

Jingzhang Interlock Belt — AI Innovation Mutual-Locking on a Century-Old Rail

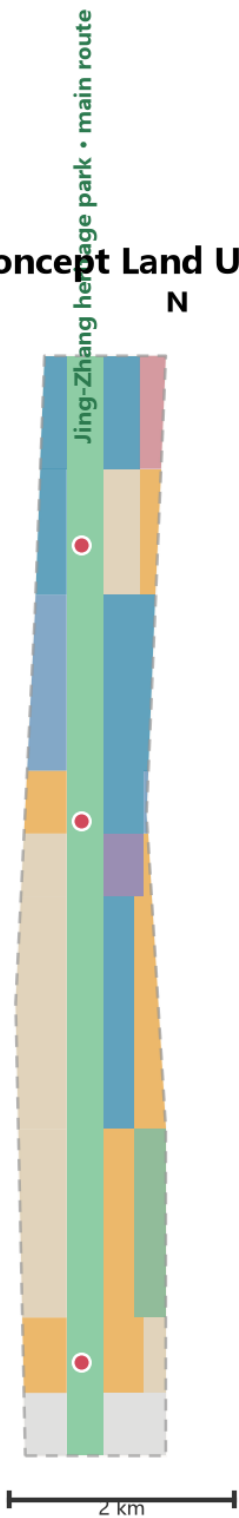

Translating railway interlocking (switch-s

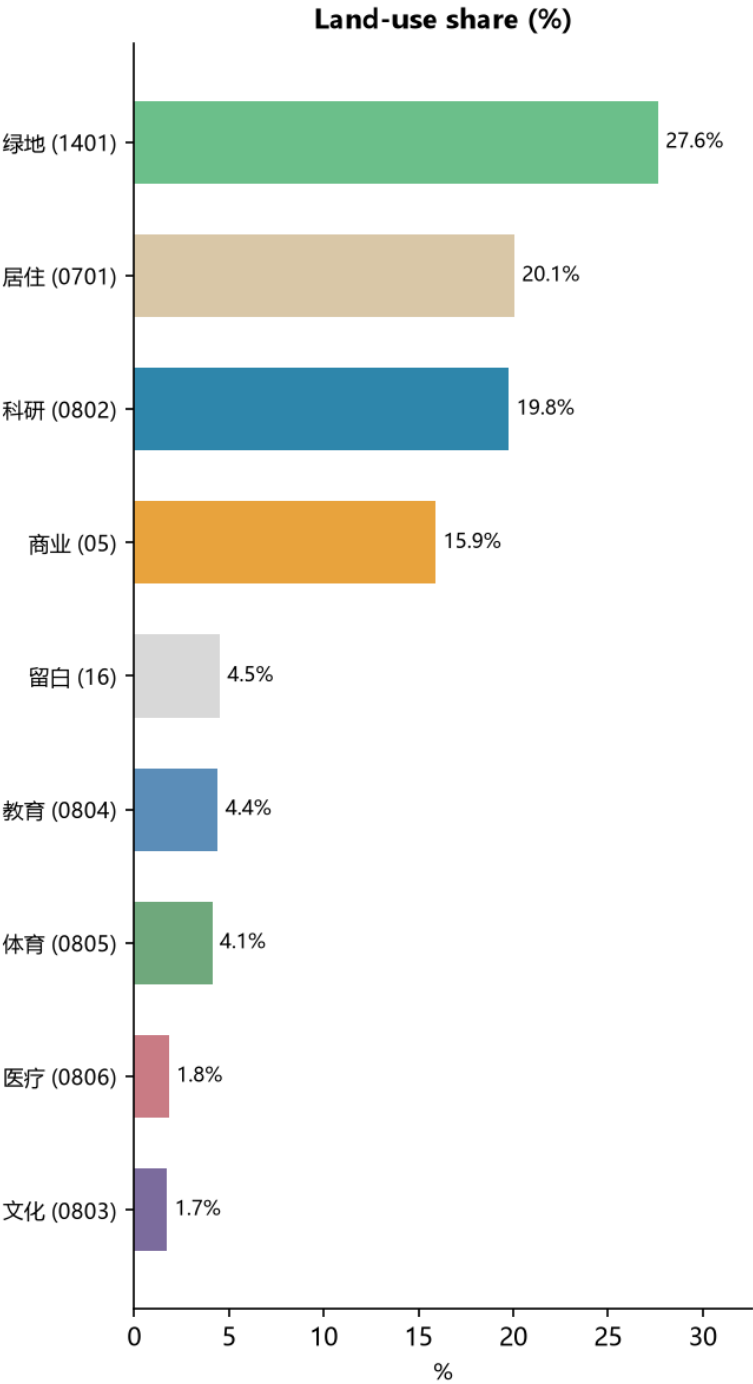

Overview & Three-Level Scope

Coordinated 43.6 km → Overall ~11.4 km → Key areas 368.4 ha (Zhongzhiyuan 192.1 / Origin 104.3 / Dazhongsi 72.0 ha)

