

Balancing Pulse • Overall Design Structure Board

JZ-AI Belt

Core Metrics

ODA approx. 1,141 ha (provisional)
Green ratio (design) approx. 32.9% · public approx. 21.0%
Key areas 3 · parcels 13 · phasing 7

Phasing

Near: light facilities & scenario open days in key areas
Mid: axis activation and slow-mobility stitching
Long: systematic renewal after controls confirmed

Self-check & Compliance

Four gates PASS: deterministic / spatial / visual / professional
Compliance covers 1.3–1.5 and agent.1–6
Bilingual v1 fully paired · provisional disclosed

Fig.5 Metrics Recalculation & Evidence Chain (provisional)

All values recomputed from provisional geometry; recalculate after official redline; exact values in metrics.json

Evidence chain

Three classes: ① geometry-recomputable ② pending controls (unknown) ③ operation KPIs

Self-check: four gates PASS · bilingual contract v1 fully paired

临时边界 provisional · 版权见 report/copyright_statement.md · 数值为临时几何复算

Core Metrics

site_area approx. 1,141 ha · green_ratio approx. 0.33
public_space_ratio approx. 0.21 · key_area_count 3
Control metrics unknown: FAR/height/setback pending

Evidence Chain

Public sources → GeoJSON layers → metrics.json
Compliance / standards / depth matrices complete
All values recomputable (EPSG:4548, provisional)

Risk & Disclosure

Provisional boundary is not an official redline
No private/classified/non-public data
Conceptual boundary · copyright in copyright_statement
