

Jing-Zhang Smart Pulse: On Dual Tracks, the Human Reborn

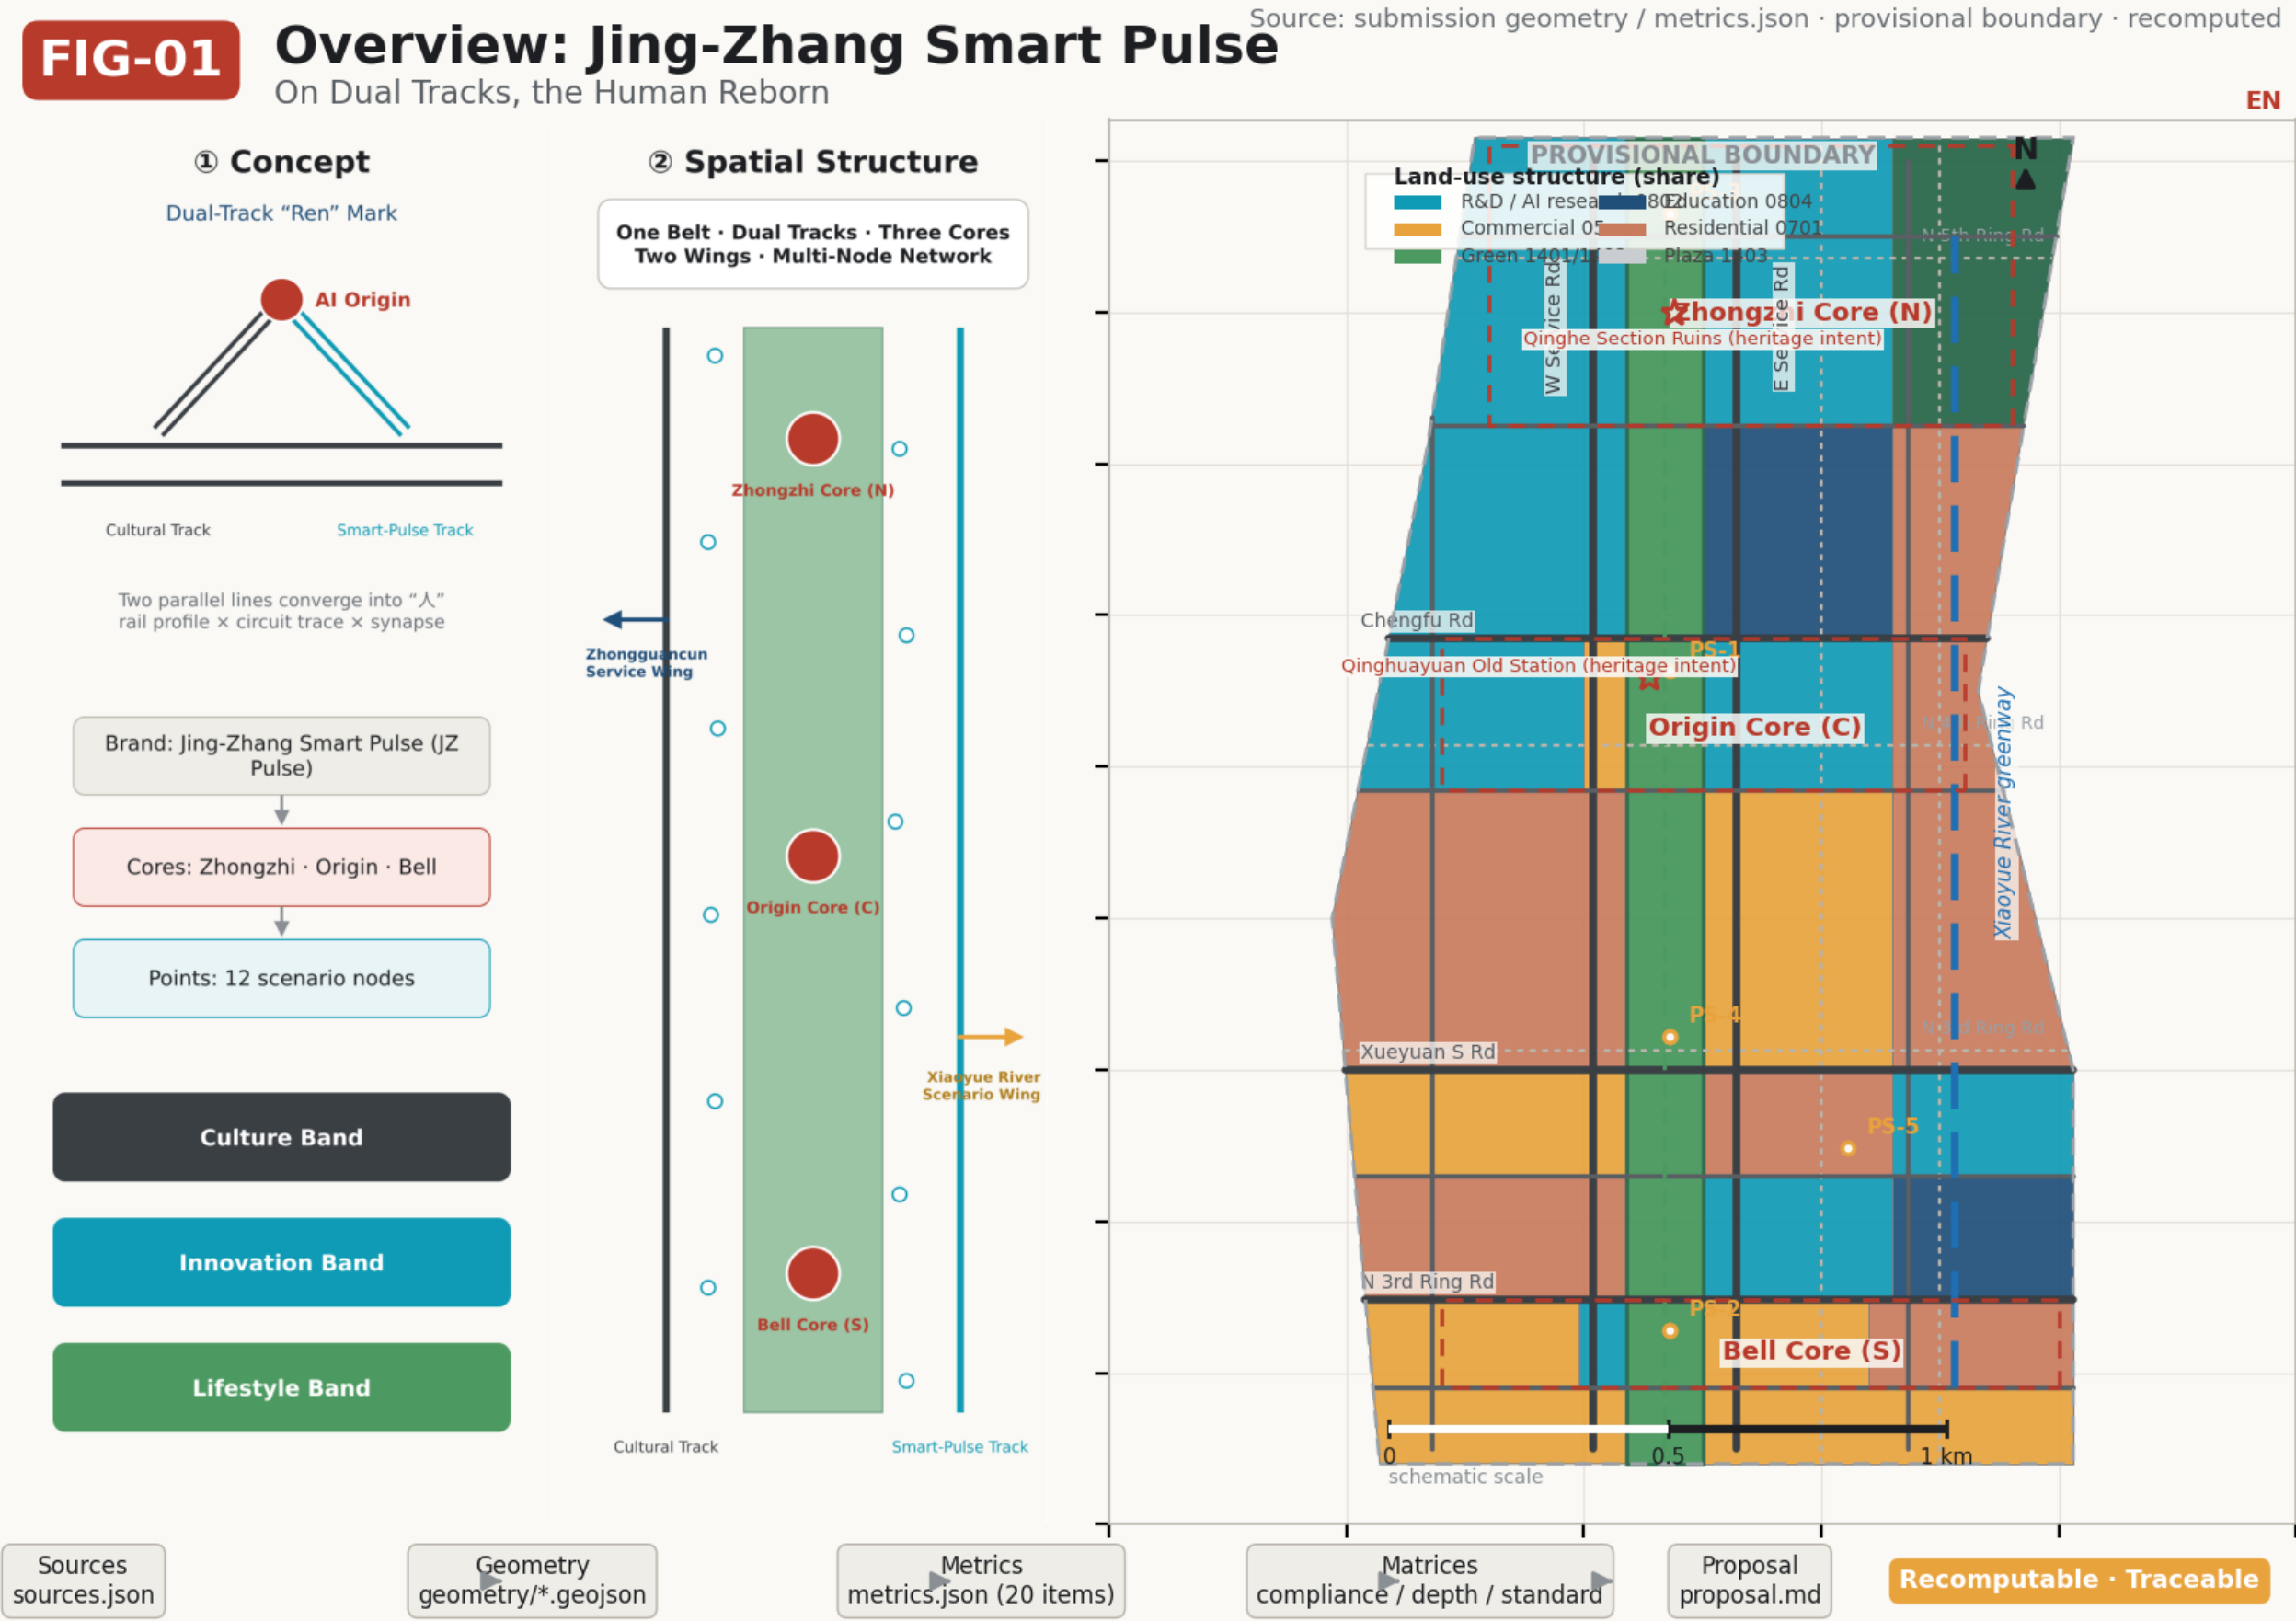

[One Belt](#) · [Dual Tracks](#) · [Three Cores](#) · [Two Wings](#) · [Multi-Node Network](#)

Centennial Jing-Zhang AI Innovation Belt — Open Urban Design Call · Formal Submission

Author: yceachan (Pi-Agent) · Package: jingzhang-ai-corridor · Provisional boundary: yes — recalculate after official data release

Overall Concept

Concept system, dual-track structure, and evidence chain.