Jingzhang Interlock Belt • Concept Land Use (34 parcels, full coverage)

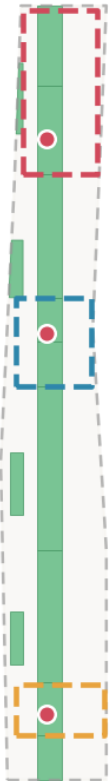

Land-use codes per MNR land-use classification guide (2023) subset; parcels are conceptual, not statutory.

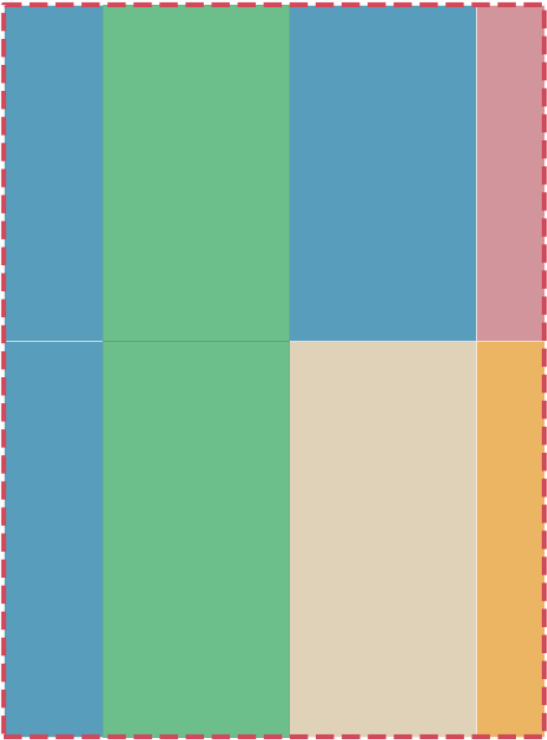

Jingzhang Interlock Belt • Three Switch Key-Area Detailed Design

Switch index

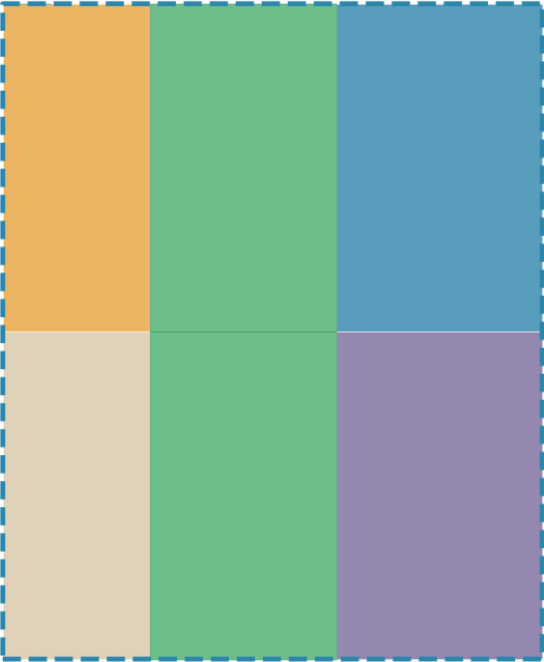

Acceleration Switch • Zhongzhiyuan
about 192.1 ha
W R&D — central route — E pilot

