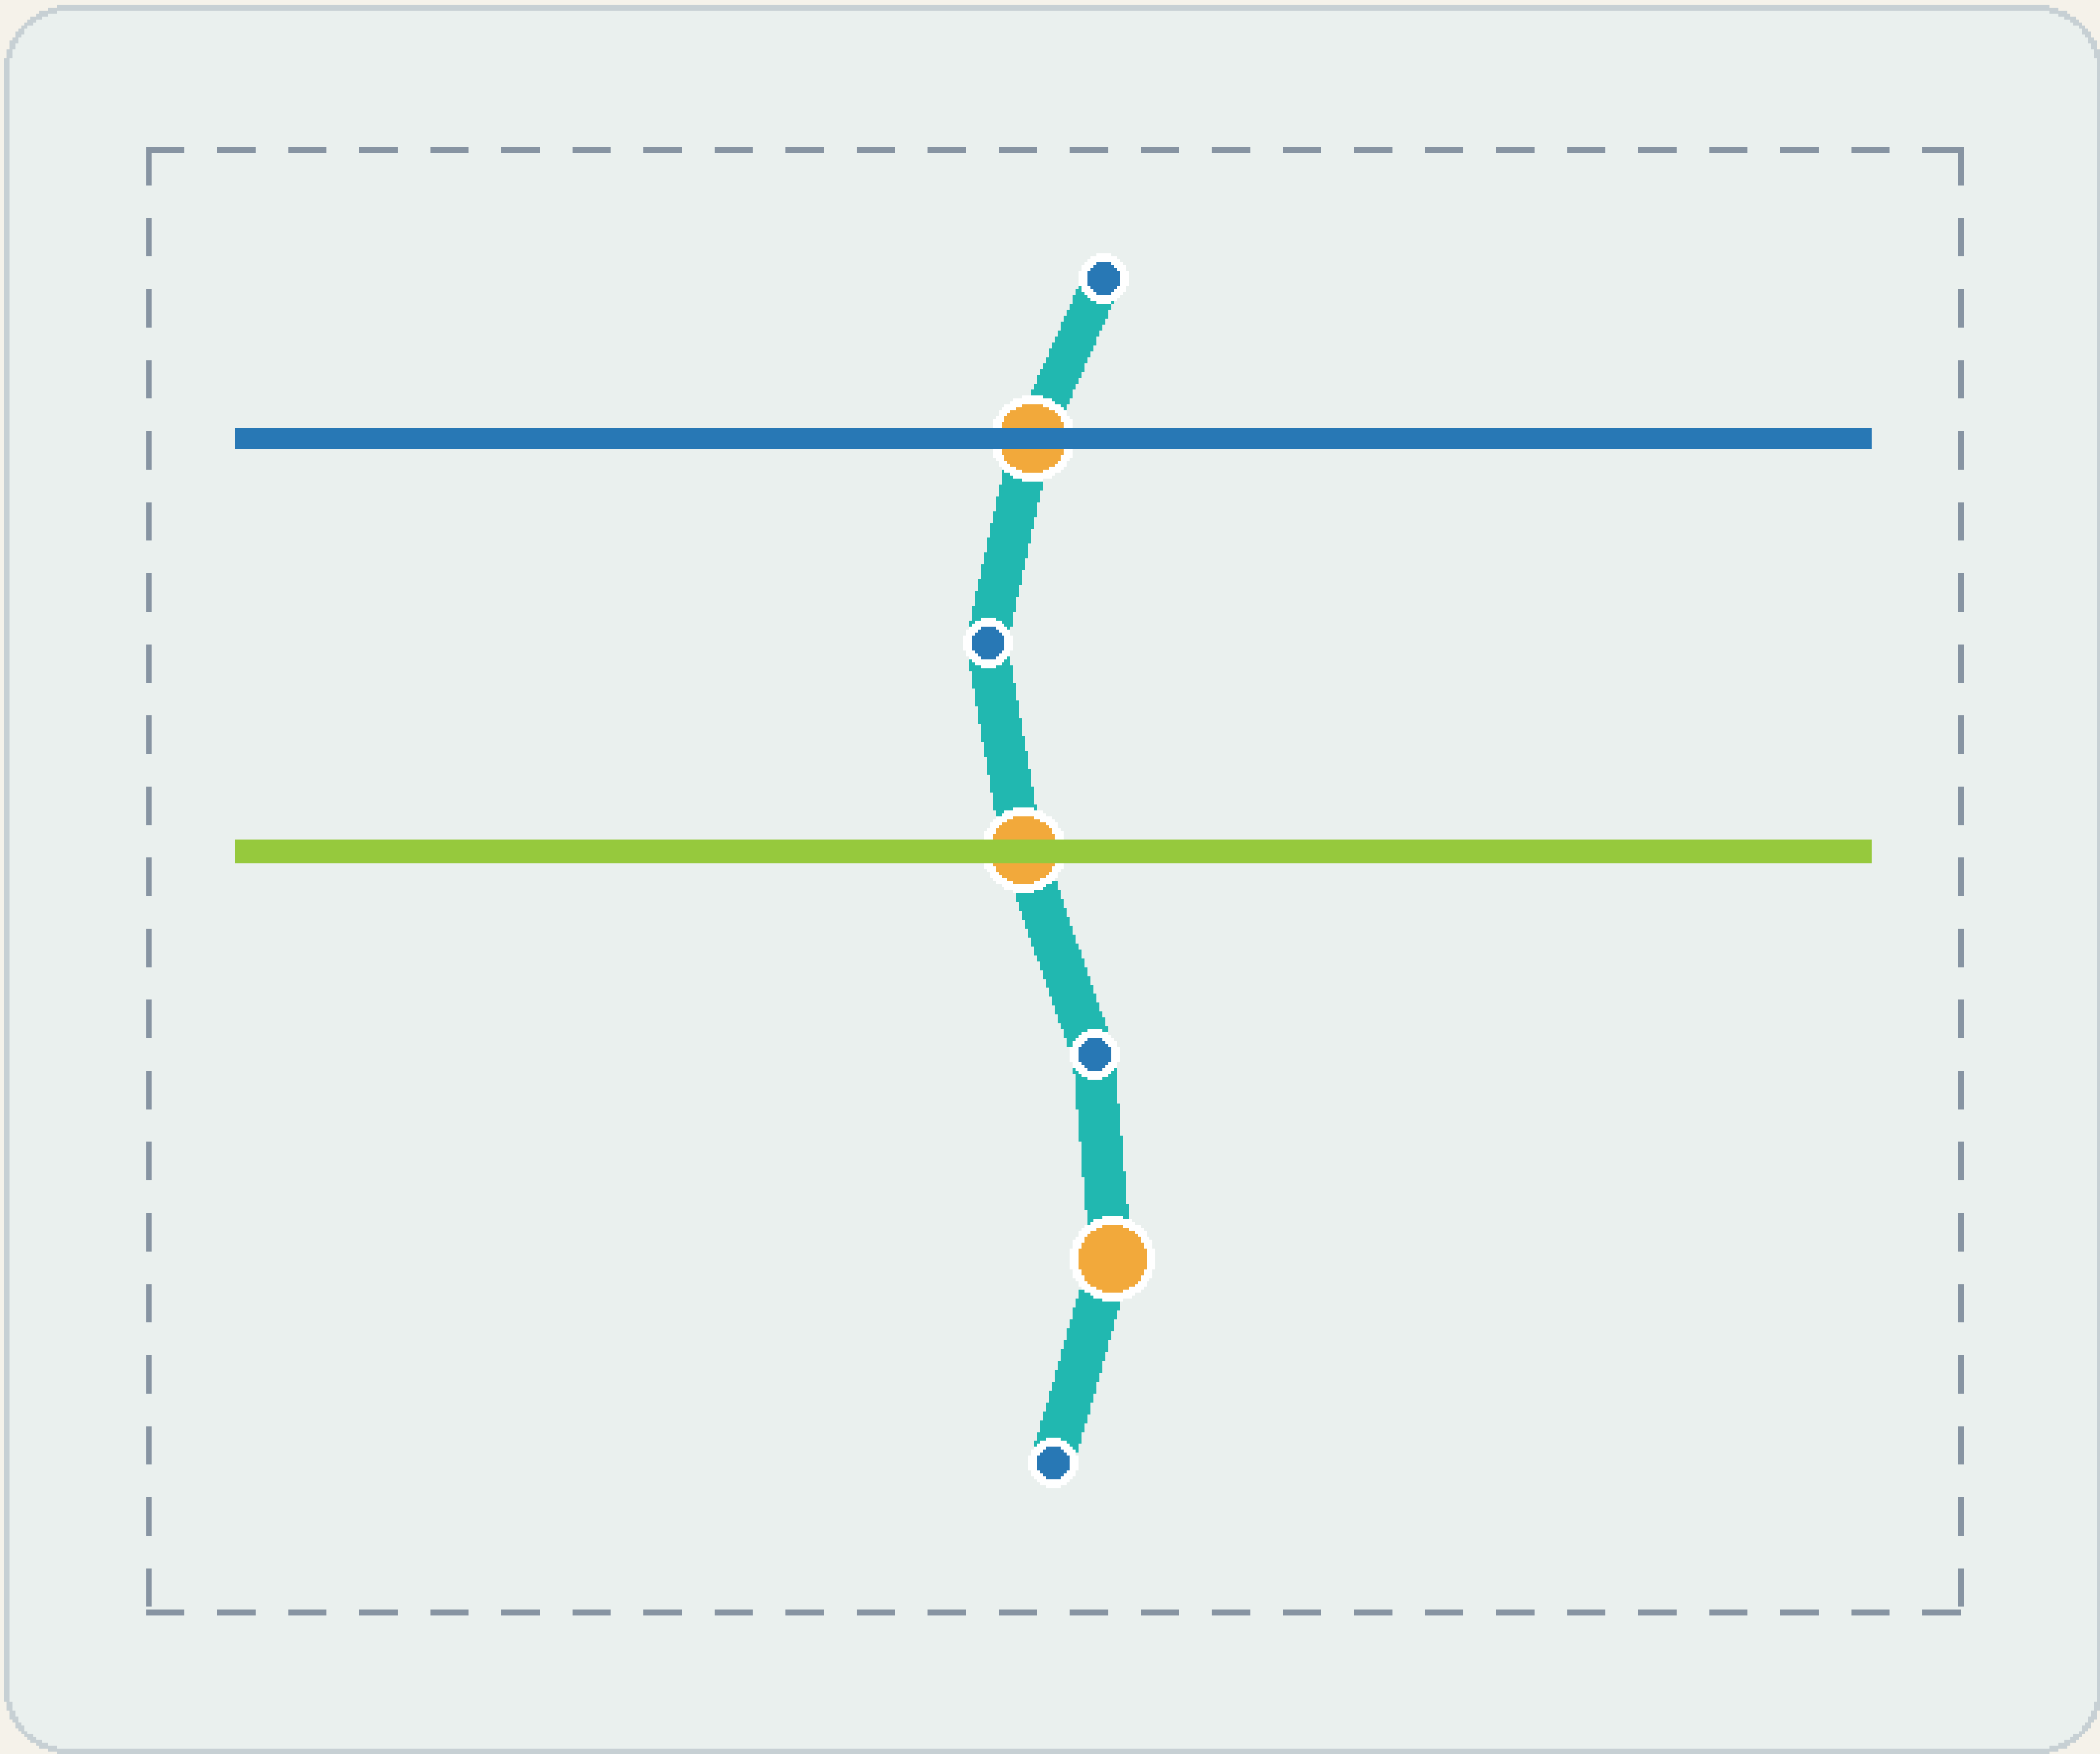

Provisional polygons support generation and intake only; recompute after official data.

* Provisional-boundary calculation; not an official redline or statutory indicator

JZ / CIVIC FAILSAFE

Walking, blue-green and accessibility share one low-tech fallback route

When digital service fails, signs, staff and continuous public space remain usable

* Provisional-boundary calculation; not an official redline or statutory indicator

DESIGN JUDGMENT

An AI city must operate, explain itself, accept human handoff, and exit safely.

SPATIAL MOVE

A heritage-park public spine links three validation commons and twelve scenario nodes.

GOVERNANCE CONTRACT

Non-digital fallback, minimum data, human review, reversible installation, recovery.

EVIDENCE LIMIT

Provisional polygons support generation and intake only; recompute after official data.

Metrics are not promises: every number has a source and failure condition

EPSG:4548 recomputation · low-confidence provisional geometry · statutory controls pending

* Provisional-boundary calculation; not an official redline or statutory indicator

DESIGN JUDGMENT

An AI city must operate, explain itself, accept human handoff, and exit safely.

SPATIAL MOVE

A heritage-park public spine links three validation commons and twelve scenario nodes.

GOVERNANCE CONTRACT

Non-digital fallback, minimum data, human review, reversible installation, recovery.

EVIDENCE LIMIT

Provisional polygons support generation and intake only; recompute after official data.