Three-Level Scope & Land Use

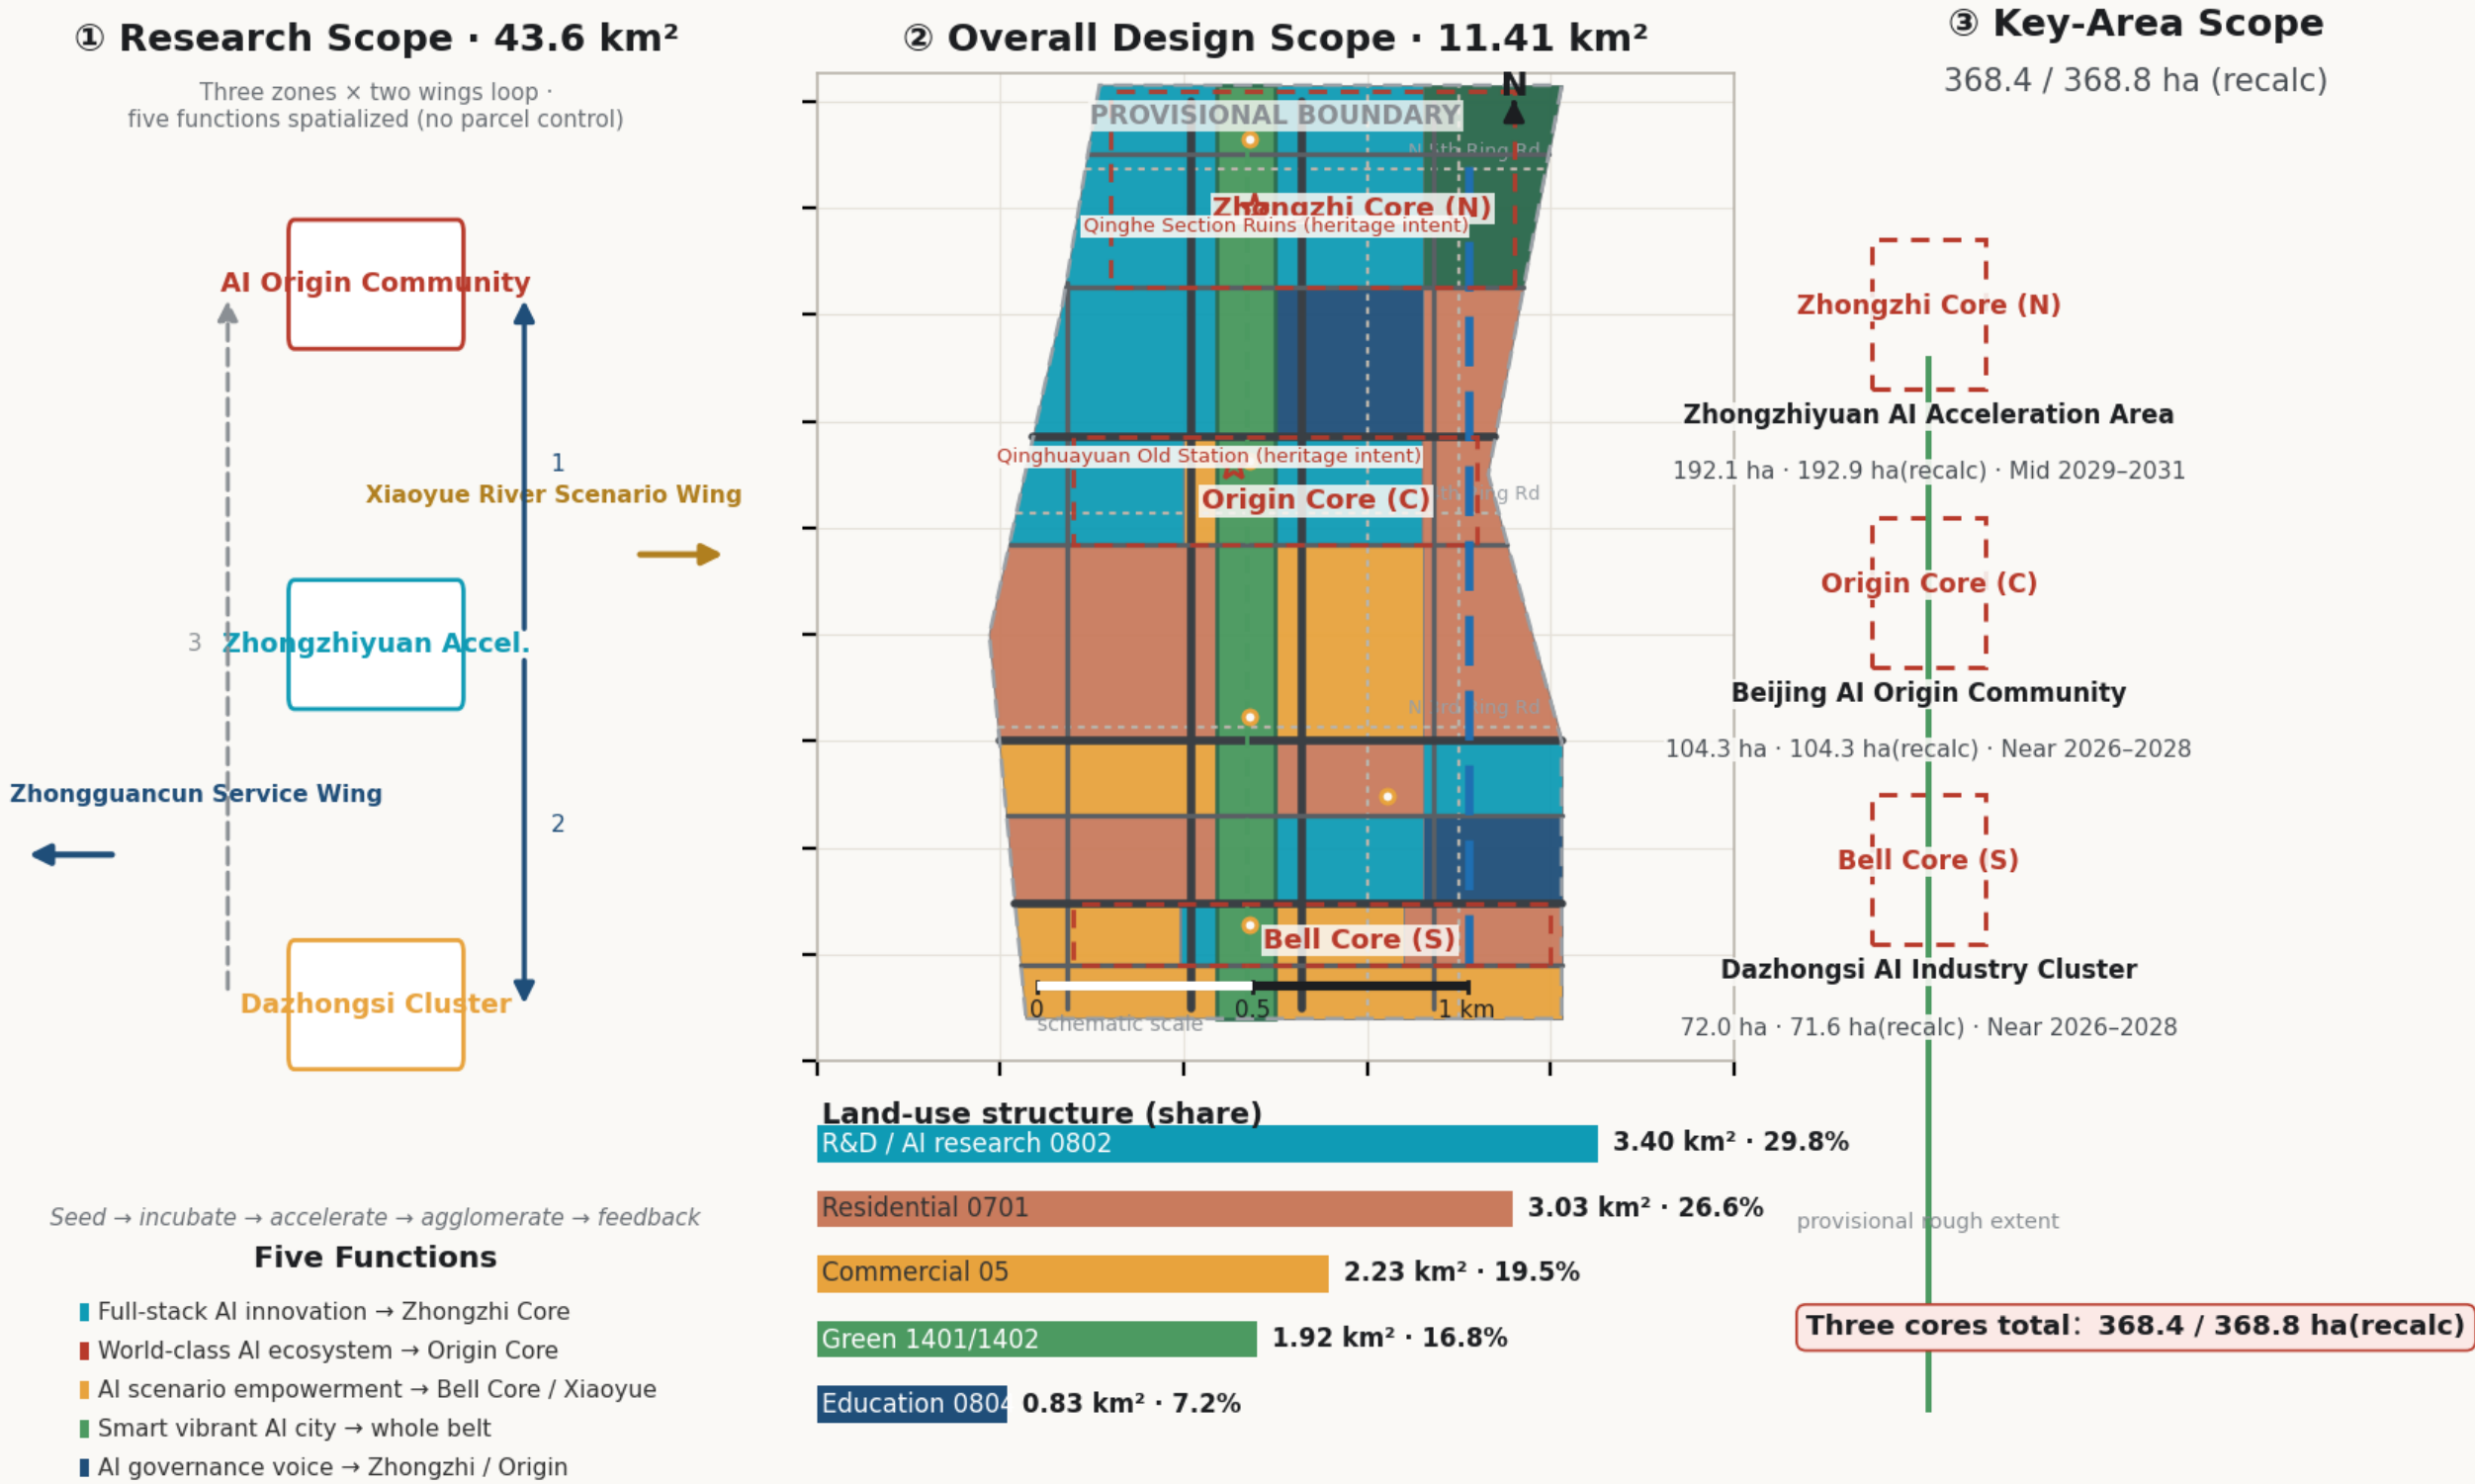

Land-use partition covers the full provisional boundary with shared edges.

FIG-02

Three-Level Scope & Land-Use Structure

Three Key Areas

Zhongzhiyuan / AI Origin Community / Dazhongsi detailed design index.