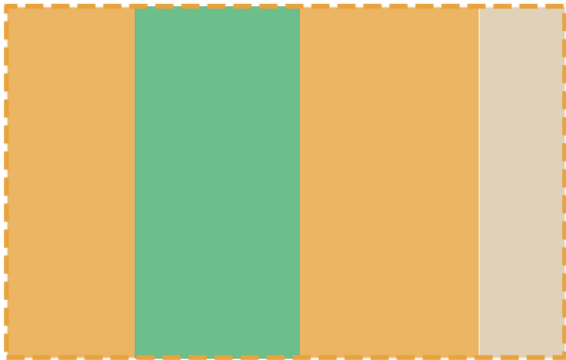

full-stack pilot / computing / AI healthcare / talent community

Origin Switch • AI Origin Community
about 104.3 ha
trace — incubate — community

Qinghuayuan Origin plaza / incubators / memorial / retained community

Landing Switch • Dazhongsi
about 72.0 ha
consumption — business — community

smart-consumption core / business belt / landing plaza

Switch plazas • public-space nodes

- Acceleration plaza
- Origin plaza (Qinghuayuan)
- Landing plaza

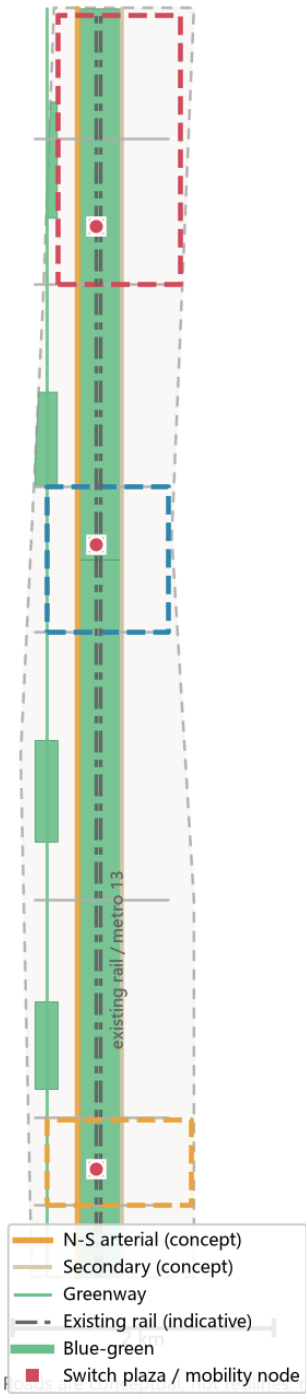

AI pilgrimage landmarks (≥3)

- Origin Signal Tower
- Renzi Switch Plaza
- Landing Bell

Acceleration switch = full-stack pilot & AI healthcare; Origin switch = Qinghuayuan trace & incubation; Landing switch = smart consumption & business. Key-area polygons are provisional.

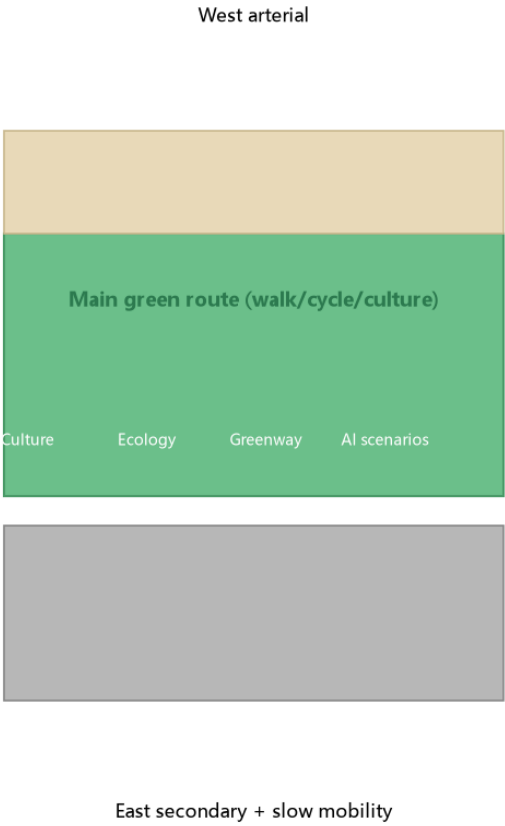

Jingzhang Interlock Belt • Mobility & Blue-Green Composite System

N

ail alignments are public-knowledge indicators, not engineering alignments.

Main-route green belt section (concept)

Core metrics (recomputed in EPSG:4548)

31.4%	Green ratio	formula	geometry/green_space.geojson
31.9%	Research land share	formula	geometry/land_use.geojson
1.9%	Public-space ratio	formula	geometry/public_space.geojson
5.6%	Footprint ratio (indicative)	formula	geometry/buildings.geojson
4.5%	Reserve land	formula	geometry/land_use.geojson
9.7 km	Main-route length	formula	geometry/green_space.geojson

All metrics are recomputable from geometry/*.geojson in EPSG:4548; provisional boundary — recalculate when official polygons arrive.

Evidence chain • task

agent.1	Naming/Logo/3+2 structure	-> compl.
agent.2	8 ecosystem cases	-> compl.
agent.3	12 scenario cards (4 test)	-> compl.
agent.4	3 pilgrimage landmarks	-> compl.
agent.5	Interlock culture narrative	-> compl.
agent.6	Interlock Day/marathon/community	-> compl.

agent. 1	Naming/Logo/3+2	Interlock Belt; renzi-fork+interface logo; 3 positionings, 5 functions
agent. 2	AI ecosystem	8 global cases → mechanisms; piloting/incubation/capital
agent. 3	AI+ scenarios	12 scenario cards (4 test); 6 personas
agent. 4	Landmarks	Origin Signal Tower / Renzi Plaza / Landing Bell; honor system
agent. 5	Culture	Renzi line→Zhongguancun→AI Origin; rail/switch/bell wayfinding
agent. 6	Operation	Interlock Day/Open-source marathon/Switch Forum/Dev community
