

Figure 10 illustrates the planning of the 'Three Windows' in the Zhongshan Road Urban Design. The diagram shows a vertical cross-section of the urban design with three main windows: 'Zongyuan · Liantian Window' (top, orange border), 'Aiyuan Community · Commons Window' (middle, blue border), and 'Dazhong Temple · Service Window' (bottom, red border). A central green hatched area represents the 'Skyline Slowly Green Belt' (9.5km). The legend identifies land use types: orange for commercial service land, purple for residential land, blue for science/AI research land, red for cultural land, green for education land, and green hatched for park green space. A dashed line indicates the overall design range (temporary boundary).