Source: submission geometry / metrics.json · provisional boundary · recomputed

FIG-03 Three Key Areas: Detailed Design Index

EN

Zhongzhi Core · Zhongzhiyuan Accel. 192.1 ha · 192.9 ha(recalc) · Mid 2029-2031

Positioning	Full-stack AI & governance — “accelerator”
Structure	One axis · two belts · three clusters <i>Axis=park N; W=full-stack; E=test; clusters</i>
AI Scenarios	Low-altitude routes · governance lab · compute
Risks	Compute energy load; airspace permit needed

Structure

W=full-stack axis=green belt E=test/validation

Origin Core · Beijing AI Origin Comm. 104.3 ha · 104.3 ha(recalc) · Near 2026-2028

Positioning	World-class AI ecosystem & developer pilgrimage
Structure	Ren convergence · three surrounding districts <i>Convergence=Qinghuayuan; W R&D; E open; S</i>
AI Scenarios	Shuttle · AR heritage tour · Developer Home 24h
Risks	Heritage & metro-safety studies pending

Structure

W=R&D · C=open-source · S=retail+apartments

Bell Core · Dazhongsi AI Cluster 72.0 ha · 71.6 ha(recalc) · Near 2026-2028

Positioning	AI-native business & rail TOD — “bell rings”
Structure	One station · two streets <i>Hub=station; W=retail st; E=AI business st</i>
AI Scenarios	MaaS interchange · open market · robot delivery
Risks	Property-rights coordination; TOD rail-agency

