

JINGZHANG DIGITAL ARTERY — Concept Booklet (A3)

1. Concept and Three-Level Scope

Re-read the engineering artery of the 1909 self-built railway as a digital artery carrying compute, models, data, talent, and scenarios — the third revitalization.

Coordinated research area ~43.6 km²: three-areas-two-wings synergy with Beijing-Tianjin-Hebei, world-class AI ecosystem, future city form, naming and brand.

Overall design area ~11.4 km²: regulatory-plan-depth urban design — land use, renewal framework, transport/municipal, heritage-park vitality belt, urban character.

Key detailed-design area ~368.4 ha: implementation-scheme-depth design for the three key areas.

Cascade: strategy sets position, overall design sets structure, key areas set implementation.

2. Spatial Structure: One Artery, Three Cores, Two Wings

One digital artery spine: the heritage-park slow/culture belt, ~9 km, running north-south.

Three pumping stations: Zhongzhiyuan compute station (full-stack acceleration), AI Origin Community model station (model ecosystem & talent), Dazhongsi scenario station (AI-native business).

Two wings: Zhongguancun tech-service wing (global factor allocation, IP and capital), Xiaoyuehe scenario wing (scenario empowerment and vibrant city).

Capillaries: community AI service stations and slow branch roads.

Naming at five levels: belt-artery-station-valve-capillary; logo direction: twin rails fading into digital pulses, rust red and electric blue.

3. Three Key Areas (Three Pumping Stations)

Zhongzhiyuan (compute station, 192.9 ha provisional): research core 0802 + talent housing 0701 + education 0804; full-stack autonomous test line; Compute Plaza honor display.

AI Origin Community (model station, 104.3 ha provisional): model ecosystem 0802 center, commercial 05 east, culture 0803 west; open-source release and developer market; 5-minute interaction circle.

Dazhongsi (scenario station, 72.0 ha provisional): commercial 05 main; smart retail and low-speed delivery pilot; Scenario Plaza night vitality.

4. Core Metrics (EPSG:4548)

- Overall area 11,412,825 m²
- Green ratio 18.4% (green 2,099,904 m²)
- Public space ratio 0.33% (5 AI plazas, 37,944 m²)
- Building density 13.2% (footprint 1,511,831 m²)
- Road & slow-mobility network 45,702 m
- Key areas recalculated at 192.9 / 104.3 / 72.0 ha