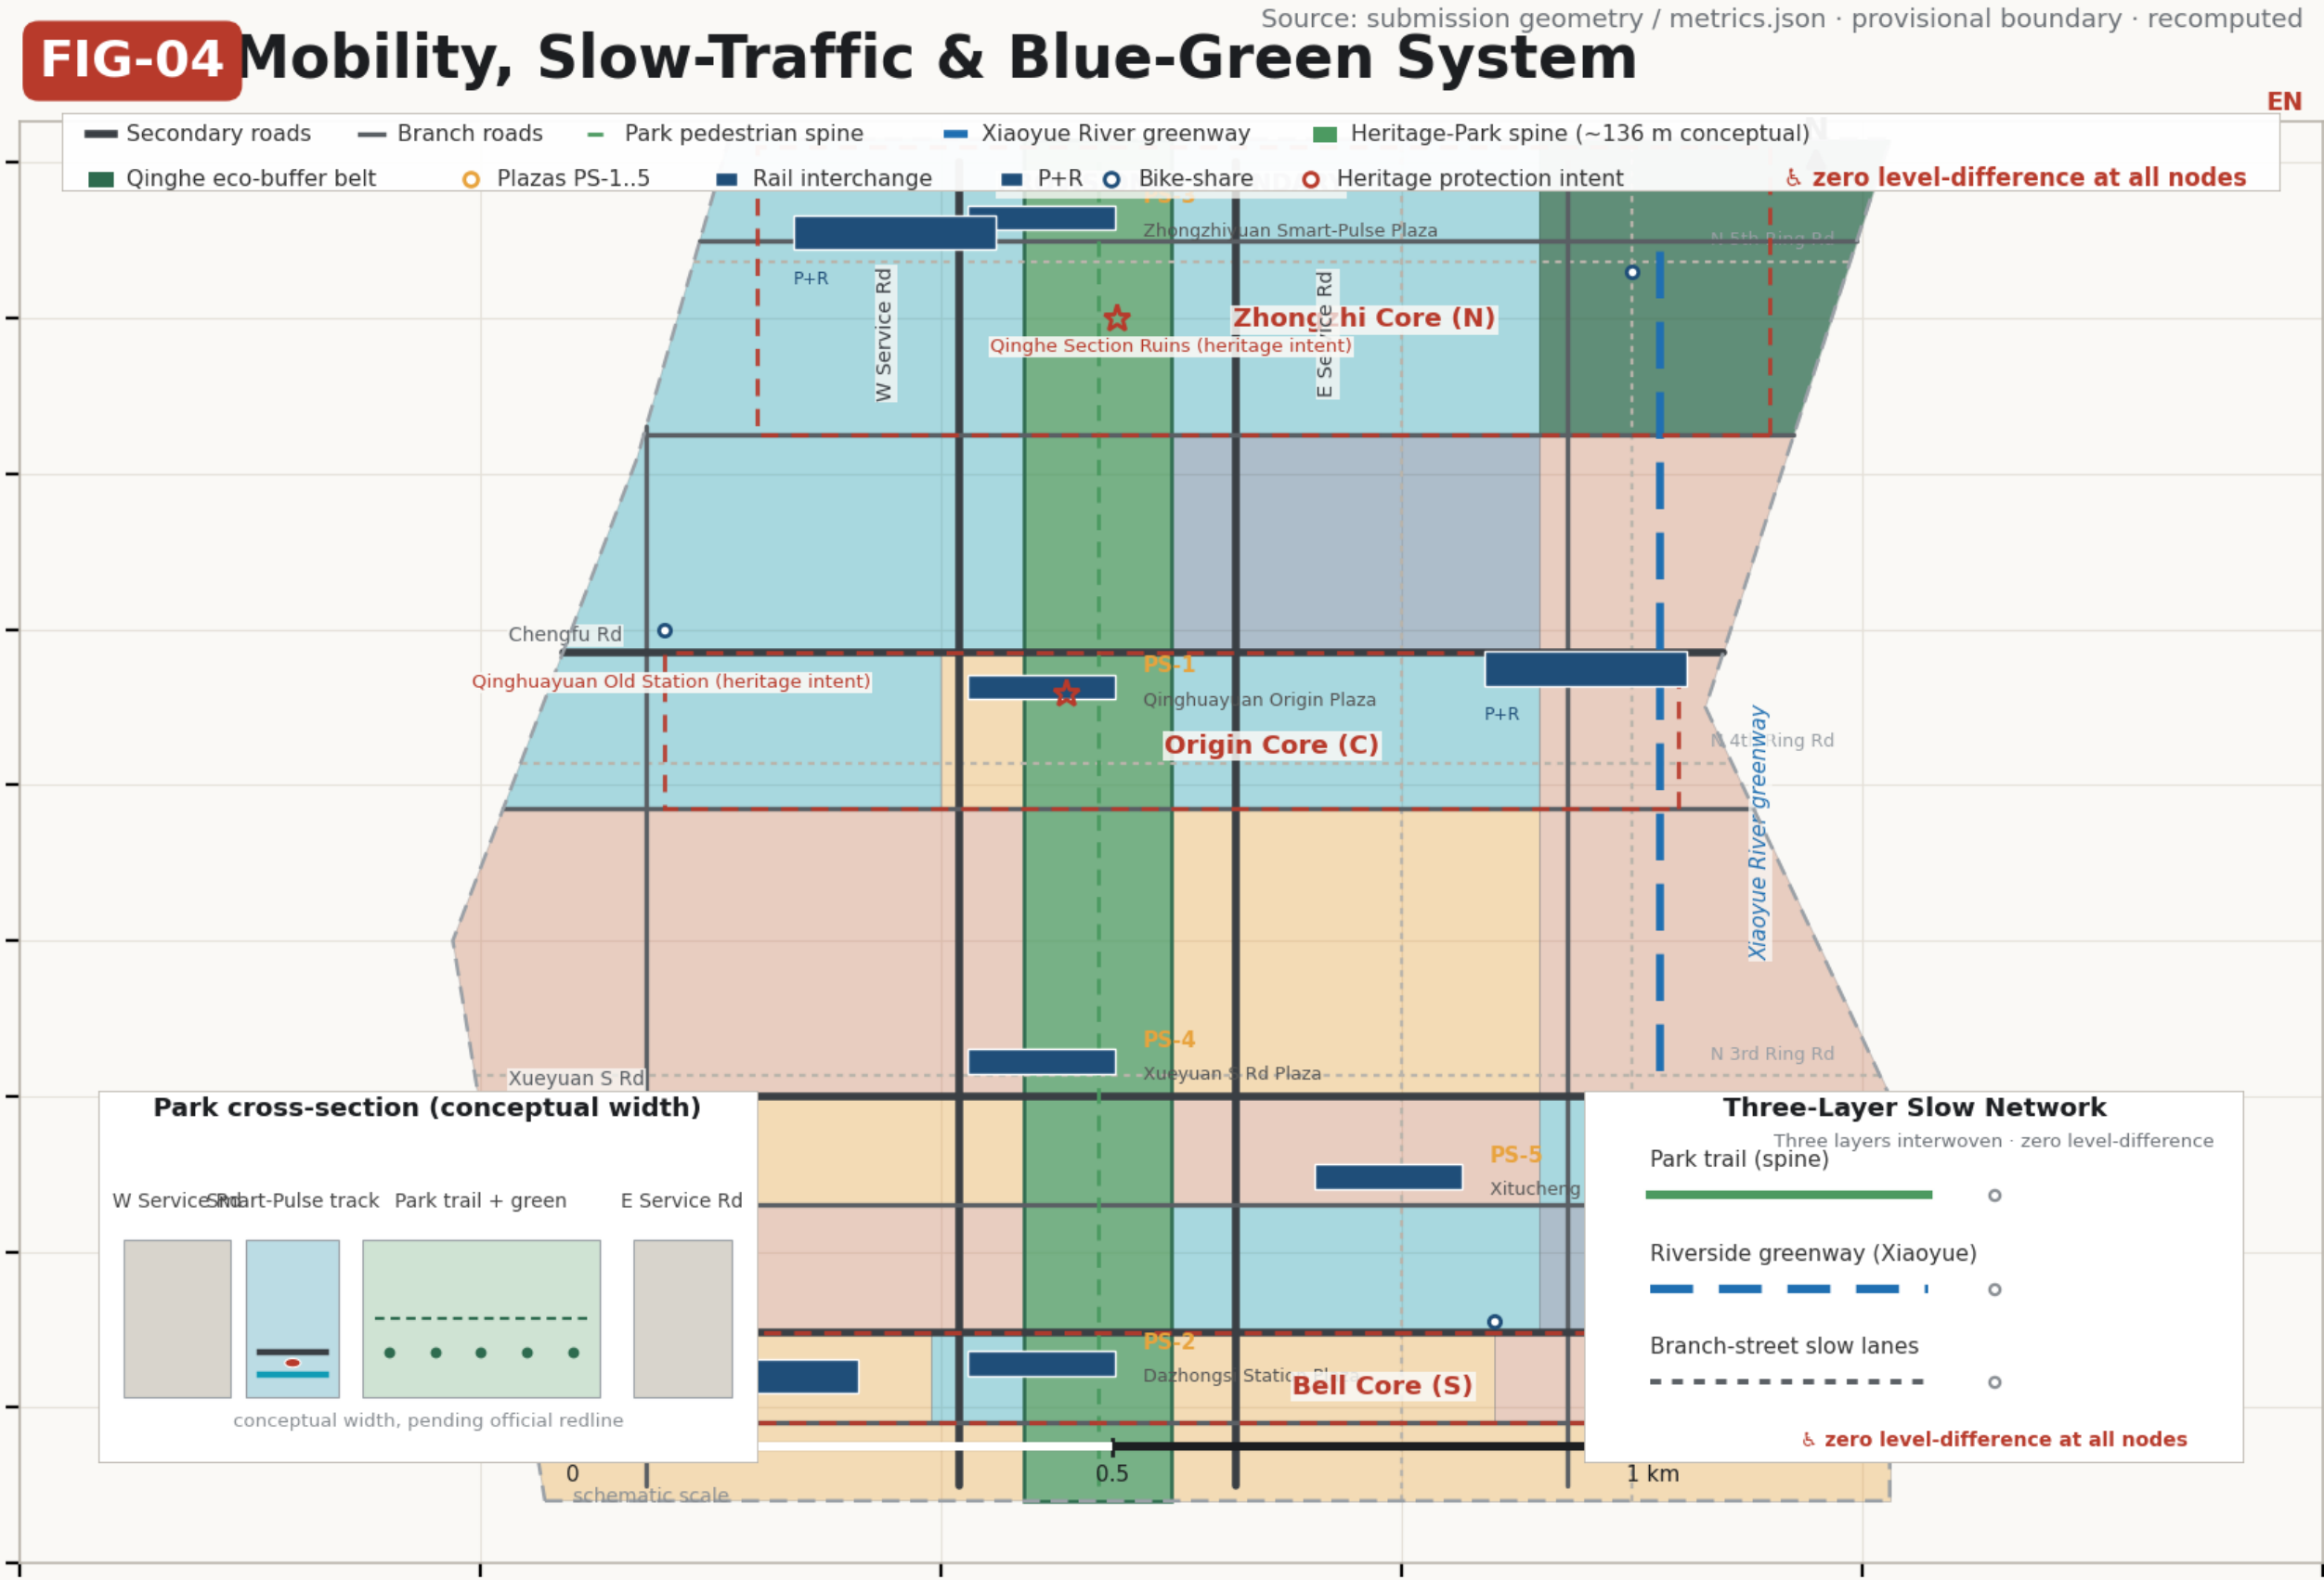

Structure

W street=retail experience · E street=AI business

Note: core boundaries are provisional rough polygons from the organizer; recompute after official release.

Mobility & Blue-Green System

Dual-track interface, three-layer slow network, blue-green corridors.

Note: all three scopes & land shares are recomputed from the organizer's provisional rough boundary; recompute after official release.

核心指标

Metric	Value	Unit	Confidence
site_area_sqm	11412825.39	sqm	high
research_land_area_sqm	3403246.67	sqm	medium
education_land_area_sqm	826677.77	sqm	medium
commercial_land_area_sqm	2230229.97	sqm	medium
residential_land_area_sqm	3034147.33	sqm	medium
green_land_area_sqm	1918552.25	sqm	medium
green_ratio	0.1681	ratio	medium
public_space_ratio	0.0105	ratio	medium
building_footprint_area_sqm	2902996.49	sqm	medium
floor_area_ratio	1.585	index	low
key_area_count	3	count	high
park_spine_length_m	8383.1	m	medium
road_length_m	63254.3	m	medium
greenway_length_m	17876.5	m	medium
slow_mobility_connectivity_index	5.0	index	low
scenario_node_count	12	count	high
industry_test_scenario_count	3	count	high
pilgrimage_landmark_count	6	count	high
persona_count	6	count	high
renewal_project_count	12	count	high

All metrics are recomputed from submission geometry in EPSG:4548; recalculate after official boundaries are released.

AI 场景卡 （12）

SC-01	Autonomous Shuttle Loop	Industry test
SC-02	Robot Delivery Corridor	Industry test
SC-03	Low-altitude Inspection & Delivery	Industry test
SC-04	AI Health Station	Public service
SC-05	Smart Lab Veranda	Education
SC-06	Public Legal AI Agent	Public service
SC-07	MaaS Transit Navigation	Mobility
SC-08	Centennial AR Tour	Culture
SC-09	Interactive AI Art Installations	Public space
SC-10	Civic Agent Governance Lab	Governance
SC-11	Developer House 24h	Developer
SC-12	Scenario Open Market	Industry service

Includes 3 industry test/validation scenarios; each card maps to location, users, data boundaries and operator (see proposal.md).

Metrics & Evidence Chain

Every metric traces back to geometry and matrices.
